INVESTMENT POLICY - ARCHIVED EDITION - RECORD 004

Helioscope Robotics, Inc. - diligence file reference POLICY_HISTORY-004

1. Authority and scope

Follow-On Reserve Framework, Edition 1.2 was drafted on 2019-11-06 and took effect on 2020-01-01 on the authority of the Investment Committee. It governs how a reserve is set at initial investment and re-forecast through the life of a position. The custodian of record is the Portfolio Finance, and the schedules to this edition form part of it.

On the authority of the Investment Committee, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. Failing that, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. As to ownership, ageing report with the flagged lines initialled answers for it under Edition 1.2, on a Fund Controller test cycle. On its own subject matter, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking co-invest allocations to the parallel vehicle as the tested set.

As the FORF control register records, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. Practically, failure is reported to the Investment Committee in the period it is found, not in the period it occurred. Operationally, exception form with both fields completed bears it in Follow-On Reserve Framework, Edition 1.2, with a Compliance Officer verification. On the facts this edition addresses, the Investment Committee applies this to how a reserve is set at initial investment and re-forecast through the life of a position by examining commitments made under an unexpired exception at each measurement point.

Where two records before the Investment Committee disagree, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. Enforcement follows automatically: a failure here is a reportable control breach and is minuted as such. On the control map, labelled schedule with the instrument list attached takes the requirement under Follow-On Reserve Framework, Edition 1.2, verified Investment Committee chair. Where it bites, for how a reserve is set at initial investment and re-forecast through the life of a position the operative population is matters where two source records disagreed, and a test reported without it is void.

Where the evidence before the Investment Committee is incomplete, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. The committee minuted the point: failure is reported to the Investment Committee in the period it is found, not in the period it occurred. As the schedules allocate it, recomputation sheet with both samples bears it in Follow-On Reserve Framework, Edition 1.2, with a Analytics Standards Group verification. On the facts this edition addresses, because this edition governs how a reserve is set at initial investment and re-forecast through the life of a position, the requirement reaches commitments made under an unexpired exception and no wider.

Where the evidence before the Investment Committee is incomplete, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. The edition is explicit here: failure is reported to the Investment Committee in the period it is found, not in the period it occurred. Turning to who answers for it, allocation worksheet and eligibility list takes the requirement under Follow-On Reserve Framework, Edition 1.2, verified Compliance Officer. By way of illustration, for how a reserve is set at initial investment and re-forecast through the life of a position the operative population is positions carried at a mark older than two quarters, and a test reported without it is void.

the Investment Committee expects, under FORF version 1.2, that a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. The register treats this strictly: the position is added to the watch list and reported at each subsequent meeting until closed. Operationally, waiver register with expiry column populated holds it for the duration of Edition 1.2, with testing Legal and Compliance Committee. Scoped to this edition, applied to how a reserve is set at initial investment and re-forecast through the life of a position, the standard is tested over commitments made under an unexpired exception and the result is minuted.

Schedule 4.V - version history of Follow-On Reserve Framework to Edition 1.2

Edition (FORF version 1.2)	Adopted	Effective from	Effective to	Sections changed	Nature of change	Approving body
Edition 1.0	2019-04-15	2019-05-01	2019-12-31	All	First adoption; reserves set as a multiple of the initial cheque at approval	the Investment Committee
Edition 1.2	2019-11-06	2020-01-01	2021-12-31	2, 4	Re-forecast cadence fixed at quarterly; reserve worksheet made a condition of funding	the Investment Committee
Edition 2.0	2021-10-27	2022-01-01	2023-12-31	3, 5, 6	First-close and fully-funded views defined and separated; release triggers enumerated	the Investment Committee
Edition 2.1	2022-06-30	2022-08-01	2023-12-31	5	Reallocation between positions permitted within a sector band	the Investment Committee
Edition 3.0	2023-11-15	2024-01-01	2025-09-30	6, 7, 8	Breach procedure rewritten to require a re-forecast and a named alternative use	the Investment Committee

2. Defined terms

As applied by the FORF monitoring calendar, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. Should that occur, the position is added to the watch list and reported at each subsequent meeting until closed. Operationally, arbitration log entry naming both sources is accountable, under the control of Follow-On Reserve Framework, Edition 1.2 tested Deal Operations manager. Scoped to this edition, the Investment Committee applies this to how a reserve is set at initial investment and re-forecast through the life of a position by examining matters where two source records disagreed at each measurement point.

As a mandatory standard of FORF version 1.2, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. On failure, the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. By assignment, exception form with both fields completed owns the point in Follow-On Reserve Framework, Edition 1.2, and the test runs Compliance Officer. Given what this edition governs, applied to how a reserve is set at initial investment and re-forecast through the life of a position, the standard is tested over transactions where a delegate signed and the result is minuted.

Subject to the escalation ladder FORF version 1.2 sets, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. As to consequence, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. As the schedules allocate it, notification record with send and receipt times performs the test Chief Operating Officer and reports under Follow-On Reserve Framework, Edition 1.2. As the scope note records, in the context of how a reserve is set at initial investment and re-forecast through the life of a position this bears on all new platform commitments in the period, which is why the test names its population.

Against the FORF version history, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. Practically, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the second reading, seat schedule with instrument references performs the test General Counsel and reports under Follow-On Reserve Framework, Edition 1.2. Scoped to this edition, the reference population for how a reserve is set at initial investment and re-forecast through the life of a position under this edition is positions with an unclosed monitoring finding.

Once a position is held under FORF version 1.2, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. The instrument provides that the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. On the second reading, labelled schedule with the instrument list attached is assigned the control by Edition 1.2, which sets the cycle at Investment Committee chair. Where it bites, for how a reserve is set at initial investment and re-forecast through the life of a position the operative population is co-invest allocations to the parallel vehicle, and a test reported without it is void.

For so long as FORF version 1.2 is in force, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. By way of enforcement, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the control map, signature page inventory with counterpart status is the accountable function here, testing General Counsel under Edition 1.2. For the tested set, applied to how a reserve is set at initial investment and re-forecast through the life of a position, the standard is tested over transactions where a delegate signed and the result is minuted.

Schedule 4.T - control testing log kept under Edition 1.2

Test ref (FORF version 1.2)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
FORF-T0001	Third-party valuation reports are read against the preparer's own conclusion	2023-07	Deal Team self-certification	matters where two source records disagreed	17	failed, approver was also preparer	open

FORF-T0070	Reserve set at initial investment is recorded before the funding instruction issues	2025-04	Fund Controller	matters approved between committee meetings	8	failed, no evidence on file	open
FORF-T0071	Rounding and precision follow the stated convention on every derived figure	2020-09	Fund Controller	positions whose model was rebuilt in the period	20	failed, approver was also preparer	open
FORF-T0072	Third-party valuation reports are read against the preparer's own conclusion	2019-05	Office of the General Counsel	positions with an unclosed monitoring finding	33	failed, evidence produced late	open
FORF-T0073	Allocation between the funds and any co-invest vehicle follows the written basis	2023-07	Portfolio Operations	commitments made under an unexpired exception	4	failed, approver was also preparer	open
FORF-T0074	A mark carried for more than two quarters without new evidence is flagged as stale	2021-10	Valuation Committee secretariat	follow-on commitments above the delegated band	25	failed, approver was also preparer	open

3. Mandatory standards

Where a delegate of the Investment Committee acts, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. The drafting leaves no room: non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. For testing purposes, room index extract showing lodging dates bears it in Follow-On Reserve Framework, Edition 1.2, with a General Counsel verification. On the facts this edition addresses, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking co-invest allocations to the parallel vehicle as the tested set.

the Investment Committee requires, before a matter may be tabled, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. In such a case, failure is reported to the Investment Committee in the period it is found, not in the period it occurred. For the avoidance of gaps, exception form with both fields completed holds it for the duration of Edition 1.2, with testing Compliance Officer. On the operative population, applied to how a reserve is set at initial investment and re-forecast through the life of a position, the standard is tested over all new platform commitments in the period and the result is minuted.

Subject to the escalation ladder FORF version 1.2 sets, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. The stated effect is that a failure here is a reportable control breach and is minuted as such. Operationally, seat schedule with instrument references is the accountable function here, testing General Counsel under Edition 1.2. As the instrument is scoped, the reference population for how a reserve is set at initial investment and re-forecast through the life of a position under this edition is positions carried at a mark older than two quarters.

As the FORF control register records, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. On failure, the position is added to the watch list and reported at each subsequent meeting until closed. As to ownership, signed clearance form with the date of search holds it for the duration of Edition 1.2, with testing Compliance Officer. For the tested set, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking all new platform commitments in the period as the tested set.

Notwithstanding the practice before FORF version 1.2, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. On failure, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For the avoidance of gaps, labelled schedule with the instrument list attached owns the point in Follow-On Reserve Framework, Edition 1.2, and the test runs Investment Committee chair. On its own subject matter, the reference population for how a reserve is set at initial investment and re-forecast through the life of a position under this edition is follow-on commitments above the delegated band.

On the face of FORF version 1.2, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. The sanction is plain: failure is reported to the Investment Committee in the period it is found, not in the period it occurred. On the second reading, model cover tab and the reviewer's checklist is assigned the control by Edition 1.2, which sets the cycle at Analytics Standards Group. On the operative population, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking follow-on commitments above the delegated band as the tested set.

Schedule 4.D - decisions taken under Edition 1.2

Decision ref (FORF version 1.2)	Decision type	Date	Approver of record	Authority relied on	Disposition	Evidence at decision
FORF-D0001	transfer consent	2021-12-09	Deal partner and General Counsel	Amendment of a governing document post-close	within band	complete
FORF-D0002	reserve re-forecast	2024-12-17	Deal partner and Portfolio Finance	Follow-on within an approved reserve	within band	incomplete at decision

Decision ref (FORF version 1.2)	Decision type	Date	Approver of record	Authority relied on	Disposition	Evidence at decision
FORF-D0003	co-invest allocation	2023-06-08	Deal partner and General Counsel	Amendment of a governing document post-close	referred to counsel	incomplete at decision
FORF-D0004	follow-on breaching reserve	2024-04-05	Investment Committee, simple majority	New platform commitment	referred to counsel	incomplete at decision

4. Evidence and owners

Having regard to the effective date of FORF version 1.2, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. In such a case, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. On the assignment of duties, exception form with both fields completed carries the control in Follow-On Reserve Framework, Edition 1.2, tested Compliance Officer. On the population that matters, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking all new platform commitments in the period as the tested set.

As the FORF control register records, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. Practically, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. On the assignment of duties, waiver register with expiry column populated is accountable, under the control of Follow-On Reserve Framework, Edition 1.2 tested Legal and Compliance Committee. On the population that matters, because this edition governs how a reserve is set at initial investment and re-forecast through the life of a position, the requirement reaches follow-on commitments above the delegated band and no wider.

Notwithstanding the practice before FORF version 1.2, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. There is no discretion here: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. For accountability, ageing report with the flagged lines initialled bears it in Follow-On Reserve Framework, Edition 1.2, with a Fund Controller verification. For the tested set, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking co-invest allocations to the parallel vehicle as the tested set.

the Investment Committee expects, under FORF version 1.2, that an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. As recorded at adoption, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. By assignment, notification record with send and receipt times performs the test Chief Operating Officer and reports under Follow-On Reserve Framework, Edition 1.2. Where it bites, scoped to how a reserve is set at initial investment and re-forecast through the life of a position, the control bites on commitments made under an unexpired exception and is reported on that basis.

As a mandatory standard of FORF version 1.2, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The instrument provides that an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. By assignment, convergence tab showing iterations and residual owns the point in Follow-On Reserve Framework, Edition 1.2, and the test runs Analytics Standards Group. In practice under this edition, in the context of how a reserve is set at initial investment and re-forecast through the life of a position this bears on co-invest allocations to the parallel vehicle, which is why the test names its population.

Save where the Investment Committee grants an exception, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. Practically, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. As to ownership, exception form with both fields completed is accountable, under the control of Follow-On

Reserve Framework, Edition 1.2 tested Compliance Officer. As a matter of coverage, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking matters approved between committee meetings as the tested set.

Schedule 4.Z - amendment trail behind Edition 1.2

Amendment ref (FORF version 1.2)	Section affected	Nature	Adopted	Origin	Later treatment
FORF-A001	section 2.2	substantive	2019-07	committee resolution	superseded without replacement

FORF-A019	section 1.6	clarifying	2019-11	committee resolution	superseded without replacement
FORF-A020	section 9.6	renumbering	2023-12	counsel direction	reversed at the next adoption
FORF-A021	section 6.2	clarifying	2022-09	regulatory change	superseded without replacement
FORF-A022	section 7.2	clarifying	2024-08	audit finding	carried into the successor edition

5. Approval and escalation

Where two records before the Investment Committee disagree, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. The drafting leaves no room: the position is added to the watch list and reported at each subsequent meeting until closed. As to ownership, seat schedule with instrument references performs the test General Counsel and reports under Follow-On Reserve Framework, Edition 1.2. In practice under this edition, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking matters where two source records disagreed as the tested set.

Notwithstanding the practice before FORF version 1.2, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. On the plain words, failure is reported to the Investment Committee in the period it is found, not in the period it occurred. On the assignment of duties, model cover tab and the reviewer's checklist retains the duty throughout Edition 1.2, evidenced Analytics Standards Group. In practice under this edition, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking matters where two source records disagreed as the tested set.

Where the evidence before the Investment Committee is incomplete, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. Enforcement follows automatically: non-

compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. As the schedules allocate it, allocation worksheet and eligibility list is named as owner of record in Edition 1.2 and tests Compliance Officer. Read narrowly, because this edition governs how a reserve is set at initial investment and re-forecast through the life of a position, the requirement reaches positions carried at a mark older than two quarters and no wider.

the Investment Committee expects, under FORF version 1.2, that the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The drafting leaves no room: a failure here is a reportable control breach and is minuted as such. For accountability, ageing report with the flagged lines initialled is assigned the control by Edition 1.2, which sets the cycle at Fund Controller. Where it bites, for how a reserve is set at initial investment and re-forecast through the life of a position the operative population is co-invest allocations to the parallel vehicle, and a test reported without it is void.

the Investment Committee expects, under FORF version 1.2, that the audit trail for a mark is retained for the life of the position and afterwards, whether or not the position is realised. As recorded at adoption, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the assignment of duties, signed clearance form with the date of search is named as owner of record in Edition 1.2 and tests Compliance Officer. On the operative population, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking co-invest allocations to the parallel vehicle as the tested set.

As applied by the FORF monitoring calendar, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. Should that occur, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. For accountability, notification record with send and receipt times performs the test Chief Operating Officer and reports under Follow-On Reserve Framework, Edition 1.2. As the scope note records, the Investment Committee applies this to how a reserve is set at initial investment and re-forecast through the life of a position by examining all new platform commitments in the period at each measurement point.

Schedule 4.C - control register as Edition 1.2 drew it

Control ref (FORF version 1.2)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
FORF-C01	Every opportunity presented for approval carries a completed conflict clearance	Compliance confirms the clearance predates the tabling date	Signed clearance form with the date of search	Deal partner	Compliance Officer	Per opportunity	The matter may not be tabled and is struck from the agenda
FORF-C02	Reserve set at initial investment is recorded before the funding instruction issues	Portfolio Finance ties the reserve line to the approval minute	Reserve worksheet countersigned by the deal partner	Portfolio Finance analyst	Fund Controller	Per investment	Funding instruction is withheld until the reserve line exists
FORF-C03	Each capital structure supplied to the committee identifies which view it presents	Reviewer checks the view label against the underlying instruments	Labelled schedule with the instrument list attached	Modeling lead	Investment Committee chair	Per submission	The submission is returned unread and the meeting slot is lost
FORF-C04	Executed instruments are lodged in the data room within five business days of signing	Deal Operations reconciles the signing log to the room index	Room index extract showing lodging dates	Deal Operations manager	General Counsel	Weekly	The deal partner loses signature authority on new documents
FORF-C05	Where two sources disagree, both	Reviewer searches the arbitration log	Arbitration log entry naming both sources	Reviewing analyst	Deal Operations manager	Per discrepancy	Any conclusion drawn from the

Control ref (FORF version 1.2)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
	are preserved and the conflict is logged	for the affected figure					figure is void and must be redone
FORF-C06	A mark carried for more than two quarters without new evidence is flagged as stale	Fund Controller runs the ageing report against the mark register	Ageing report with the flagged lines initialled	Valuation analyst	Fund Controller	Quarterly	The position is written to the lower of cost and last evidenced value
FORF-C07	Every model released to the committee has a named preparer and a named reviewer	Analytics confirms both names appear on the cover tab	Model cover tab and the reviewer's checklist	Preparer	Analytics Standards Group	Per release	The model is not circulated and the decision is deferred
FORF-C08	Exception requests state a compensating control and an expiry date	Compliance rejects any request with either field blank	Exception form with both fields completed	Requesting partner	Compliance Officer	Per request	The request is refused without prejudice to a complete resubmission
FORF-C09	Board and observer seats are confirmed against the executed voting arrangements	Legal ties each seat to the instrument that creates it	Seat schedule with instrument references	Portfolio Operations	General Counsel	Semi-annually	The seat is treated as unheld until the confirmation is produced
FORF-C10	Currency translation uses one named rate source for the whole submission	Reviewer checks that a single source is cited on every schedule	Rate extract with the source and retrieval date	Modeling lead	Fund Controller	Per submission	The submission is rejected and the analyst redoes the translation
FORF-C11	Circular calculations are iterated to a stated tolerance and the residual is disclosed	Reviewer inspects the convergence tab for the residual	Convergence tab showing iterations and residual	Preparer	Analytics Standards Group	Per model	The output may not be quoted in any approval document
FORF-C12	Post-close reporting obligations are entered in the monitoring calendar at closing	Portfolio Operations reconciles closed deals to calendar entries	Calendar extract for the quarter of closing	Portfolio Operations	Chief Operating Officer	Monthly	The closing is not marked complete and the file stays open
FORF-C13	Allocation between the funds and any co-invest vehicle follows the written basis	Compliance recomputes the allocation from the eligibility list	Allocation worksheet and eligibility list	Allocation Officer	Compliance Officer	Per allocation	The allocation is unwound and re-run under supervision
FORF-C14	Third-party valuation reports are read against the preparer's own conclusion	Fund Controller documents agreement or divergence in writing	Reconciliation note signed by the controller	Valuation analyst	Valuation Committee	Per report	The report may not be relied on and the mark is held at prior basis
FORF-C15	Rounding and precision follow the stated convention on every derived figure	Reviewer recomputes two sampled figures at full precision	Recomputation sheet with both samples	Reviewing analyst	Analytics Standards Group	Per submission	Derived figures are struck and the schedule is reissued
FORF-C16	Unsigned	Legal checks	Signature page	Deal	General	Per citation	The instrument

Control ref (FORF version 1.2)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
	counterparts are identified as unsigned wherever the instrument is cited	the citation against the signature page inventory	inventory with counterpart status	Operations manager	Counsel		is treated as a draft for every purpose in the file
FORF-C17	A waiver granted once is recorded as expiring rather than as standing	Compliance confirms each register line carries an expiry	Waiver register with expiry column populated	Compliance analyst	Legal and Compliance Committee	Quarterly	The waiver lapses immediately and the underlying rule applies
FORF-C18	Escalations reach the named recipient within the stated notification window	Compliance samples three escalations and checks the timestamps	Notification record with send and receipt times	Escalating owner	Chief Operating Officer	Quarterly	The owner's escalation authority is suspended pending retraining

6. Exceptions

By the terms of the FORF standard, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. By way of enforcement, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. By assignment, exception form with both fields completed is assigned the control by Edition 1.2, which sets the cycle at Compliance Officer. In application, applied to how a reserve is set at initial investment and re-forecast through the life of a position, the standard is tested over positions carried at a mark older than two quarters and the result is minuted.

Under FORF version 1.2, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. The remedy is procedural: an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. In the accountability chain, reserve worksheet countersigned by the deal partner bears it in Follow-On Reserve Framework, Edition 1.2, with a Fund Controller verification. Scoped to this edition, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking all new platform commitments in the period as the tested set.

Against the FORF version history, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. Failing that, failure is reported to the Investment Committee in the period it is found, not in the period it occurred. As to ownership, allocation worksheet and eligibility list carries the control in Follow-On Reserve Framework, Edition 1.2, tested Compliance Officer. Given what this edition governs, for how a reserve is set at initial investment and re-forecast through the life of a position the operative population is all new platform commitments in the period, and a test reported without it is void.

As a mandatory standard of FORF version 1.2, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. Should that occur, failure is reported to the Investment Committee in the period it is found, not in the period it occurred. In the accountability chain, signed clearance form with the date of search is assigned the control by Edition 1.2, which sets the cycle at Compliance Officer. On the facts this edition addresses, in the context of how a reserve is set at initial investment and re-forecast through the life of a position this bears on commitments made under an unexpired exception, which is why the test names its population.

Once a position is held under FORF version 1.2, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. As to consequence, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. As to ownership, ageing report with the flagged lines initialled is the accountable function here, testing Fund Controller under Edition 1.2. As a matter of coverage, for how a reserve is set at initial investment and re-forecast through the life of a position the operative population is commitments made under an unexpired exception, and a test reported without it is void.

FORF version 1.2 provides, within the scope stated above, that a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. In such a case, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. On the assignment of duties, seat schedule with instrument references carries the control in Follow-On Reserve Framework, Edition 1.2, tested General Counsel. In application, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking commitments made under an unexpired exception as the tested set.

Schedule 4.E - exceptions granted under Edition 1.2

Ref (FORF version 1.2)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
FORF-EX-014	4.2 Conflict clearance timing	Clearance search returned after the agenda closed on a competitive process	Partner recused from the vote and clearance filed within two days	Compliance Officer	2021-03-08	2021-04-30	Compliance confirmed the late filing at month end	Closed, monitoring complete
FORF-EX-019	6.1 Reserve recorded before funding	Wire released on a Friday ahead of the reserve worksheet countersignature	Fund Controller held the position off the forecast until signed	Fund Controller	2021-06-24	2021-07-15	Worksheet countersigned and forecast reissued	Closed, no recurrence
FORF-EX-023	3.4 Single rate source per submission	Two rate sources appeared in a submission inherited from a co-lead	Translation redone on one source before the committee read it	Analytics Standards Group	2021-09-02	2021-10-01	Reviewer re-checked the reissued schedules	Closed, control retested
FORF-EX-027	5.3 Model reviewer named on release	Reviewer on leave during a two-day exclusivity window	Second preparer performed an independent rebuild instead	Analytics Standards Group	2022-01-19	2022-02-28	Rebuild retained and compared line by line	Closed, evidence retained
FORF-EX-031	7.2 Executed instruments lodged in five days	Counterparty withheld the executed counterpart pending a side letter	Signing log annotated and weekly chase recorded	General Counsel	2022-04-11	2022-05-31	Counterpart lodged and index reconciled	Closed, obligation satisfied
FORF-EX-034	8.1 Stale mark flagged at two quarters	Third-party report expected within weeks of the ageing run	Position disclosed as awaiting evidence in the pack	Valuation Committee	2022-07-28	2022-09-30	Report received and mark supported	Closed, evidence obtained
FORF-EX-038	4.6 Co-invest allocation basis	Eligibility list incomplete for a newly admitted vehicle	Allocation deferred and re-run once the list was final	Compliance Officer	2022-11-03	2022-12-15	Re-run allocation reviewed by Compliance	Closed, allocation reissued
FORF-EX-042	9.4 Escalation notification window	Escalation raised over a public holiday weekend	Written notice sent to two alternates the same day	Chief Operating Officer	2023-02-16	2023-03-31	Timestamps sampled in the quarterly review	Closed, window met on retest
FORF-EX-045	6.5 Breach request evidence	Re-forecast unavailable while an audit adjustment was open	Approval conditioned on the re-forecast within ten days	Investment Committee	2023-05-09	2023-06-30	Re-forecast filed and condition discharged	Closed, condition met
FORF-EX-049	2.3 Two-signature requirement	Second signatory unreachable	Managing Partner countersigne	Managing Partners acting jointly	2023-08-22	2023-09-29	Signature page inventory	Closed, inventory reconciled

Ref (FORF version 1.2)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
		during a same-day closing	d within twenty-four hours				updated and checked	
FORF-EX-053	5.7 Convergence residual disclosed	Legacy model lacked a convergence tab when inherited	Residual computed by hand and attached to the cover	Analytics Standards Group	2023-11-14	2024-01-31	Model rebuilt with a convergence tab	Closed, rebuild released
FORF-EX-057	7.6 Unsigned counterpart labelling	Summary schedule cited an instrument before counterparts were complete	Schedule relabelled and recirculated the same day	General Counsel	2024-02-27	2024-03-29	Relabelled schedule confirmed in the room	Closed, label corrected
FORF-EX-061	8.5 Third-party report reconciliation	Report arrived two days before the reporting deadline	Controller documented divergence in a short note	Valuation Committee	2024-05-14	2024-06-28	Note reviewed at the following committee	Closed, note accepted
FORF-EX-064	3.8 Rounding convention on derived figures	Inherited schedule carried a different precision convention	Two figures recomputed at full precision and compared	Analytics Standards Group	2024-08-06	2024-09-30	Recomputation sheet retained with the file	Closed, convention applied

7. Monitoring and reporting

Having regard to the effective date of FORF version 1.2, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. As to consequence, failure is reported to the Investment Committee in the period it is found, not in the period it occurred. For testing purposes, recomputation sheet with both samples bears it in Follow-On Reserve Framework, Edition 1.2, with a Analytics Standards Group verification. As a matter of coverage, scoped to how a reserve is set at initial investment and re-forecast through the life of a position, the control bites on matters approved between committee meetings and is reported on that basis.

As applied by the FORF monitoring calendar, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. There is no discretion here: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. For testing purposes, rate extract with the source and retrieval date is the accountable function here, testing Fund Controller under Edition 1.2. In practice under this edition, for how a reserve is set at initial investment and re-forecast through the life of a position the operative population is positions with an unclosed monitoring finding, and a test reported without it is void.

Notwithstanding the practice before FORF version 1.2, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. As to consequence, a failure here is a reportable control breach and is minuted as such. On the second reading, convergence tab showing iterations and residual holds it for the duration of Edition 1.2, with testing Analytics Standards Group. For the tested set, the reference population for how a reserve is set at initial investment and re-forecast through the life of a position under this edition is positions whose model was rebuilt in the period.

As FORF version 1.2 was adopted, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. The sanction is plain: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For the avoidance of gaps, allocation worksheet and eligibility list holds it for the duration of Edition 1.2, with testing Compliance Officer. Where it bites, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking positions with an unclosed monitoring finding as the tested set.

FORF version 1.2 makes the standard testable, so a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. Enforcement follows automatically: non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. For accountability, model cover tab and the reviewer's checklist takes the requirement under Follow-On Reserve Framework, Edition 1.2, verified Analytics Standards Group. In practice under this edition, scoped to how a reserve is set at initial investment and re-forecast through the life of a position, the control bites on transactions where a delegate signed and is reported on that basis.

On the authority of the Investment Committee, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The stated effect is that non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. On the control map, reserve worksheet countersigned by the deal partner holds it for the duration of Edition 1.2, with testing Fund Controller. As a matter of coverage, scoped to how a reserve is set at initial investment and re-forecast through the life of a position, the control bites on positions carried at a mark older than two quarters and is reported on that basis.

Schedule 4.I - review issues reserved to the Investment Committee by Edition 1.2

Issue (FORF version 1.2)	Who may clear it	Standard applied	Escalation where the standard is not met
Information and inspection rights	Deal partner	Must support the post-close monitoring obligations	Portfolio Operations lead
Founder vesting and acceleration	General Counsel with the deal partner	Acceleration on a change of control needs express approval	Investment Committee
Registration and transfer restrictions	General Counsel only	Restrictions must fit the exemption being relied on	Legal and Compliance Committee
Redemption or put mechanics	General Counsel only	Any redemption right is a reserved issue in every case	Managing Partners acting jointly
Expense and fee reimbursement	Chief Financial Officer	Reimbursement must be capped and the cap must be stated	General Counsel where no cap is offered
Exclusivity and no-shop covenants	Deal partner	The term may not exceed the period the approval contemplated	General Counsel before signature
Conditions to closing	General Counsel with the deal partner	Each condition must be capable of objective testing	Legal and Compliance Committee
Liquidation preference structure	General Counsel with the deal partner	Must match the structure recorded in the approval minute	Investment Committee chair before signature
Anti-dilution mechanic	General Counsel only	Any mechanic outside the approved form is a reserved issue	Legal and Compliance Committee
Board composition and observer rights	Deal partner	Seats must be creatable by the instruments proposed	General Counsel where an instrument must change
Protective provisions and consent list	General Counsel only	The consent list may not exceed the approved list	Legal and Compliance Committee
Pro rata and participation rights	Deal partner with Portfolio Finance	The right must be exercisable from the recorded reserve	Fund Controller where the reserve is insufficient

8. Version administration

After 2021-12-31 the Portfolio Finance retained this edition as an archive copy only. Its provisions on how a reserve is set at initial investment and re-forecast through the life of a position are reproduced in the successor instrument except where the version history marks a substantive change.

As FORF version 1.2 was adopted, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. In such a case, a failure here is a reportable control breach and is minuted as such. In the accountability chain, model cover tab and the reviewer's checklist is named as owner of record in Edition 1.2 and tests Analytics Standards Group. For the tested set, for how a reserve is set at initial investment and re-forecast through the life of a position the operative population is transactions where a delegate signed, and a test reported without it is void.

the Investment Committee expects, under FORF version 1.2, that the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. Where it is not met, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the assignment of duties, labelled schedule with the instrument list attached owns the point in Follow-On Reserve Framework, Edition 1.2, and the test runs Investment Committee chair. In application, the reference population for how a

reserve is set at initial investment and re-forecast through the life of a position under this edition is matters where two source records disagreed.

the Investment Committee expects, under FORF version 1.2, that the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. In such a case, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. As to ownership, reconciliation note signed by the controller takes the requirement under Follow-On Reserve Framework, Edition 1.2, verified Valuation Committee. As the scope note records, the Portfolio Finance reads this against how a reserve is set at initial investment and re-forecast through the life of a position, taking positions carried at a mark older than two quarters as the tested set.

On the face of FORF version 1.2, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. The sanction is plain: non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. On the assignment of duties, waiver register with expiry column populated is the accountable function here, testing Legal and Compliance Committee under Edition 1.2. As the scope note records, the Investment Committee applies this to how a reserve is set at initial investment and re-forecast through the life of a position by examining commitments made under an unexpired exception at each measurement point.

Having regard to the effective date of FORF version 1.2, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. Failing that, failure is reported to the Investment Committee in the period it is found, not in the period it occurred. In control terms, rate extract with the source and retrieval date answers for it under Edition 1.2, on a Fund Controller test cycle. In application, because this edition governs how a reserve is set at initial investment and re-forecast through the life of a position, the requirement reaches commitments made under an unexpired exception and no wider.

Once a position is held under FORF version 1.2, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. Enforcement follows automatically: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For testing purposes, notification record with send and receipt times performs the test Chief Operating Officer and reports under Follow-On Reserve Framework, Edition 1.2. In practice under this edition, in the context of how a reserve is set at initial investment and re-forecast through the life of a position this bears on positions carried at a mark older than two quarters, which is why the test names its population.

Schedule 4.A - delegated authority bands under Edition 1.2

Decision type (FORF version 1.2)	Threshold band	Primary approver	Secondary approver	Documentation required	Reporting
Amendment of a governing document post-close	any amount	Deal partner and General Counsel	Investment Committee if economics change	Redline, impact note and consent record	Logged in the post-close amendment register
Guarantee, indemnity or side letter	any amount	General Counsel	Chief Financial Officer	Executed instrument and exposure note	Reported to the advisory board annually
Engagement of a third-party valuation firm	up to USD 200,000 per engagement	Fund Controller	Valuation Committee chair	Scope letter and independence confirmation	Listed in the valuation service register
Expense charged to a portfolio company	any amount	Chief Financial Officer	General Counsel where a conflict exists	Invoice, allocation basis and consent	Disclosed in the annual expense schedule
Extension of an outstanding exception	any amount	Original approver plus one	Compliance confirms monitoring is current	Extension request and monitoring evidence	Reflected in the exception log
New platform commitment	up to USD 750,000	Sector Partner	one Managing Partner	Screening memorandum and reference log	Reported at the next committee meeting
New platform commitment	USD 750,001 to USD 4,000,000	Investment Committee, simple majority	General Counsel sign-off on documents	Full diligence file and draft term sheet	Minuted with dissent recorded
New platform commitment	above USD 4,000,000	Investment Committee, unanimous	Managing Partners acting jointly	Full diligence file, model, legal opinion	Reported to the advisory board quarterly
Follow-on within an approved reserve	up to the reserved amount	Deal partner and Portfolio Finance	Fund Controller confirms reserve	Reserve worksheet and updated forecast	Listed in the monthly reserve report

Decision type (FORF version 1.2)	Threshold band	Primary approver	Secondary approver	Documentation required	Reporting
			balance		
Follow-on exceeding an approved reserve	any amount	Investment Committee, two-thirds	Chief Investment Officer	Breach request with re-forecast and rationale	Minuted and reported to the advisory board
Bridge or interim instrument	up to USD 1,250,000	Two Investment Committee members	General Counsel	Bridge memorandum and repayment analysis	Reported at the next committee meeting
Pro rata waiver or pass on a right	any amount	Investment Committee, simple majority	Managing Partner not on the board seat	Waiver rationale and portfolio impact note	Recorded in the waiver register
Co-invest allocation to a vehicle	any amount	Allocation Officer	Compliance review before allocation	Allocation worksheet and eligibility list	Reported to affected limited partners
Secondary purchase of an existing position	up to USD 2,000,000	Investment Committee, simple majority	Fund Controller on pricing basis	Independent pricing evidence and seller file	Minuted with the pricing basis stated
Disposition or write-off of a position	any amount	Investment Committee, simple majority	Valuation Committee on the carrying basis	Disposition memorandum and final mark	Reported in the quarterly valuation pack
