MANAGEMENT OPERATING REVIEW - RECORD 018

Helioscope Robotics, Inc. - diligence file reference OPERATING_REVIEWS-018

People Operating Review for August 2025: purpose and attendance

Guests from the deployment crews attended by video and contributed the only new information in the operations section. Renata Voss attended as VP People. The next session is set for 2025-10-02. Crew lead certification was formalised that week. Certification took three leads out of rotation. One function submitted its pre-read late. Notes were circulated on 2025-09-04. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

Reading the packet aloud was abandoned two sessions ago and nobody has asked for it back. One function submitted its pre-read late. Pre-reads went out ahead of the 2025-09-04 session. Crew lead certification was formalised that week. Certification took three leads out of rotation. Notes were circulated on 2025-09-04. Marguerite Do, Director of Sales Operations, presented the operations section. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

Data definitions travel with the packet now, because two functions were counting the same thing differently. The next session is set for 2025-10-02. Pre-reads went out ahead of the 2025-09-04 session. Crew lead certification was formalised that week. Certification took three leads out of rotation. Notes were circulated on 2025-09-04. Renata Voss attended as VP People. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

Attendance was complete across the functions that own the numbers, and two guests joined for the sections that concerned them. Notes were circulated on 2025-09-04. The People Operating Review convened for August 2025. Crew lead certification was formalised that week. Certification took three leads out of rotation. Renata Voss attended as VP People. Marguerite Do, Director of Sales Operations, presented the operations section. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Sales intake review

Sales operations rebuilt the stage definitions after a review found three deals sitting in a proof-of-concept stage with no active pilot. Discount depth peaked on the Pinebank Distribution multi-site award. Win rate held at 34 percent on 141 live opportunities. Crew lead certification was formalised that week. Certification took three leads out of rotation. Signed volume: 79 units, win rate 34 percent. The book took 79 units, against 248 last period. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

Enterprise accounts moved more slowly than the mid-market this period, and the difference sits almost entirely in procurement and security review. Win rate held at 34 percent on 141 live opportunities. The book took 79 units, against 248 last period. Crew lead certification was formalised that week. Certification took three leads out of rotation. Signed volume: 79 units, win rate 34 percent. Intake closed at 79 units for August 2025. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

Renewal conversations for the fleet software attached faster than expected, and the attach rate is now high enough to model separately. The book took 79 units, against 248 last period. Marrowfield Grocers accounted for the largest single order. Crew lead certification was formalised that week. Certification took three leads out of rotation. Intake closed at 79 units for August 2025. Win rate held at 34 percent on 141 live opportunities. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

Bookings quality, measured by how much of the signed volume has a named site and a readiness date, improved without any change in headline volume. Marrowfield Grocers accounted for the largest single order. Intake closed at 79

units for August 2025. Crew lead certification was formalised that week. Certification took three leads out of rotation. Signed volume: 79 units, win rate 34 percent. The book took 79 units, against 248 last period. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Two of the three regions carried the number this period, and the third missed on a single account that moved its own board meeting. Marrowfield Grocers accounted for the largest single order. Open pursuits number 141, up from 145. Crew lead certification was formalised that week. Certification took three leads out of rotation. Discount depth peaked on the Pinebank Distribution multi-site award. The book took 79 units, against 248 last period. Win rate 34 percent, best in West. Work in process 38 units, mostly Drive units. Griffin Tasse and Hollis Bramwell disagreed on sequencing. On-time delivery 94 percent, Ironbark Sheet Metal the outlier.

Our win rate improved on new logos and weakened on expansions, an inversion of last period that nobody in the room could yet explain. Signed volume: 79 units, win rate 34 percent. Open pursuits number 141, up from 145. Crew lead certification was formalised that week. Certification took three leads out of rotation. The book took 79 units, against 248 last period. Win rate held at 34 percent on 141 live opportunities. Depot fill 93 percent at Toronto depot. Queue depth 28 sites, Redlands at the front. Work in process 38 units, mostly Drive units. Toronto depot cleared its repair backlog.

Deployment site queue as read in the August 2025 session

Site	Customer	Fleet size	Readiness position	Go-live target	Queue status
Tulsa	Havering Logistics	6	Ready for crew	2025-09-22	Crew on site
Redlands	Quillon Home Supply	25	Power works pending	2025-10-09	Acceptance testing
Grand Forks	Tenmile Freight	12	Network gap open	2025-10-26	Held at gate
Waukegan	Bexley Pharmaceutical Wholesale	29	Customer dock date unconfirmed	2025-11-12	Stabilising
Mesquite	Marrowfield Grocers	10	Floor marking outstanding	2025-11-29	Signed off
Ashland Park	Pinebank Distribution	27	Survey complete	2025-12-16	Rescheduled
Riverbend	Alder & Vance Retail	6	Racking works pending	2026-01-02	Scheduled
Kennesaw	Northstar Cold Chain	34	Ready for crew	2026-01-19	Crew on site
Fort Dodge	Havering Logistics - second site	21	Power works pending	2026-02-05	Acceptance testing
Salinas Valley	Quillon Home Supply - second site	26	Network gap open	2026-02-22	Held at gate
Chandler South	Tenmile Freight - second site	31	Customer dock date unconfirmed	2026-03-11	Stabilising
Elk Grove	Bexley Pharmaceutical Wholesale - second site	54	Floor marking outstanding	2026-03-28	Signed off
Cedar Bluff	Marrowfield Grocers - second site	6	Survey complete	2026-04-14	Rescheduled
Norfolk	Pinebank Distribution - second site	49	Racking works pending	2026-05-01	Scheduled
Tulsa (phase two)	Alder & Vance Retail - second site	36	Ready for crew	2026-05-18	Crew on site
Redlands (phase two)	Northstar Cold Chain - second site	29	Power works pending	2026-06-04	Acceptance testing
Grand Forks (phase two)	Havering Logistics - follow-on scope	34	Network gap open	2026-06-21	Held at gate
Waukegan (phase two)	Quillon Home Supply - follow-on scope	51	Customer dock date unconfirmed	2026-07-08	Stabilising
Mesquite (phase two)	Tenmile Freight - follow-on scope	6	Floor marking outstanding	2026-07-25	Signed off
Ashland Park (phase two)	Bexley Pharmaceutical Wholesale - follow-on scope	58	Survey complete	2026-08-11	Rescheduled
Riverbend (phase two)	Marrowfield Grocers - follow-on scope	45	Racking works pending	2026-08-28	Scheduled
Kennesaw (phase two)	Pinebank Distribution - follow-on scope	26	Ready for crew	2026-09-14	Crew on site

Deal inspection

The largest pursuit in the book carries a dependency on the customer finishing a racking project that has already been delayed twice. Conversion into commercial close remains the weak stage. Deals leaving the period: 9, most still dated. Crew lead certification was formalised that week. Certification took three leads out of rotation. Two losses went to the same competitor. The Bexley Pharmaceutical Wholesale pursuit re-dated again. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

Procurement cycles at the grocery accounts run longer than the model assumes, and the model has not been updated since it was written. The Bexley Pharmaceutical Wholesale pursuit re-dated again. Slippage totalled 9 opportunities against 15 before. Crew lead certification was formalised that week. Certification took three leads out of rotation. Weighted coverage sits near 141 open pursuits. Deals leaving the period: 9, most still dated. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

One displacement pursuit has consumed more engineering support hours than the next four combined, with no commitment in return. Two losses went to the same competitor. The Bexley Pharmaceutical Wholesale pursuit re-dated again. Crew lead certification was formalised that week. Certification took three leads out of rotation. Deals leaving the period: 9, most still dated. Marguerite Do owns the re-qualification pass. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

The team agreed to stop reporting weighted pipeline in this meeting, on the grounds that nobody had ever acted on the number. Two losses went to the same competitor. Weighted coverage sits near 141 open pursuits. Crew lead certification was formalised that week. Certification took three leads out of rotation. Marguerite Do owns the re-qualification pass. The Bexley Pharmaceutical Wholesale pursuit re-dated again. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Of the opportunities that left the quarter, most remain live and dated, and only a minority were lost to a competitor outright. Conversion into commercial close remains the weak stage. Slippage totalled 9 opportunities against 15 before. Crew lead certification was formalised that week. Certification took three leads out of rotation. Weighted coverage sits near 141 open pursuits. Marguerite Do owns the re-qualification pass. Win rate 34 percent, best in West. Work in process 38 units, mostly Drive units. Griffin Tasse and Hollis Bramwell disagreed on sequencing. On-time delivery 94 percent, Ironbark Sheet Metal the outlier.

Two accounts that were treated as sure things at the last review have gone quiet, and neither seller has escalated. Weighted coverage sits near 141 open pursuits. The Bexley Pharmaceutical Wholesale pursuit re-dated again. Crew lead certification was formalised that week. Certification took three leads out of rotation. Slippage totalled 9 opportunities against 15 before. Marguerite Do owns the re-qualification pass. Depot fill 93 percent at Toronto depot. Queue depth 28 sites, Redlands at the front. Work in process 38 units, mostly Drive units. Toronto depot cleared its repair backlog.

Contract to go-live decomposition, sites accepted in August 2025

Site	Contract to survey days	Survey to install days	Install to acceptance days	Total elapsed days	Site class
Waukegan	15	25	20	60	retrofit
Mesquite	17	29	9	55	greenfield
Ashland Park	15	25	17	57	greenfield
Riverbend	21	33	12	66	retrofit
Kennesaw	17	25	19	61	greenfield
Fort Dodge	16	27	10	53	greenfield
Salinas Valley	16	25	15	56	retrofit
Chandler South	20	31	8	59	greenfield
Elk Grove	16	25	16	57	greenfield
Cedar Bluff	14	23	11	48	retrofit
Norfolk	20	25	18	63	greenfield
Tulsa	17	25	13	55	greenfield
Redlands	15	25	20	60	retrofit

Site	Contract to survey days	Survey to install days	Install to acceptance days	Total elapsed days	Site class
Grand Forks	17	29	9	55	greenfield
Waukegan (phase two)	15	25	17	57	greenfield
Mesquite (phase two)	21	33	12	66	retrofit
Ashland Park (phase two)	17	25	19	61	greenfield
Riverbend (phase two)	16	27	10	53	greenfield

Go-live schedule review

Crew travel days per site came down, largely because two regional hubs now hold enough tooling to avoid shipping kit ahead of each job. Redlands and Riverbend both cleared acceptance testing. Contract to go-live averaged 46 days. Crew lead certification was formalised that week. Certification took three leads out of rotation. The queue carries 28 sites, 29 a period ago. Go-live cycle: 46 days, from 44. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

Acceptance testing found more integration defects than mechanical ones, and the defects clustered in the warehouse-management adapter. The queue carries 28 sites, 29 a period ago. Cedar Bluff was held at the readiness gate. Crew lead certification was formalised that week. Certification took three leads out of rotation. Contract to go-live averaged 46 days. Go-live cycle: 46 days, from 44. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

Installer utilisation is high enough to be a risk rather than an achievement, because there is no slack for rework travel. Cedar Bluff was held at the readiness gate. Contract to go-live averaged 46 days. Crew lead certification was formalised that week. Certification took three leads out of rotation. Renata Voss sequenced the queue by readiness. Queue depth reached 28 sites. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

Every site that slipped this period slipped for a reason on the customer side, which is a better position than last year and still not good enough. Contract to go-live averaged 46 days. Renata Voss sequenced the queue by readiness. Crew lead certification was formalised that week. Certification took three leads out of rotation. Queue depth reached 28 sites. Redlands and Riverbend both cleared acceptance testing. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Sequencing the queue by contractual date rather than by readiness produced two expensive standstills, and the rule has been reversed. Cedar Bluff was held at the readiness gate. Go-live cycle: 46 days, from 44. Crew lead certification was formalised that week. Certification took three leads out of rotation. The queue carries 28 sites, 29 a period ago. Renata Voss sequenced the queue by readiness. Win rate 34 percent, best in West. Work in process 38 units, mostly Drive units. Griffin Tasse and Hollis Bramwell disagreed on sequencing. On-time delivery 94 percent, Ironbark Sheet Metal the outlier.

A retrofit site behaved nothing like a greenfield site, and the estimate model still treats them as the same class of work. Queue depth reached 28 sites. Go-live cycle: 46 days, from 44. Crew lead certification was formalised that week. Certification took three leads out of rotation. Contract to go-live averaged 46 days. The queue carries 28 sites, 29 a period ago. Depot fill 93 percent at Toronto depot. Queue depth 28 sites, Redlands at the front. Work in process 38 units, mostly Drive units. Toronto depot cleared its repair backlog.

Service performance across the fleet

Site-level variation in reliability is wider than the fleet average suggests, and the worst site drags the contractual conversation. Fleet uptime averaged 98.0 percent. Uptime reached 98.0 percent, from 97.9 percent. Crew lead certification was formalised that week. Certification took three leads out of rotation. Marrowfield Grocers measures uptime on a stricter basis. Dana Whitlock leads the joint remediation plan. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

The remediation plan with the worst-performing account is joint, with obligations written on both sides and a fixed measurement window. Interventions spaced 392 hours apart on the fleet median. Marrowfield Grocers measures uptime on a stricter basis. Crew lead certification was formalised that week. Certification took three leads out of rotation. Redlands remains the weakest site on interventions. Uptime reached 98.0 percent, from 97.9 percent. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

Battery degradation is starting to show at the oldest sites, and the replacement schedule needs to become a plan rather than a reaction. Redlands remains the weakest site on interventions. Dana Whitlock leads the joint remediation plan. Crew lead certification was formalised that week. Certification took three leads out of rotation. Interventions spaced 392 hours apart on the fleet median. Mean time between interventions was 392 hours. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

Uptime is measured differently by two customers than by us, and the review chose to adopt the stricter definition internally. Interventions spaced 392 hours apart on the fleet median. Dana Whitlock leads the joint remediation plan. Crew lead certification was formalised that week. Certification took three leads out of rotation. Mean time between interventions was 392 hours. Uptime reached 98.0 percent, from 97.9 percent. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Mean time between interventions is the number the service team manages to, and it moved in the right direction at every site but one. Marrowfield Grocers measures uptime on a stricter basis. Fleet uptime averaged 98.0 percent. Crew lead certification was formalised that week. Certification took three leads out of rotation. Mean time between interventions was 392 hours. Interventions spaced 392 hours apart on the fleet median. Win rate 34 percent, best in West. Work in process 38 units, mostly Drive units. Griffin Tasse and Hollis Bramwell disagreed on sequencing. On-time delivery 94 percent, Ironbark Sheet Metal the outlier.

Facility conditions explain more of the intervention rate than any hardware factor, which took a year of data to establish convincingly. Dana Whitlock leads the joint remediation plan. Uptime reached 98.0 percent, from 97.9 percent. Crew lead certification was formalised that week. Certification took three leads out of rotation. Interventions spaced 392 hours apart on the fleet median. Fleet uptime averaged 98.0 percent. Depot fill 93 percent at Toronto depot. Queue depth 28 sites, Redlands at the front. Work in process 38 units, mostly Drive units. Toronto depot cleared its repair backlog.

Installation crew loading, August 2025

Crew	Home region	Certified leads	Field engineers	Utilisation %	Weeks committed forward
Crew Alpha	Northeast	2	7	91	5
Crew Bravo	Ontario	2	4	84	13
Crew Charlie	Channel and reseller	2	7	92	9
Crew Delta	West	2	2	87	17
Crew Echo	Southwest	1	7	94	7
Crew Foxtrot	Great Lakes	1	5	89	11
Crew Gulf	Southeast	1	7	96	7
Crew Hotel	Northeast	1	5	85	15
Contract crew Northfield	Ontario	1	10	93	7
Contract crew Verrado	Channel and reseller	1	2	88	13
Contract crew Ellingham	West	1	7	95	2
Commissioning bench	Southwest	1	6	86	11
Crew Alpha (night rotation)	Great Lakes	1	7	91	7
Crew Bravo (night rotation)	Southeast	1	4	84	15
Crew Charlie (night rotation)	Northeast	1	7	92	11
Crew Delta (night rotation)	Ontario	1	2	87	14

Crew	Home region	Certified leads	Field engineers	Utilisation %	Weeks committed forward
Crew Echo (night rotation)	Channel and reseller	1	7	94	4
Crew Foxtrot (night rotation)	West	1	5	89	13

Warranty and returns

Depot technicians closed the repair backlog for the first time in five periods, which frees vehicle stock. Depot fill rate was 93 percent. Vehicle stock is masking the true fill rate. Crew lead certification was formalised that week. Certification took three leads out of rotation. Riverbend took the planned sensor head replacements. Griffin Tasse approved the critical spares increase. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

Courier spend tells the story that the fill rate hides, because the parts are moving from the wrong place. Return material flow remains slow. Depot fill rate was 93 percent. Crew lead certification was formalised that week. Certification took three leads out of rotation. Riverbend took the planned sensor head replacements. Warranty cost per fleet unit is falling. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

Spares fill rate from the regional depots governs how fast a field incident closes, and it has been the constraint at two sites. Depot fill rate was 93 percent. Fill rate ran 93 percent against 95 percent. Crew lead certification was formalised that week. Certification took three leads out of rotation. Vehicle stock is masking the true fill rate. Griffin Tasse approved the critical spares increase. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

Field engineers are carrying more parts in vehicles than the policy allows, which hides the true fill rate. Fill rate ran 93 percent against 95 percent. Riverbend took the planned sensor head replacements. Crew lead certification was formalised that week. Certification took three leads out of rotation. Vehicle stock is masking the true fill rate. Return material flow remains slow. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Warranty cost per fleet unit is falling, and the fall is real rather than a timing artefact of claim processing. Warranty cost per fleet unit is falling. Depot fill rate was 93 percent. Crew lead certification was formalised that week. Certification took three leads out of rotation. Fill rate ran 93 percent against 95 percent. Griffin Tasse approved the critical spares increase. Win rate 34 percent, best in West. Work in process 38 units, mostly Drive units. Griffin Tasse and Hollis Bramwell disagreed on sequencing. On-time delivery 94 percent, Ironbark Sheet Metal the outlier.

Repair-versus-replace decisions are being made in the field without guidance, and the outcomes vary by engineer. Griffin Tasse approved the critical spares increase. Riverbend took the planned sensor head replacements. Crew lead certification was formalised that week. Certification took three leads out of rotation. Depot fill rate was 93 percent. Return material flow remains slow. Depot fill 93 percent at Toronto depot. Queue depth 28 sites, Redlands at the front. Work in process 38 units, mostly Drive units. Toronto depot cleared its repair backlog.

Standing constraints and how they moved

Constraint under review: field engineering capacity, at the certification bottleneck moves stage as of this session. Hiring is no longer the binding constraint; the certification pipeline is, because only three leads are authorised to certify and each can carry one trainee per site. Bookings 79 units across 141 pursuits. Final assembly ran 96 percent first pass.

One casting supplier has become a constraint on the pallet mover, and the tooling is theirs rather than ours. Supplier on-time delivery came in at 94 percent. On-time delivery was 94 percent, from 95 percent. Crew lead certification was formalised that week. Certification took three leads out of rotation. Coverage weeks on long-lead parts were extended. Kestrel Drive Systems improved after a site visit. Build plan 86, actual 84, Drive units short. Slipped deals 9, including

Pinebank Distribution. Ryemoor Wire Harness quoted lead times moved again. Utilisation 90 percent, Contract crew Northfield fully committed.

A battery cell allocation notice arrived with thirty days of warning, and the planning team had inventory to absorb it. On-time delivery was 94 percent, from 95 percent. Ryemoor Wire Harness missed two consecutive commit dates. Crew lead certification was formalised that week. Certification took three leads out of rotation. Kestrel Drive Systems improved after a site visit. Supplier on-time delivery came in at 94 percent. Days outstanding 43, Marrowfield Grocers the largest balance. Build plan 86, actual 84, Drive units short. Yield 96 percent, scrap 16 thousand in Final assembly. Utilisation 90 percent, Contract crew Northfield fully committed.

Build attainment by week and line, August 2025

Week	Product line	Plan units	Actual units	Variance units	Primary constraint
W21	HS-200 tote handler	7	6	-1	operator absence
W21	HS-400 pallet mover	4	4	0	test cell queue
W22	HS-200 tote handler	5	4	-1	none
W22	HS-400 pallet mover	3	2	-1	fixture failure
W23	HS-200 tote handler	6	4	-2	drive unit shortage
W23	HS-400 pallet mover	3	3	0	sensor head rework
W24	HS-200 tote handler	6	5	-1	test cell queue
W24	HS-400 pallet mover	4	3	-1	harness shortage
W25	HS-200 tote handler	6	6	0	fixture failure
W25	HS-400 pallet mover	4	3	-1	plan revision mid-week
W26	HS-200 tote handler	7	6	-1	sensor head rework
W26	HS-400 pallet mover	4	3	-1	operator absence
W27	HS-200 tote handler	3	6	3	harness shortage
W27	HS-400 pallet mover	2	4	2	none
W28	HS-200 tote handler	4	7	3	plan revision mid-week
W28	HS-400 pallet mover	2	4	2	drive unit shortage
W29	HS-200 tote handler	4	3	-1	operator absence
W29	HS-400 pallet mover	3	2	-1	test cell queue

Organisation and staffing

A hiring pause was applied selectively, protecting customer-facing roles and holding back internal ones. The headcount gap is 11 roles. Median time to fill was 56 days. Crew lead certification was formalised that week. Certification took three leads out of rotation. Open requisitions number 19. Requisitions fell from 24 to 19. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

Engagement survey results split by tenure rather than by function, with the newest cohort least positive about clarity of direction. Requisitions fell from 24 to 19. Median time to fill was 56 days. Crew lead certification was formalised that week. Certification took three leads out of rotation. Annualised attrition sits at 13 percent. Open requisitions number 19. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

Time to fill improved for engineering roles and worsened for field roles, which is the opposite of what the plan needed. Time to fill improved from 53 to 56 days. The headcount gap is 11 roles. Crew lead certification was formalised that week. Certification took three leads out of rotation. Median time to fill was 56 days. Requisitions fell from 24 to 19. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

The recruiting funnel converts poorly at the on-site stage for field roles, and the loop design is the likely reason. Time to fill improved from 53 to 56 days. Annualised attrition sits at 13 percent. Crew lead certification was formalised that week. Certification took three leads out of rotation. Headcount stood at 231 against a plan of 242. The headcount gap is 11 roles. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Internal mobility filled two roles this period, which is cheaper and faster than external hiring and creates a backfill. Median time to fill was 56 days. The headcount gap is 11 roles. Crew lead certification was formalised that week.

Certification took three leads out of rotation. Headcount stood at 231 against a plan of 242. Time to fill improved from 53 to 56 days. Win rate 34 percent, best in West. Work in process 38 units, mostly Drive units. Griffin Tasse and Hollis Bramwell disagreed on sequencing. On-time delivery 94 percent, Ironbark Sheet Metal the outlier.

Performance calibration ran across all functions for the first time, and the distribution differed sharply between engineering and operations. Headcount stood at 231 against a plan of 242. Median time to fill was 56 days. Crew lead certification was formalised that week. Certification took three leads out of rotation. Requisitions fell from 24 to 19. Annualised attrition sits at 13 percent. Depot fill 93 percent at Toronto depot. Queue depth 28 sites, Redlands at the front. Work in process 38 units, mostly Drive units. Toronto depot cleared its repair backlog.

Billing and collections

Collections outpaced invoicing this period, which flatters the cash number and does not repeat. Pinebank Distribution requires a separate submission path. Two receivables aged past ninety days. Crew lead certification was formalised that week. Certification took three leads out of rotation. Days sales outstanding closed at 43 days. Receipts of 3040 thousand outpaced invoicing. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

Cash conversion for a deployment now takes weeks fewer than it did a year ago, entirely through process changes. Days sales outstanding closed at 43 days. Collections totalled 3040 thousand dollars. Crew lead certification was formalised that week. Certification took three leads out of rotation. Hollis Bramwell moved collections calls to the account teams. Outstanding days improved from 44 to 43. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

The controller closed the books faster than in any prior period, which matters because decisions in this meeting depend on it. Receipts of 3040 thousand outpaced invoicing. Outstanding days improved from 44 to 43. Crew lead certification was formalised that week. Certification took three leads out of rotation. Collections totalled 3040 thousand dollars. Pinebank Distribution requires a separate submission path. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

Collections calls are now made by the account team rather than by finance alone, which is uncomfortable and effective. Outstanding days improved from 44 to 43. Pinebank Distribution requires a separate submission path. Crew lead certification was formalised that week. Certification took three leads out of rotation. Two receivables aged past ninety days. Hollis Bramwell moved collections calls to the account teams. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Nothing in the receivables ledger suggests a credit problem; everything in it suggests a paperwork problem. Days sales outstanding closed at 43 days. Two receivables aged past ninety days. Crew lead certification was formalised that week. Certification took three leads out of rotation. Hollis Bramwell moved collections calls to the account teams. Pinebank Distribution requires a separate submission path. Win rate 34 percent, best in West. Work in process 38 units, mostly Drive units. Griffin Tasse and Hollis Bramwell disagreed on sequencing. On-time delivery 94 percent, Ironbark Sheet Metal the outlier.

Terms granted in negotiation are cash decisions made by people who do not carry the cash number. Outstanding days improved from 44 to 43. Pinebank Distribution requires a separate submission path. Crew lead certification was formalised that week. Certification took three leads out of rotation. Collections totalled 3040 thousand dollars. Receipts of 3040 thousand outpaced invoicing. Depot fill 93 percent at Toronto depot. Queue depth 28 sites, Redlands at the front. Work in process 38 units, mostly Drive units. Toronto depot cleared its repair backlog.

Assembly cell performance by shift, August 2025

Cell	Shift	Units processed	First-pass yield %	Rework hours	Scrap USD thousands
Frame and drive assembly	first shift	16	98	10	3

Cell	Shift	Units processed	First-pass yield %	Rework hours	Scrap USD thousands
Sensor head assembly	first shift	13	91	95	2
Harness and electrical	first shift	17	99	4	1
Final assembly	first shift	17	97	40	1
Functional test	first shift	16	97	15	1
Pack and ship	first shift	16	98	50	1
Frame and drive assembly	second shift	9	94	25	1
Sensor head assembly	second shift	7	89	120	1
Harness and electrical	second shift	9	96	5	1
Final assembly	second shift	9	95	45	1
Functional test	second shift	8	95	20	1
Pack and ship	second shift	8	96	55	1
Frame and drive assembly	weekend cover	2	98	10	1
Sensor head assembly	weekend cover	2	91	95	1
Harness and electrical	weekend cover	3	99	4	1
Final assembly	weekend cover	3	97	40	1
Functional test	weekend cover	2	97	15	1
Pack and ship	weekend cover	2	98	50	1

Spending and scenarios

Runway under the middle scenario extended, and the review chose to plan against that case while holding triggers for the downside. Marguerite Do holds the trigger list. Runway moved from 16 to 15 months. Crew lead certification was formalised that week. Certification took three leads out of rotation. Test-cell capital was deferred again. Burn for the period was 3290 thousand dollars. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

Scenario planning is only useful if the triggers are specific, so each scenario now names the observable that fires it. Capital spend was 290 thousand dollars. Runway moved from 16 to 15 months. Crew lead certification was formalised that week. Certification took three leads out of rotation. Burn for the period was 3290 thousand dollars. Test-cell capital was deferred again. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

Gross margin per deployed unit is improving slowly, and the improvement is in installation labour rather than in bill of materials. Marguerite Do holds the trigger list. Burn for the period was 3290 thousand dollars. Crew lead certification was formalised that week. Certification took three leads out of rotation. Runway moved from 16 to 15 months. Test-cell capital was deferred again. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

The finance team rebuilt the model bottom-up from the site queue, and the new version disagrees with the old one on timing rather than on total. Test-cell capital was deferred again. Burn for the period was 3290 thousand dollars. Crew lead certification was formalised that week. Certification took three leads out of rotation. Runway stands at 15 months on the middle case. Marguerite Do holds the trigger list. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Cutting capital spend buys months now and costs build capacity later, which is a trade this meeting keeps making. Test-cell capital was deferred again. Runway moved from 16 to 15 months. Crew lead certification was formalised that week. Certification took three leads out of rotation. Burn for the period was 3290 thousand dollars. Runway stands at 15 months on the middle case. Win rate 34 percent, best in West. Work in process 38 units, mostly Drive units. Griffin Tasse and Hollis Bramwell disagreed on sequencing. On-time delivery 94 percent, Ironbark Sheet Metal the outlier.

Burn by category matters more than burn in total, because the total has been flat while its composition changed twice. Runway stands at 15 months on the middle case. Marguerite Do holds the trigger list. Crew lead certification was formalised that week. Certification took three leads out of rotation. Runway moved from 16 to 15 months. Capital spend was 290 thousand dollars. Depot fill 93 percent at Toronto depot. Queue depth 28 sites, Redlands at the front. Work in process 38 units, mostly Drive units. Toronto depot cleared its repair backlog.

Yield excursion and containment log, August 2025

Week	Cell	First-pass yield %	Units affected	Containment in force	Disposition
W21	Sensor head assembly	99	6	100 percent bond-line inspection	scrap
W22	Harness and electrical	92	7	sample one in ten	use as is with concession
W23	Final assembly	97	8	shipments held	return to supplier
W24	Sensor head assembly	90	5	inspection lifted, trigger armed	hold pending study
W25	Harness and electrical	98	10	full inspection reinstated	rework and release
W26	Final assembly	93	9	standard sampling	scrap
W27	Sensor head assembly	99	7	100 percent bond-line inspection	use as is with concession
W28	Harness and electrical	95	6	sample one in ten	return to supplier
W29	Final assembly	99	9	shipments held	hold pending study
W30	Sensor head assembly	91	8	inspection lifted, trigger armed	rework and release
W31	Harness and electrical	99	5	full inspection reinstated	scrap
W32	Final assembly	94	10	standard sampling	use as is with concession
W33	Sensor head assembly	99	6	100 percent bond-line inspection	return to supplier
W34	Harness and electrical	92	7	sample one in ten	hold pending study
W35	Final assembly	97	8	shipments held	rework and release
W36	Sensor head assembly	90	5	inspection lifted, trigger armed	scrap
W37	Harness and electrical	98	10	full inspection reinstated	use as is with concession
W38	Final assembly	93	9	standard sampling	return to supplier
W39	Sensor head assembly	99	7	100 percent bond-line inspection	hold pending study
W40	Harness and electrical	95	6	sample one in ten	rework and release

Engineering roadmap

Fleet orchestration release slipped a milestone, and the slip was accepted in exchange for keeping the docking regression fix on schedule. Release staging across sites is now standard. Field data now sets the reliability backlog order. Crew lead certification was formalised that week. Certification took three leads out of rotation. Renata Voss brought the decision to stop one feature. Two roadmap checkpoints cleared; one slipped. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

Field data now drives the reliability backlog, which is a change from prioritising by the loudest account. Documentation lags the current release. Field data now sets the reliability backlog order. Crew lead certification was formalised that week. Certification took three leads out of rotation. Renata Voss brought the decision to stop one feature. Two roadmap checkpoints cleared; one slipped. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

Pilot features running at two accounts have no path to general availability, and that gap was made explicit. Documentation lags the current release. Adapter work crowded out platform work again. Crew lead certification was formalised that week. Certification took three leads out of rotation. Renata Voss brought the decision to stop one feature. Release staging across sites is now standard. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

Engineering capacity allocation between new sites and installed base was reset toward the installed base this period. Renata Voss brought the decision to stop one feature. Adapter work crowded out platform work again. Crew lead certification was formalised that week. Certification took three leads out of rotation. Release staging across sites is now standard. Documentation lags the current release. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Integration variety across warehouse hosts is the tax the roadmap pays every quarter. Documentation lags the current release. Renata Voss brought the decision to stop one feature. Crew lead certification was formalised that week. Certification took three leads out of rotation. Adapter work crowded out platform work again. Release staging across sites is now standard. Win rate 34 percent, best in West. Work in process 38 units, mostly Drive units. Griffin Tasse and Hollis Bramwell disagreed on sequencing. On-time delivery 94 percent, Ironbark Sheet Metal the outlier.

The warehouse-management adapter absorbed more engineering effort than any other item, and integration variety is the reason. The HS-200 tote handler absorbed most of the engineering effort. Renata Voss brought the decision to stop one feature. Crew lead certification was formalised that week. Certification took three leads out of rotation. Adapter work crowded out platform work again. Documentation lags the current release. Depot fill 93 percent at Toronto depot. Queue depth 28 sites, Redlands at the front. Work in process 38 units, mostly Drive units. Toronto depot cleared its repair backlog.

Points of disagreement

There was no consensus on the hiring pause, and the pause proceeded with the dissent recorded against it. The disagreement is recorded rather than resolved. A further test was added because of the dissent. Crew lead certification was formalised that week. Certification took three leads out of rotation. Hollis Bramwell asked for the decision to be revisited. No consensus was reached; the VP People decided. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

The customer success position, that credits should be offered before they are claimed, did not carry the room. No consensus was reached; the VP People decided. Hollis Bramwell asked for the decision to be revisited. Crew lead certification was formalised that week. Certification took three leads out of rotation. Marguerite Do and Renata Voss read the data differently. A further test was added because of the dissent. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

Objection was raised to closing an item without measured evidence, and the item stayed open as a result. A further test was added because of the dissent. The disagreement is recorded rather than resolved. Crew lead certification was formalised that week. Certification took three leads out of rotation. The minority view is preserved in the record. The objection was noted against the decision. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

The stricter uptime definition won on the argument that a customer will use it whether we do or not. Marguerite Do and Renata Voss read the data differently. The disagreement is recorded rather than resolved. Crew lead certification was formalised that week. Certification took three leads out of rotation. Hollis Bramwell asked for the decision to be revisited. The minority view is preserved in the record. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Operations and commercial did not reach agreement on how the site queue should be sequenced, and the chair decided. Hollis Bramwell asked for the decision to be revisited. Marguerite Do and Renata Voss read the data differently. Crew lead certification was formalised that week. Certification took three leads out of rotation. A further test was added because of the dissent. The objection was noted against the decision. Win rate 34 percent, best in West. Work in process 38 units, mostly Drive units. Griffin Tasse and Hollis Bramwell disagreed on sequencing. On-time delivery 94 percent, Ironbark Sheet Metal the outlier.

One participant asked for the decision to be revisited with better data, and the request was granted with a date attached. No consensus was reached; the VP People decided. The disagreement is recorded rather than resolved. Crew lead certification was formalised that week. Certification took three leads out of rotation. Marguerite Do and Renata Voss read the data differently. The minority view is preserved in the record. Depot fill 93 percent at Toronto depot. Queue depth 28 sites, Redlands at the front. Work in process 38 units, mostly Drive units. Toronto depot cleared its repair backlog.

Supplier delivery and lead time, August 2025

Supplier	Commodity	On-time delivery %	Quoted lead weeks	Actual lead weeks	Watch status
Kestrel Drive Systems	Drive units	99	8	8	watch
Brightwater Motion	Lidar assemblies	90	10	13	escalated
Halverson Optics	Battery packs	95	12	12	cleared
Penrose Castings	Castings	88	14	19	second source in qualification
Ironbark Sheet Metal	Sheet metal	96	15	15	on scorecard review
Calder Battery Works	Wire harness	91	11	12	no action
Tessellate Controls	Controllers	98	12	12	watch
Ryemoor Wire Harness	Caster and wheel sets	93	13	15	escalated
Kestrel Drive Systems	Lidar assemblies	100	14	14	cleared
Brightwater Motion	Battery packs	89	15	19	second source in qualification
Halverson Optics	Castings	97	11	11	on scorecard review
Penrose Castings	Sheet metal	92	12	18	no action
Ironbark Sheet Metal	Wire harness	99	13	13	watch
Calder Battery Works	Controllers	90	14	17	escalated
Tessellate Controls	Caster and wheel sets	95	15	15	cleared
Ryemoor Wire Harness	Drive units	88	11	16	second source in qualification

Decisions, owners and dates recorded in August 2025

Cross-functional items were given a single owner rather than two, after a period where shared ownership meant no ownership. The oldest item dates from two sessions back. Griffin Tasse inherited an item after a role change. Crew lead certification was formalised that week. Certification took three leads out of rotation. Three items carried forward into 2025-10-02. Two due dates were changed in the room. Bexley Pharmaceutical Wholesale asked for the HS-200 tote handler configuration. Build plan 86, actual 84, Drive units short. Griffin Tasse and Hollis Bramwell disagreed on sequencing. Depot fill 93 percent at Toronto depot.

Evidence of closure means a document, a measurement or a signature, and status colours no longer qualify. One item closed with measured evidence. Three items carried forward into 2025-10-02. Crew lead certification was formalised that week. Certification took three leads out of rotation. Griffin Tasse inherited an item after a role change. Two due dates were changed in the room. Requisitions open 19, Renata Voss holding the list. Burn 3290 thousand, runway 15 months. Attrition 13 percent annualised in West. Work in process 38 units, mostly Drive units.

Dates were negotiated with the owners present, which removed the usual round of silent renegotiation afterwards. Two due dates were changed in the room. Three items carried forward into 2025-10-02. Crew lead certification was formalised that week. Certification took three leads out of rotation. Dana Whitlock, Chief Operating Officer, took the largest open item. The oldest item dates from two sessions back. Griffin Tasse and Hollis Bramwell disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Attrition 13 percent annualised in West. Uptime 98.0 percent, interventions every 392 hours.

Three items carried forward from the previous session, one with a new owner after the original owner changed roles. Owners were named and dates set against 2025-10-02. Three items carried forward into 2025-10-02. Crew lead certification was formalised that week. Certification took three leads out of rotation. Dana Whitlock, Chief Operating Officer, took the largest open item. The oldest item dates from two sessions back. Cedar Bluff carries 28 of the queued fleet. Build plan 86, actual 84, Drive units short. Go-live cycle 46 days at Riverbend. Ryemoor Wire Harness quoted lead times moved again.

Open and closed actions carried through August 2025

Reference	Item	Owner	Original due	Current due	Disposition
OR-1803	Stand up crew lead certification pipeline	Priya Ramanathan	2025-09-13	2025-10-04	Open; none yet
OR-1820	Complete process capability study on the bond operation	Emil Farkas	2025-08-25	2025-09-15	Open; outstanding
OR-1823	Re-cut the stage definitions in the	Marguerite Do	2025-08-31	2025-09-21	In progress; outstanding

Reference	Item	Owner	Original due	Current due	Disposition
	pipeline report				
OR-1826	Draft deposit terms for multi-site commitments	Ingrid Solberg	2025-09-06	2025-09-27	Closed; memo circulated
OR-1829	Measure onboarding time to productivity for crews	Renata Voss	2025-09-12	2025-10-03	Open; outstanding
OR-1832	Reconcile the two uptime definitions with the customer	Owen Castellanos	2025-09-18	2025-10-09	In progress; outstanding
OR-1835	Set a plan freeze window inside the build month	Emil Farkas	2025-09-24	2025-10-15	Closed; report filed
OR-1838	Decide disposition of the superseded sensor head stock	Marcus Peil	2025-09-30	2025-10-21	Open; outstanding
OR-1841	Cost the second-shift ramp against overtime	Marcus Peil	2025-10-06	2025-10-27	In progress; outstanding
OR-1844	Publish the supplier scorecard with weighted criteria	Hollis Bramwell	2025-10-12	2025-11-02	Closed; report filed
OR-1847	Reissue the deployment playbook network section	Priya Ramanathan	2025-10-18	2025-11-08	Open; outstanding
OR-1850	Refresh compensation bands for field engineering	Renata Voss	2025-10-24	2025-11-14	In progress; outstanding
OR-1853	Rebuild the site cost model separating retrofit from greenfield	Marcus Peil	2025-10-30	2025-11-20	Closed; memo circulated
OR-1856	Size the buffer stock on long-lead commodities	Hollis Bramwell	2025-11-05	2025-11-26	Open; outstanding
OR-1859	Move collections calls to the account teams	Lucia Mbeki-Hart	2025-11-11	2025-12-02	In progress; outstanding
