# MANAGEMENT OPERATING REVIEW - RECORD 016

Helioscope Robotics, Inc. - diligence file reference OPERATING_REVIEWS-016

## Monthly Business Review for May 2025: purpose and attendance

Guests were limited to the sections that concern them, ending a habit of full attendance for its own sake. Lucia Mbeki-Hart, Controller, presented the operations section. One function submitted its pre-read late. A release regression opened the session. The regression list ran to nine items. The next session is set for 2025-07-10. Owen Castellanos attended as VP Customer Success. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

The packet was shortened after a complaint that the previous edition buried the decisions behind twenty pages of charts. Lucia Mbeki-Hart, Controller, presented the operations section. The next session is set for 2025-07-10. A release regression opened the session. The regression list ran to nine items. The Monthly Business Review convened for May 2025. Pre-reads went out ahead of the 2025-06-05 session. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

Standing agenda order was changed so that the constrained function presents first while the room is still fresh. Notes were circulated on 2025-06-05. One function submitted its pre-read late. A release regression opened the session. The regression list ran to nine items. Owen Castellanos attended as VP Customer Success. Lucia Mbeki-Hart, Controller, presented the operations section. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

The chair asked each function for the one number it would defend to a customer, which produced a more useful hour than the slides did. The next session is set for 2025-07-10. The Monthly Business Review convened for May 2025. A release regression opened the session. The regression list ran to nine items. Owen Castellanos attended as VP Customer Success. One function submitted its pre-read late. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

## Sales intake review

Renewal conversations for the fleet software attached faster than expected, and the attach rate is now high enough to model separately. Signed volume: 84 units, win rate 33 percent. Quillon Home Supply accounted for the largest single order. A release regression opened the session. The regression list ran to nine items. Discount depth peaked on the Bexley Pharmaceutical Wholesale multi-site award. Win rate held at 33 percent on 138 live opportunities. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Bookings quality, measured by how much of the signed volume has a named site and a readiness date, improved without any change in headline volume. Open pursuits number 138, up from 133. Signed volume: 84 units, win rate 33 percent. A release regression opened the session. The regression list ran to nine items. The book took 84 units, against 231 last period. Intake closed at 84 units for May 2025. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

Two of the three regions carried the number this period, and the third missed on a single account that moved its own board meeting. Discount depth peaked on the Bexley Pharmaceutical Wholesale multi-site award. Intake closed at 84 units for May 2025. A release regression opened the session. The regression list ran to nine items. Quillon Home Supply accounted for the largest single order. Open pursuits number 138, up from 133. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

Our win rate improved on new logos and weakened on expansions, an inversion of last period that nobody in the room could yet explain. Signed volume: 84 units, win rate 33 percent. Discount depth peaked on the Bexley

Pharmaceutical Wholesale multi-site award. A release regression opened the session. The regression list ran to nine items. Open pursuits number 138, up from 133. Win rate held at 33 percent on 138 live opportunities. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

Regional coverage remains uneven, with one seller carrying a territory that the coverage model says needs two. Signed volume: 84 units, win rate 33 percent. Discount depth peaked on the Bexley Pharmaceutical Wholesale multi-site award. A release regression opened the session. The regression list ran to nine items. The book took 84 units, against 231 last period. Open pursuits number 138, up from 133. Dana Whitlock owns the Wire harness recovery. Work in process 36 units, mostly Wire harness. Build plan 84, actual 81, Wire harness short. Requisitions open 26, Owen Castellanos holding the list.

Nobody in commercial believes the current forecast discipline is good enough, and the review agreed to inspect deal-level notes rather than roll-ups. Intake closed at 84 units for May 2025. Open pursuits number 138, up from 133. A release regression opened the session. The regression list ran to nine items. Quillon Home Supply accounted for the largest single order. The book took 84 units, against 231 last period. Chandler South carries 27 of the queued fleet. Burn 3210 thousand, runway 15 months. Atlanta depot cleared its repair backlog. Go-live cycle 45 days at Cedar Bluff.

**Warranty claims by build vintage and line, May 2025**

| Build vintage | Product line | Fleet units | Claims in period | Warranty cost per unit USD | Trend |
|---|---|---|---|---|---|
| 2023 build | HS-200 tote handler | 49 | 11 | 246 | flat |
| 2024 first half build | HS-200 tote handler | 78 | 3 | 224 | worsening |
| 2024 second half build | HS-200 tote handler | 95 | 13 | 290 | improving sharply |
| 2025 first half build | HS-200 tote handler | 136 | 13 | 268 | first period measured |
| 2025 second half build | HS-200 tote handler | 159 | 22 | 202 | improving |
| 2026 build | HS-200 tote handler | 179 | 15 | 312 | flat |
| 2023 build | HS-400 pallet mover | 46 | 6 | 224 | worsening |
| 2024 first half build | HS-400 pallet mover | 81 | 3 | 246 | improving sharply |
| 2024 second half build | HS-400 pallet mover | 104 | 13 | 268 | first period measured |
| 2025 first half build | HS-400 pallet mover | 121 | 10 | 202 | improving |
| 2025 second half build | HS-400 pallet mover | 162 | 22 | 312 | flat |
| 2026 build | HS-400 pallet mover | 176 | 18 | 290 | worsening |

## Deal inspection

Where a pilot converted, the common thread was an operations sponsor who owned a throughput target rather than a technology budget. Weighted coverage sits near 138 open pursuits. Conversion into commercial close remains the weak stage. A release regression opened the session. The regression list ran to nine items. Lucia Mbeki-Hart owns the re-qualification pass. Deals leaving the period: 7, most still dated. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Forecast accuracy at the regional level was worse than the aggregate, meaning two regions cancelled each other's errors out. Slippage totalled 7 opportunities against 13 before. Two losses went to the same competitor. A release regression opened the session. The regression list ran to nine items. Deals leaving the period: 7, most still dated. Lucia Mbeki-Hart owns the re-qualification pass. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

Stage conversion tells a cleaner story than the headline number does, because the drop is concentrated between technical validation and commercial close. The Tenmile Freight pursuit re-dated again. Slippage totalled 7 opportunities against 13 before. A release regression opened the session. The regression list ran to nine items. Lucia Mbeki-Hart owns the re-qualification pass. Conversion into commercial close remains the weak stage. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

Deal inspection surfaced a habit of re-dating rather than re-qualifying, and the review asked for a hard rule on how many times a close date can move. Weighted coverage sits near 138 open pursuits. Slippage totalled 7 opportunities against 13 before. A release regression opened the session. The regression list ran to nine items. Two losses went to the same competitor. Conversion into commercial close remains the weak stage. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

Qualification notes on the top ten pursuits were read aloud, which took most of the meeting and was the most useful thing in it. Weighted coverage sits near 138 open pursuits. Lucia Mbeki-Hart owns the re-qualification pass. A release regression opened the session. The regression list ran to nine items. The Tenmile Freight pursuit re-dated again. Deals leaving the period: 7, most still dated. Dana Whitlock owns the Wire harness recovery. Work in process 36 units, mostly Wire harness. Build plan 84, actual 81, Wire harness short. Requisitions open 26, Owen Castellanos holding the list.

Multi-year commitments are becoming the norm in this segment, which stabilises the site queue and complicates the revenue phasing. Slippage totalled 7 opportunities against 13 before. Lucia Mbeki-Hart owns the re-qualification pass. A release regression opened the session. The regression list ran to nine items. Two losses went to the same competitor. Deals leaving the period: 7, most still dated. Chandler South carries 27 of the queued fleet. Burn 3210 thousand, runway 15 months. Atlanta depot cleared its repair backlog. Go-live cycle 45 days at Cedar Bluff.

**Headcount plan against actual by function and location, May 2025**

| Function | Location | Plan | Actual | Gap | Open requisitions |
|---|---|---|---|---|---|
| Engineering | headquarters and plant | 46 | 9 | 58 | 5 |
| Manufacturing | headquarters and plant | 31 | 5 | 41 | 2 |
| Deployment and field service | headquarters and plant | 25 | 3 | 34 | 2 |
| Commercial | headquarters and plant | 17 | 40 | 0 | 1 |
| Customer success | headquarters and plant | 9 | 31 | 0 | 1 |
| Supply chain | headquarters and plant | 7 | 23 | 0 | 5 |
| Finance and administration | headquarters and plant | 5 | 17 | 0 | 4 |
| People | headquarters and plant | 2 | 9 | 0 | 6 |
| Engineering | field and regional | 25 | 4 | 29 | 4 |
| Manufacturing | field and regional | 17 | 2 | 20 | 1 |
| Deployment and field service | field and regional | 14 | 2 | 17 | 1 |
| Commercial | field and regional | 9 | 21 | 0 | 0 |
| Customer success | field and regional | 5 | 15 | 0 | 0 |
| Supply chain | field and regional | 3 | 12 | 0 | 4 |
| Finance and administration | field and regional | 3 | 9 | 0 | 3 |
| People | field and regional | 1 | 4 | 0 | 5 |

## Go-live schedule review

Post-go-live stabilisation periods are running longer than the plan allows, so crews are being pulled back to sites already signed off. The queue carries 27 sites, 24 a period ago. Salinas Valley and Cedar Bluff both cleared acceptance testing. A release regression opened the session. The regression list ran to nine items. Owen Castellanos sequenced the queue by readiness. Go-live cycle: 45 days, from 47. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Site queue depth grew again, and the queue is now long enough that sequencing decisions have commercial consequences rather than just scheduling ones. Go-live cycle: 45 days, from 47. Queue depth reached 27 sites. A release regression opened the session. The regression list ran to nine items. Chandler South was held at the readiness gate. Salinas Valley and Cedar Bluff both cleared acceptance testing. Build plan 84, actual 81, Wire harness short. Burn 3210

thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

Readiness surveys are now a hard gate, and two sites were held at the gate rather than allowed to start with known network gaps. Contract to go-live averaged 45 days. The queue carries 27 sites, 24 a period ago. A release regression opened the session. The regression list ran to nine items. Chandler South was held at the readiness gate. Go-live cycle: 45 days, from 47. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

Customer-side readiness remains the single largest determinant of go-live date, and it is the variable the company controls least. Queue depth reached 27 sites. Chandler South was held at the readiness gate. A release regression opened the session. The regression list ran to nine items. The queue carries 27 sites, 24 a period ago. Go-live cycle: 45 days, from 47. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

Parallel deployment at two sites in the same region worked for the first time, which changes what the queue can absorb. The queue carries 27 sites, 24 a period ago. Chandler South was held at the readiness gate. A release regression opened the session. The regression list ran to nine items. Queue depth reached 27 sites. Owen Castellanos sequenced the queue by readiness. Dana Whitlock owns the Wire harness recovery. Work in process 36 units, mostly Wire harness. Build plan 84, actual 81, Wire harness short. Requisitions open 26, Owen Castellanos holding the list.

The queue holds three sites with no confirmed dock date from the customer, and the review declined to schedule crews against hope. Owen Castellanos sequenced the queue by readiness. Go-live cycle: 45 days, from 47. A release regression opened the session. The regression list ran to nine items. Salinas Valley and Cedar Bluff both cleared acceptance testing. Chandler South was held at the readiness gate. Chandler South carries 27 of the queued fleet. Burn 3210 thousand, runway 15 months. Atlanta depot cleared its repair backlog. Go-live cycle 45 days at Cedar Bluff.

## Crew loading and certification

Deployment capacity is a function of certified crew leads, not of headcount, and the certification pipeline is the part nobody was watching. Crew leads remain the gating resource. Fort Dodge needed a second crew visit. A release regression opened the session. The regression list ran to nine items. Utilisation was 86 percent against 88 percent. Certified crew count trails the site queue of 27. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Travel load on the crew has become a retention issue, and the two most recent resignations both named it in an exit conversation. Fort Dodge needed a second crew visit. Utilisation was 86 percent against 88 percent. A release regression opened the session. The regression list ran to nine items. Travel days per site fell again. Crew leads remain the gating resource. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

Certification standards were tightened rather than relaxed under schedule pressure, and the review recorded that choice deliberately. Installer utilisation ran at 86 percent. Crew leads remain the gating resource. A release regression opened the session. The regression list ran to nine items. Utilisation was 86 percent against 88 percent. Fort Dodge needed a second crew visit. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

Utilisation above ninety percent leaves nothing for the unplanned second visit, and the second visit happens on roughly one site in four. Certified crew count trails the site queue of 27. Travel days per site fell again. A release regression opened the session. The regression list ran to nine items. Crew leads remain the gating resource. Dana Whitlock covered two regions this period. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

Handover from crew to service is still informal, and two accounts have complained about who to call after go-live. Certified crew count trails the site queue of 27. Installer utilisation ran at 86 percent. A release regression opened the

session. The regression list ran to nine items. Crew leads remain the gating resource. Dana Whitlock covered two regions this period. Dana Whitlock owns the Wire harness recovery. Work in process 36 units, mostly Wire harness. Build plan 84, actual 81, Wire harness short. Requisitions open 26, Owen Castellanos holding the list.

Contractor coverage buys schedule protection at a cost per site that the review agreed to carry for a bounded number of jobs. Dana Whitlock covered two regions this period. Installer utilisation ran at 86 percent. A release regression opened the session. The regression list ran to nine items. Crew leads remain the gating resource. Travel days per site fell again. Chandler South carries 27 of the queued fleet. Burn 3210 thousand, runway 15 months. Atlanta depot cleared its repair backlog. Go-live cycle 45 days at Cedar Bluff.

**Requisition ageing and decisions, May 2025**

| Requisition | Role | Days open | Stage | Recruiting owner | Decision this review |
|---|---|---|---|---|---|
| REQ-1640 | Field engineer | 47 | on-site loop | hiring manager sourced | widen radius |
| REQ-1642 | Crew lead | 76 | offer out | Renata Voss | pause |
| REQ-1644 | Controls engineer | 57 | offer declined | Renata Voss | close and re-scope |
| REQ-1646 | Manufacturing technician | 86 | on hold | hiring manager sourced | convert contractor |
| REQ-1648 | Buyer and planner | 43 | closed without hire | Renata Voss | continue |
| REQ-1650 | Solutions architect | 76 | sourcing | external agency | raise band |
| REQ-1652 | Service dispatcher | 51 | phone screen | internal recruiting | widen radius |
| REQ-1654 | Reliability engineer | 80 | on-site loop | Renata Voss | pause |
| REQ-1656 | Field engineer (second opening) | 45 | offer out | hiring manager sourced | close and re-scope |
| REQ-1658 | Crew lead (second opening) | 66 | offer declined | hiring manager sourced | convert contractor |
| REQ-1660 | Controls engineer (second opening) | 39 | on hold | Renata Voss | continue |
| REQ-1662 | Manufacturing technician (second opening) | 72 | closed without hire | external agency | raise band |
| REQ-1664 | Buyer and planner (second opening) | 47 | sourcing | internal recruiting | widen radius |
| REQ-1666 | Solutions architect (second opening) | 76 | phone screen | external agency | pause |
| REQ-1668 | Service dispatcher (second opening) | 57 | on-site loop | Renata Voss | close and re-scope |
| REQ-1670 | Reliability engineer (second opening) | 86 | offer out | external agency | convert contractor |
| REQ-1672 | Field engineer (backfill) | 43 | offer declined | Renata Voss | continue |

## Plant performance

Manufacturing engineering closed out the top three line stoppages, and the fourth turns out to be a fixture that nobody owns. Overtime carried the closing two weeks. Attainment gap: 3 units short of plan. A release regression opened the session. The regression list ran to nine items. Plan was 84 units; the line delivered 81. Output reached 81 units, from 79. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Plan stability is now the loudest complaint from the plant, with three revisions to the same month's plan in one period. Work in process ended at 36 units. Griffin Tasse owns the line rebalance. A release regression opened the session. The regression list ran to nine items. The Beacon WMS adapter drove most of the changeover time. Plan was 84 units; the line delivered 81. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

The plant met its unit number and missed its labour-hours-per-unit target, which the review treated as the more important miss. Plan was 84 units; the line delivered 81. Overtime carried the closing two weeks. A release regression opened the session. The regression list ran to nine items. Output reached 81 units, from 79. Griffin Tasse owns the line rebalance. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

Line output has been steady for three periods while the plan has grown, which is a planning problem dressed up as an execution problem. Overtime carried the closing two weeks. Plan was 84 units; the line delivered 81. A release regression opened the session. The regression list ran to nine items. Griffin Tasse owns the line rebalance. Output reached 81 units, from 79. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

The build plan was cut mid-period rather than allowed to fail quietly, and the cut was communicated to deployment the same week. Overtime carried the closing two weeks. Plan was 84 units; the line delivered 81. A release regression opened the session. The regression list ran to nine items. Attainment gap: 3 units short of plan. Griffin Tasse owns the line rebalance. Dana Whitlock owns the Wire harness recovery. Work in process 36 units, mostly Wire harness. Build plan 84, actual 81, Wire harness short. Requisitions open 26, Owen Castellanos holding the list.

Second-shift ramp is going more slowly than planned because training the new operators takes line time from the first shift. Output reached 81 units, from 79. The Beacon WMS adapter drove most of the changeover time. A release regression opened the session. The regression list ran to nine items. Attainment gap: 3 units short of plan. Griffin Tasse owns the line rebalance. Chandler South carries 27 of the queued fleet. Burn 3210 thousand, runway 15 months. Atlanta depot cleared its repair backlog. Go-live cycle 45 days at Cedar Bluff.

## Carried constraints

Constraint under review: large-account uptime, at the improvement stage as of this session. Cedar Bluff uptime reached ninety-eight point one percent for two consecutive months, and the customer agreed to close the remediation plan with the parameter set carried into the standard configuration. Dana Whitlock owns the Wire harness recovery. Contract crew Verrado closed Fort Dodge without a second visit.

Tooling ownership is unclear on four part numbers, and the review asked for the contracts to be read rather than remembered. Coverage weeks on long-lead parts were extended. Expedite activity rose with the build plan of 84. A release regression opened the session. The regression list ran to nine items. Lucia Mbeki-Hart issued the first supplier scorecards. Supplier on-time delivery came in at 93 percent. Frame and drive assembly ran 96 percent first pass. Uptime 98.1 percent, interventions every 381 hours. Burn 3210 thousand, runway 15 months. Days outstanding 46, Quillon Home Supply the largest balance.

Where tooling belongs to the supplier, the exit cost is real and it is not written down anywhere. Brightwater Motion missed two consecutive commit dates. Supplier on-time delivery came in at 93 percent. A release regression opened the session. The regression list ran to nine items. Calder Battery Works improved after a site visit. On-time delivery was 93 percent, from 91 percent. Tenmile Freight asked for the Beacon WMS adapter configuration. Go-live cycle 45 days at Cedar Bluff. Build plan 84, actual 81, Wire harness short. Uptime 98.1 percent, interventions every 381 hours.

**Leavers and backfill position, May 2025**

| Function | Leavers in period | Annualised attrition % | Primary stated reason | Backfill position |
|---|---|---|---|---|
| Engineering | 1 | 4 | relocation | not backfilling |
| Manufacturing | 4 | 12 | career change outside the industry | contractor covering |
| Deployment and field service | 0 | 7 | manager relationship | deferred to next quarter |
| Commercial | 3 | 14 | retirement | requisition open |
| Customer success | 1 | 5 | performance | backfilled internally |
| Supply chain | 3 | 10 | travel load | not backfilling |
| Finance and administration | 0 | 3 | compensation | contractor covering |
| People | 2 | 11 | relocation | deferred to next quarter |
| Engineering (contract) | 0 | 6 | career change outside the industry | requisition open |
| Manufacturing (contract) | 2 | 13 | manager relationship | backfilled internally |
| Deployment and field service (contract) | 1 | 8 | retirement | not backfilling |
| Commercial (contract) | 3 | 15 | performance | contractor covering |
| Customer success (contract) | 1 | 4 | travel load | deferred to next quarter |

## Quality performance

Defect Pareto shifted after the bond-line fix, and the new top category is a connector seating issue with a simple tooling answer. Rework hours concentrated in the sensor cell. Scrap ran 17 thousand, from 19 thousand. A release regression opened the session. The regression list ran to nine items. Yield was 96 percent against 95 percent. Ironbark Sheet Metal changed a process without notice. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Nobody wanted to hold shipments, and the review held them anyway on eleven units that had incomplete bond-line records. First-pass yield finished at 96 percent. Scrap ran 17 thousand, from 19 thousand. A release regression opened the session. The regression list ran to nine items. Scrap totalled 17 thousand dollars. Yield was 96 percent against 95 percent. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

Scrap dollars tell a different story from scrap units, because the units being scrapped are the expensive ones. Ironbark Sheet Metal changed a process without notice. Scrap totalled 17 thousand dollars. A release regression opened the session. The regression list ran to nine items. Scrap ran 17 thousand, from 19 thousand. First-pass yield finished at 96 percent. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

The corrective action closed with evidence rather than with an assertion, and the evidence was three weeks of clean sampling data. Ironbark Sheet Metal changed a process without notice. Scrap ran 17 thousand, from 19 thousand. A release regression opened the session. The regression list ran to nine items. Yield was 96 percent against 95 percent. Tobias Nkemdirim signed the corrective action. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

Inspection sampling reverted to the standard plan with a documented trigger, so the next excursion will be caught earlier. First-pass yield finished at 96 percent. Tobias Nkemdirim signed the corrective action. A release regression opened the session. The regression list ran to nine items. Scrap ran 17 thousand, from 19 thousand. Yield was 96 percent against 95 percent. Dana Whitlock owns the Wire harness recovery. Work in process 36 units, mostly Wire harness. Build plan 84, actual 81, Wire harness short. Requisitions open 26, Owen Castellanos holding the list.

Quality engineering asked for one more headcount and got a re-prioritisation instead, which the review acknowledged as a real trade. Ironbark Sheet Metal changed a process without notice. First-pass yield finished at 96 percent. A release regression opened the session. The regression list ran to nine items. Yield was 96 percent against 95 percent. Scrap ran 17 thousand, from 19 thousand. Chandler South carries 27 of the queued fleet. Burn 3210 thousand, runway 15 months. Atlanta depot cleared its repair backlog. Go-live cycle 45 days at Cedar Bluff.

## Inbound supply position

Dual sourcing costs more per unit during the overlap period, and the review accepted that cost with its eyes open. Expedite activity rose with the build plan of 84. Supplier on-time delivery came in at 93 percent. A release regression opened the session. The regression list ran to nine items. On-time delivery was 93 percent, from 91 percent. Lucia Mbeki-Hart issued the first supplier scorecards. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Tooling ownership is unclear on four part numbers, and the review asked for the contracts to be read rather than remembered. Lucia Mbeki-Hart issued the first supplier scorecards. Coverage weeks on long-lead parts were extended. A release regression opened the session. The regression list ran to nine items. Expedite activity rose with the build plan of 84. Brightwater Motion missed two consecutive commit dates. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

Where tooling belongs to the supplier, the exit cost is real and it is not written down anywhere. On-time delivery was 93 percent, from 91 percent. Expedite activity rose with the build plan of 84. A release regression opened the session. The regression list ran to nine items. Lucia Mbeki-Hart issued the first supplier scorecards. Supplier on-time delivery came in at 93 percent. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

Lead-time creep is the pattern to watch, because quoted lead times moved without any supplier formally notifying a change. Supplier on-time delivery came in at 93 percent. Brightwater Motion missed two consecutive commit dates. A release regression opened the session. The regression list ran to nine items. Calder Battery Works improved after a site visit. Expedite activity rose with the build plan of 84. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

Purchase order acknowledgements are now chased on a fixed cadence, which sounds trivial and caught two silent date pushes. Supplier on-time delivery came in at 93 percent. Brightwater Motion missed two consecutive commit dates. A release regression opened the session. The regression list ran to nine items. Calder Battery Works improved after a site visit. On-time delivery was 93 percent, from 91 percent. Dana Whitlock owns the Wire harness recovery. Work in process 36 units, mostly Wire harness. Build plan 84, actual 81, Wire harness short. Requisitions open 26, Owen Castellanos holding the list.

Forecast sharing with the top five suppliers began this period, and two of them immediately improved their commit dates. On-time delivery was 93 percent, from 91 percent. Coverage weeks on long-lead parts were extended. A release regression opened the session. The regression list ran to nine items. Expedite activity rose with the build plan of 84. Calder Battery Works improved after a site visit. Chandler South carries 27 of the queued fleet. Burn 3210 thousand, runway 15 months. Atlanta depot cleared its repair backlog. Go-live cycle 45 days at Cedar Bluff.

**Burn by category, May 2025**

| Category | Period USD thousands | Prior period USD thousands | Movement % | Commentary |
|---|---|---|---|---|
| Engineering payroll | 489 | 474 | 3.2 | second hub fit-out |
| Manufacturing payroll and overheads | 288 | 375 | -23.2 | spares buy for the drive unit |
| Deployment labour, employees | 256 | 281 | -8.9 | contract crews on two sites |
| Deployment labour, contract crews | 224 | 187 | 19.8 | qualification testing |
| Commercial payroll | 128 | 375 | -65.9 | contract crews on two sites |

| Travel and subsistence | 64 | 656 | -90.2 | qualification testing |
| Insurance and compliance | 96 | 469 | -79.5 | overtime in the closing weeks |
| Test and validation materials | 128 | 562 | -77.2 | overtime in the closing weeks |
| Capital expenditure | 609 | 375 | 62.4 | spares buy for the drive unit |

## Material position

Buffer inventory on the drive unit is the deliberate cost of the lead-time problem, and the review sized it explicitly. Kit shortages were concentrated in low-value parts. Excess exposure sits in the superseded sensor head. A release regression opened the session. The regression list ran to nine items. Work in process moved from 33 to 36 units. Owen Castellanos owns the disposition decision. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17

thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Spare-part inventory and production inventory are competing for the same components, and production keeps winning by default. Work in process closed at 36 units. Work in process moved from 33 to 36 units. A release regression opened the session. The regression list ran to nine items. Excess exposure sits in the superseded sensor head. Floor space in staging is now the binding limit. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

The stockroom is holding parts for a configuration that has not been ordered in three quarters, and no one had noticed. Buffer stock on the drive unit was raised deliberately. Excess exposure sits in the superseded sensor head. A release regression opened the session. The regression list ran to nine items. Owen Castellanos owns the disposition decision. Kit shortages were concentrated in low-value parts. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

Long-lead buying decisions made two quarters ago are what the stockroom looks like today, for better and worse. Excess exposure sits in the superseded sensor head. Owen Castellanos owns the disposition decision. A release regression opened the session. The regression list ran to nine items. Buffer stock on the drive unit was raised deliberately. Floor space in staging is now the binding limit. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

Work in process climbed because units are being held for a single missing part rather than because the line slowed down. Excess exposure sits in the superseded sensor head. Owen Castellanos owns the disposition decision. A release regression opened the session. The regression list ran to nine items. Floor space in staging is now the binding limit. Work in process closed at 36 units. Dana Whitlock owns the Wire harness recovery. Work in process 36 units, mostly Wire harness. Build plan 84, actual 81, Wire harness short. Requisitions open 26, Owen Castellanos holding the list.

Excess and obsolete exposure sits almost entirely in the superseded sensor head, and the disposition decision has been deferred twice. Work in process closed at 36 units. Excess exposure sits in the superseded sensor head. A release regression opened the session. The regression list ran to nine items. Floor space in staging is now the binding limit. Owen Castellanos owns the disposition decision. Chandler South carries 27 of the queued fleet. Burn 3210 thousand, runway 15 months. Atlanta depot cleared its repair backlog. Go-live cycle 45 days at Cedar Bluff.

**Collections and days outstanding by account, May 2025**

| Account | Invoiced USD thousands | Received USD thousands | Days outstanding | Collection blocker |

## Uptime and interventions

Service credits remain the sharpest feedback loop the company has, and the review looked at exposure rather than at incurred credits alone. Fleet uptime averaged 98.1 percent. Interventions spaced 381 hours apart on the fleet median. A release regression opened the session. The regression list ran to nine items. Dana Whitlock leads the joint remediation plan. Uptime reached 98.1 percent, from 97.6 percent. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Intervention data is only as good as what the operators record, and two sites have stopped recording anything useful. Mean time between interventions was 381 hours. Quillon Home Supply measures uptime on a stricter basis. A release regression opened the session. The regression list ran to nine items. Interventions spaced 381 hours apart on the fleet median. Salinas Valley remains the weakest site on interventions. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

A single navigation parameter set improved intervention rates at every site it was applied to, which is now the standard configuration. Salinas Valley remains the weakest site on interventions. Quillon Home Supply measures uptime on a stricter basis. A release regression opened the session. The regression list ran to nine items. Dana Whitlock leads the joint remediation plan. Interventions spaced 381 hours apart on the fleet median. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

Intervention causes split roughly evenly between the robot, the facility and the operator, and only one of those three is ours to fix. Dana Whitlock leads the joint remediation plan. Uptime reached 98.1 percent, from 97.6 percent. A release regression opened the session. The regression list ran to nine items. Mean time between interventions was 381 hours. Fleet uptime averaged 98.1 percent. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

Software releases are now staged across sites rather than pushed at once, after a release regressed docking behaviour at two accounts. Mean time between interventions was 381 hours. Dana Whitlock leads the joint remediation plan. A release regression opened the session. The regression list ran to nine items. Quillon Home Supply measures uptime on a stricter basis. Salinas Valley remains the weakest site on interventions. Dana Whitlock owns the Wire harness recovery. Work in process 36 units, mostly Wire harness. Build plan 84, actual 81, Wire harness short. Requisitions open 26, Owen Castellanos holding the list.

Remote diagnostics closed more incidents without a visit than in any prior period, which is where the cost curve bends. Mean time between interventions was 381 hours. Interventions spaced 381 hours apart on the fleet median. A release regression opened the session. The regression list ran to nine items. Fleet uptime averaged 98.1 percent. Uptime reached 98.1 percent, from 97.6 percent. Chandler South carries 27 of the queued fleet. Burn 3210 thousand, runway 15 months. Atlanta depot cleared its repair backlog. Go-live cycle 45 days at Cedar Bluff.

## Depot fill and warranty

Spares fill rate from the regional depots governs how fast a field incident closes, and it has been the constraint at two sites. Vehicle stock is masking the true fill rate. Fill rate ran 96 percent against 94 percent. A release regression opened the session. The regression list ran to nine items. Return material flow remains slow. Warranty cost per fleet unit is falling. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Field engineers are carrying more parts in vehicles than the policy allows, which hides the true fill rate. Griffin Tasse approved the critical spares increase. Warranty cost per fleet unit is falling. A release regression opened the session.

The regression list ran to nine items. Return material flow remains slow. Depot fill rate was 96 percent. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

Warranty cost per fleet unit is falling, and the fall is real rather than a timing artefact of claim processing. Vehicle stock is masking the true fill rate. Griffin Tasse approved the critical spares increase. A release regression opened the session. The regression list ran to nine items. Fill rate ran 96 percent against 94 percent. Cedar Bluff took the planned sensor head replacements. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

Repair-versus-replace decisions are being made in the field without guidance, and the outcomes vary by engineer. Depot fill rate was 96 percent. Vehicle stock is masking the true fill rate. A release regression opened the session. The regression list ran to nine items. Return material flow remains slow. Cedar Bluff took the planned sensor head replacements. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

Every field incident that waited on a part this period waited on one of four part numbers. Return material flow remains slow. Depot fill rate was 96 percent. A release regression opened the session. The regression list ran to nine items. Warranty cost per fleet unit is falling. Fill rate ran 96 percent against 94 percent. Dana Whitlock owns the Wire harness recovery. Work in process 36 units, mostly Wire harness. Build plan 84, actual 81, Wire harness short. Requisitions open 26, Owen Castellanos holding the list.

Engineers are quietly building their own vehicle stock, which means the depot numbers describe a system nobody uses. Cedar Bluff took the planned sensor head replacements. Vehicle stock is masking the true fill rate. A release regression opened the session. The regression list ran to nine items. Warranty cost per fleet unit is falling. Depot fill rate was 96 percent. Chandler South carries 27 of the queued fleet. Burn 3210 thousand, runway 15 months. Atlanta depot cleared its repair backlog. Go-live cycle 45 days at Cedar Bluff.

**Runway scenarios tabled in the May 2025 review**

| Scenario | Horizon | Monthly burn USD thousands | Hiring posture | Runway months | Arming trigger |
|---|---|---|---|---|---|
| Upside | next quarter | 3420 | plan plus eight roles | 13 | two multi-site awards signed by quarter end |
| Upside | two quarters out | 3560 | plan plus eight roles | 12 | two multi-site awards signed by quarter end |
| Upside | four quarters out | 3740 | plan plus eight roles | 11 | two multi-site awards signed by quarter end |
| Middle, planning case | next quarter | 3210 | plan as approved | 15 | bookings within ten percent of plan |
| Middle, planning case | two quarters out | 3350 | plan as approved | 14 | bookings within ten percent of plan |
| Middle, planning case | four quarters out | 3530 | plan as approved | 13 | bookings within ten percent of plan |
| Downside | next quarter | 3030 | hiring pause on internal roles | 18 | two large awards leave the quarter |
| Downside | two quarters out | 3170 | hiring pause on internal roles | 17 | two large awards leave the quarter |
| Downside | four quarters out | 3350 | hiring pause on internal roles | 16 | two large awards leave the quarter |
| Severe | next quarter | 2870 | pause plus contract labour reduction | 21 | site queue shorter than nine sites |
| Severe | two quarters out | 3010 | pause plus contract labour reduction | 20 | site queue shorter than nine sites |
| Severe | four quarters out | 3190 | pause plus contract labour reduction | 19 | site queue shorter than nine sites |

## Decisions, owners and dates recorded in May 2025

Decisions were recorded with a named owner and a date, and items without both were explicitly not recorded as decisions. The oldest item dates from two sessions back. Griffin Tasse inherited an item after a role change. A release regression opened the session. The regression list ran to nine items. Owners were named and dates set against 2025-07-10. Dana Whitlock, Chief Operating Officer, took the largest open item. On-time delivery 93 percent, Ironbark Sheet

Metal the outlier. Scrap 17 thousand, Calder Battery Works contributing. Uptime 98.1 percent, interventions every 381 hours. Slipped deals 7, including Bexley Pharmaceutical Wholesale.

Owners were asked to bring evidence of closure rather than a status colour, and two items failed that test. One item closed with measured evidence. Griffin Tasse inherited an item after a role change. A release regression opened the session. The regression list ran to nine items. Two due dates were changed in the room. The oldest item dates from two sessions back. Build plan 84, actual 81, Wire harness short. Burn 3210 thousand, runway 15 months. Bookings 84 units across 138 pursuits. Requisitions open 26, Owen Castellanos holding the list.

One decision was escalated out of this forum because it commits capital beyond the delegated threshold. Two due dates were changed in the room. Three items carried forward into 2025-07-10. A release regression opened the session. The regression list ran to nine items. One item closed with measured evidence. Dana Whitlock, Chief Operating Officer, took the largest open item. Go-live cycle 45 days at Cedar Bluff. Uptime 98.1 percent, interventions every 381 hours. Dana Whitlock owns the Wire harness recovery. Yield 96 percent, scrap 17 thousand in Frame and drive assembly.

The oldest open item on the list dates from three sessions ago, and its owner was asked to either finish it or kill it. Two due dates were changed in the room. Dana Whitlock, Chief Operating Officer, took the largest open item. A release regression opened the session. The regression list ran to nine items. Owners were named and dates set against 2025-07-10. Griffin Tasse inherited an item after a role change. Yield 96 percent, scrap 17 thousand in Frame and drive assembly. Slipped deals 7, including Bexley Pharmaceutical Wholesale. Atlanta depot cleared its repair backlog. Queue depth 27 sites, Salinas Valley at the front.

A short reconstruction of how the constraint was first noticed is included, since the sequence matters more than the date. Figures here match the packet issued for May 2025. The chair reviewed it before 2025-07-10. A release regression opened the session. The regression list ran to nine items. This detail was not read into the May 2025 session. Dana Whitlock asked for the note to be kept. Contract crew Verrado closed Fort Dodge without a second visit. On-time delivery 93 percent, Ironbark Sheet Metal the outlier. Griffin Tasse and Tobias Nkemdirim disagreed on sequencing. Dana Whitlock owns the Wire harness recovery.

Points on which the room agreed to disagree are written out at greater length than the packet allowed. Dana Whitlock asked for the note to be kept. This detail was not read into the May 2025 session. A release regression opened the session. The regression list ran to nine items. It concerns Salinas Valley and, in part, Cedar Bluff. The chair reviewed it before 2025-07-10. Work in process 36 units, mostly Wire harness. Atlanta depot cleared its repair backlog. Utilisation 86 percent, Contract crew Verrado fully committed. Dana Whitlock owns the Wire harness recovery.

**Action items reviewed and recorded, May 2025**

| Item | Description | Owner | Opened | Due | Status | Closing evidence |
|---|---|---|---|---|---|---|
| OR-0409 | Agree joint remediation plan with the Cedar Bluff account | Owen Castellanos | 2024-06-06 | 2025-06-21 | Closed | countersigned remediation close-out letter |
| OR-1620 | Decide disposition of the superseded sensor head stock | Marcus Peil | 2025-05-27 | 2025-06-16 | Closed | report filed |
| OR-1623 | Refresh compensation bands for field engineering | Renata Voss | 2025-05-23 | 2025-06-22 | Open | outstanding |
| OR-1626 | Measure onboarding time to productivity for crews | Renata Voss | 2025-05-19 | 2025-06-28 | In progress | outstanding |
| OR-1629 | Stage software releases across sites rather than at once | Griffin Tasse | 2025-05-15 | 2025-07-04 | Closed | measured result attached |
| OR-1632 | Rebuild the site cost model separating retrofit from greenfield | Marcus Peil | 2025-05-11 | 2025-07-10 | Open | outstanding |
| OR-1635 | Bring deal-level | Marguerite Do | 2025-05-07 | 2025-07-16 | In progress | outstanding |

| Item | Description | Owner | Opened | Due | Status | Closing evidence |
|---|---|---|---|---|---|---|
| | notes for the top ten pursuits | | | | | |
| OR-1638 | Publish the supplier scorecard with weighted criteria | Hollis Bramwell | 2025-05-03 | 2025-07-22 | Closed | memo circulated |
| OR-1641 | Move collections calls to the account teams | Lucia Mbeki-Hart | 2025-04-29 | 2025-07-28 | Open | outstanding |
| OR-1644 | Reissue the deployment playbook network section | Priya Ramanathan | 2025-04-25 | 2025-08-03 | In progress | outstanding |
