CORPORATE RECORD - RECORD 011

Helioscope Robotics, Inc. - diligence file reference LEGAL_HISTORY-011

1. Administration of State Filings

This file addresses the filing administration record, and in particular the two submissions the state rejected: the 2020 amendment whose signature block omitted the officer's capacity, and the 2023 restatement lodged without its officer certification. Filing Administration Log and the Two Rejected Submissions. What follows is an extract from the corporate records limited to the submission batches, the two rejections, and the corrections that followed. Figures below are drawn from the instruments themselves, and no part of this file was written to describe the round presently being documented.

The first rejection turned on a signature block that did not state the signing officer's capacity, a defect corrected within a day. One document was lodged by facsimile with the original following by courier, a practice the log notes has not been used since. The registered agent lodged two of the batches, and the agent's own confirmation is filed alongside the state receipt.

Where the state's response date differs from the effective time of the instrument, both dates appear so the interval is visible. The registered agent lodged two of the batches, and the agent's own confirmation is filed alongside the state receipt. The second rejection concerned a restated form lodged without the officer certification the state requires with a restatement of that kind.

2. Effectiveness Against Substantive Compliance

Counsel distinguished a curable procedural gap from a substantive failure of authority, since the remedies available differ sharply between them. A refiling was considered and rejected, since refiling would have created a second instrument with a later effective time and disturbed the reconciliation of authorized totals. The reviewer is cautioned that a stamped copy proves lodgement and nothing more, and that the substantive record sits in the consents behind it.

The file records that no stockholder brought a challenge within the period during which one might have been brought, though that is not offered as a legal conclusion. The reviewer is cautioned that a stamped copy proves lodgement and nothing more, and that the substantive record sits in the consents behind it. One instrument became effective before the class vote it required was complete, and the corporation later addressed that gap through a ratification rather than a refiling.

2. Effectiveness Against Substantive Compliance - part 2 of 4

Rows of the 2. Effectiveness Against Substantive Compliance resume here, numbered on from the part immediately preceding, so a reference cited once resolves in only one place. No row is omitted at the join.

Definitions given once for the 2. Effectiveness Against Substantive Compliance are relied on again rather than restated, the compilation basis being identical. Nothing is restated from the earlier part.

3. Charter Lineage and Sequence

Where a restatement consolidated earlier amendments, the superseded instruments stay in the file, because an abandoned proposal and an operative provision look alike once the numbering changes. Where an instrument bears an effective time later than the hour of filing, the delay was requested in the cover letter and that request sits in the batch materials. Nothing was filed out of sequence, yet three instruments were signed well before submission, and the interval between signature and lodgement is recorded for each of them.

No merger or conversion instrument appears, so the entity has remained throughout a corporation organized under the original Delaware certificate. Nothing was filed out of sequence, yet three instruments were signed well before submission, and the interval between signature and lodgement is recorded for each of them. Two restatements were adopted in the same week as a new series designation, and they remain separate instruments here because the state accepted them as separate filings.

4. Tax and Annual Report History

One year's payment was late and carried interest, and the log records the interest separately from the tax rather than folding it into a single figure. The log carries the tax year rather than the filing year in its first column, because the two differ for every entry. A good standing certificate of recent date was obtained for the current diligence process, and it is filed at the front of the administration tab.

One year's report was filed before the directors' slate had been updated, and the following year's report corrected the listing. A good standing certificate of recent date was obtained for the current diligence process, and it is filed at the front of the administration tab. Good standing certificates were obtained at three points, and each certificate is filed with the request that produced it.

5. Records Held and Where They Sit

One tab has a gap covering a single year of registered agent correspondence, which the index records rather than leaving the reader to discover it. The secretary's certificate delivered for this process certifies the minute book as complete subject to the exceptions the index lists. Counsel reviewed whether the minute book contains any instrument inconsistent with the charter as filed, and identified none.

Materials relating to the current financing are held outside the historical tabs and are not indexed here. Counsel reviewed whether the minute book contains any instrument inconsistent with the charter as filed, and identified none. The registered agent has changed once, and the acceptance of the incoming agent is filed with the instrument that recorded the change.

6. Series Terms as Designated

Seniority is expressed by series and, within one series, by tranche, and the designation avoids describing rank through any summary capitalization exhibit. The series terms bind successors and permitted assigns, and the designation makes an assignment of rights ineffective until the assignee has joined the relevant agreement. The designation defines a deemed liquidation event by reference to enumerated transaction forms and then states the notice the corporation owes on each of them.

A closing subsection states that the designation is not a stockholder agreement and that no right in it may be enforced by a person who is not a holder of record. The designation defines a deemed liquidation event by reference to enumerated transaction forms and then states the notice the corporation owes on each of them. Conversion is stated as an optional right at holder election plus an automatic conversion on stated events, and each trigger is defined in its own lettered clause.

7. Consent Record and Thresholds

Two directors recused themselves from the item in which they held an interest, and the minute records the recusal before the vote rather than as a later annotation. A trustee signature was accepted only after the trust certificate had been produced, and the register notes the date the certificate arrived. For one item the corporation solicited a consent from a class whose approval was not in fact required, and the file keeps that solicitation as a belt-and-braces record.

The corporation obtained one approval by unanimous consent of all holders of record, which removed any question about the notice that a partial consent would have required. For one item the corporation solicited a consent from a class whose approval was not in fact required, and the file keeps that solicitation as a belt-and-braces record. An abstention was treated as neither a consent nor an objection, and the numerator excludes it while the denominator continues to count the abstaining holder's shares.

8. Plan Records and Evergreen Mechanics

A later plan introduced an evergreen provision, and the history records each year the evergreen tranche was certified by the board. A quarterly certification of the reserve balance was waived once and delivered on the lapse date, which the history cross-references to the waiver register. Counsel checked that no grant was made in excess of the reserve then available, and the check found no such grant.

The plan's administration provisions were amended to allow delegation to a committee, and the delegation resolution is filed with the plan documents. Counsel checked that no grant was made in excess of the reserve then available, and the check found no such grant. The evergreen was suspended for one year, and the suspension was approved by the same consent that carried a charter amendment.

9. Definitional Framework

A deemed liquidation event is defined by enumerating transaction forms rather than by a general description, which narrows the clause deliberately. Where a term is used only once, the charter defines it inline rather than in the definitions subsection, and the conformance review lists those instances. One term defined in the earliest certificate is no longer used, and the restatement retained it, which the conformance review notes as a harmless remnant.

The construction clause provides that a reference to a statute is to that statute as amended, which affects how the older instruments should be read today. One term defined in the earliest certificate is no longer used, and the restatement retained it, which the conformance review notes as a harmless remnant. The original issue price of each series is fixed as a defined term in the designation, and no later instrument adjusts it except by express amendment.

10. Joinders and Party Administration

Where a party succeeded to another holder's position, the register identifies the predecessor and states whether the predecessor's joinder was superseded or remains on foot. One entity changed its legal name after joining, and the register carries the former and current names against a single entry. A successor trustee joined in place of the original trustee, and the register keeps both entries so the change in capacity is visible.

The corporation has not required a joinder from holders of vested options, and the register explains why on its face. A successor trustee joined in place of the original trustee, and the register keeps both entries so the change in capacity is visible. Two notice addresses on the register are stale, and mail to one of them has been returned, which is recorded as an open administrative item.

11. Stock Certificates, Stubs, and Reissues

Two certificates were cancelled and reissued in part, and the register shows both the cancelled amount and the reissued amount rather than only the net position. One reissued certificate bears a legend that its predecessor did not, because the holder's circumstances changed between the two issuances. The register was reconciled against the transfer agent's own report, and the two agreed on every line except one entry the agent had recorded a day earlier.

The corporation issues certificates only against a completed subscription or grant record, and the register names that record for each issuance. The register was reconciled against the transfer agent's own report, and the two agreed on every line except one entry the agent had recorded a day earlier. Restricted shares carry a legend, and the register distinguishes a legend that remains from one removed on a stated date with a stated certification behind it.

12. Unresolved Points on the Record

One restricted stock election receipt is missing from the file, and the grantee has been asked to produce the mailing evidence. The file distinguishes an open item from a qualification, since a qualification limits a statement while an open item describes work remaining. The corporation's position on the unsigned board consents is that the action was validly taken by the directors who did sign, and the file records that position as a position.

Counsel expects most of the listed items to close before signing, but the file makes no commitment on the reader's behalf. The corporation's position on the unsigned board consents is that the action was validly taken by the directors who did sign, and the file records that position as a position. Two notice addresses are stale, and until they are corrected any notice sent under the agreements to those parties is of doubtful effect.
