MANAGEMENT OPERATING REVIEW - RECORD 002

Helioscope Robotics, Inc. - diligence file reference OPERATING_REVIEWS-002

Monthly Business Review for March 2024: purpose and attendance

Pre-read materials went out three business days ahead, and the review started from questions rather than from a walkthrough. Marguerite Do, Director of Sales Operations, presented the operations section. One function submitted its pre-read late. The plant ran a single shift. The queue was tracked on a whiteboard. Griffin Tasse attended as Head of Product. The Monthly Business Review convened for March 2024. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

One function submitted its pre-read late, and the section was taken last rather than allowed to shorten the discussion of others. Notes were circulated on 2024-04-10. The next session is set for 2024-05-09. The plant ran a single shift. The queue was tracked on a whiteboard. One function submitted its pre-read late. Marguerite Do, Director of Sales Operations, presented the operations section. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

Data definitions were attached to the packet for the first time, and two functions discovered they were counting differently. The next session is set for 2024-05-09. Notes were circulated on 2024-04-10. The plant ran a single shift. The queue was tracked on a whiteboard. Griffin Tasse attended as Head of Product. Marguerite Do, Director of Sales Operations, presented the operations section. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

Action item review opened the meeting rather than closing it, which changed the tone of the whole session. The Monthly Business Review convened for March 2024. One function submitted its pre-read late. The plant ran a single shift. The queue was tracked on a whiteboard. Pre-reads went out ahead of the 2024-04-10 session. Marguerite Do, Director of Sales Operations, presented the operations section. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

Production review

Manufacturing engineering closed out the top three line stoppages, and the fourth turns out to be a fixture that nobody owns. Output reached 41 units, from 38. The HS-400 pallet mover drove most of the changeover time. The plant ran a single shift. The queue was tracked on a whiteboard. Marcus Peil owns the line rebalance. Plan was 44 units; the line delivered 41. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Plan stability is now the loudest complaint from the plant, with three revisions to the same month's plan in one period. Attainment gap: 3 units short of plan. Plan was 44 units; the line delivered 41. The plant ran a single shift. The queue was tracked on a whiteboard. Output reached 41 units, from 38. Overtime carried the closing two weeks. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

The plant met its unit number and missed its labour-hours-per-unit target, which the review treated as the more important miss. Overtime carried the closing two weeks. The HS-400 pallet mover drove most of the changeover time. The plant ran a single shift. The queue was tracked on a whiteboard. Output reached 41 units, from 38. Attainment gap: 3 units short of plan. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

Line output has been steady for three periods while the plan has grown, which is a planning problem dressed up as an execution problem. Output reached 41 units, from 38. Plan was 44 units; the line delivered 41. The plant ran a single shift. The queue was tracked on a whiteboard. Work in process ended at 26 units. Attainment gap: 3 units short of plan.

Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

The build plan was cut mid-period rather than allowed to fail quietly, and the cut was communicated to deployment the same week. Overtime carried the closing two weeks. Attainment gap: 3 units short of plan. The plant ran a single shift. The queue was tracked on a whiteboard. Plan was 44 units; the line delivered 41. The HS-400 pallet mover drove most of the changeover time. The Beacon WMS adapter took most of the test cell time. Slipped deals 6, including Pinebank Distribution. Uptime 96.4 percent, interventions every 274 hours. Contract crew Northfield closed Norfolk without a second visit.

Second-shift ramp is going more slowly than planned because training the new operators takes line time from the first shift. Work in process ended at 26 units. The HS-400 pallet mover drove most of the changeover time. The plant ran a single shift. The queue was tracked on a whiteboard. Marcus Peil owns the line rebalance. Output reached 41 units, from 38. Days outstanding 55, Havering Logistics the largest balance. Uptime 96.4 percent, interventions every 274 hours. Utilisation 88 percent, Contract crew Northfield fully committed. Go-live cycle 64 days at Mesquite.

Assembly cell performance by shift, March 2024

Cell	Shift	Units processed	First-pass yield %	Rework hours	Scrap USD thousands
Frame and drive assembly	first shift	10	96	5	2
Sensor head assembly	first shift	7	89	105	4
Harness and electrical	first shift	7	95	20	1
Final assembly	first shift	7	96	55	1
Functional test	first shift	6	96	10	1
Pack and ship	first shift	8	94	35	1
Frame and drive assembly	second shift	5	95	4	1
Sensor head assembly	second shift	4	87	100	2
Harness and electrical	second shift	4	93	15	1
Final assembly	second shift	4	94	50	1
Functional test	second shift	3	92	25	1
Pack and ship	second shift	4	95	60	1
Frame and drive assembly	weekend cover	1	96	5	1
Sensor head assembly	weekend cover	1	89	105	1
Harness and electrical	weekend cover	1	95	20	1
Final assembly	weekend cover	1	96	55	1
Functional test	weekend cover	1	96	10	1
Pack and ship	weekend cover	1	94	35	1

Quality performance

Defect Pareto shifted after the bond-line fix, and the new top category is a connector seating issue with a simple tooling answer. Hollis Bramwell signed the corrective action. Scrap ran 21 thousand, from 18 thousand. The plant ran a single shift. The queue was tracked on a whiteboard. Rework hours concentrated in the sensor cell. First-pass yield finished at 94 percent. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Nobody wanted to hold shipments, and the review held them anyway on eleven units that had incomplete bond-line records. First-pass yield finished at 94 percent. Hollis Bramwell signed the corrective action. The plant ran a single shift. The queue was tracked on a whiteboard. Scrap ran 21 thousand, from 18 thousand. Rework hours concentrated in the sensor cell. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

Scrap dollars tell a different story from scrap units, because the units being scrapped are the expensive ones. Kestrel Drive Systems changed a process without notice. Scrap ran 21 thousand, from 18 thousand. The plant ran a single shift. The queue was tracked on a whiteboard. First-pass yield finished at 94 percent. Rework hours concentrated in the sensor cell. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

The corrective action closed with evidence rather than with an assertion, and the evidence was three weeks of clean sampling data. Hollis Bramwell signed the corrective action. Yield was 94 percent against 94 percent. The plant ran a single shift. The queue was tracked on a whiteboard. First-pass yield finished at 94 percent. Scrap ran 21 thousand, from 18 thousand. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

Inspection sampling reverted to the standard plan with a documented trigger, so the next excursion will be caught earlier. Scrap totalled 21 thousand dollars. Kestrel Drive Systems changed a process without notice. The plant ran a single shift. The queue was tracked on a whiteboard. Scrap ran 21 thousand, from 18 thousand. Hollis Bramwell signed the corrective action. The Beacon WMS adapter took most of the test cell time. Slipped deals 6, including Pinebank Distribution. Uptime 96.4 percent, interventions every 274 hours. Contract crew Northfield closed Norfolk without a second visit.

Quality engineering asked for one more headcount and got a re-prioritisation instead, which the review acknowledged as a real trade. Scrap totalled 21 thousand dollars. First-pass yield finished at 94 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Hollis Bramwell signed the corrective action. Kestrel Drive Systems changed a process without notice. Days outstanding 55, Havering Logistics the largest balance. Uptime 96.4 percent, interventions every 274 hours. Utilisation 88 percent, Contract crew Northfield fully committed. Go-live cycle 64 days at Mesquite.

Yield excursion and containment log, March 2024

Week	Cell	First-pass yield %	Units affected	Containment in force	Disposition
W09	Final assembly	99	9	shipments held	hold pending study
W10	Sensor head assembly	89	8	inspection lifted, trigger armed	rework and release
W11	Harness and electrical	97	5	full inspection reinstated	scrap
W12	Final assembly	92	10	standard sampling	use as is with concession
W13	Sensor head assembly	99	6	100 percent bond-line inspection	return to supplier
W14	Harness and electrical	90	7	sample one in ten	hold pending study
W15	Final assembly	95	8	shipments held	rework and release
W16	Sensor head assembly	88	5	inspection lifted, trigger armed	scrap
W17	Harness and electrical	96	10	full inspection reinstated	use as is with concession
W18	Final assembly	91	9	standard sampling	return to supplier
W19	Sensor head assembly	98	7	100 percent bond-line inspection	hold pending study
W20	Harness and electrical	93	6	sample one in ten	rework and release
W21	Final assembly	99	9	shipments held	scrap
W22	Sensor head assembly	89	8	inspection lifted, trigger armed	use as is with concession
W23	Harness and electrical	97	5	full inspection reinstated	return to supplier
W24	Final assembly	92	10	standard sampling	hold pending study
W25	Sensor head assembly	99	6	100 percent bond-line inspection	rework and release
W26	Harness and electrical	90	7	sample one in ten	scrap
W27	Final assembly	95	8	shipments held	use as is with concession
W28	Sensor head assembly	88	5	inspection lifted, trigger armed	return to supplier

Supplier delivery review

The harness supplier improved after a site visit, and the improvement is real enough to move them off the watch list. On-time delivery was 86 percent, from 91 percent. Supplier on-time delivery came in at 86 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Expedite activity rose with the build plan of 44. Ryemoor Wire Harness improved after a site visit. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Sharing a rolling forecast with the top suppliers cost nothing and moved two commit dates within a fortnight. Ryemoor Wire Harness improved after a site visit. On-time delivery was 86 percent, from 91 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Tessellate Controls missed two consecutive commit dates. Supplier on-time delivery came in at 86 percent. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

Supplier on-time delivery deteriorated across the board rather than at a single vendor, which points at demand signal quality on our side. Supplier on-time delivery came in at 86 percent. Ryemoor Wire Harness improved after a site visit. The plant ran a single shift. The queue was tracked on a whiteboard. Coverage weeks on long-lead parts were extended. Expedite activity rose with the build plan of 44. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

Second-source qualification is slow, unglamorous work that removes the only single point of failure left in the drive train. Coverage weeks on long-lead parts were extended. Supplier on-time delivery came in at 86 percent. The plant ran a single shift. The queue was tracked on a whiteboard. On-time delivery was 86 percent, from 91 percent. Marguerite Do issued the first supplier scorecards. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

Component cost movement was mild, and the review spent its time on availability instead because that is what is hurting. Marguerite Do issued the first supplier scorecards. Expedite activity rose with the build plan of 44. The plant ran a single shift. The queue was tracked on a whiteboard. Supplier on-time delivery came in at 86 percent. Tessellate Controls missed two consecutive commit dates. The Beacon WMS adapter took most of the test cell time. Slipped deals 6, including Pinebank Distribution. Uptime 96.4 percent, interventions every 274 hours. Contract crew Northfield closed Norfolk without a second visit.

Supplier scorecards were issued for the first time with delivery, quality and responsiveness weighted, and the ranking surprised nobody. Tessellate Controls missed two consecutive commit dates. Ryemoor Wire Harness improved after a site visit. The plant ran a single shift. The queue was tracked on a whiteboard. Coverage weeks on long-lead parts were extended. Supplier on-time delivery came in at 86 percent. Days outstanding 55, Havering Logistics the largest balance. Uptime 96.4 percent, interventions every 274 hours. Utilisation 88 percent, Contract crew Northfield fully committed. Go-live cycle 64 days at Mesquite.

Work in process and buffers

A stock count in the sensor cage found more usable material than the system said, which is welcome and still a control failure. Griffin Tasse owns the disposition decision. Excess exposure sits in the superseded sensor head. The plant ran a single shift. The queue was tracked on a whiteboard. Work in process moved from 22 to 26 units. Floor space in staging is now the binding limit. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Safety stock policy was set when lead times were shorter, and nobody has revisited the parameters since. Floor space in staging is now the binding limit. Excess exposure sits in the superseded sensor head. The plant ran a single shift. The queue was tracked on a whiteboard. Work in process moved from 22 to 26 units. Buffer stock on the drive unit was raised deliberately. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

Buffer inventory on the drive unit is the deliberate cost of the lead-time problem, and the review sized it explicitly. Excess exposure sits in the superseded sensor head. Floor space in staging is now the binding limit. The plant ran a single shift. The queue was tracked on a whiteboard. Work in process closed at 26 units. Buffer stock on the drive unit was raised deliberately. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

Spare-part inventory and production inventory are competing for the same components, and production keeps winning by default. Floor space in staging is now the binding limit. Griffin Tasse owns the disposition decision. The plant ran a single shift. The queue was tracked on a whiteboard. Work in process moved from 22 to 26 units. Excess exposure

sits in the superseded sensor head. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

The stockroom is holding parts for a configuration that has not been ordered in three quarters, and no one had noticed. Work in process closed at 26 units. Work in process moved from 22 to 26 units. The plant ran a single shift. The queue was tracked on a whiteboard. Griffin Tasse owns the disposition decision. Floor space in staging is now the binding limit. The Beacon WMS adapter took most of the test cell time. Slipped deals 6, including Pinebank Distribution. Uptime 96.4 percent, interventions every 274 hours. Contract crew Northfield closed Norfolk without a second visit.

Long-lead buying decisions made two quarters ago are what the stockroom looks like today, for better and worse. Kit shortages were concentrated in low-value parts. Buffer stock on the drive unit was raised deliberately. The plant ran a single shift. The queue was tracked on a whiteboard. Excess exposure sits in the superseded sensor head. Griffin Tasse owns the disposition decision. Days outstanding 55, Havering Logistics the largest balance. Uptime 96.4 percent, interventions every 274 hours. Utilisation 88 percent, Contract crew Northfield fully committed. Go-live cycle 64 days at Mesquite.

Supplier delivery and lead time, March 2024

Supplier	Commodity	On-time delivery %	Quoted lead weeks	Actual lead weeks	Watch status
Kestrel Drive Systems	Drive units	87	8	12	cleared
Brightwater Motion	Lidar assemblies	80	10	15	second source in qualification
Halverson Optics	Battery packs	88	12	12	on scorecard review
Penrose Castings	Castings	83	14	15	no action
Ironbark Sheet Metal	Sheet metal	90	15	15	watch
Calder Battery Works	Wire harness	85	11	13	escalated
Tessellate Controls	Controllers	92	12	12	cleared
Ryemoor Wire Harness	Caster and wheel sets	81	13	17	second source in qualification
Kestrel Drive Systems	Lidar assemblies	89	14	14	on scorecard review
Brightwater Motion	Battery packs	84	15	21	no action
Halverson Optics	Castings	91	11	11	watch
Penrose Castings	Sheet metal	82	12	15	escalated
Ironbark Sheet Metal	Wire harness	87	13	13	cleared
Calder Battery Works	Controllers	80	14	19	second source in qualification
Tessellate Controls	Caster and wheel sets	88	15	15	on scorecard review
Ryemoor Wire Harness	Drive units	83	11	12	no action

Field reliability review

Service credits remain the sharpest feedback loop the company has, and the review looked at exposure rather than at incurred credits alone. Mean time between interventions was 274 hours. Uptime reached 96.4 percent, from 96.2 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Interventions spaced 274 hours apart on the fleet median. Kennesaw remains the weakest site on interventions. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Intervention data is only as good as what the operators record, and two sites have stopped recording anything useful. Mean time between interventions was 274 hours. Interventions spaced 274 hours apart on the fleet median. The plant ran a single shift. The queue was tracked on a whiteboard. Kennesaw remains the weakest site on interventions. Havering Logistics measures uptime on a stricter basis. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

A single navigation parameter set improved intervention rates at every site it was applied to, which is now the standard configuration. Uptime reached 96.4 percent, from 96.2 percent. Kennesaw remains the weakest site on interventions. The plant ran a single shift. The queue was tracked on a whiteboard. Interventions spaced 274 hours apart on the fleet median. Mean time between interventions was 274 hours. Tessellate Controls quoted lead times moved again.

Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

Intervention causes split roughly evenly between the robot, the facility and the operator, and only one of those three is ours to fix. Kennesaw remains the weakest site on interventions. Lucia Mbeki-Hart leads the joint remediation plan. The plant ran a single shift. The queue was tracked on a whiteboard. Interventions spaced 274 hours apart on the fleet median. Fleet uptime averaged 96.4 percent. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

Software releases are now staged across sites rather than pushed at once, after a release regressed docking behaviour at two accounts. Kennesaw remains the weakest site on interventions. Lucia Mbeki-Hart leads the joint remediation plan. The plant ran a single shift. The queue was tracked on a whiteboard. Interventions spaced 274 hours apart on the fleet median. Fleet uptime averaged 96.4 percent. The Beacon WMS adapter took most of the test cell time. Slipped deals 6, including Pinebank Distribution. Uptime 96.4 percent, interventions every 274 hours. Contract crew Northfield closed Norfolk without a second visit.

Remote diagnostics closed more incidents without a visit than in any prior period, which is where the cost curve bends. Interventions spaced 274 hours apart on the fleet median. Fleet uptime averaged 96.4 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Uptime reached 96.4 percent, from 96.2 percent. Mean time between interventions was 274 hours. Days outstanding 55, Havering Logistics the largest balance. Uptime 96.4 percent, interventions every 274 hours. Utilisation 88 percent, Contract crew Northfield fully committed. Go-live cycle 64 days at Mesquite.

Constraint tracking since the last session

Constraint under review: drive-unit lead time, at the watch item stage as of this session. Kestrel Drive Systems moved quoted lead time on the DU-4 drive unit from nine weeks to thirteen without a formal notice, and the change surfaced only when a buyer chased an acknowledgement. The Beacon WMS adapter took most of the test cell time. On-time delivery 86 percent, Kestrel Drive Systems the outlier.

Sharing a rolling forecast with the top suppliers cost nothing and moved two commit dates within a fortnight. Tessellate Controls missed two consecutive commit dates. On-time delivery was 86 percent, from 91 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Coverage weeks on long-lead parts were extended. Ryemoor Wire Harness improved after a site visit. Attrition 11 percent annualised in Channel and reseller. Marrowfield Grocers asked for the HS-400 pallet mover configuration. Go-live cycle 64 days at Mesquite. Lucia Mbeki-Hart owns the Caster and wheel sets recovery.

Supplier on-time delivery deteriorated across the board rather than at a single vendor, which points at demand signal quality on our side. Coverage weeks on long-lead parts were extended. On-time delivery was 86 percent, from 91 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Marguerite Do issued the first supplier scorecards. Ryemoor Wire Harness improved after a site visit. Bookings 38 units across 79 pursuits. Scrap 21 thousand, Ryemoor Wire Harness contributing. Slipped deals 6, including Pinebank Distribution. Tessellate Controls quoted lead times moved again.

Expedite and premium freight log, March 2024

Part number	Supplier	Reason	Freight mode	Added cost USD thousands
4022-2	Halverson Optics	engineering change cut-in	courier	19
4027-3	Penrose Castings	customer date brought forward	expedited road	15
4032-4	Ironbark Sheet Metal	build plan pull-in	air	13
4037-5	Calder Battery Works	supplier missed commit date	standard road with premium	19
4042-6	Tessellate Controls	yield loss replacement	courier	17
4047-7	Ryemoor Wire Harness	spares depot backorder	expedited road	11
4052-8	Kestrel Drive Systems	engineering change cut-in	air	21
4057-0	Brightwater Motion	customer date brought forward	standard road with premium	13

Part number	Supplier	Reason	Freight mode	Added cost USD thousands
4062-1	Halverson Optics	build plan pull-in	courier	15
4067-2	Penrose Castings	supplier missed commit date	expedited road	17
4072-3	Ironbark Sheet Metal	yield loss replacement	air	11
4077-4	Calder Battery Works	spares depot backorder	standard road with premium	21
4082-5	Tessellate Controls	engineering change cut-in	courier	19
4087-6	Ryemoor Wire Harness	customer date brought forward	expedited road	15
4092-7	Kestrel Drive Systems	build plan pull-in	air	13
4097-8	Brightwater Motion	supplier missed commit date	standard road with premium	19
4102-0	Halverson Optics	yield loss replacement	courier	17

Spares logistics

Depot technicians closed the repair backlog for the first time in five periods, which frees vehicle stock. Return material flow remains slow. Warranty cost per fleet unit is falling. The plant ran a single shift. The queue was tracked on a whiteboard. Mesquite took the planned sensor head replacements. Depot fill rate was 85 percent. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Courier spend tells the story that the fill rate hides, because the parts are moving from the wrong place. Marcus Peil approved the critical spares increase. Fill rate ran 85 percent against 88 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Warranty cost per fleet unit is falling. Vehicle stock is masking the true fill rate. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

Spares fill rate from the regional depots governs how fast a field incident closes, and it has been the constraint at two sites. Fill rate ran 85 percent against 88 percent. Marcus Peil approved the critical spares increase. The plant ran a single shift. The queue was tracked on a whiteboard. Vehicle stock is masking the true fill rate. Warranty cost per fleet unit is falling. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

Field engineers are carrying more parts in vehicles than the policy allows, which hides the true fill rate. Marcus Peil approved the critical spares increase. Depot fill rate was 85 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Mesquite took the planned sensor head replacements. Vehicle stock is masking the true fill rate. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

Warranty cost per fleet unit is falling, and the fall is real rather than a timing artefact of claim processing. Fill rate ran 85 percent against 88 percent. Marcus Peil approved the critical spares increase. The plant ran a single shift. The queue was tracked on a whiteboard. Depot fill rate was 85 percent. Mesquite took the planned sensor head replacements. The Beacon WMS adapter took most of the test cell time. Slipped deals 6, including Pinebank Distribution. Uptime 96.4 percent, interventions every 274 hours. Contract crew Northfield closed Norfolk without a second visit.

Repair-versus-replace decisions are being made in the field without guidance, and the outcomes vary by engineer. Return material flow remains slow. Fill rate ran 85 percent against 88 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Warranty cost per fleet unit is falling. Mesquite took the planned sensor head replacements. Days outstanding 55, Havering Logistics the largest balance. Uptime 96.4 percent, interventions every 274 hours. Utilisation 88 percent, Contract crew Northfield fully committed. Go-live cycle 64 days at Mesquite.

Headcount and recruiting

Recruiting moved to a regional pipeline model with standing phone screens, which changed time to fill more than any sourcing spend did. Annualised attrition sits at 11 percent. Open requisitions number 17. The plant ran a single shift. The queue was tracked on a whiteboard. The headcount gap is 7 roles. Median time to fill was 76 days. Go-live cycle 64

days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Attrition is low in aggregate and uncomfortable in specifics, because the leavers include two people the company cannot easily replace. Requisitions fell from 14 to 17. Time to fill improved from 71 to 76 days. The plant ran a single shift. The queue was tracked on a whiteboard. Median time to fill was 76 days. Headcount stood at 117 against a plan of 124. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

Compensation bands for field engineering were refreshed after three offers were declined on base salary. The headcount gap is 7 roles. Median time to fill was 76 days. The plant ran a single shift. The queue was tracked on a whiteboard. Headcount stood at 117 against a plan of 124. Open requisitions number 17. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

Onboarding time to productivity for field engineers is measured now, and the number is longer than anyone assumed. Open requisitions number 17. Median time to fill was 76 days. The plant ran a single shift. The queue was tracked on a whiteboard. Time to fill improved from 71 to 76 days. The headcount gap is 7 roles. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

Contractor-to-employee conversion is the cheapest source of certified crew, and the process for it does not exist yet. The headcount gap is 7 roles. Annualised attrition sits at 11 percent. The plant ran a single shift. The queue was tracked on a whiteboard. Requisitions fell from 14 to 17. Time to fill improved from 71 to 76 days. The Beacon WMS adapter took most of the test cell time. Slipped deals 6, including Pinebank Distribution. Uptime 96.4 percent, interventions every 274 hours. Contract crew Northfield closed Norfolk without a second visit.

Headcount against plan closed part of its gap, and the remaining gap is concentrated in the two functions that gate deployment capacity. Time to fill improved from 71 to 76 days. Headcount stood at 117 against a plan of 124. The plant ran a single shift. The queue was tracked on a whiteboard. Requisitions fell from 14 to 17. Annualised attrition sits at 11 percent. Days outstanding 55, Havering Logistics the largest balance. Uptime 96.4 percent, interventions every 274 hours. Utilisation 88 percent, Contract crew Northfield fully committed. Go-live cycle 64 days at Mesquite.

Second-source qualification progress reviewed in March 2024

Qualification step	Candidate source	Owner	Planned date	Actual date	Result
Request for quotation issued	Brightwater Motion drive unit	Marcus Peil	2024-01-31	2024-01-29	pass with observation
Sample order placed	Brightwater Motion drive unit	Hollis Bramwell	2024-02-14	2024-02-15	retest scheduled
First article dimensional inspection	Brightwater Motion drive unit	Marcus Peil	2024-02-28	2024-03-03	complete
Thermal soak test	Brightwater Motion drive unit	Tobias Nkemdirim	2024-03-13	2024-03-20	in progress
Endurance run to two thousand hours	Brightwater Motion drive unit	Hollis Bramwell	2024-03-27	2024-03-26	pass
Process audit at supplier	Brightwater Motion drive unit	Emil Farkas	2024-04-10	2024-04-12	fail, two of eight samples
Production part approval	Brightwater Motion drive unit	Marcus Peil	2024-04-24	2024-04-29	pass with observation
First production lot	Brightwater Motion drive unit	Hollis Bramwell	2024-05-08	2024-05-16	retest scheduled
Request for quotation issued	Penrose Castings frame	Marcus Peil	2024-02-05	2024-02-05	complete
Sample order placed	Penrose Castings frame	Hollis Bramwell	2024-02-19	2024-02-22	in progress
First article dimensional inspection	Penrose Castings frame	Marcus Peil	2024-03-04	2024-03-10	pass
Thermal soak test	Penrose Castings frame	Tobias Nkemdirim	2024-03-18	2024-03-16	fail, two of eight samples
Endurance run to two thousand hours	Penrose Castings frame	Marcus Peil	2024-04-01	2024-04-02	pass with observation

Qualification step	Candidate source	Owner	Planned date	Actual date	Result
Process audit at supplier	Penrose Castings frame	Emil Farkas	2024-04-15	2024-04-19	retest scheduled
Production part approval	Penrose Castings frame	Tobias Nkemdirim	2024-04-29	2024-05-06	complete
First production lot	Penrose Castings frame	Hollis Bramwell	2024-05-13	2024-05-12	in progress

Invoicing and days outstanding

Collections outpaced invoicing this period, which flatters the cash number and does not repeat. Outstanding days improved from 52 to 55. Days sales outstanding closed at 55 days. The plant ran a single shift. The queue was tracked on a whiteboard. Hollis Bramwell moved collections calls to the account teams. Receipts of 1920 thousand outpaced invoicing. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Cash conversion for a deployment now takes weeks fewer than it did a year ago, entirely through process changes. Outstanding days improved from 52 to 55. Two receivables aged past ninety days. The plant ran a single shift. The queue was tracked on a whiteboard. Hollis Bramwell moved collections calls to the account teams. Pinebank Distribution requires a separate submission path. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

The controller closed the books faster than in any prior period, which matters because decisions in this meeting depend on it. Hollis Bramwell moved collections calls to the account teams. Pinebank Distribution requires a separate submission path. The plant ran a single shift. The queue was tracked on a whiteboard. Two receivables aged past ninety days. Days sales outstanding closed at 55 days. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

Collections calls are now made by the account team rather than by finance alone, which is uncomfortable and effective. Pinebank Distribution requires a separate submission path. Hollis Bramwell moved collections calls to the account teams. The plant ran a single shift. The queue was tracked on a whiteboard. Days sales outstanding closed at 55 days. Receipts of 1920 thousand outpaced invoicing. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

Nothing in the receivables ledger suggests a credit problem; everything in it suggests a paperwork problem. Collections totalled 1920 thousand dollars. Hollis Bramwell moved collections calls to the account teams. The plant ran a single shift. The queue was tracked on a whiteboard. Two receivables aged past ninety days. Receipts of 1920 thousand outpaced invoicing. The Beacon WMS adapter took most of the test cell time. Slipped deals 6, including Pinebank Distribution. Uptime 96.4 percent, interventions every 274 hours. Contract crew Northfield closed Norfolk without a second visit.

Terms granted in negotiation are cash decisions made by people who do not carry the cash number. Days sales outstanding closed at 55 days. Receipts of 1920 thousand outpaced invoicing. The plant ran a single shift. The queue was tracked on a whiteboard. Outstanding days improved from 52 to 55. Hollis Bramwell moved collections calls to the account teams. Days outstanding 55, Havering Logistics the largest balance. Uptime 96.4 percent, interventions every 274 hours. Utilisation 88 percent, Contract crew Northfield fully committed. Go-live cycle 64 days at Mesquite.

Inventory coverage by commodity and stocking point, March 2024

Commodity	Stocking point	On hand units	Coverage weeks	Policy weeks	Action agreed
Drive units	Plant stockroom	36	2	4	reduce to policy
Lidar assemblies	Plant stockroom	28	7	6	expedite inbound
Battery packs	Plant stockroom	25	1	8	review with supplier
Castings	Plant stockroom	23	8	4	disposition required
Sheet metal	Plant stockroom	18	3	6	raise buffer
Wire harness	Plant stockroom	16	10	8	hold policy
Controllers	Plant stockroom	51	5	4	reduce to policy
Caster and wheel sets	Plant stockroom	37	12	6	expedite inbound
Drive units	Regional depots	18	3	8	review with supplier

Commodity	Stocking point	On hand units	Coverage weeks	Policy weeks	Action agreed
Lidar assemblies	Regional depots	14	11	4	disposition required
Battery packs	Regional depots	12	6	6	raise buffer
Castings	Regional depots	11	13	8	hold policy
Sheet metal	Regional depots	9	4	4	reduce to policy
Wire harness	Regional depots	8	9	6	expedite inbound
Controllers	Regional depots	25	2	8	review with supplier
Caster and wheel sets	Regional depots	18	10	4	disposition required

Spending and scenarios

Runway under the middle scenario extended, and the review chose to plan against that case while holding triggers for the downside. Marguerite Do holds the trigger list. Burn for the period was 2455 thousand dollars. The plant ran a single shift. The queue was tracked on a whiteboard. Runway moved from 26 to 25 months. Spending ran 2455 thousand against 2380 thousand. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Scenario planning is only useful if the triggers are specific, so each scenario now names the observable that fires it. Capital spend was 380 thousand dollars. Runway moved from 26 to 25 months. The plant ran a single shift. The queue was tracked on a whiteboard. Burn for the period was 2455 thousand dollars. Spending ran 2455 thousand against 2380 thousand. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

Gross margin per deployed unit is improving slowly, and the improvement is in installation labour rather than in bill of materials. Runway stands at 25 months on the middle case. Test-cell capital was deferred again. The plant ran a single shift. The queue was tracked on a whiteboard. Capital spend was 380 thousand dollars. Marguerite Do holds the trigger list. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

The finance team rebuilt the model bottom-up from the site queue, and the new version disagrees with the old one on timing rather than on total. Runway moved from 26 to 25 months. Runway stands at 25 months on the middle case. The plant ran a single shift. The queue was tracked on a whiteboard. Capital spend was 380 thousand dollars. Spending ran 2455 thousand against 2380 thousand. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

Cutting capital spend buys months now and costs build capacity later, which is a trade this meeting keeps making. Spending ran 2455 thousand against 2380 thousand. Burn for the period was 2455 thousand dollars. The plant ran a single shift. The queue was tracked on a whiteboard. Marguerite Do holds the trigger list. Runway moved from 26 to 25 months. The Beacon WMS adapter took most of the test cell time. Slipped deals 6, including Pinebank Distribution. Uptime 96.4 percent, interventions every 274 hours. Contract crew Northfield closed Norfolk without a second visit.

Burn by category matters more than burn in total, because the total has been flat while its composition changed twice. Runway stands at 25 months on the middle case. Test-cell capital was deferred again. The plant ran a single shift. The queue was tracked on a whiteboard. Marguerite Do holds the trigger list. Capital spend was 380 thousand dollars. Days outstanding 55, Havering Logistics the largest balance. Uptime 96.4 percent, interventions every 274 hours. Utilisation 88 percent, Contract crew Northfield fully committed. Go-live cycle 64 days at Mesquite.

Product checkpoints

Fleet orchestration release slipped a milestone, and the slip was accepted in exchange for keeping the docking regression fix on schedule. Field data now sets the reliability backlog order. Adapter work crowded out platform work again. The plant ran a single shift. The queue was tracked on a whiteboard. Documentation lags the current release. Griffin Tasse brought the decision to stop one feature. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Field data now drives the reliability backlog, which is a change from prioritising by the loudest account. Release staging across sites is now standard. Documentation lags the current release. The plant ran a single shift. The queue was tracked on a whiteboard. Griffin Tasse brought the decision to stop one feature. Adapter work crowded out platform work

again. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

Pilot features running at two accounts have no path to general availability, and that gap was made explicit. The Beacon WMS adapter absorbed most of the engineering effort. Griffin Tasse brought the decision to stop one feature. The plant ran a single shift. The queue was tracked on a whiteboard. Adapter work crowded out platform work again. Field data now sets the reliability backlog order. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

Engineering capacity allocation between new sites and installed base was reset toward the installed base this period. Documentation lags the current release. Release staging across sites is now standard. The plant ran a single shift. The queue was tracked on a whiteboard. Griffin Tasse brought the decision to stop one feature. The Beacon WMS adapter absorbed most of the engineering effort. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

Integration variety across warehouse hosts is the tax the roadmap pays every quarter. Documentation lags the current release. Griffin Tasse brought the decision to stop one feature. The plant ran a single shift. The queue was tracked on a whiteboard. Adapter work crowded out platform work again. Field data now sets the reliability backlog order. The Beacon WMS adapter took most of the test cell time. Slipped deals 6, including Pinebank Distribution. Uptime 96.4 percent, interventions every 274 hours. Contract crew Northfield closed Norfolk without a second visit.

The warehouse-management adapter absorbed more engineering effort than any other item, and integration variety is the reason. Adapter work crowded out platform work again. Release staging across sites is now standard. The plant ran a single shift. The queue was tracked on a whiteboard. Two roadmap checkpoints cleared; one slipped. Field data now sets the reliability backlog order. Days outstanding 55, Havering Logistics the largest balance. Uptime 96.4 percent, interventions every 274 hours. Utilisation 88 percent, Contract crew Northfield fully committed. Go-live cycle 64 days at Mesquite.

Work in process ageing at the March 2024 cut-off

Build lot	Units	Days in work in process	Held for	Expected release
LOT-0201	4	3	controller firmware load	2024-04-15
LOT-0202	1	14	customer configuration decision	2024-04-19
LOT-0203	5	2	test cell slot	2024-04-23
LOT-0204	4	18	harness rework	2024-04-27
LOT-0205	4	5	nothing, awaiting ship date	2024-05-01
LOT-0206	3	20	drive unit	2024-05-05
LOT-0207	3	11	lidar window assembly	2024-05-09
LOT-0208	2	26	controller firmware load	2024-05-13
LOT-0209	3	2	customer configuration decision	2024-05-17
LOT-0210	1	18	test cell slot	2024-05-21
LOT-0211	4	9	harness rework	2024-05-25
LOT-0212	3	24	nothing, awaiting ship date	2024-05-29
LOT-0213	3	3	drive unit	2024-06-02
LOT-0214	2	14	lidar window assembly	2024-06-06
LOT-0215	2	2	controller firmware load	2024-06-10
LOT-0216	1	18	customer configuration decision	2024-06-14
LOT-0217	2	5	test cell slot	2024-06-18
LOT-0218	1	20	harness rework	2024-06-22

Decisions, owners and dates recorded in March 2024

An item that had rolled twice was closed by decision rather than by completion, with the rationale written down. Marcus Peil inherited an item after a role change. One item closed with measured evidence. The plant ran a single shift. The queue was tracked on a whiteboard. Lucia Mbeki-Hart, Controller, took the largest open item. Three items carried forward into 2024-05-09. Go-live cycle 64 days at Mesquite. Bookings 38 units across 79 pursuits. Marcus Peil and Hollis Bramwell disagreed on sequencing. Headcount 117 of 124, Marguerite Do reporting.

Due dates were set against the next meeting rather than against a vague month end, which improved follow-through visibly. Lucia Mbeki-Hart, Controller, took the largest open item. Owners were named and dates set against 2024-05-09. The plant ran a single shift. The queue was tracked on a whiteboard. Marcus Peil inherited an item after a role change. One item closed with measured evidence. Slipped deals 6, including Pinebank Distribution. Depot fill 85 percent at Atlanta depot. Atlanta depot cleared its repair backlog. Build plan 44, actual 41, Caster and wheel sets short.

Two owners pushed back on dates they had not been consulted about, and the dates were changed in the room. The oldest item dates from two sessions back. Three items carried forward into 2024-05-09. The plant ran a single shift. The queue was tracked on a whiteboard. One item closed with measured evidence. Owners were named and dates set against 2024-05-09. Tessellate Controls quoted lead times moved again. Contract crew Northfield closed Norfolk without a second visit. Burn 2455 thousand, runway 25 months. Uptime 96.4 percent, interventions every 274 hours.

Follow-up between meetings will be handled in writing, with the chair reading the updates rather than convening a session. Owners were named and dates set against 2024-05-09. Three items carried forward into 2024-05-09. The plant ran a single shift. The queue was tracked on a whiteboard. Two due dates were changed in the room. The oldest item dates from two sessions back. Work in process 26 units, mostly Caster and wheel sets. Headcount 117 of 124, Marguerite Do reporting. Uptime 96.4 percent, interventions every 274 hours. Functional test ran 94 percent first pass.

This appendix material was not read in the meeting and is kept for the record because two owners asked for it. It concerns Kennesaw and, in part, Mesquite. This detail was not read into the March 2024 session. The plant ran a single shift. The queue was tracked on a whiteboard. The material was retained after the 2024-04-10 meeting closed. Lucia Mbeki-Hart asked for the note to be kept. Functional test ran 94 percent first pass. Depot fill 85 percent at Atlanta depot. Headcount 117 of 124, Marguerite Do reporting. On-time delivery 86 percent, Kestrel Drive Systems the outlier.

Correspondence with the affected customer accounts is paraphrased rather than quoted, on the advice of the account teams. It concerns Kennesaw and, in part, Mesquite. Marrowfield Grocers is named only in the working file. The plant ran a single shift. The queue was tracked on a whiteboard. The chair reviewed it before 2024-05-09. Lucia Mbeki-Hart asked for the note to be kept. Days outstanding 55, Havering Logistics the largest balance. Attrition 11 percent annualised in Channel and reseller. Tessellate Controls quoted lead times moved again. Utilisation 88 percent, Contract crew Northfield fully committed.

Action register as it stood after the March 2024 session

Action	Accountable owner	First raised	Revised due date	State	Note
OR-0214 Obtain written lead-time commitment from Kestrel on DU-4	Hollis Bramwell	2024-04-10	2024-05-08	Open	none yet
OR-0220 Move collections calls to the account teams	Lucia Mbeki-Hart	2024-04-01	2024-04-21	In progress	outstanding
OR-0223 Reconcile the two uptime definitions with the customer	Owen Castellanos	2024-03-28	2024-04-27	Closed	measured result attached
OR-0226 Cost the second-shift ramp against overtime	Marcus Peil	2024-03-24	2024-05-03	Open	outstanding
OR-0229 Bring deal-level notes for the top ten pursuits	Marguerite Do	2024-03-20	2024-05-09	In progress	outstanding
OR-0232 Measure onboarding time to productivity for crews	Renata Voss	2024-03-16	2024-05-15	Closed	memo circulated
OR-0235 Publish the supplier scorecard with weighted criteria	Hollis Bramwell	2024-03-12	2024-05-21	Open	outstanding
OR-0238 Split the reliability backlog by build vintage	Tobias Nkemdirim	2024-03-08	2024-05-27	In progress	outstanding
OR-0241 Stage software releases across sites rather	Griffin Tasse	2024-03-04	2024-06-02	Closed	report filed

Action	Accountable owner	First raised	Revised due date	State	Note
than at once					
OR-0244 Complete process capability study on the bond operation	Emil Farkas	2024-02-29	2024-06-08	Open	outstanding
OR-0247 Size the buffer stock on long-lead commodities	Hollis Bramwell	2024-02-25	2024-06-14	In progress	outstanding
OR-0250 Reissue the deployment playbook network section	Priya Ramanathan	2024-02-21	2024-06-20	Closed	report filed
OR-0253 Set a plan freeze window inside the build month	Emil Farkas	2024-02-17	2024-06-26	Open	outstanding
OR-0256 Refresh compensation bands for field engineering	Renata Voss	2024-02-13	2024-07-02	In progress	outstanding
OR-0259 Re-cut the stage definitions in the pipeline report	Marguerite Do	2024-02-09	2024-07-08	Closed	measured result attached
OR-0262 Read the tooling ownership clauses on four part numbers	Hollis Bramwell	2024-02-05	2024-07-14	Open	outstanding
