INVESTMENT POLICY - ARCHIVED EDITION - RECORD 008

Helioscope Robotics, Inc. - diligence file reference POLICY_HISTORY-008

1. Authority and scope

Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1 was drafted on 2022-09-08 and took effect on 2022-10-01 on the authority of the Deal Operations Council. It governs which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy. The custodian of record is the Deal Operations, and the schedules to this edition form part of it.

SAEH version 1.1 provides, within the scope stated above, that the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. The sanction is plain: failure is reported to the Deal Operations Council in the period it is found, not in the period it occurred. On the control map, reserve worksheet countersigned by the deal partner retains the duty throughout Edition 1.1, evidenced Fund Controller. As a matter of coverage, applied to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the standard is tested over matters approved between committee meetings and the result is minuted.

On the authority of the Deal Operations Council, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. As recorded at adoption, non-compliance suspends the delegate's authority for the matter in question until the Deal Operations Council restores it. On the second reading, reconciliation note signed by the controller holds it for the duration of Edition 1.1, with testing Valuation Committee. On the operative population, in the context of which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy this bears on all new platform commitments in the period, which is why the test names its population.

As applied by the SAEH monitoring calendar, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. Where it is not met, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the control map, signed clearance form with the date of search is accountable, under the control of Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1 tested Compliance Officer. Scoped to this edition, the Deal Operations reads this against which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, taking co-invest allocations to the parallel vehicle as the tested set.

Where two records before the Deal Operations Council disagree, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. The drafting leaves no room: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the second reading, convergence tab showing iterations and residual is the accountable function here, testing Analytics Standards Group under Edition 1.1. Where it bites, the Deal Operations reads this against which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, taking positions carried at a mark older than two quarters as the tested set.

Where a delegate of the Deal Operations Council acts, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The remedy is procedural: an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. In control terms, seat schedule with instrument references is assigned the control by Edition 1.1, which sets the cycle at General Counsel. On the population that matters, for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy the operative population is positions carried at a mark older than two quarters, and a test reported without it is void.

As applied by the SAEH monitoring calendar, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. The stated effect is that failure is reported to the Deal Operations Council in the period it is found, not in the period it occurred. In the accountability chain, signed clearance form with the date of search is assigned the control by Edition 1.1, which sets the cycle at Compliance Officer. Confined to its own field, because this edition governs which document controls when two

disagree, how effective dates are compared, and the duty to preserve a discrepancy, the requirement reaches matters approved between committee meetings and no wider.

Schedule 8.V - version history of Source Arbitration and Evidence Hierarchy Protocol to Edition 1.1

Edition (SAEH version 1.1)	Adopted	Effective from	Effective to	Sections changed	Nature of change	Approving body
Edition 1.0	2021-12-09	2022-01-01	2022-09-30	All	First adoption; ranking of source types and the preservation duty	the Deal Operations Council
Edition 1.1	2022-09-08	2022-10-01	2025-03-31	2, 4, 5	Unsigned counterparts demoted to draft status; effective-date comparison rules added	the Deal Operations Council
Edition 2.0	2025-01-20	2025-04-01		3, 6	Arbitration log made auditable with a named reviewer per entry	the Deal Operations Council

2. Defined terms

Once a position is held under SAEH version 1.1, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. The edition is explicit here: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. In control terms, calendar extract for the quarter of closing is assigned the control by Edition 1.1, which sets the cycle at Chief Operating Officer. As a matter of coverage, applied to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the standard is tested over transactions where a delegate signed and the result is minuted.

Against the SAEH version history, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. On failure, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. Turning to who answers for it, calendar extract for the quarter of closing holds it for the duration of Edition 1.1, with testing Chief Operating Officer. On the population that matters, for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy the operative population is positions carried at a mark older than two quarters, and a test reported without it is void.

On a proper reading of the SAEH schedules, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. The remedy is procedural: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. Turning to who answers for it, reserve worksheet countersigned by the deal partner holds it for the duration of Edition 1.1, with testing Fund Controller. On the operative population, the Deal Operations Council applies this to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy by examining commitments made under an unexpired exception at each measurement point.

the Deal Operations Council expects, under SAEH version 1.1, that a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. The sanction is plain: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the assignment of duties, room index extract showing lodging dates carries the control in Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, tested General Counsel. Where it bites, applied to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the standard is tested over positions carried at a mark older than two quarters and the result is minuted.

For the avoidance of doubt under SAEH version 1.1, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. The remedy is procedural: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. On the second reading, notification record with send and receipt times holds it for the duration of Edition 1.1, with testing Chief

Operating Officer. By way of illustration, because this edition governs which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the requirement reaches positions carried at a mark older than two quarters and no wider.

As SAEH version 1.1 was adopted, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. As recorded at adoption, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. For accountability, waiver register with expiry column populated takes the requirement under Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, verified Legal and Compliance Committee. In practice under this edition, the Deal Operations Council applies this to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy by examining all new platform commitments in the period at each measurement point.

Schedule 8.T - control testing log kept under Edition 1.1

Test ref (SAEH version 1.1)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
SAEH-T0001	Post-close reporting obligations are entered in the monitoring calendar at closing	2019-04	External compliance reviewer	positions with an unclosed monitoring finding	15	passed after remediation	closed

2. Defined terms - part 2 of 3

Set out next is the balance of the 2. Defined terms, in the sequence in which the rows were originally compiled. The sequence is unbroken either side of it.

Because the basis of the 2. Defined terms is unchanged, figures in this part may be compared directly with those already given. No row is omitted at the join.

Schedule 8.T - control testing log kept under Edition 1.1 (continued, part 2 of 3)

Test ref (SAEH version 1.1)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status

SAEH-T0074	A mark carried for more than two quarters without new evidence is flagged as stale	2023-02	External compliance reviewer	positions with an unclosed monitoring finding	28	failed, approver was also preparer	open

3. Mandatory standards

For the avoidance of doubt under SAEH version 1.1, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. As recorded at adoption,

where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. In the accountability chain, ageing report with the flagged lines initialled bears it in Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, with a Fund Controller verification. On the facts this edition addresses, in the context of which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy this bears on positions carried at a mark older than two quarters, which is why the test names its population.

Where two records before the Deal Operations Council disagree, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. The committee minuted the point: failure is reported to the Deal Operations Council in the period it is found, not in the period it occurred. On the control map, labelled schedule with the instrument list attached carries the control in Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, tested Investment Committee chair. Scoped to this edition, applied to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the standard is tested over positions whose model was rebuilt in the period and the result is minuted.

As a mandatory standard of SAEH version 1.1, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. The committee minuted the point: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. As the schedules allocate it, recomputation sheet with both samples is accountable, under the control of Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1 tested Analytics Standards Group. Where it bites, the Deal Operations reads this against which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, taking matters approved between committee meetings as the tested set.

On the face of SAEH version 1.1, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. Should that occur, a failure here is a reportable control breach and is minuted as such. In the accountability chain, arbitration log entry naming both sources holds it for the duration of Edition 1.1, with testing Deal Operations manager. In application, the Deal Operations reads this against which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, taking follow-on commitments above the delegated band as the tested set.

Where two records before the Deal Operations Council disagree, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. The register treats this strictly: a failure here is a reportable control breach and is minuted as such. For testing purposes, room index extract showing lodging dates is accountable, under the control of Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1 tested General Counsel. Where it bites, in the context of which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy this bears on matters where two source records disagreed, which is why the test names its population.

As the SAEH control register records, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. By way of enforcement, failure is reported to the Deal Operations Council in the period it is found, not in the period it occurred. By assignment, calendar extract for the quarter of closing is the accountable function here, testing Chief Operating Officer under Edition 1.1. In practice under this edition, the reference population for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy under this edition is follow-on commitments above the delegated band.

Schedule 8.D - decisions taken under Edition 1.1

Decision ref (SAEH version 1.1)	Decision type	Date	Approver of record	Authority relied on	Disposition	Evidence at decision
SAEH-D0001	follow-on breaching reserve	2020-04-28	Investment Committee, simple majority	Secondary purchase of an existing position	within band	incomplete at decision
SAEH-D0002	watch-list escalation	2025-10-07	Investment Committee, unanimous	New platform commitment	within band	complete
SAEH-D0003	follow-on within reserve	2019-09-21	General Counsel	Guarantee, indemnity or side letter	referred to counsel	complete
SAEH-D0004	exception renewal	2022-03-08	Investment	Disposition or	within band	complete

Decision ref (SAEH version 1.1)	Decision type	Date	Approver of record	Authority relied on	Disposition	Evidence at decision
			Committee, simple majority	write-off of a position		
SAEH-D0005	follow-on breaching reserve	2025-03-04	Investment Committee, simple majority	Secondary purchase of an existing position	within band	complete

4. Evidence and owners

By the terms of the SAEH standard, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. As to consequence, failure is reported to the Deal Operations Council in the period it is found, not in the period it occurred. In control terms, exception form with both fields completed owns the point in Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, and the test runs Compliance Officer. Where it bites, scoped to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the control bites on positions with an unclosed monitoring finding and is reported on that basis.

Where two records before the Deal Operations Council disagree, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. On failure, a failure here is a reportable control breach and is minuted as such. On the control map, notification record with send and receipt times answers for it under Edition 1.1, on a Chief Operating Officer test cycle. Where it bites, the Deal Operations Council applies this to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy by examining positions with an unclosed monitoring finding at each measurement point.

As the SAEH control register records, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. In such a case, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the assignment of duties, signed clearance form with the date of search holds it for the duration of Edition 1.1, with testing Compliance Officer. In application, because this edition governs which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the requirement reaches commitments made under an unexpired exception and no wider.

As a mandatory standard of SAEH version 1.1, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. By way of enforcement, a failure here is a reportable control breach and is minuted as such. As the schedules allocate it, seat schedule with instrument references performs the test General Counsel and reports under Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1. Given what this edition governs, for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy the operative population is transactions where a delegate signed, and a test reported without it is void.

For the avoidance of doubt under SAEH version 1.1, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. On failure, failure is reported to the Deal Operations Council in the period it is found, not in the period it occurred. As the schedules allocate it, allocation worksheet and eligibility list holds it for the duration of Edition 1.1, with testing Compliance Officer. As the scope note records, in the context of which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy this bears on transactions where a delegate signed, which is why the test names its population.

Where the evidence before the Deal Operations Council is incomplete, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. The remedy is procedural: failure is reported to the Deal Operations Council in the period it is found, not in the period it occurred. For accountability, notification record with send and receipt times answers for it under Edition 1.1, on a Chief Operating Officer test cycle. Given what this edition governs, because this edition governs which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the requirement reaches positions whose model was rebuilt in the period and no wider.

Schedule 8.Z - amendment trail behind Edition 1.1

Amendment ref (SAEH version 1.1)	Section affected	Nature	Adopted	Origin	Later treatment
SAEH-A001	section 1.5	clarifying	2025-05	regulatory change	superseded without replacement

SAEH-A022	section 8.4	consequential	2019-04	committee resolution	reversed at the next adoption

5. Approval and escalation

Against the SAEH version history, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. The remedy is procedural: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. For the avoidance of gaps, model cover tab and the reviewer's checklist carries the control in Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, tested Analytics Standards Group. As the instrument is scoped, applied to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the standard is tested over transactions where a delegate signed and the result is minuted.

SAEH version 1.1 provides, within the scope stated above, that the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. The remedy is procedural: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. Turning to who answers for it, labelled schedule with the instrument list attached holds it for the duration of Edition 1.1, with testing Investment Committee chair. In practice under this edition, the Deal Operations Council applies this to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy by examining positions whose model was rebuilt in the period at each measurement point.

In the terms SAEH version 1.1 uses, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. As recorded at adoption, the position is added to the watch list and reported at

each subsequent meeting until closed. As the schedules allocate it, allocation worksheet and eligibility list takes the requirement under Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, verified Compliance Officer. Scoped to this edition, the Deal Operations reads this against which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, taking commitments made under an unexpired exception as the tested set.

As applied by the SAEH monitoring calendar, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. Where it is not met, the position is added to the watch list and reported at each subsequent meeting until closed. For accountability, reconciliation note signed by the controller is accountable, under the control of Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1 tested Valuation Committee. On the facts this edition addresses, scoped to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the control bites on positions with an unclosed monitoring finding and is reported on that basis.

As applied by the SAEH monitoring calendar, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. On the plain words, non-compliance suspends the delegate's authority for the matter in question until the Deal Operations Council restores it. For testing purposes, reconciliation note signed by the controller takes the requirement under Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, verified Valuation Committee. On its own subject matter, because this edition governs which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the requirement reaches positions carried at a mark older than two quarters and no wider.

Where two records before the Deal Operations Council disagree, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. The drafting leaves no room: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. Turning to who answers for it, calendar extract for the quarter of closing retains the duty throughout Edition 1.1, evidenced Chief Operating Officer. On the population that matters, the reference population for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy under this edition is transactions where a delegate signed.

Schedule 8.C - control register as Edition 1.1 drew it

Control ref (SAEH version 1.1)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
SAEH-C13	Allocation between the funds and any co-invest vehicle follows the written basis	Compliance recomputes the allocation from the eligibility list	Allocation worksheet and eligibility list	Allocation Officer	Compliance Officer	Per allocation	The allocation is unwound and re-run under supervision
SAEH-C14	Third-party valuation reports are read against the preparer's own conclusion	Fund Controller documents agreement or divergence in writing	Reconciliation note signed by the controller	Valuation analyst	Valuation Committee	Per report	The report may not be relied on and the mark is held at prior basis
SAEH-C15	Rounding and precision follow the stated convention on every derived figure	Reviewer recomputes two sampled figures at full precision	Recomputation sheet with both samples	Reviewing analyst	Analytics Standards Group	Per submission	Derived figures are struck and the schedule is reissued
SAEH-C16	Unsigned counterparts are identified as unsigned wherever the instrument is cited	Legal checks the citation against the signature page inventory	Signature page inventory with counterpart status	Deal Operations manager	General Counsel	Per citation	The instrument is treated as a draft for every purpose in the file
SAEH-C17	A waiver granted once is	Compliance confirms each	Waiver register with expiry	Compliance analyst	Legal and Compliance	Quarterly	The waiver lapses

Control ref (SAEH version 1.1)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
	recorded as expiring rather than as standing	register line carries an expiry	column populated		Committee		immediately and the underlying rule applies
SAEH-C18	Escalations reach the named recipient within the stated notification window	Compliance samples three escalations and checks the timestamps	Notification record with send and receipt times	Escalating owner	Chief Operating Officer	Quarterly	The owner's escalation authority is suspended pending retraining
SAEH-C01	Every opportunity presented for approval carries a completed conflict clearance	Compliance confirms the clearance predates the tabling date	Signed clearance form with the date of search	Deal partner	Compliance Officer	Per opportunity	The matter may not be tabled and is struck from the agenda
SAEH-C02	Reserve set at initial investment is recorded before the funding instruction issues	Portfolio Finance ties the reserve line to the approval minute	Reserve worksheet countersigned by the deal partner	Portfolio Finance analyst	Fund Controller	Per investment	Funding instruction is withheld until the reserve line exists
SAEH-C03	Each capital structure supplied to the committee identifies which view it presents	Reviewer checks the view label against the underlying instruments	Labelled schedule with the instrument list attached	Modeling lead	Investment Committee chair	Per submission	The submission is returned unread and the meeting slot is lost
SAEH-C04	Executed instruments are lodged in the data room within five business days of signing	Deal Operations reconciles the signing log to the room index	Room index extract showing lodging dates	Deal Operations manager	General Counsel	Weekly	The deal partner loses signature authority on new documents
SAEH-C05	Where two sources disagree, both are preserved and the conflict is logged	Reviewer searches the arbitration log for the affected figure	Arbitration log entry naming both sources	Reviewing analyst	Deal Operations manager	Per discrepancy	Any conclusion drawn from the figure is void and must be redone
SAEH-C06	A mark carried for more than two quarters without new evidence is flagged as stale	Fund Controller runs the ageing report against the mark register	Ageing report with the flagged lines initialled	Valuation analyst	Fund Controller	Quarterly	The position is written to the lower of cost and last evidenced value
SAEH-C07	Every model released to the committee has a named preparer and a named reviewer	Analytics confirms both names appear on the cover tab	Model cover tab and the reviewer's checklist	Preparer	Analytics Standards Group	Per release	The model is not circulated and the decision is deferred
SAEH-C08	Exception requests state a compensating control and an expiry date	Compliance rejects any request with either field blank	Exception form with both fields completed	Requesting partner	Compliance Officer	Per request	The request is refused without prejudice to a complete resubmission
SAEH-C09	Board and observer seats are confirmed	Legal ties each seat to the instrument that	Seat schedule with instrument	Portfolio Operations	General Counsel	Semi-annually	The seat is treated as unheld until the

Control ref (SAEH version 1.1)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
	against the executed voting arrangements	creates it	references				confirmation is produced
SAEH-C10	Currency translation uses one named rate source for the whole submission	Reviewer checks that a single source is cited on every schedule	Rate extract with the source and retrieval date	Modeling lead	Fund Controller	Per submission	The submission is rejected and the analyst redoes the translation
SAEH-C11	Circular calculations are iterated to a stated tolerance and the residual is disclosed	Reviewer inspects the convergence tab for the residual	Convergence tab showing iterations and residual	Preparer	Analytics Standards Group	Per model	The output may not be quoted in any approval document
SAEH-C12	Post-close reporting obligations are entered in the monitoring calendar at closing	Portfolio Operations reconciles closed deals to calendar entries	Calendar extract for the quarter of closing	Portfolio Operations	Chief Operating Officer	Monthly	The closing is not marked complete and the file stays open

6. Exceptions

Under SAEH version 1.1, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. As recorded at adoption, the position is added to the watch list and reported at each subsequent meeting until closed. Within the register, exception form with both fields completed is assigned the control by Edition 1.1, which sets the cycle at Compliance Officer. Given what this edition governs, the reference population for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy under this edition is positions with an unclosed monitoring finding.

Where a delegate of the Deal Operations Council acts, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. As to consequence, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the control map, exception form with both fields completed bears it in Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, with a Compliance Officer verification. On the population that matters, the Deal Operations Council applies this to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy by examining matters where two source records disagreed at each measurement point.

In the SAEH drafting convention, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. The remedy is procedural: the position is added to the watch list and reported at each subsequent meeting until closed. Operationally, model cover tab and the reviewer's checklist answers for it under Edition 1.1, on a Analytics Standards Group test cycle. As the instrument is scoped, the reference population for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy under this edition is positions carried at a mark older than two quarters.

Where the evidence before the Deal Operations Council is incomplete, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. By way of enforcement, a failure here is a reportable control breach and is minuted as such. On the second reading, calendar extract for the quarter of closing owns the point in Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, and the test runs Chief Operating Officer. As the scope note records, the reference population for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy under this edition is all new platform commitments in the period.

On the face of SAEH version 1.1, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. The committee minuted the point: the finding stays open on

the register until the evidence is produced, whatever the outcome of the transaction. As to ownership, arbitration log entry naming both sources answers for it under Edition 1.1, on a Deal Operations manager test cycle. For the tested set, scoped to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the control bites on matters approved between committee meetings and is reported on that basis.

Read with the SAEH schedules, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. On the plain words, a failure here is a reportable control breach and is minuted as such. As the schedules allocate it, model cover tab and the reviewer's checklist is assigned the control by Edition 1.1, which sets the cycle at Analytics Standards Group. In application, because this edition governs which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the requirement reaches matters where two source records disagreed and no wider.

Schedule 8.E - exceptions granted under Edition 1.1

Ref (SAEH version 1.1)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
SAEH-EX-064	3.8 Rounding convention on derived figures	Inherited schedule carried a different precision convention	Two figures recomputed at full precision and compared	Analytics Standards Group	2024-08-06	2024-09-30	Recomputation sheet retained with the file	Closed, convention applied
SAEH-EX-014	4.2 Conflict clearance timing	Clearance search returned after the agenda closed on a competitive process	Partner recused from the vote and clearance filed within two days	Compliance Officer	2021-03-08	2021-04-30	Compliance confirmed the late filing at month end	Closed, monitoring complete
SAEH-EX-019	6.1 Reserve recorded before funding	Wire released on a Friday ahead of the reserve worksheet countersignature	Fund Controller held the position off the forecast until signed	Fund Controller	2021-06-24	2021-07-15	Worksheet countersigned and forecast reissued	Closed, no recurrence
SAEH-EX-023	3.4 Single rate source per submission	Two rate sources appeared in a submission inherited from a co-lead	Translation redone on one source before the committee read it	Analytics Standards Group	2021-09-02	2021-10-01	Reviewer re-checked the reissued schedules	Closed, control retested
SAEH-EX-027	5.3 Model reviewer named on release	Reviewer on leave during a two-day exclusivity window	Second preparer performed an independent rebuild instead	Analytics Standards Group	2022-01-19	2022-02-28	Rebuild retained and compared line by line	Closed, evidence retained
SAEH-EX-031	7.2 Executed instruments lodged in five days	Counterparty withheld the executed counterpart pending a side letter	Signing log annotated and weekly chase recorded	General Counsel	2022-04-11	2022-05-31	Counterpart lodged and index reconciled	Closed, obligation satisfied
SAEH-EX-034	8.1 Stale mark flagged at two quarters	Third-party report expected within weeks of the ageing run	Position disclosed as awaiting evidence in the pack	Valuation Committee	2022-07-28	2022-09-30	Report received and mark supported	Closed, evidence obtained
SAEH-EX-038	4.6 Co-invest allocation basis	Eligibility list incomplete for a newly admitted vehicle	Allocation deferred and re-run once the list was final	Compliance Officer	2022-11-03	2022-12-15	Re-run allocation reviewed by Compliance	Closed, allocation reissued
SAEH-EX-042	9.4 Escalation	Escalation raised over a	Written notice sent to	Chief Operating	2023-02-16	2023-03-31	Timestamps sampled in	Closed, window met

Ref (SAEH version 1.1)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
	notification window	public holiday weekend	two alternates the same day	Officer			the quarterly review	on retest
SAEH-EX-045	6.5 Breach request evidence	Re-forecast unavailable while an audit adjustment was open	Approval conditioned on the re-forecast within ten days	Investment Committee	2023-05-09	2023-06-30	Re-forecast filed and condition discharged	Closed, condition met
SAEH-EX-049	2.3 Two-signature requirement	Second signatory unreachable during a same-day closing	Managing Partner countersigned within twenty-four hours	Managing Partners acting jointly	2023-08-22	2023-09-29	Signature page inventory updated and checked	Closed, inventory reconciled
SAEH-EX-053	5.7 Convergence residual disclosed	Legacy model lacked a convergence tab when inherited	Residual computed by hand and attached to the cover	Analytics Standards Group	2023-11-14	2024-01-31	Model rebuilt with a convergence tab	Closed, rebuild released
SAEH-EX-057	7.6 Unsigned counterpart labelling	Summary schedule cited an instrument before counterparts were complete	Schedule relabelled and recirculated the same day	General Counsel	2024-02-27	2024-03-29	Relabelled schedule confirmed in the room	Closed, label corrected
SAEH-EX-061	8.5 Third-party report reconciliation	Report arrived two days before the reporting deadline	Controller documented divergence in a short note	Valuation Committee	2024-05-14	2024-06-28	Note reviewed at the following committee	Closed, note accepted

7. Monitoring and reporting

Under SAEH version 1.1, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. The drafting leaves no room: an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. For the avoidance of gaps, model cover tab and the reviewer's checklist takes the requirement under Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, verified Analytics Standards Group. On the operative population, the reference population for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy under this edition is transactions where a delegate signed.

At each measurement point SAEH version 1.1 fixes, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. The register treats this strictly: a failure here is a reportable control breach and is minuted as such. By assignment, convergence tab showing iterations and residual answers for it under Edition 1.1, on a Analytics Standards Group test cycle. By way of illustration, in the context of which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy this bears on positions whose model was rebuilt in the period, which is why the test names its population.

On the face of SAEH version 1.1, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. The instrument provides that the position is added to the watch list and reported at each subsequent meeting until closed. By assignment, rate extract with the source and retrieval date performs the test Fund Controller and reports under Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1. As a matter of coverage, because this edition governs which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the requirement reaches matters approved between committee meetings and no wider.

As SAEH version 1.1 was adopted, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. The drafting leaves no room: the finding stays open on

the register until the evidence is produced, whatever the outcome of the transaction. On the assignment of duties, signature page inventory with counterpart status is assigned the control by Edition 1.1, which sets the cycle at General Counsel. Given what this edition governs, in the context of which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy this bears on positions carried at a mark older than two quarters, which is why the test names its population.

On the face of SAEH version 1.1, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. The register treats this strictly: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. In the accountability chain, convergence tab showing iterations and residual owns the point in Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, and the test runs Analytics Standards Group. On the facts this edition addresses, applied to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the standard is tested over positions whose model was rebuilt in the period and the result is minuted.

As the SAEH control register records, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The sanction is plain: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. As to ownership, ageing report with the flagged lines initialled is the accountable function here, testing Fund Controller under Edition 1.1. As the instrument is scoped, in the context of which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy this bears on matters where two source records disagreed, which is why the test names its population.

Schedule 8.A - delegated authority bands under Edition 1.1

Decision type (SAEH version 1.1)	Threshold band	Primary approver	Secondary approver	Documentation required	Reporting
Follow-on exceeding an approved reserve	any amount	Investment Committee, two-thirds	Chief Investment Officer	Breach request with re-forecast and rationale	Minuted and reported to the advisory board
Bridge or interim instrument	up to USD 1,250,000	Two Investment Committee members	General Counsel	Bridge memorandum and repayment analysis	Reported at the next committee meeting
Pro rata waiver or pass on a right	any amount	Investment Committee, simple majority	Managing Partner not on the board seat	Waiver rationale and portfolio impact note	Recorded in the waiver register
Co-invest allocation to a vehicle	any amount	Allocation Officer	Compliance review before allocation	Allocation worksheet and eligibility list	Reported to affected limited partners
Secondary purchase of an existing position	up to USD 2,000,000	Investment Committee, simple majority	Fund Controller on pricing basis	Independent pricing evidence and seller file	Minuted with the pricing basis stated
Disposition or write-off of a position	any amount	Investment Committee, simple majority	Valuation Committee on the carrying basis	Disposition memorandum and final mark	Reported in the quarterly valuation pack
Amendment of a governing document post-close	any amount	Deal partner and General Counsel	Investment Committee if economics change	Redline, impact note and consent record	Logged in the post-close amendment register
Guarantee, indemnity or side letter	any amount	General Counsel	Chief Financial Officer	Executed instrument and exposure note	Reported to the advisory board annually
Engagement of a third-party valuation firm	up to USD 200,000 per engagement	Fund Controller	Valuation Committee chair	Scope letter and independence confirmation	Listed in the valuation service register
Expense charged to a portfolio company	any amount	Chief Financial Officer	General Counsel where a conflict exists	Invoice, allocation basis and consent	Disclosed in the annual expense schedule
Extension of an outstanding exception	any amount	Original approver plus one	Compliance confirms monitoring is current	Extension request and monitoring evidence	Reflected in the exception log
New platform commitment	up to USD 750,000	Sector Partner	one Managing Partner	Screening memorandum and reference log	Reported at the next committee meeting
New platform commitment	USD 750,001 to USD 4,000,000	Investment Committee, simple majority	General Counsel sign-off on documents	Full diligence file and draft term sheet	Minuted with dissent recorded
New platform commitment	above USD 4,000,000	Investment Committee, unanimous	Managing Partners acting jointly	Full diligence file, model, legal opinion	Reported to the advisory board quarterly

Decision type (SAEH version 1.1)	Threshold band	Primary approver	Secondary approver	Documentation required	Reporting
Follow-on within an approved reserve	up to the reserved amount	Deal partner and Portfolio Finance	Fund Controller confirms reserve balance	Reserve worksheet and updated forecast	Listed in the monthly reserve report

8. Version administration

After 2025-03-31 the Deal Operations retained this edition as an archive copy only. Its provisions on which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy are reproduced in the successor instrument except where the version history marks a substantive change.

Under SAEH version 1.1, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. The stated effect is that failure is reported to the Deal Operations Council in the period it is found, not in the period it occurred. On the second reading, signed clearance form with the date of search is the accountable function here, testing Compliance Officer under Edition 1.1. In practice under this edition, because this edition governs which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the requirement reaches positions carried at a mark older than two quarters and no wider.

Where the evidence before the Deal Operations Council is incomplete, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. Should that occur, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. For testing purposes, signature page inventory with counterpart status is assigned the control by Edition 1.1, which sets the cycle at General Counsel. Given what this edition governs, the Deal Operations reads this against which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, taking positions carried at a mark older than two quarters as the tested set.

In the terms SAEH version 1.1 uses, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. There is no discretion here: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. For the avoidance of gaps, waiver register with expiry column populated retains the duty throughout Edition 1.1, evidenced Legal and Compliance Committee. As the scope note records, applied to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the standard is tested over co-invest allocations to the parallel vehicle and the result is minuted.

the Deal Operations Council requires, before a matter may be tabled, a discrepancy between two records is preserved in the file and reported, and it is not resolved by adopting whichever figure the model already used. The drafting leaves no room: a failure here is a reportable control breach and is minuted as such. On the control map, rate extract with the source and retrieval date is the accountable function here, testing Fund Controller under Edition 1.1. On the operative population, the reference population for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy under this edition is follow-on commitments above the delegated band.

Against the SAEH version history, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. Should that occur, the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. In the accountability chain, recomputation sheet with both samples is the accountable function here, testing Analytics Standards Group under Edition 1.1. Scoped to this edition, for which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy the operative population is matters where two source records disagreed, and a test reported without it is void.

Save where the Deal Operations Council grants an exception, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. The instrument provides that where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the second reading, reconciliation note signed by the controller bears it in Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, with a Valuation Committee verification. As a matter of coverage, for which document controls

when two disagree, how effective dates are compared, and the duty to preserve a discrepancy the operative population is positions with an unclosed monitoring finding, and a test reported without it is void.

the Deal Operations Council expects, under SAEH version 1.1, that the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. As recorded at adoption, a failure here is a reportable control breach and is minuted as such. For testing purposes, convergence tab showing iterations and residual carries the control in Source Arbitration and Evidence Hierarchy Protocol, Edition 1.1, tested Analytics Standards Group. For the tested set, applied to which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the standard is tested over positions with an unclosed monitoring finding and the result is minuted.

By the terms of the SAEH standard, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The sanction is plain: non-compliance suspends the delegate's authority for the matter in question until the Deal Operations Council restores it. For accountability, room index extract showing lodging dates holds it for the duration of Edition 1.1, with testing General Counsel. Where it bites, because this edition governs which document controls when two disagree, how effective dates are compared, and the duty to preserve a discrepancy, the requirement reaches transactions where a delegate signed and no wider.

Schedule 8.H - evidence hierarchy applied by Edition 1.1

Source type (SAEH version 1.1)	Rank	Conditions	Defeats	Defeated by
Management accounts or an internal ledger extract	4	Preparer named and the extraction date recorded	A verbal figure or a slide	Any audited or executed source
Third-party valuation or specialist report	3	Scope letter and independence confirmation on file	An unsupported internal estimate	An executed transaction in the same security
Term sheet or letter of intent	5	Marked as non-binding except where stated	Nothing; it evidences intent only	Any definitive instrument on the same subject
Counterparty summary, model or diligence answer	6	Source and author identified	Nothing	Every source at rank five or better
Data room index entry without the underlying file	7	Recorded as a pointer, never as content	Nothing	The file itself, once produced
Executed definitive instrument with all counterparts complete	1	Signature pages inventoried and dated	Every draft, summary and model of the same term	A later executed amendment of the same instrument
Executed amendment or restatement	1	Effective date stated on the face of the instrument	The instrument it amends, from its effective date forward	A subsequent executed amendment
Executed instrument with a counterpart outstanding	3	Treated as a draft until the counterpart is lodged	Nothing; it is cited as incomplete	Any instrument at rank one or two
Board or stockholder consent in final executed form	2	Names the matter approved and the date of approval	A summary of the same approval	The instrument the consent authorizes, once executed
Filed constitutional document bearing a state stamp	1	The stamped copy, not a conformed copy	Any internal statement of the same provision	A later filed and stamped document
Auditor-signed financial statement	2	Signed opinion attached and period stated	Management accounts covering the same period	A restated statement for the same period
