MANAGEMENT OPERATING REVIEW - RECORD 001

Helioscope Robotics, Inc. - diligence file reference OPERATING_REVIEWS-001

Monthly Business Review for February 2024: purpose and attendance

Owners who could not attend sent written positions, and those were read into the record verbatim. The next session is set for 2024-04-11. The Monthly Business Review convened for February 2024. Norfolk was still a drawing then. Two functions still shared one planner. One function submitted its pre-read late. Notes were circulated on 2024-03-08. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Guests were limited to the sections that concern them, ending a habit of full attendance for its own sake. Owen Castellanos attended as VP Customer Success. Pre-reads went out ahead of the 2024-03-08 session. Norfolk was still a drawing then. Two functions still shared one planner. The next session is set for 2024-04-11. The Monthly Business Review convened for February 2024. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

The packet was shortened after a complaint that the previous edition buried the decisions behind twenty pages of charts. Pre-reads went out ahead of the 2024-03-08 session. Renata Voss, VP People, presented the operations section. Norfolk was still a drawing then. Two functions still shared one planner. Owen Castellanos attended as VP Customer Success. One function submitted its pre-read late. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

Standing agenda order was changed so that the constrained function presents first while the room is still fresh. One function submitted its pre-read late. Owen Castellanos attended as VP Customer Success. Norfolk was still a drawing then. Two functions still shared one planner. Renata Voss, VP People, presented the operations section. Pre-reads went out ahead of the 2024-03-08 session. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Order book and bookings quality

Commercial intake for the period came in ahead of the internal plan on unit count and behind it on gross margin, which is the trade the team was asked to make. Quillon Home Supply accounted for the largest single order. Signed volume: 46 units, win rate 27 percent. Norfolk was still a drawing then. Two functions still shared one planner. Open pursuits number 74, up from 178. The book took 46 units, against 312 last period. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Discounting concentrated in one competitive displacement rather than spreading across the book, which the review treated as an acceptable outcome. Open pursuits number 74, up from 178. The book took 46 units, against 312 last period. Norfolk was still a drawing then. Two functions still shared one planner. Signed volume: 46 units, win rate 27 percent. Win rate held at 27 percent on 74 live opportunities. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

Late-quarter intake distorted the shape of the funnel again, and the pattern is now visible in three consecutive periods of data. Discount depth peaked on the Pinebank Distribution multi-site award. Signed volume: 46 units, win rate 27 percent. Norfolk was still a drawing then. Two functions still shared one planner. Win rate held at 27 percent on 74 live opportunities. Open pursuits number 74, up from 178. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

A single reseller relationship produced more qualified volume than the whole outbound programme, which raises an uncomfortable question about channel mix. Discount depth peaked on the Pinebank Distribution multi-site award. Win rate held at 27 percent on 74 live opportunities. Norfolk was still a drawing then. Two functions still shared one planner. The book took 46 units, against 312 last period. Intake closed at 46 units for February 2024. Crew Gulf closed Cedar

Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Pricing exceptions ran above the standing threshold this period, mostly on multi-site commitments where the customer wanted a single unit price. Discount depth peaked on the Pinebank Distribution multi-site award. Signed volume: 46 units, win rate 27 percent. Norfolk was still a drawing then. Two functions still shared one planner. Quillon Home Supply accounted for the largest single order. The book took 46 units, against 312 last period. Scrap 18 thousand, Tessellate Controls contributing. Days outstanding 52, Quillon Home Supply the largest balance. Headcount 112 of 118, Renata Voss reporting. Build plan 40, actual 38, Lidar assemblies short.

Field feedback contradicted the commercial narrative on one account, and the review chose to believe the field. The book took 46 units, against 312 last period. Open pursuits number 74, up from 178. Norfolk was still a drawing then. Two functions still shared one planner. Quillon Home Supply accounted for the largest single order. Win rate held at 27 percent on 74 live opportunities. Bookings 46 units across 74 pursuits. Yield 94 percent, scrap 18 thousand in Final assembly. Capital spend 410 thousand this period. Burn 2380 thousand, runway 26 months.

Bookings by region, February 2024

Region	Units booked	Prior period units	Win rate %	Deals slipped	Regional commentary
West - new logos	4	32	21	4	in line with plan
Southwest - new logos	1	29	24	5	single seller territory
Great Lakes - new logos	1	22	26	0	reseller led the quarter
Southeast - new logos	6	16	22	1	coverage gap showing
Northeast - new logos	4	12	25	2	coverage gap showing
Ontario - new logos	3	7	23	3	best conversion in the book
Channel and reseller - new logos	2	42	21	4	best conversion in the book
West - expansion	2	20	30	5	best conversion in the book
Southwest - expansion	1	18	32	0	single seller territory
Great Lakes - expansion	1	14	28	1	one award slipped a week
Southeast - expansion	3	10	29	2	missed on one account
Northeast - expansion	2	7	31	3	single seller territory
Ontario - expansion	2	4	33	4	reseller led the quarter
Channel and reseller - expansion	1	26	30	5	no new logos this period
West - renewal attach	1	9	24	0	reseller led the quarter
Southwest - renewal attach	1	8	26	1	one award slipped a week
Great Lakes - renewal attach	1	6	22	2	missed on one account
Southeast - renewal attach	1	4	25	3	reseller led the quarter
Northeast - renewal attach	1	3	23	4	ahead on expansions
Ontario - renewal attach	1	2	21	5	in line with plan
Channel and reseller - renewal attach	1	12	24	0	ahead on expansions

Conversion and forecast discipline

Deal inspection surfaced a habit of re-dating rather than re-qualifying, and the review asked for a hard rule on how many times a close date can move. Renata Voss owns the re-qualification pass. Deals leaving the period: 4, most still dated. Norfolk was still a drawing then. Two functions still shared one planner. The Tenmile Freight pursuit re-dated

again. Slippage totalled 4 opportunities against 14 before. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Qualification notes on the top ten pursuits were read aloud, which took most of the meeting and was the most useful thing in it. Slippage totalled 4 opportunities against 14 before. The Tenmile Freight pursuit re-dated again. Norfolk was still a drawing then. Two functions still shared one planner. Two losses went to the same competitor. Weighted coverage sits near 74 open pursuits. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

Multi-year commitments are becoming the norm in this segment, which stabilises the site queue and complicates the revenue phasing. Renata Voss owns the re-qualification pass. Two losses went to the same competitor. Norfolk was still a drawing then. Two functions still shared one planner. The Tenmile Freight pursuit re-dated again. Weighted coverage sits near 74 open pursuits. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

Late-stage legal review has become a recurring source of slip, and the general counsel asked for the pattern rather than the anecdotes. Conversion into commercial close remains the weak stage. Two losses went to the same competitor. Norfolk was still a drawing then. Two functions still shared one planner. Slippage totalled 4 opportunities against 14 before. Deals leaving the period: 4, most still dated. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Slippage this period was not random: the deals that moved had a common feature, which is that the customer had no internal project owner. Weighted coverage sits near 74 open pursuits. Two losses went to the same competitor. Norfolk was still a drawing then. Two functions still shared one planner. Conversion into commercial close remains the weak stage. Deals leaving the period: 4, most still dated. Scrap 18 thousand, Tessellate Controls contributing. Days outstanding 52, Quillon Home Supply the largest balance. Headcount 112 of 118, Renata Voss reporting. Build plan 40, actual 38, Lidar assemblies short.

The largest pursuit in the book carries a dependency on the customer finishing a racking project that has already been delayed twice. Deals leaving the period: 4, most still dated. Conversion into commercial close remains the weak stage. Norfolk was still a drawing then. Two functions still shared one planner. Two losses went to the same competitor. Slippage totalled 4 opportunities against 14 before. Bookings 46 units across 74 pursuits. Yield 94 percent, scrap 18 thousand in Final assembly. Capital spend 410 thousand this period. Burn 2380 thousand, runway 26 months.

Top pursuits under inspection, February 2024

Pursuit reference	Account	Stage	Units in scope	Current close date	Movement since last review
PUR-1207	Havering Logistics	Technical validation	4	2024-04-03	second re-date
PUR-1210	Quillon Home Supply	Legal review	10	2024-04-16	second re-date
PUR-1213	Tenmile Freight	Re-qualifying	4	2024-04-29	no change since last review
PUR-1216	Bexley Pharmaceutical Wholesale	Pilot running	14	2024-05-12	moved four weeks

PUR-1264	Bexley Pharmaceutical Wholesale - follow-on scope	Pilot running	38	2024-12-06	no change since last review

Deployment operations

Customer-side readiness remains the single largest determinant of go-live date, and it is the variable the company controls least. Owen Castellanos sequenced the queue by readiness. Contract to go-live averaged 62 days. Norfolk was still a drawing then. Two functions still shared one planner. Queue depth reached 7 sites. Kennesaw and Mesquite both cleared acceptance testing. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Parallel deployment at two sites in the same region worked for the first time, which changes what the queue can absorb. Owen Castellanos sequenced the queue by readiness. Queue depth reached 7 sites. Norfolk was still a drawing then. Two functions still shared one planner. Go-live cycle: 62 days, from 37. Kennesaw and Mesquite both cleared acceptance testing. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

The queue holds three sites with no confirmed dock date from the customer, and the review declined to schedule crews against hope. Queue depth reached 7 sites. Norfolk was held at the readiness gate. Norfolk was still a drawing then. Two functions still shared one planner. Contract to go-live averaged 62 days. Owen Castellanos sequenced the queue by readiness. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

Days from contract to go-live improved, but the improvement came from the front of the process rather than from anything the installation crews changed. Contract to go-live averaged 62 days. The queue carries 7 sites, 37 a period ago. Norfolk was still a drawing then. Two functions still shared one planner. Kennesaw and Mesquite both cleared acceptance testing. Queue depth reached 7 sites. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

The deployment playbook was rewritten mid-period after a crew found that the network prerequisites section was three revisions out of date. Owen Castellanos sequenced the queue by readiness. Contract to go-live averaged 62 days. Norfolk was still a drawing then. Two functions still shared one planner. Go-live cycle: 62 days, from 37. The queue carries 7 sites, 37 a period ago. Scrap 18 thousand, Tessellate Controls contributing. Days outstanding 52, Quillon Home Supply the largest balance. Headcount 112 of 118, Renata Voss reporting. Build plan 40, actual 38, Lidar assemblies short.

Crew travel days per site came down, largely because two regional hubs now hold enough tooling to avoid shipping kit ahead of each job. The queue carries 7 sites, 37 a period ago. Queue depth reached 7 sites. Norfolk was still a drawing then. Two functions still shared one planner. Contract to go-live averaged 62 days. Norfolk was held at the readiness gate. Bookings 46 units across 74 pursuits. Yield 94 percent, scrap 18 thousand in Final assembly. Capital spend 410 thousand this period. Burn 2380 thousand, runway 26 months.

Crew loading and certification

Utilisation above ninety percent leaves nothing for the unplanned second visit, and the second visit happens on roughly one site in four. Travel days per site fell again. Installer utilisation ran at 84 percent. Norfolk was still a drawing then. Two functions still shared one planner. Cedar Bluff needed a second crew visit. Emil Farkas covered two regions this period. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Handover from crew to service is still informal, and two accounts have complained about who to call after go-live. Certified crew count trails the site queue of 7. Crew leads remain the gating resource. Norfolk was still a drawing then. Two functions still shared one planner. Emil Farkas covered two regions this period. Installer utilisation ran at 84 percent. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

Contractor coverage buys schedule protection at a cost per site that the review agreed to carry for a bounded number of jobs. Installer utilisation ran at 84 percent. Crew leads remain the gating resource. Norfolk was still a drawing then. Two functions still shared one planner. Utilisation was 84 percent against 85 percent. Travel days per site fell again. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

Regional crew hubs changed the utilisation picture more than any hiring decision made in the same period. Cedar Bluff needed a second crew visit. Installer utilisation ran at 84 percent. Norfolk was still a drawing then. Two functions still shared one planner. Utilisation was 84 percent against 85 percent. Emil Farkas covered two regions this period. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Weekend and holiday work is filling gaps that the capacity model does not show, which makes the model look better than reality. Cedar Bluff needed a second crew visit. Travel days per site fell again. Norfolk was still a drawing then. Two functions still shared one planner. Emil Farkas covered two regions this period. Installer utilisation ran at 84 percent. Scrap 18 thousand, Tessellate Controls contributing. Days outstanding 52, Quillon Home Supply the largest balance. Headcount 112 of 118, Renata Voss reporting. Build plan 40, actual 38, Lidar assemblies short.

Crew composition changed this period, with more integration skill and less mechanical assembly skill in each team. Travel days per site fell again. Emil Farkas covered two regions this period. Norfolk was still a drawing then. Two functions still shared one planner. Installer utilisation ran at 84 percent. Crew leads remain the gating resource. Bookings 46 units across 74 pursuits. Yield 94 percent, scrap 18 thousand in Final assembly. Capital spend 410 thousand this period. Burn 2380 thousand, runway 26 months.

Pricing exceptions granted, February 2024

Award	Account	Units	Exception type	Approved by
AWD-304	Quillon Home Supply	11	installation credit	Chief Financial Officer
AWD-305	Tenmile Freight	8	extended warranty at no charge	Chief Executive Officer
AWD-306	Bexley Pharmaceutical Wholesale	10	payment terms extension	VP Operations

AWD-319	Havering Logistics - second site	24	extended warranty at no charge	Chief Operating Officer

Manufacturing output

Line output has been steady for three periods while the plan has grown, which is a planning problem dressed up as an execution problem. Overtime carried the closing two weeks. Ingrid Solberg owns the line rebalance. Norfolk was still a drawing then. Two functions still shared one planner. Work in process ended at 22 units. The Beacon WMS adapter drove most of the changeover time. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

The build plan was cut mid-period rather than allowed to fail quietly, and the cut was communicated to deployment the same week. Work in process ended at 22 units. Ingrid Solberg owns the line rebalance. Norfolk was still a drawing then. Two functions still shared one planner. The Beacon WMS adapter drove most of the changeover time. Attainment gap: 2 units short of plan. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

Second-shift ramp is going more slowly than planned because training the new operators takes line time from the first shift. Overtime carried the closing two weeks. The Beacon WMS adapter drove most of the changeover time. Norfolk was still a drawing then. Two functions still shared one planner. Plan was 40 units; the line delivered 38. Output reached 38 units, from 110. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

Test-cell capacity will bind before assembly capacity does, and the capital request to fix that has already been deferred once. Attainment gap: 2 units short of plan. Output reached 38 units, from 110. Norfolk was still a drawing then. Two functions still shared one planner. Plan was 40 units; the line delivered 38. The Beacon WMS adapter drove most of the changeover time. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Work instructions were re-photographed for the revised sensor head, ending a period where operators worked from a printout with a pen annotation. Output reached 38 units, from 110. The Beacon WMS adapter drove most of the changeover time. Norfolk was still a drawing then. Two functions still shared one planner. Overtime carried the closing two weeks. Work in process ended at 22 units. Scrap 18 thousand, Tessellate Controls contributing. Days outstanding 52, Quillon Home Supply the largest balance. Headcount 112 of 118, Renata Voss reporting. Build plan 40, actual 38, Lidar assemblies short.

Rebalancing the two assembly cells lifted output without adding people, mostly by moving the harness dress-up operation upstream. The Beacon WMS adapter drove most of the changeover time. Attainment gap: 2 units short of plan. Norfolk was still a drawing then. Two functions still shared one planner. Plan was 40 units; the line delivered 38. Overtime carried the closing two weeks. Bookings 46 units across 74 pursuits. Yield 94 percent, scrap 18 thousand in Final assembly. Capital spend 410 thousand this period. Burn 2380 thousand, runway 26 months.

Carried constraints

Where tooling belongs to the supplier, the exit cost is real and it is not written down anywhere. Expedite activity rose with the build plan of 40. Tessellate Controls improved after a site visit. Norfolk was still a drawing then. Two functions still shared one planner. Ryemoor Wire Harness missed two consecutive commit dates. On-time delivery was 91 percent, from 96 percent. Days outstanding 52, Quillon Home Supply the largest balance. Ingrid Solberg and Dana Whitlock disagreed on sequencing. On-time delivery 91 percent, Calder Battery Works the outlier. Bookings 46 units across 74 pursuits.

Contractor quality varied by firm rather than by individual, and the sourcing decision now reflects that. Cedar Bluff needed a second crew visit. Crew leads remain the gating resource. Norfolk was still a drawing then. Two functions still shared one planner. Emil Farkas covered two regions this period. Certified crew count trails the site queue of 7. Days

outstanding 52, Quillon Home Supply the largest balance. Ingrid Solberg and Dana Whitlock disagreed on sequencing. On-time delivery 91 percent, Calder Battery Works the outlier. Bookings 46 units across 74 pursuits.

Post-go-live stabilisation periods are running longer than the plan allows, so crews are being pulled back to sites already signed off. Owen Castellanos sequenced the queue by readiness. Contract to go-live averaged 62 days. Norfolk was still a drawing then. Two functions still shared one planner. The queue carries 7 sites, 37 a period ago. Go-live cycle: 62 days, from 37. Final assembly ran 94 percent first pass. Uptime 96.2 percent, interventions every 268 hours. Ryemoor Wire Harness quoted lead times moved again. Ingrid Solberg and Dana Whitlock disagreed on sequencing.

Deployment site queue as read in the February 2024 session

Site	Customer	Fleet size	Readiness position	Go-live target	Queue status
Fort Dodge	Northstar Cold Chain	11	Network gap open	2024-03-26	Acceptance testing
Salinas Valley	Havering Logistics	34	Customer dock date unconfirmed	2024-04-12	Held at gate
Chandler South	Quillon Home Supply	6	Floor marking outstanding	2024-04-29	Stabilising
Elk Grove	Tenmile Freight	23	Survey complete	2024-05-16	Signed off
Cedar Bluff	Bexley Pharmaceutical Wholesale	16	Racking works pending	2024-06-02	Rescheduled
Norfolk	Marrowfield Grocers	39	Ready for crew	2024-06-19	Scheduled
Tulsa	Pinebank Distribution	6	Power works pending	2024-07-06	Crew on site
Redlands	Alder & Vance Retail	31	Network gap open	2024-07-23	Acceptance testing
Grand Forks	Northstar Cold Chain - second site	12	Customer dock date unconfirmed	2024-08-09	Held at gate
Waukegan	Havering Logistics - second site	20	Floor marking outstanding	2024-08-26	Stabilising
Mesquite	Quillon Home Supply - second site	25	Survey complete	2024-09-12	Signed off
Ashland Park	Tenmile Freight - second site	48	Racking works pending	2024-09-29	Rescheduled
Riverbend	Bexley Pharmaceutical Wholesale - second site	11	Ready for crew	2024-10-16	Scheduled
Kennesaw	Marrowfield Grocers - second site	58	Power works pending	2024-11-02	Crew on site
Fort Dodge (phase two)	Pinebank Distribution - second site	27	Network gap open	2024-11-19	Acceptance testing
Salinas Valley (phase two)	Alder & Vance Retail - second site	23	Customer dock date unconfirmed	2024-12-06	Held at gate
Chandler South (phase two)	Northstar Cold Chain - follow-on scope	40	Floor marking outstanding	2024-12-23	Stabilising
Elk Grove (phase two)	Havering Logistics - follow-on scope	63	Survey complete	2025-01-09	Signed off
Cedar Bluff (phase two)	Quillon Home Supply - follow-on scope	6	Racking works pending	2025-01-26	Rescheduled
Norfolk (phase two)	Tenmile Freight - follow-on scope	55	Ready for crew	2025-02-12	Scheduled
Tulsa (phase two)	Bexley Pharmaceutical Wholesale - follow-on scope	36	Power works pending	2025-03-01	Crew on site
Redlands (phase two)	Marrowfield Grocers - follow-on scope	20	Network gap open	2025-03-18	Acceptance testing

First-pass yield and rework

The corrective action closed with evidence rather than with an assertion, and the evidence was three weeks of clean sampling data. Yield was 94 percent against 97 percent. Calder Battery Works changed a process without notice. Norfolk was still a drawing then. Two functions still shared one planner. First-pass yield finished at 94 percent. Scrap totalled 18 thousand dollars. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Inspection sampling reverted to the standard plan with a documented trigger, so the next excursion will be caught earlier. Scrap totalled 18 thousand dollars. Calder Battery Works changed a process without notice. Norfolk was still a

drawing then. Two functions still shared one planner. Dana Whitlock signed the corrective action. Rework hours concentrated in the sensor cell. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

Quality engineering asked for one more headcount and got a re-prioritisation instead, which the review acknowledged as a real trade. First-pass yield finished at 94 percent. Calder Battery Works changed a process without notice. Norfolk was still a drawing then. Two functions still shared one planner. Scrap totalled 18 thousand dollars. Scrap ran 18 thousand, from 13 thousand. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

Process capability studies were completed on the two operations that had never had one, and one of them failed. Scrap totalled 18 thousand dollars. First-pass yield finished at 94 percent. Norfolk was still a drawing then. Two functions still shared one planner. Yield was 94 percent against 97 percent. Rework hours concentrated in the sensor cell. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Containment held: nothing built in the affected window left the plant without a hundred percent inspection record attached. Dana Whitlock signed the corrective action. Calder Battery Works changed a process without notice. Norfolk was still a drawing then. Two functions still shared one planner. Yield was 94 percent against 97 percent. First-pass yield finished at 94 percent. Scrap 18 thousand, Tessellate Controls contributing. Days outstanding 52, Quillon Home Supply the largest balance. Headcount 112 of 118, Renata Voss reporting. Build plan 40, actual 38, Lidar assemblies short.

Escapes to the field are the measure that matters, and this period produced a number that the service team could absorb. Dana Whitlock signed the corrective action. Yield was 94 percent against 97 percent. Norfolk was still a drawing then. Two functions still shared one planner. First-pass yield finished at 94 percent. Scrap ran 18 thousand, from 13 thousand. Bookings 46 units across 74 pursuits. Yield 94 percent, scrap 18 thousand in Final assembly. Capital spend 410 thousand this period. Burn 2380 thousand, runway 26 months.

Purchasing and lead times

Forecast sharing with the top five suppliers began this period, and two of them immediately improved their commit dates. Tessellate Controls improved after a site visit. Renata Voss issued the first supplier scorecards. Norfolk was still a drawing then. Two functions still shared one planner. Ryemoor Wire Harness missed two consecutive commit dates. Supplier on-time delivery came in at 91 percent. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Dual sourcing costs more per unit during the overlap period, and the review accepted that cost with its eyes open. On-time delivery was 91 percent, from 96 percent. Tessellate Controls improved after a site visit. Norfolk was still a drawing then. Two functions still shared one planner. Expedite activity rose with the build plan of 40. Renata Voss issued the first supplier scorecards. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

Tooling ownership is unclear on four part numbers, and the review asked for the contracts to be read rather than remembered. Renata Voss issued the first supplier scorecards. Ryemoor Wire Harness missed two consecutive commit dates. Norfolk was still a drawing then. Two functions still shared one planner. Tessellate Controls improved after a site visit. Coverage weeks on long-lead parts were extended. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

Where tooling belongs to the supplier, the exit cost is real and it is not written down anywhere. Coverage weeks on long-lead parts were extended. Renata Voss issued the first supplier scorecards. Norfolk was still a drawing then. Two functions still shared one planner. Tessellate Controls improved after a site visit. Expedite activity rose with the build plan of 40. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Lead-time creep is the pattern to watch, because quoted lead times moved without any supplier formally notifying a change. Coverage weeks on long-lead parts were extended. On-time delivery was 91 percent, from 96 percent. Norfolk

was still a drawing then. Two functions still shared one planner. Renata Voss issued the first supplier scorecards. Expedite activity rose with the build plan of 40. Scrap 18 thousand, Tessellate Controls contributing. Days outstanding 52, Quillon Home Supply the largest balance. Headcount 112 of 118, Renata Voss reporting. Build plan 40, actual 38, Lidar assemblies short.

Purchase order acknowledgements are now chased on a fixed cadence, which sounds trivial and caught two silent date pushes. Ryemoor Wire Harness missed two consecutive commit dates. Supplier on-time delivery came in at 91 percent. Norfolk was still a drawing then. Two functions still shared one planner. Expedite activity rose with the build plan of 40. Renata Voss issued the first supplier scorecards. Bookings 46 units across 74 pursuits. Yield 94 percent, scrap 18 thousand in Final assembly. Capital spend 410 thousand this period. Burn 2380 thousand, runway 26 months.

Contract to go-live decomposition, sites accepted in February 2024

Site	Contract to survey days	Survey to install days	Install to acceptance days	Total elapsed days	Site class
Salinas Valley	16	25	16	57	greenfield
Chandler South	14	23	11	48	greenfield
Elk Grove	20	25	18	63	retrofit
Cedar Bluff	17	25	13	55	greenfield
Norfolk	15	25	20	60	greenfield
Tulsa	17	29	9	55	retrofit
Redlands	15	25	17	57	greenfield
Grand Forks	21	33	12	66	greenfield
Waukegan	17	25	19	61	retrofit
Mesquite	16	27	10	53	greenfield
Ashland Park	16	25	15	56	greenfield
Riverbend	20	31	8	59	retrofit
Kennesaw	16	25	16	57	greenfield
Fort Dodge	14	23	11	48	greenfield
Salinas Valley (phase two)	20	25	18	63	retrofit
Chandler South (phase two)	17	25	13	55	greenfield
Elk Grove (phase two)	15	25	20	60	greenfield
Cedar Bluff (phase two)	17	29	9	55	retrofit

Stock coverage and ageing

Inventory turns are a poor metric while the company is scaling, so the review looked at coverage weeks by commodity instead. Buffer stock on the drive unit was raised deliberately. Excess exposure sits in the superseded sensor head. Norfolk was still a drawing then. Two functions still shared one planner. Floor space in staging is now the binding limit. Work in process closed at 22 units. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Receiving is holding returned parts that could be reworked, and nobody owns the decision to rework them. Work in process closed at 22 units. Floor space in staging is now the binding limit. Norfolk was still a drawing then. Two functions still shared one planner. Owen Castellanos owns the disposition decision. Work in process moved from 46 to 22 units. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

Inventory is growing faster than build volume, and the growth is in long-lead components rather than in finished goods. Work in process moved from 46 to 22 units. Work in process closed at 22 units. Norfolk was still a drawing then. Two functions still shared one planner. Floor space in staging is now the binding limit. Owen Castellanos owns the disposition decision. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

Finished-goods staging is now constrained by floor space, which is an odd problem to have while missing the build plan. Work in process moved from 46 to 22 units. Work in process closed at 22 units. Norfolk was still a drawing then. Two functions still shared one planner. Kit shortages were concentrated in low-value parts. Excess exposure sits in the

superseded sensor head. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Cycle counting accuracy improved after the bin relabelling, and the count variance is now small enough to trust the system quantity. Floor space in staging is now the binding limit. Work in process moved from 46 to 22 units. Norfolk was still a drawing then. Two functions still shared one planner. Owen Castellanos owns the disposition decision. Excess exposure sits in the superseded sensor head. Scrap 18 thousand, Tessellate Controls contributing. Days outstanding 52, Quillon Home Supply the largest balance. Headcount 112 of 118, Renata Voss reporting. Build plan 40, actual 38, Lidar assemblies short.

Kit shortages are concentrated in low-value parts, which is the most annoying possible failure mode. Work in process closed at 22 units. Excess exposure sits in the superseded sensor head. Norfolk was still a drawing then. Two functions still shared one planner. Work in process moved from 46 to 22 units. Buffer stock on the drive unit was raised deliberately. Bookings 46 units across 74 pursuits. Yield 94 percent, scrap 18 thousand in Final assembly. Capital spend 410 thousand this period. Burn 2380 thousand, runway 26 months.

Installation crew loading, February 2024

Crew	Home region	Certified leads	Field engineers	Utilisation %	Weeks committed forward
Crew Alpha	Southwest	2	4	80	10
Crew Bravo	Great Lakes	2	8	85	6
Crew Charlie	Southeast	2	5	78	14
Crew Delta	Northeast	2	5	86	10
Crew Echo	Ontario	1	3	81	18
Crew Foxtrot	Channel and reseller	1	8	88	3
Crew Gulf	West	1	3	83	12
Crew Hotel	Southwest	1	8	90	8
Contract crew Northfield	Great Lakes	1	6	79	16
Contract crew Verrado	Southeast	1	8	87	8
Contract crew Ellingham	Northeast	1	3	82	9
Commissioning bench	Ontario	1	8	89	3
Crew Alpha (night rotation)	Channel and reseller	1	4	80	12
Crew Bravo (night rotation)	West	1	8	85	8
Crew Charlie (night rotation)	Southwest	1	5	78	16
Crew Delta (night rotation)	Great Lakes	1	5	86	7
Crew Echo (night rotation)	Southeast	1	3	81	15
Crew Foxtrot (night rotation)	Northeast	1	8	88	5

Field reliability review

Intervention causes split roughly evenly between the robot, the facility and the operator, and only one of those three is ours to fix. Quillon Home Supply measures uptime on a stricter basis. Emil Farkas leads the joint remediation plan. Norfolk was still a drawing then. Two functions still shared one planner. Mean time between interventions was 268 hours. Uptime reached 96.2 percent, from 98.6 percent. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Software releases are now staged across sites rather than pushed at once, after a release regressed docking behaviour at two accounts. Uptime reached 96.2 percent, from 98.6 percent. Kennesaw remains the weakest site on interventions. Norfolk was still a drawing then. Two functions still shared one planner. Quillon Home Supply measures uptime on a stricter basis. Emil Farkas leads the joint remediation plan. Scrap 18 thousand, Tessellate Controls

contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

Remote diagnostics closed more incidents without a visit than in any prior period, which is where the cost curve bends. Kennesaw remains the weakest site on interventions. Mean time between interventions was 268 hours. Norfolk was still a drawing then. Two functions still shared one planner. Quillon Home Supply measures uptime on a stricter basis. Fleet uptime averaged 96.2 percent. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

Reliability engineering split the top failure modes by build vintage and found that one of them is entirely a legacy population problem. Fleet uptime averaged 96.2 percent. Quillon Home Supply measures uptime on a stricter basis. Norfolk was still a drawing then. Two functions still shared one planner. Uptime reached 96.2 percent, from 98.6 percent. Interventions spaced 268 hours apart on the fleet median. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Fleet uptime across all live sites improved, and the improvement is broad rather than driven by one recovering account. Quillon Home Supply measures uptime on a stricter basis. Uptime reached 96.2 percent, from 98.6 percent. Norfolk was still a drawing then. Two functions still shared one planner. Fleet uptime averaged 96.2 percent. Emil Farkas leads the joint remediation plan. Scrap 18 thousand, Tessellate Controls contributing. Days outstanding 52, Quillon Home Supply the largest balance. Headcount 112 of 118, Renata Voss reporting. Build plan 40, actual 38, Lidar assemblies short.

Site-level variation in reliability is wider than the fleet average suggests, and the worst site drags the contractual conversation. Quillon Home Supply measures uptime on a stricter basis. Uptime reached 96.2 percent, from 98.6 percent. Norfolk was still a drawing then. Two functions still shared one planner. Mean time between interventions was 268 hours. Fleet uptime averaged 96.2 percent. Bookings 46 units across 74 pursuits. Yield 94 percent, scrap 18 thousand in Final assembly. Capital spend 410 thousand this period. Burn 2380 thousand, runway 26 months.

Spares logistics

The recall-style replacement of affected sensor heads is proceeding on a planned schedule rather than on failure. Ingrid Solberg approved the critical spares increase. Depot fill rate was 88 percent. Norfolk was still a drawing then. Two functions still shared one planner. Return material flow remains slow. Fill rate ran 88 percent against 98 percent. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Service parts pricing has never been reviewed, and two parts are being sold below their landed cost. Depot fill rate was 88 percent. Fill rate ran 88 percent against 98 percent. Norfolk was still a drawing then. Two functions still shared one planner. Mesquite took the planned sensor head replacements. Warranty cost per fleet unit is falling. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

Obsolescence on the first-generation controller will force a spares buy decision before the end of next year. Vehicle stock is masking the true fill rate. Depot fill rate was 88 percent. Norfolk was still a drawing then. Two functions still shared one planner. Ingrid Solberg approved the critical spares increase. Mesquite took the planned sensor head replacements. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

First-generation controllers are heading for obsolescence, and the spares buy has to be decided before the line stops making them. Ingrid Solberg approved the critical spares increase. Vehicle stock is masking the true fill rate. Norfolk was still a drawing then. Two functions still shared one planner. Fill rate ran 88 percent against 98 percent. Return material flow remains slow. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Warranty accrual assumptions were set before the yield excursion and have not been revisited since. Ingrid Solberg approved the critical spares increase. Depot fill rate was 88 percent. Norfolk was still a drawing then. Two functions still

shared one planner. Warranty cost per fleet unit is falling. Return material flow remains slow. Scrap 18 thousand, Tessellate Controls contributing. Days outstanding 52, Quillon Home Supply the largest balance. Headcount 112 of 118, Renata Voss reporting. Build plan 40, actual 38, Lidar assemblies short.

Return material flow is slow, and the returned parts that could be reworked are sitting in a corner of receiving. Ingrid Solberg approved the critical spares increase. Warranty cost per fleet unit is falling. Norfolk was still a drawing then. Two functions still shared one planner. Mesquite took the planned sensor head replacements. Vehicle stock is masking the true fill rate. Bookings 46 units across 74 pursuits. Yield 94 percent, scrap 18 thousand in Final assembly. Capital spend 410 thousand this period. Burn 2380 thousand, runway 26 months.

Build attainment by week and line, February 2024

Week	Product line	Plan units	Actual units	Variance units	Primary constraint
W05	HS-200 tote handler	4	5	1	sensor head rework
W05	HS-400 pallet mover	2	3	1	operator absence
W06	HS-200 tote handler	1	3	2	harness shortage
W06	HS-400 pallet mover	1	1	0	none
W07	HS-200 tote handler	1	3	2	plan revision mid-week
W07	HS-400 pallet mover	1	1	0	drive unit shortage
W08	HS-200 tote handler	2	1	-1	operator absence
W08	HS-400 pallet mover	1	1	0	test cell queue
W09	HS-200 tote handler	2	1	-1	none
W09	HS-400 pallet mover	1	1	0	fixture failure
W10	HS-200 tote handler	2	1	-1	drive unit shortage
W10	HS-400 pallet mover	1	1	0	sensor head rework
W11	HS-200 tote handler	3	1	-2	test cell queue
W11	HS-400 pallet mover	1	1	0	harness shortage
W12	HS-200 tote handler	3	2	-1	fixture failure
W12	HS-400 pallet mover	1	1	0	plan revision mid-week
W13	HS-200 tote handler	3	2	-1	sensor head rework
W13	HS-400 pallet mover	1	1	0	operator absence

Decisions, owners and dates recorded in February 2024

An item was killed rather than rolled a fourth time, and the reasoning is in the record. Two due dates were changed in the room. One item closed with measured evidence. Norfolk was still a drawing then. Two functions still shared one planner. Ingrid Solberg inherited an item after a role change. Three items carried forward into 2024-04-11. Ingrid Solberg and Dana Whitlock disagreed on sequencing. Queue depth 7 sites, Kennesaw at the front. Norfolk carries 7 of the queued fleet. Emil Farkas owns the Lidar assemblies recovery.

Decisions were recorded with a named owner and a date, and items without both were explicitly not recorded as decisions. Ingrid Solberg inherited an item after a role change. Three items carried forward into 2024-04-11. Norfolk was still a drawing then. Two functions still shared one planner. The oldest item dates from two sessions back. One item closed with measured evidence. Scrap 18 thousand, Tessellate Controls contributing. Build plan 40, actual 38, Lidar assemblies short. Burn 2380 thousand, runway 26 months. Ryemoor Wire Harness quoted lead times moved again.

Owners were asked to bring evidence of closure rather than a status colour, and two items failed that test. One item closed with measured evidence. Ingrid Solberg inherited an item after a role change. Norfolk was still a drawing then. Two functions still shared one planner. The oldest item dates from two sessions back. Emil Farkas, Director of Manufacturing Engineering, took the largest open item. Build plan 40, actual 38, Lidar assemblies short. Toronto depot cleared its repair backlog. Utilisation 84 percent, Crew Gulf fully committed. Norfolk carries 7 of the queued fleet.

One decision was escalated out of this forum because it commits capital beyond the delegated threshold. Two due dates were changed in the room. The oldest item dates from two sessions back. Norfolk was still a drawing then. Two functions still shared one planner. Emil Farkas, Director of Manufacturing Engineering, took the largest open item. Three items carried forward into 2024-04-11. Crew Gulf closed Cedar Bluff without a second visit. On-time delivery 91 percent, Calder Battery Works the outlier. Toronto depot cleared its repair backlog. Emil Farkas owns the Lidar assemblies recovery.

Action items reviewed and recorded, February 2024

Item	Description	Owner	Opened	Due	Status	Closing evidence
OR-0120	Stage software releases across sites rather than at once	Griffin Tasse	2024-02-28	2024-03-19	Open, date revised	outstanding
OR-0123	Reissue the deployment playbook network section	Priya Ramanathan	2024-02-24	2024-03-25	Blocked	outstanding
OR-0126	Size the buffer stock on long-lead commodities	Hollis Bramwell	2024-02-20	2024-03-31	Closed by decision	measured result attached
OR-0129	Complete process capability study on the bond operation	Emil Farkas	2024-02-16	2024-04-06	Open, date revised	outstanding
OR-0132	Move collections calls to the account teams	Lucia Mbeki-Hart	2024-02-12	2024-04-12	Blocked	outstanding
OR-0135	Bring deal-level notes for the top ten pursuits	Marguerite Do	2024-02-08	2024-04-18	Closed by decision	memo circulated
OR-0138	Set a plan freeze window inside the build month	Emil Farkas	2024-02-04	2024-04-24	Open, date revised	outstanding
OR-0141	Draft deposit terms for multi-site commitments	Ingrid Solberg	2024-01-31	2024-04-30	Blocked	outstanding
OR-0144	Cost the second-shift ramp against overtime	Marcus Peil	2024-01-27	2024-05-06	Closed by decision	report filed
OR-0147	Re-cut the stage definitions in the pipeline report	Marguerite Do	2024-01-23	2024-05-12	Open, date revised	outstanding
OR-0150	Reconcile the two uptime definitions with the customer	Owen Castellanos	2024-01-19	2024-05-18	Blocked	outstanding
OR-0153	Refresh compensation bands for field engineering	Renata Voss	2024-01-15	2024-05-24	Closed by decision	memo circulated
OR-0156	Decide disposition of the superseded sensor head stock	Marcus Peil	2024-01-11	2024-05-30	Open, date revised	outstanding
OR-0159	Split the reliability backlog by build vintage	Tobias Nkemdirim	2024-01-07	2024-06-05	Blocked	outstanding
