MANAGEMENT OPERATING REVIEW - RECORD 019

Helioscope Robotics, Inc. - diligence file reference OPERATING_REVIEWS-019

Monthly Business Review for September 2025: purpose and attendance

Owners who could not attend sent written positions, and those were read into the record verbatim. Lucia Mbeki-Hart, Controller, presented the operations section. Pre-reads went out ahead of the 2025-10-08 session. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. One function submitted its pre-read late. The next session is set for 2025-11-06. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Guests were limited to the sections that concern them, ending a habit of full attendance for its own sake. Lucia Mbeki-Hart, Controller, presented the operations section. Owen Castellanos attended as VP Customer Success. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. The Monthly Business Review convened for September 2025. The next session is set for 2025-11-06. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

The packet was shortened after a complaint that the previous edition buried the decisions behind twenty pages of charts. The Monthly Business Review convened for September 2025. One function submitted its pre-read late. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Owen Castellanos attended as VP Customer Success. Pre-reads went out ahead of the 2025-10-08 session. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

Standing agenda order was changed so that the constrained function presents first while the room is still fresh. Pre-reads went out ahead of the 2025-10-08 session. Notes were circulated on 2025-10-08. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Lucia Mbeki-Hart, Controller, presented the operations section. One function submitted its pre-read late. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Order book and bookings quality

Nobody in commercial believes the current forecast discipline is good enough, and the review agreed to inspect deal-level notes rather than roll-ups. Intake closed at 96 units for September 2025. The book took 96 units, against 79 last period. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Open pursuits number 152, up from 141. Discount depth peaked on the Quillon Home Supply multi-site award. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

The competitive picture shifted, with two losses attributed to a rival that had not appeared in a deal review for three periods. Marrowfield Grocers accounted for the largest single order. Discount depth peaked on the Quillon Home Supply multi-site award. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. The book took 96 units, against 79 last period. Win rate held at 37 percent on 152 live opportunities. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

Commercial intake for the period came in ahead of the internal plan on unit count and behind it on gross margin, which is the trade the team was asked to make. The book took 96 units, against 79 last period. Win rate held at 37 percent on 152 live opportunities. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Signed volume: 96 units, win rate 37 percent. Marrowfield Grocers accounted for the largest single order. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

Discounting concentrated in one competitive displacement rather than spreading across the book, which the review treated as an acceptable outcome. Signed volume: 96 units, win rate 37 percent. Win rate held at 37 percent on 152 live opportunities. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Open pursuits number 152, up from 141. Intake closed at 96 units for September 2025. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Late-quarter intake distorted the shape of the funnel again, and the pattern is now visible in three consecutive periods of data. Marrowfield Grocers accounted for the largest single order. Open pursuits number 152, up from 141. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Signed volume: 96 units, win rate 37 percent. Intake closed at 96 units for September 2025. Go-live cycle 42 days at Fort Dodge. Ryemoor Wire Harness quoted lead times moved again. Win rate 37 percent, best in Northeast. Queue depth 31 sites, Elk Grove at the front.

A single reseller relationship produced more qualified volume than the whole outbound programme, which raises an uncomfortable question about channel mix. Discount depth peaked on the Quillon Home Supply multi-site award. Signed volume: 96 units, win rate 37 percent. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Open pursuits number 152, up from 141. Intake closed at 96 units for September 2025. Scrap 24 thousand, Halverson Optics contributing. The HS-200 tote handler took most of the test cell time. Slipped deals 11, including Quillon Home Supply. Uptime 97.7 percent, interventions every 384 hours.

Expedite and premium freight log, September 2025

Part number	Supplier	Reason	Freight mode	Added cost USD thousands
4209-1	Penrose Castings	yield loss replacement	standard road with premium	19
4214-2	Ironbark Sheet Metal	spares depot backorder	courier	15
4219-3	Calder Battery Works	engineering change cut-in	expedited road	13
4224-4	Tessellate Controls	customer date brought forward	air	19
4229-5	Ryemoor Wire Harness	build plan pull-in	standard road with premium	17
4234-6	Kestrel Drive Systems	supplier missed commit date	courier	11
4239-7	Brightwater Motion	yield loss replacement	expedited road	21
4244-8	Halverson Optics	spares depot backorder	air	13
4249-0	Penrose Castings	engineering change cut-in	standard road with premium	15
4254-1	Ironbark Sheet Metal	customer date brought forward	courier	17
4259-2	Calder Battery Works	build plan pull-in	expedited road	11
4264-3	Tessellate Controls	supplier missed commit date	air	21
4269-4	Ryemoor Wire Harness	yield loss replacement	standard road with premium	19
4274-5	Kestrel Drive Systems	spares depot backorder	courier	15
4279-6	Brightwater Motion	engineering change cut-in	expedited road	13
4284-7	Halverson Optics	customer date brought forward	air	19
4289-8	Penrose Castings	build plan pull-in	standard road with premium	17

Conversion and forecast discipline

Multi-year commitments are becoming the norm in this segment, which stabilises the site queue and complicates the revenue phasing. The Pinebank Distribution pursuit re-dated again. Weighted coverage sits near 152 open pursuits. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Lucia Mbeki-Hart owns the re-qualification pass. Deals leaving the period: 11, most still dated. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Late-stage legal review has become a recurring source of slip, and the general counsel asked for the pattern rather than the anecdotes. Weighted coverage sits near 152 open pursuits. Conversion into commercial close remains the weak stage. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Deals leaving the period: 11, most still dated. Lucia Mbeki-Hart owns the re-qualification pass. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

Slippage this period was not random: the deals that moved had a common feature, which is that the customer had no internal project owner. The Pinebank Distribution pursuit re-dated again. Weighted coverage sits near 152 open pursuits. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Deals leaving the period: 11, most still dated. Slippage totalled 11 opportunities against 9 before. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

The largest pursuit in the book carries a dependency on the customer finishing a racking project that has already been delayed twice. Lucia Mbeki-Hart owns the re-qualification pass. Deals leaving the period: 11, most still dated. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Conversion into commercial close remains the weak stage. Slippage totalled 11 opportunities against 9 before. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Procurement cycles at the grocery accounts run longer than the model assumes, and the model has not been updated since it was written. Two losses went to the same competitor. Conversion into commercial close remains the weak stage. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Deals leaving the period: 11, most still dated. The Pinebank Distribution pursuit re-dated again. Go-live cycle 42 days at Fort Dodge. Ryemoor Wire Harness quoted lead times moved again. Win rate 37 percent, best in Northeast. Queue depth 31 sites, Elk Grove at the front.

One displacement pursuit has consumed more engineering support hours than the next four combined, with no commitment in return. The Pinebank Distribution pursuit re-dated again. Deals leaving the period: 11, most still dated. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Weighted coverage sits near 152 open pursuits. Slippage totalled 11 opportunities against 9 before. Scrap 24 thousand, Halverson Optics contributing. The HS-200 tote handler took most of the test cell time. Slipped deals 11, including Quillon Home Supply. Uptime 97.7 percent, interventions every 384 hours.

Second-source qualification progress reviewed in September 2025

Qualification step	Candidate source	Owner	Planned date	Actual date	Result
Request for quotation issued	Brightwater Motion drive unit	Tobias Nkemdirim	2025-07-30	2025-07-28	fail, two of eight samples
Sample order placed	Brightwater Motion drive unit	Emil Farkas	2025-08-13	2025-08-14	pass with observation
First article dimensional inspection	Brightwater Motion drive unit	Marcus Peil	2025-08-27	2025-08-31	retest scheduled
Thermal soak test	Brightwater Motion drive unit	Emil Farkas	2025-09-10	2025-09-17	complete
Endurance run to two thousand hours	Brightwater Motion drive unit	Marcus Peil	2025-09-24	2025-09-23	in progress
Process audit at supplier	Brightwater Motion drive unit	Emil Farkas	2025-10-08	2025-10-10	pass
Production part approval	Brightwater Motion drive unit	Emil Farkas	2025-10-22	2025-10-27	fail, two of eight samples
First production lot	Brightwater Motion drive unit	Marcus Peil	2025-11-05	2025-11-13	pass with observation
Request for quotation issued	Penrose Castings frame	Hollis Bramwell	2025-08-04	2025-08-04	retest scheduled
Sample order placed	Penrose Castings frame	Hollis Bramwell	2025-08-18	2025-08-21	complete
First article dimensional inspection	Penrose Castings frame	Hollis Bramwell	2025-09-01	2025-09-07	in progress

Qualification step	Candidate source	Owner	Planned date	Actual date	Result
Thermal soak test	Penrose Castings frame	Emil Farkas	2025-09-15	2025-09-13	pass
Endurance run to two thousand hours	Penrose Castings frame	Hollis Bramwell	2025-09-29	2025-09-30	fail, two of eight samples
Process audit at supplier	Penrose Castings frame	Hollis Bramwell	2025-10-13	2025-10-17	pass with observation
Production part approval	Penrose Castings frame	Tobias Nkemdirim	2025-10-27	2025-11-03	retest scheduled
First production lot	Penrose Castings frame	Hollis Bramwell	2025-11-10	2025-11-09	complete

Deployment operations

The queue holds three sites with no confirmed dock date from the customer, and the review declined to schedule crews against hope. Salinas Valley was held at the readiness gate. Elk Grove and Fort Dodge both cleared acceptance testing. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Owen Castellanos sequenced the queue by readiness. Contract to go-live averaged 42 days. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Days from contract to go-live improved, but the improvement came from the front of the process rather than from anything the installation crews changed. Go-live cycle: 42 days, from 46. Owen Castellanos sequenced the queue by readiness. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Queue depth reached 31 sites. Elk Grove and Fort Dodge both cleared acceptance testing. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

The deployment playbook was rewritten mid-period after a crew found that the network prerequisites section was three revisions out of date. Go-live cycle: 42 days, from 46. The queue carries 31 sites, 28 a period ago. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Contract to go-live averaged 42 days. Salinas Valley was held at the readiness gate. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

Crew travel days per site came down, largely because two regional hubs now hold enough tooling to avoid shipping kit ahead of each job. Contract to go-live averaged 42 days. Elk Grove and Fort Dodge both cleared acceptance testing. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. The queue carries 31 sites, 28 a period ago. Salinas Valley was held at the readiness gate. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Acceptance testing found more integration defects than mechanical ones, and the defects clustered in the warehouse-management adapter. Elk Grove and Fort Dodge both cleared acceptance testing. The queue carries 31 sites, 28 a period ago. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Queue depth reached 31 sites. Owen Castellanos sequenced the queue by readiness. Go-live cycle 42 days at Fort Dodge. Ryemoor Wire Harness quoted lead times moved again. Win rate 37 percent, best in Northeast. Queue depth 31 sites, Elk Grove at the front.

Installer utilisation is high enough to be a risk rather than an achievement, because there is no slack for rework travel. Queue depth reached 31 sites. The queue carries 31 sites, 28 a period ago. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Owen Castellanos sequenced the queue by readiness. Contract to go-live averaged 42 days. Scrap 24 thousand, Halverson Optics contributing. The HS-200 tote handler took most of the test cell time. Slipped deals 11, including Quillon Home Supply. Uptime 97.7 percent, interventions every 384 hours.

Deployment resourcing

Contractor coverage buys schedule protection at a cost per site that the review agreed to carry for a bounded number of jobs. Sunil Achterberg covered two regions this period. Redlands needed a second crew visit. Peak-season

lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Crew leads remain the gating resource. Utilisation was 85 percent against 90 percent. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Regional crew hubs changed the utilisation picture more than any hiring decision made in the same period. Utilisation was 85 percent against 90 percent. Crew leads remain the gating resource. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Installer utilisation ran at 85 percent. Sunil Achterberg covered two regions this period. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

Weekend and holiday work is filling gaps that the capacity model does not show, which makes the model look better than reality. Crew leads remain the gating resource. Sunil Achterberg covered two regions this period. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Travel days per site fell again. Certified crew count trails the site queue of 31. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

Crew composition changed this period, with more integration skill and less mechanical assembly skill in each team. Crew leads remain the gating resource. Installer utilisation ran at 85 percent. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Certified crew count trails the site queue of 31. Sunil Achterberg covered two regions this period. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Scheduling crews more than six weeks out has proved futile, because customer readiness dates move inside that window. Sunil Achterberg covered two regions this period. Certified crew count trails the site queue of 31. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Utilisation was 85 percent against 90 percent. Crew leads remain the gating resource. Go-live cycle 42 days at Fort Dodge. Ryemoor Wire Harness quoted lead times moved again. Win rate 37 percent, best in Northeast. Queue depth 31 sites, Elk Grove at the front.

Training throughput limits how fast the crew grows, because each certifying lead can supervise one trainee per site without degrading the job. Crew leads remain the gating resource. Redlands needed a second crew visit. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Travel days per site fell again. Certified crew count trails the site queue of 31. Scrap 24 thousand, Halverson Optics contributing. The HS-200 tote handler took most of the test cell time. Slipped deals 11, including Quillon Home Supply. Uptime 97.7 percent, interventions every 384 hours.

Inventory coverage by commodity and stocking point, September 2025

Commodity	Stocking point	On hand units	Coverage weeks	Policy weeks	Action agreed
Drive units	Plant stockroom	87	9	4	hold policy
Lidar assemblies	Plant stockroom	60	4	6	reduce to policy
Battery packs	Plant stockroom	52	11	8	expedite inbound
Castings	Plant stockroom	45	2	4	review with supplier
Sheet metal	Plant stockroom	41	7	6	disposition required
Wire harness	Plant stockroom	37	1	8	raise buffer
Controllers	Plant stockroom	30	8	4	hold policy
Caster and wheel sets	Plant stockroom	26	3	6	reduce to policy
Drive units	Regional depots	43	12	8	expedite inbound
Lidar assemblies	Regional depots	30	7	4	review with supplier
Battery packs	Regional depots	26	14	6	disposition required
Castings	Regional depots	22	3	8	raise buffer
Sheet metal	Regional depots	20	11	4	hold policy
Wire harness	Regional depots	18	6	6	reduce to policy
Controllers	Regional depots	15	13	8	expedite inbound
Caster and wheel sets	Regional depots	13	4	4	review with supplier

Plant performance

Second-shift ramp is going more slowly than planned because training the new operators takes line time from the first shift. Overtime carried the closing two weeks. Output reached 90 units, from 84. Peak-season lockouts pushed

acceptance testing later. Four accounts locked their docks entirely. Work in process ended at 42 units. Plan was 92 units; the line delivered 90. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Test-cell capacity will bind before assembly capacity does, and the capital request to fix that has already been deferred once. Output reached 90 units, from 84. Overtime carried the closing two weeks. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Plan was 92 units; the line delivered 90. Nadia Oyelaran owns the line rebalance. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

Work instructions were re-photographed for the revised sensor head, ending a period where operators worked from a printout with a pen annotation. Plan was 92 units; the line delivered 90. Nadia Oyelaran owns the line rebalance. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Work in process ended at 42 units. Overtime carried the closing two weeks. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

Rebalancing the two assembly cells lifted output without adding people, mostly by moving the harness dress-up operation upstream. The HS-400 pallet mover drove most of the changeover time. Overtime carried the closing two weeks. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Work in process ended at 42 units. Nadia Oyelaran owns the line rebalance. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Cycle time on the pallet mover remains longer than the tote handler by more than the work content justifies. Work in process ended at 42 units. Attainment gap: 2 units short of plan. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Nadia Oyelaran owns the line rebalance. Output reached 90 units, from 84. Go-live cycle 42 days at Fort Dodge. Ryemoor Wire Harness quoted lead times moved again. Win rate 37 percent, best in Northeast. Queue depth 31 sites, Elk Grove at the front.

Kitting accuracy improved after the pick-to-light change, and the number of build starts held for missing parts fell accordingly. Nadia Oyelaran owns the line rebalance. The HS-400 pallet mover drove most of the changeover time. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Plan was 92 units; the line delivered 90. Output reached 90 units, from 84. Scrap 24 thousand, Halverson Optics contributing. The HS-200 tote handler took most of the test cell time. Slipped deals 11, including Quillon Home Supply. Uptime 97.7 percent, interventions every 384 hours.

Live constraints and their stage

Constraint under review: sensor assembly yield, at the recurrence scare stage as of this session. A single week dipped to ninety-one percent on the sensor line, the trigger fired as designed, and inspection went back to full for eight days before sampling resumed. Requisitions open 22, Owen Castellanos holding the list. Capital spend 340 thousand this period.

Dual sourcing costs more per unit during the overlap period, and the review accepted that cost with its eyes open. Lucia Mbeki-Hart issued the first supplier scorecards. Ryemoor Wire Harness missed two consecutive commit dates. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Supplier on-time delivery came in at 92 percent. Halverson Optics improved after a site visit. Salinas Valley carries 31 of the queued fleet. Bookings 96 units across 152 pursuits. Sunil Achterberg owns the Sheet metal recovery. Build plan 92, actual 90, Sheet metal short.

Tooling ownership is unclear on four part numbers, and the review asked for the contracts to be read rather than remembered. Expedite activity rose with the build plan of 92. Supplier on-time delivery came in at 92 percent. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. On-time delivery was 92 percent, from 94 percent. Ryemoor Wire Harness missed two consecutive commit dates. Win rate 37 percent, best in Northeast. Pinebank Distribution asked for the HS-400 pallet mover configuration. Capital spend 340 thousand this period. Salinas Valley carries 31 of the queued fleet.

Work in process ageing at the September 2025 cut-off

Build lot	Units	Days in work in process	Held for	Expected release
LOT-1901	11	15	harness rework	2025-10-13
LOT-1902	7	6	nothing, awaiting ship date	2025-10-17
LOT-1903	7	21	drive unit	2025-10-21
LOT-1904	5	12	lidar window assembly	2025-10-25
LOT-1905	5	23	controller firmware load	2025-10-29
LOT-1906	3	2	customer configuration decision	2025-11-02
LOT-1907	3	19	test cell slot	2025-11-06
LOT-1908	1	10	harness rework	2025-11-10
LOT-1909	10	21	nothing, awaiting ship date	2025-11-14
LOT-1910	6	4	drive unit	2025-11-18
LOT-1911	6	15	lidar window assembly	2025-11-22
LOT-1912	4	2	controller firmware load	2025-11-26
LOT-1913	4	15	customer configuration decision	2025-11-30
LOT-1914	2	6	test cell slot	2025-12-04
LOT-1915	2	21	harness rework	2025-12-08
LOT-1916	1	12	nothing, awaiting ship date	2025-12-12
LOT-1917	9	23	drive unit	2025-12-16
LOT-1918	5	2	lidar window assembly	2025-12-20

Quality performance

Quality engineering asked for one more headcount and got a re-prioritisation instead, which the review acknowledged as a real trade. First-pass yield finished at 91 percent. Scrap totalled 24 thousand dollars. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Yield was 91 percent against 96 percent. Rework hours concentrated in the sensor cell. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Process capability studies were completed on the two operations that had never had one, and one of them failed. Dana Whitlock signed the corrective action. Kestrel Drive Systems changed a process without notice. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Scrap totalled 24 thousand dollars. Rework hours concentrated in the sensor cell. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

Containment held: nothing built in the affected window left the plant without a hundred percent inspection record attached. Scrap ran 24 thousand, from 16 thousand. Yield was 91 percent against 96 percent. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Scrap totalled 24 thousand dollars. Rework hours concentrated in the sensor cell. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

Escapes to the field are the measure that matters, and this period produced a number that the service team could absorb. Dana Whitlock signed the corrective action. Scrap totalled 24 thousand dollars. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. First-pass yield finished at 91 percent. Scrap ran 24 thousand, from 16 thousand. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

A supplier process change arrived without notification and produced a yield loss that took five weeks to attribute correctly. Dana Whitlock signed the corrective action. Kestrel Drive Systems changed a process without notice. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Scrap ran 24 thousand, from 16 thousand. First-pass yield finished at 91 percent. Go-live cycle 42 days at Fort Dodge. Ryemoor Wire Harness quoted lead times moved again. Win rate 37 percent, best in Northeast. Queue depth 31 sites, Elk Grove at the front.

Warranty claims lag the build date by months, so the yield excursion will keep appearing in service data after the plant has moved on. Scrap ran 24 thousand, from 16 thousand. Yield was 91 percent against 96 percent. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Scrap totalled 24 thousand dollars.

Kestrel Drive Systems changed a process without notice. Scrap 24 thousand, Halverson Optics contributing. The HS-200 tote handler took most of the test cell time. Slipped deals 11, including Quillon Home Supply. Uptime 97.7 percent, interventions every 384 hours.

Inbound supply position

Forecast sharing with the top five suppliers began this period, and two of them immediately improved their commit dates. Halverson Optics improved after a site visit. Supplier on-time delivery came in at 92 percent. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Lucia Mbeki-Hart issued the first supplier scorecards. Expedite activity rose with the build plan of 92. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Dual sourcing costs more per unit during the overlap period, and the review accepted that cost with its eyes open. Coverage weeks on long-lead parts were extended. Lucia Mbeki-Hart issued the first supplier scorecards. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Halverson Optics improved after a site visit. On-time delivery was 92 percent, from 94 percent. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

Tooling ownership is unclear on four part numbers, and the review asked for the contracts to be read rather than remembered. Lucia Mbeki-Hart issued the first supplier scorecards. Expedite activity rose with the build plan of 92. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Halverson Optics improved after a site visit. Supplier on-time delivery came in at 92 percent. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

Where tooling belongs to the supplier, the exit cost is real and it is not written down anywhere. Supplier on-time delivery came in at 92 percent. Expedite activity rose with the build plan of 92. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Halverson Optics improved after a site visit. Coverage weeks on long-lead parts were extended. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Lead-time creep is the pattern to watch, because quoted lead times moved without any supplier formally notifying a change. Ryemoor Wire Harness missed two consecutive commit dates. Expedite activity rose with the build plan of 92. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Lucia Mbeki-Hart issued the first supplier scorecards. Supplier on-time delivery came in at 92 percent. Go-live cycle 42 days at Fort Dodge. Ryemoor Wire Harness quoted lead times moved again. Win rate 37 percent, best in Northeast. Queue depth 31 sites, Elk Grove at the front.

Purchase order acknowledgements are now chased on a fixed cadence, which sounds trivial and caught two silent date pushes. Supplier on-time delivery came in at 92 percent. Lucia Mbeki-Hart issued the first supplier scorecards. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Coverage weeks on long-lead parts were extended. On-time delivery was 92 percent, from 94 percent. Scrap 24 thousand, Halverson Optics contributing. The HS-200 tote handler took most of the test cell time. Slipped deals 11, including Quillon Home Supply. Uptime 97.7 percent, interventions every 384 hours.

Fleet uptime by live site, September 2025

Site	Fleet units	Uptime %	Contract floor %	Service credit exposure
Waukegan	16	97.2	96.0	none
Mesquite	22	98.0	97.0	none
Ashland Park	20	97.5	97.0	none
Riverbend	14	98.2	96.0	none
Kennesaw	24	97.3	97.0	none
Fort Dodge	16	97.8	97.0	none
Salinas Valley	18	97.1	96.0	none
Chandler South	20	97.9	97.0	none
Elk Grove	14	97.4	97.0	none

Site	Fleet units	Uptime %	Contract floor %	Service credit exposure
Cedar Bluff	24	98.1	96.0	none
Norfolk	22	97.6	97.0	none
Tulsa	18	98.3	97.0	none
Redlands	16	97.2	96.0	none
Grand Forks	22	98.0	97.0	none
Waukegan (phase two)	20	97.2	97.0	none
Mesquite (phase two)	14	97.9	96.0	none
Ashland Park (phase two)	24	97.0	97.0	none
Riverbend (phase two)	16	97.5	97.0	none
Kennesaw (phase two)	18	96.8	96.0	none
Fort Dodge (phase two)	20	97.6	97.0	none

Financial posture

Contract labour in deployment is the fastest lever available and the one with the most direct customer consequence. Spending ran 3360 thousand against 3290 thousand. Lucia Mbeki-Hart holds the trigger list. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Runway moved from 15 to 14 months. Test-cell capital was deferred again. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Cash discipline this year came two-thirds from collections and one-third from deferred capital, which is a better mix than cutting people. Capital spend was 340 thousand dollars. Runway moved from 15 to 14 months. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Burn for the period was 3360 thousand dollars. Lucia Mbeki-Hart holds the trigger list. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

Runway is not a single number, and presenting it as one has caused more confusion than it has prevented. Lucia Mbeki-Hart holds the trigger list. Capital spend was 340 thousand dollars. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Test-cell capital was deferred again. Spending ran 3360 thousand against 3290 thousand. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

Each scenario was read against a named observable, so nobody has to interpret whether a trigger has fired. Lucia Mbeki-Hart holds the trigger list. Burn for the period was 3360 thousand dollars. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Capital spend was 340 thousand dollars. Runway stands at 14 months on the middle case. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Capital spending on test cells was deferred, which protects cash now and constrains build capacity later. Spending ran 3360 thousand against 3290 thousand. Burn for the period was 3360 thousand dollars. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Capital spend was 340 thousand dollars. Test-cell capital was deferred again. Go-live cycle 42 days at Fort Dodge. Ryemoor Wire Harness quoted lead times moved again. Win rate 37 percent, best in Northeast. Queue depth 31 sites, Elk Grove at the front.

The downside trigger was armed after two large bookings left the quarter, and nine requisitions were paused within a week. Runway moved from 15 to 14 months. Capital spend was 340 thousand dollars. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Spending ran 3360 thousand against 3290 thousand. Burn for the period was 3360 thousand dollars. Scrap 24 thousand, Halverson Optics contributing. The HS-200 tote handler took most of the test cell time. Slipped deals 11, including Quillon Home Supply. Uptime 97.7 percent, interventions every 384 hours.

Intervention causes across the fleet, September 2025

Cause category	Site band	Interventions	Share of total %	Accountable party	Trend
Floor marking and facility	ten largest sites	14	10.6	Customer operations	improving sharply
Operator intervention	ten largest sites	9	6.8	Engineering	first period measured
Navigation software	ten largest sites	8	6.1	Manufacturing	improving

Cause category	Site band	Interventions	Share of total %	Accountable party	Trend
Drive unit hardware	ten largest sites	6	4.5	Field service	flat
Sensor head hardware	ten largest sites	4	3.0	Product	worsening
Warehouse management interface	ten largest sites	3	2.3	Customer facility team	improving sharply
Battery and charging	ten largest sites	21	15.9	Customer operations	first period measured
Unclassified	ten largest sites	16	12.1	Engineering	improving
Floor marking and facility	remaining sites	8	6.1	Manufacturing	flat
Operator intervention	remaining sites	5	3.8	Field service	worsening
Navigation software	remaining sites	4	3.0	Product	improving sharply
Drive unit hardware	remaining sites	3	2.3	Customer facility team	first period measured
Sensor head hardware	remaining sites	2	1.5	Customer operations	improving
Warehouse management interface	remaining sites	1	0.8	Engineering	flat
Battery and charging	remaining sites	12	9.1	Manufacturing	worsening
Unclassified	remaining sites	9	6.8	Field service	improving sharply

Product checkpoints

Product management brought a decision to stop building one feature, and the review supported stopping it. The HS-200 tote handler absorbed most of the engineering effort. Documentation lags the current release. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Field data now sets the reliability backlog order. Release staging across sites is now standard. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Simulation coverage before release improved, and the last two releases produced fewer field regressions as a result. Documentation lags the current release. Two roadmap checkpoints cleared; one slipped. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Release staging across sites is now standard. Owen Castellanos brought the decision to stop one feature. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

Stopping work is harder than starting it, and this session stopped one thing on purpose. The HS-200 tote handler absorbed most of the engineering effort. Two roadmap checkpoints cleared; one slipped. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Owen Castellanos brought the decision to stop one feature. Field data now sets the reliability backlog order. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

Roadmap checkpoints were reviewed against the commitments made to customers rather than against the internal plan, which is a harder test. The HS-200 tote handler absorbed most of the engineering effort. Field data now sets the reliability backlog order. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Documentation lags the current release. Adapter work crowded out platform work again. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Hardware and software roadmaps are coupled more tightly than the planning process admits, and one dependency was found late. Release staging across sites is now standard. Documentation lags the current release. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Two roadmap checkpoints cleared; one slipped. Field data now sets the reliability backlog order. Go-live cycle 42 days at Fort Dodge. Ryemoor Wire Harness quoted lead times moved again. Win rate 37 percent, best in Northeast. Queue depth 31 sites, Elk Grove at the front.

The next controller revision closes an obsolescence exposure and requires a re-validation cycle that has to be planned now. Release staging across sites is now standard. Adapter work crowded out platform work again. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Two roadmap checkpoints cleared;

one slipped. Documentation lags the current release. Scrap 24 thousand, Halverson Optics contributing. The HS-200 tote handler took most of the test cell time. Slipped deals 11, including Quillon Home Supply. Uptime 97.7 percent, interventions every 384 hours.

Points of disagreement

The plant manager objected to another plan revision inside the month and asked for a freeze window, which was granted in part. The disagreement is recorded rather than resolved. No consensus was reached; the Chief Operating Officer decided. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Lucia Mbeki-Hart and Owen Castellanos read the data differently. Dana Whitlock asked for the decision to be revisited. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Whether a deferral saves money depends on which function is counting, and both counts were tabled. The objection was noted against the decision. Lucia Mbeki-Hart and Owen Castellanos read the data differently. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Dana Whitlock asked for the decision to be revisited. A further test was added because of the dissent. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

Disagreement was recorded rather than smoothed over, because the two positions rest on different readings of the same data. The objection was noted against the decision. The minority view is preserved in the record. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. No consensus was reached; the Chief Operating Officer decided. Lucia Mbeki-Hart and Owen Castellanos read the data differently. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

Finance and deployment disagreed about whether contract labour should be treated as a fixed or variable commitment. A further test was added because of the dissent. No consensus was reached; the Chief Operating Officer decided. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. The objection was noted against the decision. The minority view is preserved in the record. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Two functions read the reliability data differently, and the review agreed to a single definition before arguing again. A further test was added because of the dissent. Lucia Mbeki-Hart and Owen Castellanos read the data differently. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. The minority view is preserved in the record. The disagreement is recorded rather than resolved. Go-live cycle 42 days at Fort Dodge. Ryemoor Wire Harness quoted lead times moved again. Win rate 37 percent, best in Northeast. Queue depth 31 sites, Elk Grove at the front.

Product and sales disagreed on whether the pilot feature should be committed to a customer date, and the answer was no. The disagreement is recorded rather than resolved. Lucia Mbeki-Hart and Owen Castellanos read the data differently. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Dana Whitlock asked for the decision to be revisited. The minority view is preserved in the record. Scrap 24 thousand, Halverson Optics contributing. The HS-200 tote handler took most of the test cell time. Slipped deals 11, including Quillon Home Supply. Uptime 97.7 percent, interventions every 384 hours.

Customer escalations live at the September 2025 review

Account	Issue	Opened	Severity	State	Next step
Pinebank Distribution	operator training gap	2025-09-26	high, customer executive involved	monitoring	joint review scheduled
Alder & Vance Retail	uptime reporting dispute	2025-09-17	medium	escalated to product	parameter set applied
Northstar Cold Chain	docking misalignment after release	2025-09-08	high, customer executive involved	open	parameter set applied
Havering Logistics	aisle congestion at	2025-08-30	medium	mitigated	parts shipped

Account	Issue	Opened	Severity	State	Next step
	peak				
Quillon Home Supply	charger fault on two units	2025-08-21	high, customer executive involved	closed	joint review scheduled
Tenmile Freight	interface timeouts to the host	2025-08-12	medium	monitoring	joint review scheduled
Bexley Pharmaceutical Wholesale	sensor head replacement scheduling	2025-08-03	high, customer executive involved	escalated to product	site visit booked
Marrowfield Grocers	operator training gap	2025-07-25	medium	open	no further action
Pinebank Distribution - second site	uptime reporting dispute	2025-07-16	high, customer executive involved	mitigated	parameter set applied
Alder & Vance Retail - second site	docking misalignment after release	2025-07-07	medium	closed	joint review scheduled
Northstar Cold Chain - second site	aisle congestion at peak	2025-06-28	high, customer executive involved	monitoring	no further action
Havering Logistics - second site	charger fault on two units	2025-06-19	medium	escalated to product	parameter set applied
Quillon Home Supply - second site	interface timeouts to the host	2025-06-10	high, customer executive involved	open	site visit booked
Tenmile Freight - second site	sensor head replacement scheduling	2025-06-01	medium	mitigated	definition agreed
Bexley Pharmaceutical Wholesale - second site	operator training gap	2025-05-23	high, customer executive involved	closed	no further action

Decisions, owners and dates recorded in September 2025

An item was killed rather than rolled a fourth time, and the reasoning is in the record. Nadia Oyelaran inherited an item after a role change. Three items carried forward into 2025-11-06. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. One item closed with measured evidence. The oldest item dates from two sessions back. Requisitions open 22, Owen Castellanos holding the list. The HS-200 tote handler took most of the test cell time. Headcount 238 of 251, Lucia Mbeki-Hart reporting. Days outstanding 45, Marrowfield Grocers the largest balance.

Decisions were recorded with a named owner and a date, and items without both were explicitly not recorded as decisions. Owners were named and dates set against 2025-11-06. Two due dates were changed in the room. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. The oldest item dates from two sessions back. One item closed with measured evidence. Attrition 10 percent annualised in Northeast. Requisitions open 22, Owen Castellanos holding the list. Burn 3360 thousand, runway 14 months. Crew Charlie closed Redlands without a second visit.

Owners were asked to bring evidence of closure rather than a status colour, and two items failed that test. One item closed with measured evidence. Owners were named and dates set against 2025-11-06. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Nadia Oyelaran inherited an item after a role change. Three items carried forward into 2025-11-06. Work in process 42 units, mostly Sheet metal. Nadia Oyelaran and Dana Whitlock disagreed on sequencing. The HS-200 tote handler took most of the test cell time. Sunil Achterberg owns the Sheet metal recovery.

One decision was escalated out of this forum because it commits capital beyond the delegated threshold. The oldest item dates from two sessions back. Two due dates were changed in the room. Peak-season lockouts pushed acceptance testing later. Four accounts locked their docks entirely. Owners were named and dates set against 2025-11-06. Sunil Achterberg, Director of Field Service, took the largest open item. Go-live cycle 42 days at Fort Dodge. Burn 3360 thousand, runway 14 months. Bookings 96 units across 152 pursuits. Nadia Oyelaran and Dana Whitlock disagreed on sequencing.

Action items reviewed and recorded, September 2025

Item	Description	Owner	Opened	Due	Status	Closing evidence
OR-1803	Stand up crew lead certification pipeline	Renata Voss	2025-09-04	2025-11-02	Open, date revised	partial

Item	Description	Owner	Opened	Due	Status	Closing evidence
OR-1920	Size the buffer stock on long-lead commodities	Hollis Bramwell	2025-09-29	2025-10-19	Open, date revised	outstanding
OR-1923	Publish the supplier scorecard with weighted criteria	Hollis Bramwell	2025-09-25	2025-10-25	Blocked	outstanding
OR-1926	Refresh compensation bands for field engineering	Renata Voss	2025-09-21	2025-10-31	Closed by decision	decision recorded
OR-1929	Split the reliability backlog by build vintage	Tobias Nkemdirim	2025-09-17	2025-11-06	Open, date revised	outstanding
OR-1932	Complete process capability study on the bond operation	Emil Farkas	2025-09-13	2025-11-12	Blocked	outstanding
OR-1935	Measure onboarding time to productivity for crews	Renata Voss	2025-09-09	2025-11-18	Closed by decision	decision recorded
OR-1938	Reissue the deployment playbook network section	Priya Ramanathan	2025-09-05	2025-11-24	Open, date revised	outstanding
OR-1941	Move collections calls to the account teams	Lucia Mbeki-Hart	2025-09-01	2025-11-30	Blocked	outstanding
OR-1944	Re-cut the stage definitions in the pipeline report	Marguerite Do	2025-08-28	2025-12-06	Closed by decision	report filed
OR-1947	Read the tooling ownership clauses on four part numbers	Hollis Bramwell	2025-08-24	2025-12-12	Open, date revised	outstanding
OR-1950	Rebuild the site cost model separating retrofit from greenfield	Marcus Peil	2025-08-20	2025-12-18	Blocked	outstanding
OR-1953	Draft deposit terms for multi-site commitments	Ingrid Solberg	2025-08-16	2025-12-24	Closed by decision	measured result attached
OR-1956	Reconcile the two uptime definitions with the customer	Owen Castellanos	2025-08-12	2025-12-30	Open, date revised	outstanding
OR-1959	Decide disposition of the superseded sensor head stock	Marcus Peil	2025-08-08	2026-01-05	Blocked	outstanding
