INVESTMENT POLICY - ARCHIVED EDITION - RECORD 005

Helioscope Robotics, Inc. - diligence file reference POLICY_HISTORY-005

1. Authority and scope

Follow-On Reserve Framework, Edition 2.0 was drafted on 2021-10-27 and took effect on 2022-01-01 on the authority of the Investment Committee. It governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for. The custodian of record is the Portfolio Finance, and the schedules to this edition form part of it.

Save where the Investment Committee grants an exception, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. Failing that, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. In control terms, notification record with send and receipt times is accountable, under the control of Follow-On Reserve Framework, Edition 2.0 tested Chief Operating Officer. On its own subject matter, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches positions carried at a mark older than two quarters and no wider.

Notwithstanding the practice before FORF version 2.0, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. Should that occur, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. For accountability, calendar extract for the quarter of closing takes the requirement under Follow-On Reserve Framework, Edition 2.0, verified Chief Operating Officer. Scoped to this edition, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking matters where two source records disagreed as the tested set.

Once a position is held under FORF version 2.0, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The committee minuted the point: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. As the schedules allocate it, signature page inventory with counterpart status answers for it under Edition 2.0, on a General Counsel test cycle. As a matter of coverage, the Investment Committee applies this to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for by examining follow-on commitments above the delegated band at each measurement point.

the Investment Committee expects, under FORF version 2.0, that a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. By way of enforcement, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. Turning to who answers for it, reconciliation note signed by the controller owns the point in Follow-On Reserve Framework, Edition 2.0, and the test runs Valuation Committee. In application, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches follow-on commitments above the delegated band and no wider.

For so long as FORF version 2.0 is in force, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. By way of enforcement, failure is reported to the Investment Committee in the period it is found, not in the period it occurred. In control terms, exception form with both fields completed performs the test Compliance Officer and reports under Follow-On Reserve Framework, Edition 2.0. For the tested set, the Investment Committee applies this to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for by examining commitments made under an unexpired exception at each measurement point.

On a proper reading of the FORF schedules, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. The stated effect is that a failure here is a reportable control breach and is minuted as such. On the second reading, arbitration log entry naming both sources is named as owner of record in Edition 2.0 and tests Deal Operations manager. By way of illustration, because

this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches matters approved between committee meetings and no wider.

Schedule 5.V - version history of Follow-On Reserve Framework to Edition 2.0

Edition (FORF version 2.0)	Adopted	Effective from	Effective to	Sections changed	Nature of change	Approving body
Edition 1.0	2019-04-15	2019-05-01	2019-12-31	All	First adoption; reserves set as a multiple of the initial cheque at approval	the Investment Committee
Edition 1.2	2019-11-06	2020-01-01	2021-12-31	2, 4	Re-forecast cadence fixed at quarterly; reserve worksheet made a condition of funding	the Investment Committee
Edition 2.0	2021-10-27	2022-01-01	2023-12-31	3, 5, 6	First-close and fully-funded views defined and separated; release triggers enumerated	the Investment Committee
Edition 2.1	2022-06-30	2022-08-01	2023-12-31	5	Reallocation between positions permitted within a sector band	the Investment Committee
Edition 3.0	2023-11-15	2024-01-01	2025-09-30	6, 7, 8	Breach procedure rewritten to require a re-forecast and a named alternative use	the Investment Committee

2. Defined terms

In the terms FORF version 2.0 uses, the audit trail for a mark is retained for the life of the position and afterwards, whether or not the position is realised. The committee minuted the point: non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. In the accountability chain, signature page inventory with counterpart status is assigned the control by Edition 2.0, which sets the cycle at General Counsel. As a matter of coverage, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking follow-on commitments above the delegated band as the tested set.

FORF version 2.0 makes the standard testable, so a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. Enforcement follows automatically: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For accountability, exception form with both fields completed retains the duty throughout Edition 2.0, evidenced Compliance Officer. On the operative population, for release and reallocation triggers, and the two views of a capital structure and what each is authoritative for the operative population is positions whose model was rebuilt in the period, and a test reported without it is void.

As the FORF control register records, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The committee minuted the point: failure is reported to the Investment Committee in the period it is found, not in the period it occurred. As the schedules allocate it, convergence tab showing iterations and residual is named as owner of record in Edition 2.0 and tests Analytics Standards Group. As a matter of coverage, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking matters approved between committee meetings as the tested set.

the Investment Committee expects, under FORF version 2.0, that the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. The register treats this strictly: failure is reported to the Investment Committee in the period it is found, not in the period it occurred.

Operationally, signed clearance form with the date of search is the accountable function here, testing Compliance Officer under Edition 2.0. Read narrowly, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches positions carried at a mark older than two quarters and no wider.

As the FORF control register records, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. In such a case, the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. As to ownership, allocation worksheet and eligibility list performs the test Compliance Officer and reports under Follow-On Reserve Framework, Edition 2.0. For the tested set, in the context of release and reallocation triggers, and the two views of a capital structure and what each is authoritative for this bears on positions with an unclosed monitoring finding, which is why the test names its population.

As a mandatory standard of FORF version 2.0, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. The sanction is plain: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. Turning to who answers for it, signature page inventory with counterpart status holds it for the duration of Edition 2.0, with testing General Counsel. By way of illustration, in the context of release and reallocation triggers, and the two views of a capital structure and what each is authoritative for this bears on all new platform commitments in the period, which is why the test names its population.

Schedule 5.T - control testing log kept under Edition 2.0

Test ref (FORF version 2.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
FORF-T0001	Post-close reporting obligations are entered in the monitoring calendar at closing	2022-03	Portfolio Operations	follow-on commitments above the delegated band	23	passed after remediation	closed
FORF-T0002	Board and observer seats are confirmed against the executed voting arrangements	2020-06	Deal Team self-certification	positions with an unclosed monitoring finding	24	partially tested, sample incomplete	n/a
FORF-T0003	Where two sources disagree, both are preserved and the conflict is logged	2020-01	External compliance reviewer	positions with an unclosed monitoring finding	22	failed, evidence produced late	open
FORF-T0004	Allocation between the funds and any co-invest vehicle follows the written basis	2024-10	Fund Controller	matters where two source records disagreed	21	passed after remediation	closed
FORF-T0005	Board and observer seats are confirmed against the executed voting arrangements	2021-06	Deal Team self-certification	positions whose model was rebuilt in the period	27	passed after remediation	closed
FORF-T0006	Rounding and precision follow the stated convention on every derived	2020-11	External compliance reviewer	transactions where a delegate signed	35	failed, no evidence on file	open

Test ref (FORF version 2.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
	figure						
FORF-T0007	A waiver granted once is recorded as expiring rather than as standing	2024-05	External compliance reviewer	all new platform commitments in the period	27	passed, evidence complete	closed

	a named preparer and a named reviewer			than two quarters			

3. Mandatory standards

In the FORF drafting convention, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. The sanction is plain: an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. In the accountability chain, calendar extract for the quarter of closing owns the point in Follow-On Reserve Framework, Edition 2.0, and the test runs Chief Operating Officer. Given what this edition governs, the reference population for release and reallocation triggers, and the two views of a capital structure and what each is authoritative for under this edition is co-invest allocations to the parallel vehicle.

As the FORF control register records, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The register treats this strictly: a failure here is a reportable control breach and is minuted as such. For testing purposes, recomputation sheet with both samples is named as owner of record in Edition 2.0 and tests Analytics Standards Group. Scoped to this edition, scoped to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the control bites on positions with an unclosed monitoring finding and is reported on that basis.

Subject to the escalation ladder FORF version 2.0 sets, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The drafting leaves no room: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. For accountability, reconciliation note signed by the controller is named as owner of record in Edition 2.0 and tests Valuation Committee. As the instrument is scoped, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking commitments made under an unexpired exception as the tested set.

On the authority of the Investment Committee, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. By way of enforcement, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. For testing purposes, notification record with send and receipt times owns the point in Follow-On Reserve Framework, Edition 2.0, and the test runs Chief Operating Officer. On the population that matters, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches transactions where a delegate signed and no wider.

As a mandatory standard of FORF version 2.0, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. The drafting leaves no room: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. Turning to who answers for it, allocation worksheet and eligibility list holds it for the duration of Edition 2.0, with testing Compliance Officer. As the scope note records, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking positions with an unclosed monitoring finding as the tested set.

As the FORF control register records, a discrepancy between two records is preserved in the file and reported, and it is not resolved by adopting whichever figure the model already used. As to consequence, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. As to ownership, room index extract showing lodging dates is accountable, under the control of Follow-On Reserve Framework, Edition 2.0 tested General Counsel. By way of illustration, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking matters approved between committee meetings as the tested set.

Schedule 5.D - decisions taken under Edition 2.0

Decision ref (FORF version 2.0)	Decision type	Date	Approver of record	Authority relied on	Disposition	Evidence at decision
FORF-D0001	follow-on within reserve	2025-12-25	Investment Committee, simple majority	New platform commitment	within band	incomplete at decision
FORF-D0002	new platform commitment	2023-08-27	Deal partner and General Counsel	Amendment of a governing document post-close	escalated one level	complete
FORF-D0003	new platform commitment	2023-01-20	Two Investment Committee members	Bridge or interim instrument	within band	incomplete at decision
FORF-D0004	exception renewal	2024-11-26	Two Investment Committee members	Bridge or interim instrument	ratified after the fact	complete

4. Evidence and owners

Where the evidence before the Investment Committee is incomplete, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. The committee minuted the point: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. In control terms, model cover tab and the reviewer's checklist bears it in Follow-On Reserve Framework, Edition 2.0, with a Analytics Standards Group verification. On the operative population, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking commitments made under an unexpired exception as the tested set.

As between the deal team and the Investment Committee, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. In such a case, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. In control terms, exception form with both fields completed is named as owner of record in Edition 2.0 and tests Compliance Officer. On the operative population, for release and reallocation triggers, and the two views of a capital structure and what each is authoritative for the operative population is transactions where a delegate signed, and a test reported without it is void.

the Investment Committee requires, before a matter may be tabled, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. In such a case, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. For testing purposes, ageing report with the flagged lines initialled is accountable, under the control of Follow-On Reserve Framework, Edition 2.0 tested Fund Controller. Read narrowly, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches follow-on commitments above the delegated band and no wider.

Subject to the escalation ladder FORF version 2.0 sets, the audit trail for a mark is retained for the life of the position and afterwards, whether or not the position is realised. The remedy is procedural: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. On the second reading, reconciliation note signed by the controller holds it for the duration of Edition 2.0, with testing Valuation Committee. By way of illustration, applied to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the standard is tested over co-invest allocations to the parallel vehicle and the result is minuted.

As between the deal team and the Investment Committee, a discrepancy between two records is preserved in the file and reported, and it is not resolved by adopting whichever figure the model already used. The drafting leaves no room: non-compliance suspends the delegate's authority for the matter in question until the Investment Committee

restores it. As the schedules allocate it, arbitration log entry naming both sources is the accountable function here, testing Deal Operations manager under Edition 2.0. Confined to its own field, scoped to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the control bites on positions carried at a mark older than two quarters and is reported on that basis.

Where a delegate of the Investment Committee acts, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. Failing that, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. For the avoidance of gaps, rate extract with the source and retrieval date carries the control in Follow-On Reserve Framework, Edition 2.0, tested Fund Controller. On the population that matters, scoped to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the control bites on co-invest allocations to the parallel vehicle and is reported on that basis.

Schedule 5.Z - amendment trail behind Edition 2.0

Amendment ref (FORF version 2.0)	Section affected	Nature	Adopted	Origin	Later treatment
FORF-A001	section 1.5	renumbering	2020-09	counsel direction	superseded without replacement

FORF-A022	section 2.2	typographical	2023-09	practice note	retained unchanged

5. Approval and escalation

On a proper reading of the FORF schedules, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. By way of enforcement, a failure here is a reportable control breach and is minuted as such. On the control map, convergence tab showing iterations and residual performs the test Analytics Standards Group and reports under Follow-On Reserve Framework, Edition 2.0. In application, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking commitments made under an unexpired exception as the tested set.

At each measurement point FORF version 2.0 fixes, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. The instrument provides that failure is reported to the Investment Committee in the period it is found, not in the period it occurred. In the accountability chain, rate extract with the source and retrieval date answers for it under Edition 2.0, on a Fund Controller test cycle. For the tested set, the Investment Committee applies this to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for by examining positions with an unclosed monitoring finding at each measurement point.

Where a delegate of the Investment Committee acts, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. As to consequence, the position is added to the watch list and reported at each subsequent meeting until closed. Operationally, calendar extract for the quarter of closing takes the requirement under Follow-On Reserve Framework, Edition 2.0, verified Chief Operating Officer. On the population that matters, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking positions carried at a mark older than two quarters as the tested set.

By the terms of the FORF standard, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. The register treats this strictly: an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. For testing purposes, ageing report with the flagged lines initialled is assigned the control by Edition 2.0, which sets the cycle at Fund Controller. As the instrument is scoped, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches all new platform commitments in the period and no wider.

At each measurement point FORF version 2.0 fixes, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. As to consequence, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. Within the register, reserve worksheet countersigned by the deal partner takes the requirement under Follow-On Reserve Framework, Edition 2.0, verified Fund Controller. On the population that matters, for release and reallocation triggers, and the two views of a capital structure and what each is authoritative for the operative population is co-invest allocations to the parallel vehicle, and a test reported without it is void.

Notwithstanding the practice before FORF version 2.0, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. As recorded at adoption, the position is added to the watch list and reported at each subsequent meeting until closed. Turning to who answers for it, reserve worksheet countersigned by the deal partner is named as owner of record in Edition 2.0 and tests Fund Controller. By way of illustration, applied to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the standard is tested over positions with an unclosed monitoring finding and the result is minuted.

Schedule 5.C - control register as Edition 2.0 drew it

Control ref (FORF version 2.0)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
FORF-C09	Board and observer seats are confirmed against the executed voting arrangements	Legal ties each seat to the instrument that creates it	Seat schedule with instrument references	Portfolio Operations	General Counsel	Semi-annually	The seat is treated as unheld until the confirmation is produced
FORF-C10	Currency translation uses one named rate source for the whole submission	Reviewer checks that a single source is cited on every schedule	Rate extract with the source and retrieval date	Modeling lead	Fund Controller	Per submission	The submission is rejected and the analyst redoes the translation
FORF-C11	Circular calculations are iterated to a stated tolerance and the residual is disclosed	Reviewer inspects the convergence tab for the residual	Convergence tab showing iterations and residual	Preparer	Analytics Standards Group	Per model	The output may not be quoted in any approval document

Control ref (FORF version 2.0)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
FORF-C12	Post-close reporting obligations are entered in the monitoring calendar at closing	Portfolio Operations reconciles closed deals to calendar entries	Calendar extract for the quarter of closing	Portfolio Operations	Chief Operating Officer	Monthly	The closing is not marked complete and the file stays open
FORF-C13	Allocation between the funds and any co-invest vehicle follows the written basis	Compliance recomputes the allocation from the eligibility list	Allocation worksheet and eligibility list	Allocation Officer	Compliance Officer	Per allocation	The allocation is unwound and re-run under supervision
FORF-C14	Third-party valuation reports are read against the preparer's own conclusion	Fund Controller documents agreement or divergence in writing	Reconciliation note signed by the controller	Valuation analyst	Valuation Committee	Per report	The report may not be relied on and the mark is held at prior basis
FORF-C15	Rounding and precision follow the stated convention on every derived figure	Reviewer recomputes two sampled figures at full precision	Recomputation sheet with both samples	Reviewing analyst	Analytics Standards Group	Per submission	Derived figures are struck and the schedule is reissued
FORF-C16	Unsigned counterparts are identified as unsigned wherever the instrument is cited	Legal checks the citation against the signature page inventory	Signature page inventory with counterpart status	Deal Operations manager	General Counsel	Per citation	The instrument is treated as a draft for every purpose in the file
FORF-C17	A waiver granted once is recorded as expiring rather than as standing	Compliance confirms each register line carries an expiry	Waiver register with expiry column populated	Compliance analyst	Legal and Compliance Committee	Quarterly	The waiver lapses immediately and the underlying rule applies
FORF-C18	Escalations reach the named recipient within the stated notification window	Compliance samples three escalations and checks the timestamps	Notification record with send and receipt times	Escalating owner	Chief Operating Officer	Quarterly	The owner's escalation authority is suspended pending retraining
FORF-C01	Every opportunity presented for approval carries a completed conflict clearance	Compliance confirms the clearance predates the tabling date	Signed clearance form with the date of search	Deal partner	Compliance Officer	Per opportunity	The matter may not be tabled and is struck from the agenda
FORF-C02	Reserve set at initial investment is recorded before the funding instruction issues	Portfolio Finance ties the reserve line to the approval minute	Reserve worksheet countersigned by the deal partner	Portfolio Finance analyst	Fund Controller	Per investment	Funding instruction is withheld until the reserve line exists
FORF-C03	Each capital structure supplied to the committee identifies	Reviewer checks the view label against the underlying	Labelled schedule with the instrument list attached	Modeling lead	Investment Committee chair	Per submission	The submission is returned unread and the meeting slot is

Control ref (FORF version 2.0)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
	which view it presents	instruments					lost
FORF-C04	Executed instruments are lodged in the data room within five business days of signing	Deal Operations reconciles the signing log to the room index	Room index extract showing lodging dates	Deal Operations manager	General Counsel	Weekly	The deal partner loses signature authority on new documents
FORF-C05	Where two sources disagree, both are preserved and the conflict is logged	Reviewer searches the arbitration log for the affected figure	Arbitration log entry naming both sources	Reviewing analyst	Deal Operations manager	Per discrepancy	Any conclusion drawn from the figure is void and must be redone
FORF-C06	A mark carried for more than two quarters without new evidence is flagged as stale	Fund Controller runs the ageing report against the mark register	Ageing report with the flagged lines initialled	Valuation analyst	Fund Controller	Quarterly	The position is written to the lower of cost and last evidenced value
FORF-C07	Every model released to the committee has a named preparer and a named reviewer	Analytics confirms both names appear on the cover tab	Model cover tab and the reviewer's checklist	Preparer	Analytics Standards Group	Per release	The model is not circulated and the decision is deferred
FORF-C08	Exception requests state a compensating control and an expiry date	Compliance rejects any request with either field blank	Exception form with both fields completed	Requesting partner	Compliance Officer	Per request	The request is refused without prejudice to a complete resubmission

6. Exceptions

Notwithstanding the practice before FORF version 2.0, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. The edition is explicit here: failure is reported to the Investment Committee in the period it is found, not in the period it occurred. As to ownership, model cover tab and the reviewer's checklist retains the duty throughout Edition 2.0, evidenced Analytics Standards Group. By way of illustration, for release and reallocation triggers, and the two views of a capital structure and what each is authoritative for the operative population is all new platform commitments in the period, and a test reported without it is void.

Notwithstanding the practice before FORF version 2.0, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. On failure, the position is added to the watch list and reported at each subsequent meeting until closed. For the avoidance of gaps, labelled schedule with the instrument list attached bears it in Follow-On Reserve Framework, Edition 2.0, with a Investment Committee chair verification. On the population that matters, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking all new platform commitments in the period as the tested set.

Having regard to the effective date of FORF version 2.0, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. Practically, a failure here is a reportable control breach and is minuted as such. On the second reading, recomputation sheet with both samples takes the requirement under Follow-On Reserve Framework, Edition 2.0, verified Analytics Standards Group. As the scope note records, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches positions with an unclosed monitoring finding and no wider.

Where the evidence before the Investment Committee is incomplete, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. As to consequence, the position is added to the watch list and reported at each subsequent meeting until closed. On the assignment of duties,

waiver register with expiry column populated holds it for the duration of Edition 2.0, with testing Legal and Compliance Committee. On the operative population, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches matters where two source records disagreed and no wider.

As the FORF control register records, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. As to consequence, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. As to ownership, rate extract with the source and retrieval date answers for it under Edition 2.0, on a Fund Controller test cycle. Given what this edition governs, the reference population for release and reallocation triggers, and the two views of a capital structure and what each is authoritative for under this edition is positions with an unclosed monitoring finding.

Where a delegate of the Investment Committee acts, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. As to consequence, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. Turning to who answers for it, seat schedule with instrument references is accountable, under the control of Follow-On Reserve Framework, Edition 2.0 tested General Counsel. Given what this edition governs, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking follow-on commitments above the delegated band as the tested set.

Schedule 5.E - exceptions granted under Edition 2.0

Ref (FORF version 2.0)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
FORF-EX-019	6.1 Reserve recorded before funding	Wire released on a Friday ahead of the reserve worksheet countersignature	Fund Controller held the position off the forecast until signed	Fund Controller	2021-06-24	2021-07-15	Worksheet countersigned and forecast reissued	Closed, no recurrence
FORF-EX-023	3.4 Single rate source per submission	Two rate sources appeared in a submission inherited from a co-lead	Translation redone on one source before the committee read it	Analytics Standards Group	2021-09-02	2021-10-01	Reviewer re-checked the reissued schedules	Closed, control retested
FORF-EX-027	5.3 Model reviewer named on release	Reviewer on leave during a two-day exclusivity window	Second preparer performed an independent rebuild instead	Analytics Standards Group	2022-01-19	2022-02-28	Rebuild retained and compared line by line	Closed, evidence retained
FORF-EX-031	7.2 Executed instruments lodged in five days	Counterparty withheld the executed counterpart pending a side letter	Signing log annotated and weekly chase recorded	General Counsel	2022-04-11	2022-05-31	Counterpart lodged and index reconciled	Closed, obligation satisfied
FORF-EX-034	8.1 Stale mark flagged at two quarters	Third-party report expected within weeks of the ageing run	Position disclosed as awaiting evidence in the pack	Valuation Committee	2022-07-28	2022-09-30	Report received and mark supported	Closed, evidence obtained
FORF-EX-038	4.6 Co-invest allocation basis	Eligibility list incomplete for a newly admitted vehicle	Allocation deferred and re-run once the list was final	Compliance Officer	2022-11-03	2022-12-15	Re-run allocation reviewed by Compliance	Closed, allocation reissued
FORF-EX-042	9.4 Escalation notification window	Escalation raised over a public holiday weekend	Written notice sent to two alternates the same day	Chief Operating Officer	2023-02-16	2023-03-31	Timestamps sampled in the quarterly review	Closed, window met on retest

Ref (FORF version 2.0)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
FORF-EX-045	6.5 Breach request evidence	Re-forecast unavailable while an audit adjustment was open	Approval conditioned on the re-forecast within ten days	Investment Committee	2023-05-09	2023-06-30	Re-forecast filed and condition discharged	Closed, condition met
FORF-EX-049	2.3 Two-signature requirement	Second signatory unreachable during a same-day closing	Managing Partner countersigned within twenty-four hours	Managing Partners acting jointly	2023-08-22	2023-09-29	Signature page inventory updated and checked	Closed, inventory reconciled
FORF-EX-053	5.7 Convergence residual disclosed	Legacy model lacked a convergence tab when inherited	Residual computed by hand and attached to the cover	Analytics Standards Group	2023-11-14	2024-01-31	Model rebuilt with a convergence tab	Closed, rebuild released
FORF-EX-057	7.6 Unsigned counterpart labelling	Summary schedule cited an instrument before counterparts were complete	Schedule relabelled and recirculated the same day	General Counsel	2024-02-27	2024-03-29	Relabelled schedule confirmed in the room	Closed, label corrected
FORF-EX-061	8.5 Third-party report reconciliation	Report arrived two days before the reporting deadline	Controller documented divergence in a short note	Valuation Committee	2024-05-14	2024-06-28	Note reviewed at the following committee	Closed, note accepted
FORF-EX-064	3.8 Rounding convention on derived figures	Inherited schedule carried a different precision convention	Two figures recomputed at full precision and compared	Analytics Standards Group	2024-08-06	2024-09-30	Recomputation sheet retained with the file	Closed, convention applied
FORF-EX-014	4.2 Conflict clearance timing	Clearance search returned after the agenda closed on a competitive process	Partner recused from the vote and clearance filed within two days	Compliance Officer	2021-03-08	2021-04-30	Compliance confirmed the late filing at month end	Closed, monitoring complete

7. Monitoring and reporting

At each measurement point FORF version 2.0 fixes, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. The instrument provides that the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. On the second reading, arbitration log entry naming both sources is assigned the control by Edition 2.0, which sets the cycle at Deal Operations manager. Scoped to this edition, the Investment Committee applies this to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for by examining positions with an unclosed monitoring finding at each measurement point.

Notwithstanding the practice before FORF version 2.0, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. In such a case, the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. Operationally, labelled schedule with the instrument list attached is the accountable function here, testing Investment Committee chair under Edition 2.0. In application, in the context of release and reallocation triggers, and the two views of a capital structure and what each is authoritative for this bears on matters approved between committee meetings, which is why the test names its population.

Having regard to the effective date of FORF version 2.0, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. Failing that, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. As the schedules allocate it, seat schedule with

instrument references is accountable, under the control of Follow-On Reserve Framework, Edition 2.0 tested General Counsel. Given what this edition governs, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches positions with an unclosed monitoring finding and no wider.

As FORF version 2.0 was adopted, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. The instrument provides that the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For the avoidance of gaps, recomputation sheet with both samples holds it for the duration of Edition 2.0, with testing Analytics Standards Group. Given what this edition governs, scoped to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the control bites on matters approved between committee meetings and is reported on that basis.

the Investment Committee expects, under FORF version 2.0, that the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. The stated effect is that a failure here is a reportable control breach and is minuted as such. In the accountability chain, signed clearance form with the date of search is the accountable function here, testing Compliance Officer under Edition 2.0. As a matter of coverage, for release and reallocation triggers, and the two views of a capital structure and what each is authoritative for the operative population is positions with an unclosed monitoring finding, and a test reported without it is void.

As applied by the FORF monitoring calendar, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The drafting leaves no room: the position is added to the watch list and reported at each subsequent meeting until closed. Turning to who answers for it, notification record with send and receipt times owns the point in Follow-On Reserve Framework, Edition 2.0, and the test runs Chief Operating Officer. In practice under this edition, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches matters approved between committee meetings and no wider.

Schedule 5.B - valuation basis by instrument under Edition 2.0

Instrument type (FORF version 2.0)	Primary basis	Permitted alternative	Evidence required	Preparer	Approver	Review frequency
Warrant over preferred stock	Option pricing consistent with the underlying mark	Intrinsic value where the underlying is liquid	Warrant instrument and the pricing inputs	Senior valuation analyst	Valuation Committee	Quarterly
Position under a signed exit agreement	Consideration payable under the agreement, risk adjusted	Prior basis where completion is materially uncertain	Executed agreement and completion analysis	Fund Controller	Valuation Committee	At each reporting date
Position in a company that has ceased trading	Estimated recovery from the wind-down	Written to nil where recovery is not supportable	Administrator correspondence and recovery estimate	Valuation analyst	Valuation Committee	Quarterly
Secondary purchase completed in the period	Price paid, tested against the calibrated approach	Calibrated approach alone where the price is not orderly	Purchase agreement and orderliness assessment	Senior valuation analyst	Fund Controller	Quarterly
Preferred stock with a recent priced round	Price of the most recent orderly transaction	Calibrated market approach where the round is stale	Executed stock purchase agreement and closing set	Valuation analyst	Valuation Committee	Quarterly
Preferred stock with no recent transaction	Calibrated market approach against comparable companies	Income approach where forecasts are reliable	Comparable set with the selection rationale	Valuation analyst	Valuation Committee	Quarterly
Common stock held alongside a preferred position	Allocation of enterprise value across the structure	Recent secondary transaction in the same class	Allocation working paper and structure schedule	Senior valuation analyst	Fund Controller	Quarterly
Convertible note before conversion	Amortized cost unless an impairment	Fair value where conversion is probable and	Instrument, accrual schedule and impairment	Valuation analyst	Fund Controller	Quarterly

Instrument type (FORF version 2.0)	Primary basis	Permitted alternative	Evidence required	Preparer	Approver	Review frequency
	indicator exists	priced	memo			
Simple agreement for future equity	Value referenced to the expected conversion terms	Cost where no priced round is in prospect	Instrument and the conversion analysis	Valuation analyst	Valuation Committee	Semi-annually

8. Version administration

After 2023-12-31 the Portfolio Finance retained this edition as an archive copy only. Its provisions on release and reallocation triggers, and the two views of a capital structure and what each is authoritative for are reproduced in the successor instrument except where the version history marks a substantive change.

Where a delegate of the Investment Committee acts, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. Practically, a failure here is a reportable control breach and is minuted as such. On the second reading, ageing report with the flagged lines initialled is assigned the control by Edition 2.0, which sets the cycle at Fund Controller. On the operative population, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking all new platform commitments in the period as the tested set.

Read with the FORF schedules, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. By way of enforcement, a failure here is a reportable control breach and is minuted as such. In control terms, reconciliation note signed by the controller performs the test Valuation Committee and reports under Follow-On Reserve Framework, Edition 2.0. In application, the Investment Committee applies this to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for by examining matters approved between committee meetings at each measurement point.

the Investment Committee expects, under FORF version 2.0, that the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. Where it is not met, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For accountability, ageing report with the flagged lines initialled holds it for the duration of Edition 2.0, with testing Fund Controller. As the instrument is scoped, in the context of release and reallocation triggers, and the two views of a capital structure and what each is authoritative for this bears on positions whose model was rebuilt in the period, which is why the test names its population.

At each measurement point FORF version 2.0 fixes, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. As recorded at adoption, a failure here is a reportable control breach and is minuted as such. On the assignment of duties, model cover tab and the reviewer's checklist performs the test Analytics Standards Group and reports under Follow-On Reserve Framework, Edition 2.0. By way of illustration, in the context of release and reallocation triggers, and the two views of a capital structure and what each is authoritative for this bears on positions carried at a mark older than two quarters, which is why the test names its population.

As between the deal team and the Investment Committee, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. Practically, the position is added to the watch list and reported at each subsequent meeting until closed. As the schedules allocate it, notification record with send and receipt times is assigned the control by Edition 2.0, which sets the cycle at Chief Operating Officer. Given what this edition governs, because this edition governs release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, the requirement reaches follow-on commitments above the delegated band and no wider.

Read with the FORF schedules, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. On the plain words, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. In control terms, model cover tab and the reviewer's checklist is the accountable function here, testing Analytics Standards Group under Edition 2.0. In practice under this edition, for release and reallocation triggers, and the two views of a capital structure

and what each is authoritative for the operative population is commitments made under an unexpired exception, and a test reported without it is void.

FORF version 2.0 provides, within the scope stated above, that a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. Where it is not met, a failure here is a reportable control breach and is minuted as such. As the schedules allocate it, calendar extract for the quarter of closing takes the requirement under Follow-On Reserve Framework, Edition 2.0, verified Chief Operating Officer. Confined to its own field, the Portfolio Finance reads this against release and reallocation triggers, and the two views of a capital structure and what each is authoritative for, taking follow-on commitments above the delegated band as the tested set.

In the terms FORF version 2.0 uses, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. There is no discretion here: non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. As the schedules allocate it, waiver register with expiry column populated is named as owner of record in Edition 2.0 and tests Legal and Compliance Committee. By way of illustration, the Investment Committee applies this to release and reallocation triggers, and the two views of a capital structure and what each is authoritative for by examining matters approved between committee meetings at each measurement point.

Schedule 5.I - review issues reserved to the Investment Committee by Edition 2.0

Issue (FORF version 2.0)	Who may clear it	Standard applied	Escalation where the standard is not met
Information and inspection rights	Deal partner	Must support the post-close monitoring obligations	Portfolio Operations lead
Founder vesting and acceleration	General Counsel with the deal partner	Acceleration on a change of control needs express approval	Investment Committee
Registration and transfer restrictions	General Counsel only	Restrictions must fit the exemption being relied on	Legal and Compliance Committee
Redemption or put mechanics	General Counsel only	Any redemption right is a reserved issue in every case	Managing Partners acting jointly
Expense and fee reimbursement	Chief Financial Officer	Reimbursement must be capped and the cap must be stated	General Counsel where no cap is offered
Exclusivity and no-shop covenants	Deal partner	The term may not exceed the period the approval contemplated	General Counsel before signature
Conditions to closing	General Counsel with the deal partner	Each condition must be capable of objective testing	Legal and Compliance Committee
Liquidation preference structure	General Counsel with the deal partner	Must match the structure recorded in the approval minute	Investment Committee chair before signature
Anti-dilution mechanic	General Counsel only	Any mechanic outside the approved form is a reserved issue	Legal and Compliance Committee
Board composition and observer rights	Deal partner	Seats must be creatable by the instruments proposed	General Counsel where an instrument must change
Protective provisions and consent list	General Counsel only	The consent list may not exceed the approved list	Legal and Compliance Committee
Pro rata and participation rights	Deal partner with Portfolio Finance	The right must be exercisable from the recorded reserve	Fund Controller where the reserve is insufficient
