INVESTMENT POLICY - ARCHIVED EDITION - RECORD 010

Helioscope Robotics, Inc. - diligence file reference POLICY_HISTORY-010

1. Authority and scope

Modeling and Measurement Conventions, Edition 4.0 was drafted on 2022-12-01 and took effect on 2023-01-01 on the authority of the Analytics Standards Group. It governs day-count, rounding, currency translation, measurement dates and convergence for circular calculations. The custodian of record is the Investment Analytics, and the schedules to this edition form part of it.

As between the deal team and the Analytics Standards Group, the audit trail for a mark is retained for the life of the position and afterwards, whether or not the position is realised. The instrument provides that a failure here is a reportable control breach and is minuted as such. By assignment, model cover tab and the reviewer's checklist carries the control in Modeling and Measurement Conventions, Edition 4.0, tested Analytics Standards Group. Given what this edition governs, in the context of day-count, rounding, currency translation, measurement dates and convergence for circular calculations this bears on transactions where a delegate signed, which is why the test names its population.

As the MMC control register records, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. There is no discretion here: non-compliance suspends the delegate's authority for the matter in question until the Analytics Standards Group restores it. For accountability, reserve worksheet countersigned by the deal partner is named as owner of record in Edition 4.0 and tests Fund Controller. On the operative population, in the context of day-count, rounding, currency translation, measurement dates and convergence for circular calculations this bears on co-invest allocations to the parallel vehicle, which is why the test names its population.

As the Analytics Standards Group minuted at adoption, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The drafting leaves no room: an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the assignment of duties, waiver register with expiry column populated holds it for the duration of Edition 4.0, with testing Legal and Compliance Committee. Read narrowly, in the context of day-count, rounding, currency translation, measurement dates and convergence for circular calculations this bears on all new platform commitments in the period, which is why the test names its population.

As the Analytics Standards Group minuted at adoption, the audit trail for a mark is retained for the life of the position and afterwards, whether or not the position is realised. The committee minuted the point: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. On the second reading, room index extract showing lodging dates is accountable, under the control of Modeling and Measurement Conventions, Edition 4.0 tested General Counsel. As the scope note records, scoped to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the control bites on matters approved between committee meetings and is reported on that basis.

MMC version 4.0 provides, within the scope stated above, that a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. Failing that, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. In the accountability chain, arbitration log entry naming both sources takes the requirement under Modeling and Measurement Conventions, Edition 4.0, verified Deal Operations manager. On its own subject matter, the Analytics Standards Group applies this to day-count, rounding, currency translation, measurement dates and convergence for circular calculations by examining co-invest allocations to the parallel vehicle at each measurement point.

For so long as MMC version 4.0 is in force, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. The stated effect is that non-compliance suspends the delegate's authority for the matter in question until the Analytics Standards Group restores it. Turning to who answers for it, waiver register with expiry column populated is named as owner of record in Edition 4.0 and tests Legal and Compliance Committee. Scoped to this edition, for day-count, rounding, currency translation, measurement dates and convergence for

circular calculations the operative population is matters where two source records disagreed, and a test reported without it is void.

Schedule 10.V - version history of Modeling and Measurement Conventions to Edition 4.0

Edition (MMC version 4.0)	Adopted	Effective from	Effective to	Sections changed	Nature of change	Approving body
Edition 2.0	2020-02-24	2020-04-01	2021-06-30	All	Day-count and rounding conventions written down; measurement date defined	the Analytics Standards Group
Edition 3.0	2021-05-31	2021-07-01	2022-12-31	2, 4	Currency translation and a single rate source per submission required	the Analytics Standards Group
Edition 4.0	2022-12-01	2023-01-01	2025-06-30	3, 5, 6	Convergence tolerance, tie-break order and model documentation standard added	the Analytics Standards Group

2. Defined terms

MMC version 4.0 provides, within the scope stated above, that a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. The drafting leaves no room: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. Turning to who answers for it, notification record with send and receipt times is assigned the control by Edition 4.0, which sets the cycle at Chief Operating Officer. In practice under this edition, applied to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the standard is tested over follow-on commitments above the delegated band and the result is minuted.

Subject to the escalation ladder MMC version 4.0 sets, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. The edition is explicit here: failure is reported to the Analytics Standards Group in the period it is found, not in the period it occurred. Operationally, signed clearance form with the date of search is accountable, under the control of Modeling and Measurement Conventions, Edition 4.0 tested Compliance Officer. Where it bites, scoped to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the control bites on positions whose model was rebuilt in the period and is reported on that basis.

On a proper reading of the MMC schedules, a discrepancy between two records is preserved in the file and reported, and it is not resolved by adopting whichever figure the model already used. The register treats this strictly: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. In the accountability chain, reconciliation note signed by the controller performs the test Valuation Committee and reports under Modeling and Measurement Conventions, Edition 4.0. On its own subject matter, because this edition governs day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the requirement reaches matters where two source records disagreed and no wider.

Subject to the escalation ladder MMC version 4.0 sets, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. By way of enforcement, non-compliance suspends the delegate's authority for the matter in question until the Analytics Standards Group restores it. As to ownership, exception form with both fields completed takes the requirement under Modeling and Measurement Conventions, Edition 4.0, verified Compliance Officer. Scoped to this edition, the Investment Analytics reads this against day-count, rounding, currency translation, measurement dates and convergence for circular calculations, taking all new platform commitments in the period as the tested set.

As a mandatory standard of MMC version 4.0, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. The committee minuted the point: the position is added to the

watch list and reported at each subsequent meeting until closed. By assignment, room index extract showing lodging dates is accountable, under the control of Modeling and Measurement Conventions, Edition 4.0 tested General Counsel. Read narrowly, applied to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the standard is tested over co-invest allocations to the parallel vehicle and the result is minuted.

Having regard to the effective date of MMC version 4.0, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. Enforcement follows automatically: non-compliance suspends the delegate's authority for the matter in question until the Analytics Standards Group restores it. As to ownership, room index extract showing lodging dates is named as owner of record in Edition 4.0 and tests General Counsel. Confined to its own field, applied to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the standard is tested over transactions where a delegate signed and the result is minuted.

Schedule 10.T - control testing log kept under Edition 4.0

Test ref (MMC version 4.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
MMC-T0001	Allocation between the funds and any co-invest vehicle follows the written basis	2025-11	Internal Control Review	positions carried at a mark older than two quarters	45	passed with an observation recorded	closed
MMC-T0002	Every opportunity presented for approval carries a completed conflict clearance	2022-09	Valuation Committee secretariat	positions with an unclosed monitoring finding	44	passed after remediation	closed
MMC-T0003	Allocation between the funds and any co-invest vehicle follows the written basis	2023-08	Portfolio Operations	follow-on commitments above the delegated band	28	passed, evidence complete	closed
MMC-T0004	Reserve set at initial investment is recorded before the funding instruction issues	2025-06	Fund Controller	all new platform commitments in the period	14	partially tested, sample incomplete	n/a
MMC-T0005	Exception requests state a compensating control and an expiry date	2020-03	Portfolio Operations	positions with an unclosed monitoring finding	15	failed, approver was also preparer	open
MMC-T0006	Reserve set at initial investment is recorded before the funding instruction issues	2025-05	Portfolio Operations	positions carried at a mark older than two quarters	31	failed, no evidence on file	open
MMC-T0007	Allocation between the funds and any co-invest vehicle follows the written basis	2020-09	Deal Team self-certification	transactions where a delegate signed	40	failed, no evidence on file	open
MMC-T0008	A waiver	2019-07	Valuation	transactions	7	failed,	open

Test ref (MMC version 4.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
	granted once is recorded as expiring rather than as standing		Committee secretariat	where a delegate signed		evidence produced late	
MMC-T0009	Third-party valuation reports are read against the preparer's own conclusion	2025-06	Internal Control Review	matters where two source records disagreed	24	failed, approver was also preparer	open
MMC-T0010	Allocation between the funds and any co-invest vehicle follows the written basis	2022-09	Office of the General Counsel	matters approved between committee meetings	45	not tested, population empty	n/a
MMC-T0011	Reserve set at initial investment is recorded before the funding instruction issues	2021-10	Portfolio Operations	follow-on commitments above the delegated band	13	passed, evidence complete	closed
MMC-T0012	Currency translation uses one named rate source for the whole submission	2021-01	Office of the General Counsel	matters where two source records disagreed	35	not tested, population empty	n/a
MMC-T0013	Post-close reporting obligations are entered in the monitoring calendar at closing	2025-03	Fund Controller	all new platform commitments in the period	31	failed, no evidence on file	open
MMC-T0014	Exception requests state a compensating control and an expiry date	2020-01	Valuation Committee secretariat	all new platform commitments in the period	24	not tested, population empty	n/a
MMC-T0015	Every model released to the committee has a named preparer and a named reviewer	2023-12	Office of the General Counsel	transactions where a delegate signed	10	passed, evidence complete	closed
MMC-T0016	Where two sources disagree, both are preserved and the conflict is logged	2023-07	Office of the General Counsel	positions carried at a mark older than two quarters	40	failed, no evidence on file	open
MMC-T0017	Board and observer seats are confirmed against the executed voting arrangements	2022-10	Internal Control Review	positions carried at a mark older than two quarters	7	not tested, population empty	n/a
MMC-T0018	Post-close reporting obligations are entered in the monitoring	2025-09	Office of the General Counsel	positions whose model was rebuilt in the period	21	passed, evidence complete	closed

Test ref (MMC version 4.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
	calendar at closing						
MMC-T0019	Where two sources disagree, both are preserved and the conflict is logged	2022-06	Fund Controller	co-invest allocations to the parallel vehicle	20	passed, evidence complete	closed
MMC-T0020	Where two sources disagree, both are preserved and the conflict is logged	2019-09	Fund Controller	matters approved between committee meetings	32	failed, approver was also preparer	open
MMC-T0021	A waiver granted once is recorded as expiring rather than as standing	2022-03	Internal Control Review	transactions where a delegate signed	32	not tested, population empty	n/a
MMC-T0022	Executed instruments are lodged in the data room within five business days of signing	2019-08	Fund Controller	transactions where a delegate signed	32	not tested, population empty	n/a
MMC-T0023	Post-close reporting obligations are entered in the monitoring calendar at closing	2022-05	Fund Controller	positions whose model was rebuilt in the period	41	not tested, population empty	n/a
MMC-T0024	Reserve set at initial investment is recorded before the funding instruction issues	2019-10	Fund Controller	matters where two source records disagreed	26	passed after remediation	closed
MMC-T0025	A mark carried for more than two quarters without new evidence is flagged as stale	2019-06	Portfolio Operations	all new platform commitments in the period	27	passed with an observation recorded	closed

2. Defined terms - part 2 of 3

Rows of the 2. Defined terms resume here, numbered on from the part immediately preceding, so a reference cited once resolves in only one place. The sequence is unbroken either side of it.

Nothing in this part varies how the 2. Defined terms was compiled, and the headings given at the start remain the operative ones.

Schedule 10.T - control testing log kept under Edition 4.0 (continued, part 2 of 3)

Test ref (MMC version 4.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
MMC-T0026	Post-close reporting obligations are entered in the monitoring calendar at closing	2019-07	Deal Team self-certification	follow-on commitments above the delegated band	44	failed, no evidence on file	open

Test ref (MMC version 4.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
MMC-T0027	Executed instruments are lodged in the data room within five business days of signing	2025-10	Office of the General Counsel	matters approved between committee meetings	44	failed, no evidence on file	open
MMC-T0028	A waiver granted once is recorded as expiring rather than as standing	2023-09	Portfolio Operations	positions whose model was rebuilt in the period	40	failed, no evidence on file	open
MMC-T0029	Reserve set at initial investment is recorded before the funding instruction issues	2022-06	Deal Team self-certification	matters where two source records disagreed	47	partially tested, sample incomplete	n/a
MMC-T0030	A waiver granted once is recorded as expiring rather than as standing	2020-11	Fund Controller	positions carried at a mark older than two quarters	39	failed, no evidence on file	open
MMC-T0031	Third-party valuation reports are read against the preparer's own conclusion	2024-07	Deal Team self-certification	transactions where a delegate signed	39	passed, evidence complete	closed
MMC-T0032	Reserve set at initial investment is recorded before the funding instruction issues	2019-01	Fund Controller	follow-on commitments above the delegated band	41	failed, approver was also preparer	open
MMC-T0033	Every opportunity presented for approval carries a completed conflict clearance	2021-04	Deal Team self-certification	transactions where a delegate signed	42	failed, evidence produced late	open
MMC-T0034	Exception requests state a compensating control and an expiry date	2025-08	Internal Control Review	commitments made under an unexpired exception	19	partially tested, sample incomplete	n/a
MMC-T0035	Reserve set at initial investment is recorded before the funding instruction issues	2020-10	Office of the General Counsel	positions whose model was rebuilt in the period	21	failed, evidence produced late	open
MMC-T0036	Reserve set at initial investment is recorded before the funding instruction	2020-01	Office of the General Counsel	transactions where a delegate signed	47	passed with an observation recorded	closed

Test ref (MMC version 4.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
	issues						
MMC-T0037	Post-close reporting obligations are entered in the monitoring calendar at closing	2021-06	External compliance reviewer	commitments made under an unexpired exception	27	partially tested, sample incomplete	n/a
MMC-T0038	Every opportunity presented for approval carries a completed conflict clearance	2025-09	Valuation Committee secretariat	positions with an unclosed monitoring finding	47	passed after remediation	closed
MMC-T0039	Unsigned counterparts are identified as unsigned wherever the instrument is cited	2024-10	Deal Team self-certification	positions with an unclosed monitoring finding	20	failed, evidence produced late	open
MMC-T0040	Post-close reporting obligations are entered in the monitoring calendar at closing	2024-01	External compliance reviewer	matters approved between committee meetings	29	passed with an observation recorded	closed

MMC-T0042	Executed instruments are lodged in the data room within five business days of signing	2021-01	Fund Controller	transactions where a delegate signed	50	passed, evidence complete	closed
MMC-T0043	Third-party valuation reports are read against the preparer's own conclusion	2020-01	Deal Team self-certification	commitments made under an unexpired exception	26	not tested, population empty	n/a
MMC-T0044	Rounding and precision follow the stated convention on every derived figure	2022-11	Deal Team self-certification	transactions where a delegate signed	25	passed after remediation	closed
MMC-T0045	Where two sources disagree, both are preserved and the conflict is logged	2019-09	Office of the General Counsel	co-invest allocations to the parallel vehicle	40	failed, approver was also preparer	open
MMC-T0046	Each capital structure supplied to the committee identifies which view it presents	2023-03	Fund Controller	co-invest allocations to the parallel vehicle	20	partially tested, sample incomplete	n/a
MMC-T0047	A mark carried	2019-08	Deal Team	all new	27	failed,	open

Test ref (MMC version 4.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
	for more than two quarters without new evidence is flagged as stale		self-certification	platform commitments in the period		evidence produced late	
MMC-T0048	A waiver granted once is recorded as expiring rather than as standing	2024-02	Deal Team self-certification	co-invest allocations to the parallel vehicle	30	not tested, population empty	n/a
MMC-T0049	Exception requests state a compensating control and an expiry date	2024-06	Internal Control Review	follow-on commitments above the delegated band	28	failed, no evidence on file	open
MMC-T0050	Executed instruments are lodged in the data room within five business days of signing	2019-10	Portfolio Operations	follow-on commitments above the delegated band	18	partially tested, sample incomplete	n/a

2. Defined terms - part 3 of 3

The 2. Defined terms begun above continues from this point, and its row references run consecutively across the parts rather than restarting. The parts are to be read together.

The measurement basis recorded when the 2. Defined terms opened is unchanged, so any figure here is comparable with any figure in the earlier parts. The parts are to be read together.

Schedule 10.T - control testing log kept under Edition 4.0 (continued, part 3 of 3)

Test ref (MMC version 4.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
MMC-T0051	Currency translation uses one named rate source for the whole submission	2020-07	Fund Controller	commitments made under an unexpired exception	21	passed after remediation	closed
MMC-T0052	Unsigned counterparts are identified as unsigned wherever the instrument is cited	2025-02	Internal Control Review	co-invest allocations to the parallel vehicle	23	passed, evidence complete	closed
MMC-T0053	Reserve set at initial investment is recorded before the funding instruction issues	2021-02	Office of the General Counsel	all new platform commitments in the period	18	passed with an observation recorded	closed
MMC-T0054	Where two sources disagree, both are preserved and the conflict is logged	2025-09	External compliance reviewer	positions with an unclosed monitoring finding	19	partially tested, sample incomplete	n/a
MMC-T0055	Post-close reporting obligations are entered in the monitoring	2020-10	Deal Team self-certification	follow-on commitments above the delegated band	10	failed, approver was also preparer	open

Test ref (MMC version 4.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
	calendar at closing						
MMC-T0056	Every model released to the committee has a named preparer and a named reviewer	2025-04	Deal Team self-certification	matters where two source records disagreed	3	failed, no evidence on file	open
MMC-T0057	Every opportunity presented for approval carries a completed conflict clearance	2019-10	External compliance reviewer	all new platform commitments in the period	40	not tested, population empty	n/a
MMC-T0058	Each capital structure supplied to the committee identifies which view it presents	2023-12	Fund Controller	positions whose model was rebuilt in the period	7	partially tested, sample incomplete	n/a
MMC-T0059	Unsigned counterparts are identified as unsigned wherever the instrument is cited	2024-02	External compliance reviewer	transactions where a delegate signed	28	partially tested, sample incomplete	n/a
MMC-T0060	Rounding and precision follow the stated convention on every derived figure	2021-05	External compliance reviewer	matters approved between committee meetings	30	not tested, population empty	n/a
MMC-T0061	Escalations reach the named recipient within the stated notification window	2024-10	Deal Team self-certification	matters where two source records disagreed	44	passed, evidence complete	closed
MMC-T0062	Third-party valuation reports are read against the preparer's own conclusion	2019-07	Fund Controller	all new platform commitments in the period	12	passed after remediation	closed
MMC-T0063	Unsigned counterparts are identified as unsigned wherever the instrument is cited	2021-07	Internal Control Review	positions carried at a mark older than two quarters	3	not tested, population empty	n/a
MMC-T0064	Circular calculations are iterated to a stated tolerance and the residual is disclosed	2019-11	Internal Control Review	all new platform commitments in the period	22	passed, evidence complete	closed
MMC-T0065	Third-party valuation reports are read	2021-09	Portfolio Operations	positions whose model was rebuilt in	14	not tested, population empty	n/a

Test ref (MMC version 4.0)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
	against the preparer's own conclusion			the period			
MMC-T0066	Where two sources disagree, both are preserved and the conflict is logged	2020-09	Internal Control Review	all new platform commitments in the period	40	passed after remediation	closed
MMC-T0067	Every model released to the committee has a named preparer and a named reviewer	2020-03	Internal Control Review	transactions where a delegate signed	35	not tested, population empty	n/a
MMC-T0068	Circular calculations are iterated to a stated tolerance and the residual is disclosed	2019-05	Valuation Committee secretariat	all new platform commitments in the period	3	not tested, population empty	n/a
MMC-T0069	Executed instruments are lodged in the data room within five business days of signing	2019-10	Deal Team self-certification	positions carried at a mark older than two quarters	3	failed, approver was also preparer	open
MMC-T0070	A mark carried for more than two quarters without new evidence is flagged as stale	2023-10	Portfolio Operations	transactions where a delegate signed	5	failed, evidence produced late	open
MMC-T0071	Rounding and precision follow the stated convention on every derived figure	2021-02	Fund Controller	matters where two source records disagreed	35	failed, no evidence on file	open
MMC-T0072	Every model released to the committee has a named preparer and a named reviewer	2020-08	Deal Team self-certification	matters where two source records disagreed	45	not tested, population empty	n/a
MMC-T0073	Each capital structure supplied to the committee identifies which view it presents	2023-10	Fund Controller	transactions where a delegate signed	48	not tested, population empty	n/a
MMC-T0074	Allocation between the funds and any co-invest vehicle follows the written basis	2021-06	Office of the General Counsel	matters approved between committee meetings	42	passed with an observation recorded	closed

3. Mandatory standards

As MMC version 4.0 was adopted, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The instrument provides that a

failure here is a reportable control breach and is minuted as such. As the schedules allocate it, labelled schedule with the instrument list attached carries the control in Modeling and Measurement Conventions, Edition 4.0, tested Investment Committee chair. Scoped to this edition, the Investment Analytics reads this against day-count, rounding, currency translation, measurement dates and convergence for circular calculations, taking positions with an unclosed monitoring finding as the tested set.

As the MMC control register records, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. Where it is not met, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. For testing purposes, rate extract with the source and retrieval date answers for it under Edition 4.0, on a Fund Controller test cycle. On the facts this edition addresses, the reference population for day-count, rounding, currency translation, measurement dates and convergence for circular calculations under this edition is transactions where a delegate signed.

For the avoidance of doubt under MMC version 4.0, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. The stated effect is that a failure here is a reportable control breach and is minuted as such. For the avoidance of gaps, seat schedule with instrument references performs the test General Counsel and reports under Modeling and Measurement Conventions, Edition 4.0. As the instrument is scoped, the Investment Analytics reads this against day-count, rounding, currency translation, measurement dates and convergence for circular calculations, taking matters approved between committee meetings as the tested set.

As applied by the MMC monitoring calendar, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. The edition is explicit here: failure is reported to the Analytics Standards Group in the period it is found, not in the period it occurred. In control terms, model cover tab and the reviewer's checklist answers for it under Edition 4.0, on a Analytics Standards Group test cycle. Read narrowly, the Investment Analytics reads this against day-count, rounding, currency translation, measurement dates and convergence for circular calculations, taking positions with an unclosed monitoring finding as the tested set.

On the face of MMC version 4.0, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. The stated effect is that where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. For testing purposes, labelled schedule with the instrument list attached answers for it under Edition 4.0, on a Investment Committee chair test cycle. In practice under this edition, the reference population for day-count, rounding, currency translation, measurement dates and convergence for circular calculations under this edition is transactions where a delegate signed.

Where a delegate of the Analytics Standards Group acts, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The stated effect is that where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the assignment of duties, room index extract showing lodging dates owns the point in Modeling and Measurement Conventions, Edition 4.0, and the test runs General Counsel. In practice under this edition, scoped to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the control bites on positions whose model was rebuilt in the period and is reported on that basis.

Schedule 10.D - decisions taken under Edition 4.0

Decision ref (MMC version 4.0)	Decision type	Date	Approver of record	Authority relied on	Disposition	Evidence at decision
MMC-D0001	exception renewal	2024-07-24	Two Investment Committee members	Bridge or interim instrument	escalated one level	complete
MMC-D0002	mark change on an unrealised position	2023-05-05	Original approver plus one	Extension of an outstanding exception	within band	complete
MMC-D0003	co-invest allocation	2019-04-06	Investment Committee, simple majority	Disposition or write-off of a position	referred to counsel	produced late
MMC-D0004	follow-on breaching reserve	2021-07-04	General Counsel	Guarantee, indemnity or side letter	escalated one level	incomplete at decision
MMC-D0005	exception renewal	2019-10-18	Two Investment	Bridge or interim	ratified after the	produced late

Decision ref (MMC version 4.0)	Decision type	Date	Approver of record	Authority relied on	Disposition	Evidence at decision
			Committee members	instrument	fact	
MMC-D0006	transfer consent	2022-05-09	Investment Committee, simple majority	Disposition or write-off of a position	ratified after the fact	incomplete at decision
MMC-D0007	exception renewal	2019-07-07	Two Investment Committee members	Bridge or interim instrument	within band	complete
MMC-D0008	follow-on breaching reserve	2025-06-01	Allocation Officer	Co-invest allocation to a vehicle	escalated one level	incomplete at decision
MMC-D0009	exception grant	2021-02-08	Investment Committee, simple majority	Pro rata waiver or pass on a right	referred to counsel	produced late

4. Evidence and owners

Notwithstanding the practice before MMC version 4.0, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. Where it is not met, the position is added to the watch list and reported at each subsequent meeting until closed. For the avoidance of gaps, waiver register with expiry column populated is accountable, under the control of Modeling and Measurement Conventions, Edition 4.0 tested Legal and Compliance Committee. As the instrument is scoped, because this edition governs day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the requirement reaches follow-on commitments above the delegated band and no wider.

Save where the Analytics Standards Group grants an exception, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. The drafting leaves no room: the position is added to the watch list and reported at each subsequent meeting until closed. On the control map, reconciliation note signed by the controller holds it for the duration of Edition 4.0, with testing Valuation Committee. For the tested set, in the context of day-count, rounding, currency translation, measurement dates and convergence for circular calculations this bears on commitments made under an unexpired exception, which is why the test names its population.

For the avoidance of doubt under MMC version 4.0, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. The register treats this strictly: failure is reported to the Analytics Standards Group in the period it is found, not in the period it occurred. By assignment, signature page inventory with counterpart status takes the requirement under Modeling and Measurement Conventions, Edition 4.0, verified General Counsel. As the instrument is scoped, for day-count, rounding, currency translation, measurement dates and convergence for circular calculations the operative population is positions carried at a mark older than two quarters, and a test reported without it is void.

On a proper reading of the MMC schedules, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. The remedy is procedural: an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. For accountability, signature page inventory with counterpart status performs the test General Counsel and reports under Modeling and Measurement Conventions, Edition 4.0. In practice under this edition, applied to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the standard is tested over commitments made under an unexpired exception and the result is minuted.

Notwithstanding the practice before MMC version 4.0, the audit trail for a mark is retained for the life of the position and afterwards, whether or not the position is realised. Where it is not met, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the control map, ageing report with the flagged lines initialled is assigned the control by Edition 4.0, which sets the cycle at Fund Controller. Where it bites, the Analytics Standards Group applies this to day-count, rounding, currency translation, measurement dates and convergence for circular calculations by examining positions carried at a mark older than two quarters at each measurement point.

Subject to the escalation ladder MMC version 4.0 sets, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. In such a case, failure is reported to the Analytics Standards Group in the period it is found, not in the period it occurred. In the accountability chain, labelled schedule with the instrument list attached answers for it under Edition 4.0, on a Investment Committee chair test cycle. Given what this edition governs, scoped to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the control bites on positions carried at a mark older than two quarters and is reported on that basis.

Schedule 10.Z - amendment trail behind Edition 4.0

Amendment ref (MMC version 4.0)	Section affected	Nature	Adopted	Origin	Later treatment
MMC-A001	section 8.6	consequential	2025-11	audit finding	superseded without replacement
MMC-A002	section 3.2	typographical	2020-11	committee resolution	reversed at the next adoption
MMC-A003	section 6.5	consequential	2021-08	counsel direction	reversed at the next adoption

MMC-A009	section 9.5	consequential	2022-04	practice note	retained unchanged
MMC-A010	section 9.2	renumbering	2024-11	regulatory change	retained unchanged
MMC-A011	section 1.6	substantive	2020-12	practice note	reversed at the next adoption
MMC-A012	section 8.6	substantive	2019-03	audit finding	superseded without replacement
MMC-A013	section 7.6	clarifying	2022-04	practice note	carried into the successor edition
MMC-A014	section 5.6	consequential	2020-10	audit finding	carried into the successor edition
MMC-A015	section 4.2	consequential	2024-11	audit finding	carried into the successor edition
MMC-A016	section 4.4	consequential	2021-02	counsel direction	retained unchanged
MMC-A017	section 1.1	clarifying	2019-12	counsel direction	retained unchanged
MMC-A018	section 3.5	renumbering	2024-11	audit finding	carried into the successor edition
MMC-A019	section 7.6	consequential	2022-03	committee resolution	reversed at the next adoption
MMC-A020	section 8.4	renumbering	2023-06	regulatory change	retained unchanged
MMC-A021	section 9.2	clarifying	2025-10	committee resolution	carried into the successor edition
MMC-A022	section 7.6	renumbering	2024-06	audit finding	retained unchanged

5. Approval and escalation

As a mandatory standard of MMC version 4.0, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. In such a case, non-compliance suspends the delegate's authority for the matter in question until the Analytics Standards Group restores it. On the assignment of duties, arbitration log entry naming both sources owns the point in Modeling and Measurement Conventions, Edition 4.0, and the test runs Deal Operations manager. For the tested set, the reference population for day-count, rounding, currency translation, measurement dates and convergence for circular calculations under this edition is positions with an unclosed monitoring finding.

Read with the MMC schedules, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. On the plain words, the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. Within the register, ageing report with the flagged lines initialled takes the requirement under Modeling and Measurement Conventions, Edition 4.0, verified Fund Controller. As a matter of coverage, the Investment Analytics reads this against day-count, rounding, currency translation, measurement dates and convergence for circular calculations, taking positions whose model was rebuilt in the period as the tested set.

Having regard to the effective date of MMC version 4.0, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. Practically, non-compliance suspends the delegate's authority for the matter in question until the Analytics Standards Group restores it. As the schedules allocate it, notification record with send and receipt times answers for it under Edition 4.0, on a Chief Operating Officer test cycle. Read narrowly, for day-count, rounding, currency translation, measurement dates and convergence for circular

calculations the operative population is positions with an unclosed monitoring finding, and a test reported without it is void.

For so long as MMC version 4.0 is in force, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. Where it is not met, failure is reported to the Analytics Standards Group in the period it is found, not in the period it occurred. On the second reading, reserve worksheet countersigned by the deal partner is assigned the control by Edition 4.0, which sets the cycle at Fund Controller. In practice under this edition, scoped to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the control bites on all new platform commitments in the period and is reported on that basis.

In the MMC drafting convention, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. As to consequence, a failure here is a reportable control breach and is minuted as such. As the schedules allocate it, rate extract with the source and retrieval date carries the control in Modeling and Measurement Conventions, Edition 4.0, tested Fund Controller. On the operative population, applied to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the standard is tested over follow-on commitments above the delegated band and the result is minuted.

the Analytics Standards Group expects, under MMC version 4.0, that an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. Where it is not met, non-compliance suspends the delegate's authority for the matter in question until the Analytics Standards Group restores it. In control terms, allocation worksheet and eligibility list carries the control in Modeling and Measurement Conventions, Edition 4.0, tested Compliance Officer. By way of illustration, in the context of day-count, rounding, currency translation, measurement dates and convergence for circular calculations this bears on positions carried at a mark older than two quarters, which is why the test names its population.

Schedule 10.C - control register as Edition 4.0 drew it

Control ref (MMC version 4.0)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
MMC-C15	Rounding and precision follow the stated convention on every derived figure	Reviewer recomputes two sampled figures at full precision	Recomputation sheet with both samples	Reviewing analyst	Analytics Standards Group	Per submission	Derived figures are struck and the schedule is reissued
MMC-C16	Unsigned counterparts are identified as unsigned wherever the instrument is cited	Legal checks the citation against the signature page inventory	Signature page inventory with counterpart status	Deal Operations manager	General Counsel	Per citation	The instrument is treated as a draft for every purpose in the file
MMC-C17	A waiver granted once is recorded as expiring rather than as standing	Compliance confirms each register line carries an expiry	Waiver register with expiry column populated	Compliance analyst	Legal and Compliance Committee	Quarterly	The waiver lapses immediately and the underlying rule applies
MMC-C18	Escalations reach the named recipient within the stated notification window	Compliance samples three escalations and checks the timestamps	Notification record with send and receipt times	Escalating owner	Chief Operating Officer	Quarterly	The owner's escalation authority is suspended pending retraining
MMC-C01	Every opportunity presented for approval carries a completed conflict clearance	Compliance confirms the clearance predates the tabling date	Signed clearance form with the date of search	Deal partner	Compliance Officer	Per opportunity	The matter may not be tabled and is struck from the agenda

Control ref (MMC version 4.0)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
MMC-C02	Reserve set at initial investment is recorded before the funding instruction issues	Portfolio Finance ties the reserve line to the approval minute	Reserve worksheet countersigned by the deal partner	Portfolio Finance analyst	Fund Controller	Per investment	Funding instruction is withheld until the reserve line exists
MMC-C03	Each capital structure supplied to the committee identifies which view it presents	Reviewer checks the view label against the underlying instruments	Labelled schedule with the instrument list attached	Modeling lead	Investment Committee chair	Per submission	The submission is returned unread and the meeting slot is lost
MMC-C04	Executed instruments are lodged in the data room within five business days of signing	Deal Operations reconciles the signing log to the room index	Room index extract showing lodging dates	Deal Operations manager	General Counsel	Weekly	The deal partner loses signature authority on new documents
MMC-C05	Where two sources disagree, both are preserved and the conflict is logged	Reviewer searches the arbitration log for the affected figure	Arbitration log entry naming both sources	Reviewing analyst	Deal Operations manager	Per discrepancy	Any conclusion drawn from the figure is void and must be redone
MMC-C06	A mark carried for more than two quarters without new evidence is flagged as stale	Fund Controller runs the ageing report against the mark register	Ageing report with the flagged lines initialled	Valuation analyst	Fund Controller	Quarterly	The position is written to the lower of cost and last evidenced value
MMC-C07	Every model released to the committee has a named preparer and a named reviewer	Analytics confirms both names appear on the cover tab	Model cover tab and the reviewer's checklist	Preparer	Analytics Standards Group	Per release	The model is not circulated and the decision is deferred
MMC-C08	Exception requests state a compensating control and an expiry date	Compliance rejects any request with either field blank	Exception form with both fields completed	Requesting partner	Compliance Officer	Per request	The request is refused without prejudice to a complete resubmission
MMC-C09	Board and observer seats are confirmed against the executed voting arrangements	Legal ties each seat to the instrument that creates it	Seat schedule with instrument references	Portfolio Operations	General Counsel	Semi-annually	The seat is treated as unheld until the confirmation is produced
MMC-C10	Currency translation uses one named rate source for the whole submission	Reviewer checks that a single source is cited on every schedule	Rate extract with the source and retrieval date	Modeling lead	Fund Controller	Per submission	The submission is rejected and the analyst redoes the translation
MMC-C11	Circular calculations are iterated to a stated tolerance and the residual is disclosed	Reviewer inspects the convergence tab for the residual	Convergence tab showing iterations and residual	Preparer	Analytics Standards Group	Per model	The output may not be quoted in any approval document
MMC-C12	Post-close reporting obligations are	Portfolio Operations reconciles	Calendar extract for the quarter of	Portfolio Operations	Chief Operating Officer	Monthly	The closing is not marked complete and

Control ref (MMC version 4.0)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
	entered in the monitoring calendar at closing	closed deals to calendar entries	closing				the file stays open
MMC-C13	Allocation between the funds and any co-invest vehicle follows the written basis	Compliance recomputes the allocation from the eligibility list	Allocation worksheet and eligibility list	Allocation Officer	Compliance Officer	Per allocation	The allocation is unwound and re-run under supervision
MMC-C14	Third-party valuation reports are read against the preparer's own conclusion	Fund Controller documents agreement or divergence in writing	Reconciliation note signed by the controller	Valuation analyst	Valuation Committee	Per report	The report may not be relied on and the mark is held at prior basis

6. Exceptions

Where the evidence before the Analytics Standards Group is incomplete, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. Should that occur, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. Operationally, recomputation sheet with both samples is accountable, under the control of Modeling and Measurement Conventions, Edition 4.0 tested Analytics Standards Group. By way of illustration, the reference population for day-count, rounding, currency translation, measurement dates and convergence for circular calculations under this edition is matters approved between committee meetings.

As the Analytics Standards Group minuted at adoption, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. As recorded at adoption, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. For accountability, model cover tab and the reviewer's checklist is accountable, under the control of Modeling and Measurement Conventions, Edition 4.0 tested Analytics Standards Group. By way of illustration, the reference population for day-count, rounding, currency translation, measurement dates and convergence for circular calculations under this edition is co-invest allocations to the parallel vehicle.

Where a delegate of the Analytics Standards Group acts, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. There is no discretion here: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the second reading, rate extract with the source and retrieval date is assigned the control by Edition 4.0, which sets the cycle at Fund Controller. On its own subject matter, the Investment Analytics reads this against day-count, rounding, currency translation, measurement dates and convergence for circular calculations, taking matters approved between committee meetings as the tested set.

As the MMC control register records, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. Enforcement follows automatically: non-compliance suspends the delegate's authority for the matter in question until the Analytics Standards Group restores it. In control terms, exception form with both fields completed answers for it under Edition 4.0, on a Compliance Officer test cycle. Where it bites, for day-count, rounding, currency translation, measurement dates and convergence for circular calculations the operative population is matters approved between committee meetings, and a test reported without it is void.

As the Analytics Standards Group minuted at adoption, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. The committee minuted the point: a failure here is a reportable control breach and is minuted as such. For the avoidance of gaps, convergence tab showing iterations and residual is assigned the control by Edition 4.0, which sets the cycle at Analytics Standards Group. As a matter of

coverage, scoped to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the control bites on matters where two source records disagreed and is reported on that basis.

MMC version 4.0 makes the standard testable, so a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. The sanction is plain: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the second reading, model cover tab and the reviewer's checklist takes the requirement under Modeling and Measurement Conventions, Edition 4.0, verified Analytics Standards Group. Where it bites, the Analytics Standards Group applies this to day-count, rounding, currency translation, measurement dates and convergence for circular calculations by examining positions with an unclosed monitoring finding at each measurement point.

Schedule 10.E - exceptions granted under Edition 4.0

Ref (MMC version 4.0)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
MMC-EX-042	9.4 Escalation notification window	Escalation raised over a public holiday weekend	Written notice sent to two alternates the same day	Chief Operating Officer	2023-02-16	2023-03-31	Timestamps sampled in the quarterly review	Closed, window met on retest
MMC-EX-045	6.5 Breach request evidence	Re-forecast unavailable while an audit adjustment was open	Approval conditioned on the re-forecast within ten days	Investment Committee	2023-05-09	2023-06-30	Re-forecast filed and condition discharged	Closed, condition met
MMC-EX-049	2.3 Two-signature requirement	Second signatory unreachable during a same-day closing	Managing Partner countersigned within twenty-four hours	Managing Partners acting jointly	2023-08-22	2023-09-29	Signature page inventory updated and checked	Closed, inventory reconciled
MMC-EX-053	5.7 Convergence residual disclosed	Legacy model lacked a convergence tab when inherited	Residual computed by hand and attached to the cover	Analytics Standards Group	2023-11-14	2024-01-31	Model rebuilt with a convergence tab	Closed, rebuild released
MMC-EX-057	7.6 Unsigned counterpart labelling	Summary schedule cited an instrument before counterparts were complete	Schedule relabelled and recirculated the same day	General Counsel	2024-02-27	2024-03-29	Relabelled schedule confirmed in the room	Closed, label corrected
MMC-EX-061	8.5 Third-party report reconciliation	Report arrived two days before the reporting deadline	Controller documented divergence in a short note	Valuation Committee	2024-05-14	2024-06-28	Note reviewed at the following committee	Closed, note accepted
MMC-EX-064	3.8 Rounding convention on derived figures	Inherited schedule carried a different precision convention	Two figures recomputed at full precision and compared	Analytics Standards Group	2024-08-06	2024-09-30	Recomputation sheet retained with the file	Closed, convention applied
MMC-EX-014	4.2 Conflict clearance timing	Clearance search returned after the agenda closed on a competitive process	Partner recused from the vote and clearance filed within two days	Compliance Officer	2021-03-08	2021-04-30	Compliance confirmed the late filing at month end	Closed, monitoring complete
MMC-EX-019	6.1 Reserve recorded before funding	Wire released on a Friday ahead of the reserve worksheet countersignat	Fund Controller held the position off the forecast until signed	Fund Controller	2021-06-24	2021-07-15	Worksheet countersigned and forecast reissued	Closed, no recurrence

Ref (MMC version 4.0)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
		ure						
MMC-EX-023	3.4 Single rate source per submission	Two rate sources appeared in a submission inherited from a co-lead	Translation redone on one source before the committee read it	Analytics Standards Group	2021-09-02	2021-10-01	Reviewer re-checked the reissued schedules	Closed, control retested
MMC-EX-027	5.3 Model reviewer named on release	Reviewer on leave during a two-day exclusivity window	Second preparer performed an independent rebuild instead	Analytics Standards Group	2022-01-19	2022-02-28	Rebuild retained and compared line by line	Closed, evidence retained
MMC-EX-031	7.2 Executed instruments lodged in five days	Counterparty withheld the executed counterpart pending a side letter	Signing log annotated and weekly chase recorded	General Counsel	2022-04-11	2022-05-31	Counterpart lodged and index reconciled	Closed, obligation satisfied
MMC-EX-034	8.1 Stale mark flagged at two quarters	Third-party report expected within weeks of the ageing run	Position disclosed as awaiting evidence in the pack	Valuation Committee	2022-07-28	2022-09-30	Report received and mark supported	Closed, evidence obtained
MMC-EX-038	4.6 Co-invest allocation basis	Eligibility list incomplete for a newly admitted vehicle	Allocation deferred and re-run once the list was final	Compliance Officer	2022-11-03	2022-12-15	Re-run allocation reviewed by Compliance	Closed, allocation reissued

7. Monitoring and reporting

As the MMC control register records, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. The committee minuted the point: the position is added to the watch list and reported at each subsequent meeting until closed. Operationally, rate extract with the source and retrieval date carries the control in Modeling and Measurement Conventions, Edition 4.0, tested Fund Controller. As the scope note records, the reference population for day-count, rounding, currency translation, measurement dates and convergence for circular calculations under this edition is matters where two source records disagreed.

In the MMC drafting convention, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. On failure, failure is reported to the Analytics Standards Group in the period it is found, not in the period it occurred. By assignment, seat schedule with instrument references is accountable, under the control of Modeling and Measurement Conventions, Edition 4.0 tested General Counsel. By way of illustration, applied to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the standard is tested over all new platform commitments in the period and the result is minuted.

the Analytics Standards Group expects, under MMC version 4.0, that a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. In such a case, a failure here is a reportable control breach and is minuted as such. By assignment, calendar extract for the quarter of closing answers for it under Edition 4.0, on a Chief Operating Officer test cycle. For the tested set, because this edition governs day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the requirement reaches positions whose model was rebuilt in the period and no wider.

For so long as MMC version 4.0 is in force, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The register treats this strictly: an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. As the schedules allocate it, allocation worksheet and eligibility list holds it for the duration of Edition 4.0, with testing Compliance Officer. Given what this edition governs, for day-count, rounding, currency translation, measurement dates and convergence for circular

calculations the operative population is positions carried at a mark older than two quarters, and a test reported without it is void.

Where a delegate of the Analytics Standards Group acts, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. Enforcement follows automatically: failure is reported to the Analytics Standards Group in the period it is found, not in the period it occurred. As the schedules allocate it, signed clearance form with the date of search carries the control in Modeling and Measurement Conventions, Edition 4.0, tested Compliance Officer. On the operative population, for day-count, rounding, currency translation, measurement dates and convergence for circular calculations the operative population is co-invest allocations to the parallel vehicle, and a test reported without it is void.

On the authority of the Analytics Standards Group, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. The committee minuted the point: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For the avoidance of gaps, ageing report with the flagged lines initialled owns the point in Modeling and Measurement Conventions, Edition 4.0, and the test runs Fund Controller. As the instrument is scoped, the Analytics Standards Group applies this to day-count, rounding, currency translation, measurement dates and convergence for circular calculations by examining transactions where a delegate signed at each measurement point.

Schedule 10.H - evidence hierarchy applied by Edition 4.0

Source type (MMC version 4.0)	Rank	Conditions	Defeats	Defeated by
Data room index entry without the underlying file	7	Recorded as a pointer, never as content	Nothing	The file itself, once produced
Executed definitive instrument with all counterparts complete	1	Signature pages inventoried and dated	Every draft, summary and model of the same term	A later executed amendment of the same instrument
Executed amendment or restatement	1	Effective date stated on the face of the instrument	The instrument it amends, from its effective date forward	A subsequent executed amendment
Executed instrument with a counterpart outstanding	3	Treated as a draft until the counterpart is lodged	Nothing; it is cited as incomplete	Any instrument at rank one or two
Board or stockholder consent in final executed form	2	Names the matter approved and the date of approval	A summary of the same approval	The instrument the consent authorizes, once executed
Filed constitutional document bearing a state stamp	1	The stamped copy, not a conformed copy	Any internal statement of the same provision	A later filed and stamped document
Auditor-signed financial statement	2	Signed opinion attached and period stated	Management accounts covering the same period	A restated statement for the same period
Management accounts or an internal ledger extract	4	Preparer named and the extraction date recorded	A verbal figure or a slide	Any audited or executed source
Third-party valuation or specialist report	3	Scope letter and independence confirmation on file	An unsupported internal estimate	An executed transaction in the same security
Term sheet or letter of intent	5	Marked as non-binding except where stated	Nothing; it evidences intent only	Any definitive instrument on the same subject
Counterparty summary, model or diligence answer	6	Source and author identified	Nothing	Every source at rank five or better

8. Version administration

Custody of the treatment of day-count, rounding, currency translation, measurement dates and convergence for circular calculations left this instrument on 2025-06-30. A reader establishing which edition governed a transaction compares its date against the effective and superseded dates in the header above.

As MMC version 4.0 was adopted, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. The remedy is procedural: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. As to ownership, model cover tab and the reviewer's checklist bears it in Modeling and Measurement Conventions, Edition 4.0, with a Analytics Standards Group verification. On the population that matters, the Investment Analytics reads this against day-count, rounding, currency translation,

measurement dates and convergence for circular calculations, taking co-invest allocations to the parallel vehicle as the tested set.

Where two records before the Analytics Standards Group disagree, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. In such a case, failure is reported to the Analytics Standards Group in the period it is found, not in the period it occurred. On the control map, ageing report with the flagged lines initialled retains the duty throughout Edition 4.0, evidenced Fund Controller. On the operative population, scoped to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the control bites on transactions where a delegate signed and is reported on that basis.

For so long as MMC version 4.0 is in force, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. The drafting leaves no room: a failure here is a reportable control breach and is minuted as such. By assignment, exception form with both fields completed carries the control in Modeling and Measurement Conventions, Edition 4.0, tested Compliance Officer. On the population that matters, for day-count, rounding, currency translation, measurement dates and convergence for circular calculations the operative population is positions whose model was rebuilt in the period, and a test reported without it is void.

Where the evidence before the Analytics Standards Group is incomplete, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. Practically, failure is reported to the Analytics Standards Group in the period it is found, not in the period it occurred. By assignment, waiver register with expiry column populated performs the test Legal and Compliance Committee and reports under Modeling and Measurement Conventions, Edition 4.0. By way of illustration, the Analytics Standards Group applies this to day-count, rounding, currency translation, measurement dates and convergence for circular calculations by examining commitments made under an unexpired exception at each measurement point.

As the Analytics Standards Group minuted at adoption, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. As to consequence, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. Operationally, ageing report with the flagged lines initialled carries the control in Modeling and Measurement Conventions, Edition 4.0, tested Fund Controller. Where it bites, for day-count, rounding, currency translation, measurement dates and convergence for circular calculations the operative population is positions with an unclosed monitoring finding, and a test reported without it is void.

For so long as MMC version 4.0 is in force, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. As recorded at adoption, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. As to ownership, arbitration log entry naming both sources is assigned the control by Edition 4.0, which sets the cycle at Deal Operations manager. In application, scoped to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the control bites on commitments made under an unexpired exception and is reported on that basis.

In the MMC drafting convention, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The stated effect is that a failure here is a reportable control breach and is minuted as such. As to ownership, reconciliation note signed by the controller holds it for the duration of Edition 4.0, with testing Valuation Committee. As the instrument is scoped, in the context of day-count, rounding, currency translation, measurement dates and convergence for circular calculations this bears on positions carried at a mark older than two quarters, which is why the test names its population.

Where the evidence before the Analytics Standards Group is incomplete, the audit trail for a mark is retained for the life of the position and afterwards, whether or not the position is realised. By way of enforcement, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. Turning to who answers for it, calendar extract for the quarter of closing bears it in Modeling and Measurement Conventions, Edition 4.0, with a Chief Operating Officer verification. On its own subject matter, scoped to day-count, rounding, currency translation, measurement dates and convergence for circular calculations, the control bites on co-invest allocations to the parallel vehicle and is reported on that basis.

Schedule 10.X - escalation ladder in force under Edition 4.0

Trigger (MMC version 4.0)	Severity	Notify within	Escalate to	Decision required	Record
A conflict identified after an opportunity has been tabled	Grade 1	Immediately on identification	Compliance Officer and the committee chair	Whether the vote stands, is retaken, or the matter is withdrawn	Minute amendment and the clearance file
An allocation that departs from the written basis	Grade 1	Same business day	Compliance Officer and Allocation Officer	Whether the allocation is unwound and re-run	Allocation worksheet and the unwind instruction
A post-close reporting obligation missed by a full period	Grade 3	Five business days	Portfolio Operations lead	Whether the position moves to enhanced monitoring	Monitoring calendar annotation and a chase record
An exception that reaches its expiry with monitoring outstanding	Grade 2	Two business days	Original approver and Compliance	Whether the exception lapses or is extended on new evidence	Exception log entry and the extension request
A counterparty request to sign a document outside the review standard	Grade 2	Two business days	General Counsel	Whether the document is signed, amended, or refused	Redline, the reviewer's note and the signing log
A third-party report whose conclusion diverges from the internal mark	Grade 2	Three business days	Fund Controller and Valuation Committee	Which basis is carried and what is disclosed	Reconciliation note and both working papers
A funding instruction issued without a recorded reserve line	Grade 1	Immediately on identification	Fund Controller and Chief Financial Officer	Whether the instruction is recalled or ratified with conditions	Treasury log and the ratification minute
A governing-document amendment that changes an economic term post-close	Grade 2	Two business days	Investment Committee chair	Whether committee approval is required before consent is given	Amendment register entry and the consent record
A discrepancy between two executed instruments affecting an economic term	Grade 1	Same business day	General Counsel and the deal partner	Whether the matter is preserved as open or resolved by amendment	Arbitration log and a dated memorandum
A reserve forecast that cannot be met from uncommitted capital	Grade 1	Same business day	Chief Investment Officer and Fund Controller	Whether to seek a breach approval or to reduce participation	Committee minute with the re-forecast attached
A mark that would move by more than one valuation grade in a quarter	Grade 2	Two business days	Valuation Committee chair	Whether an interim mark is struck before quarter end	Valuation file note and the supporting evidence
A model output that fails to converge within the stated tolerance	Grade 2	Two business days	Analytics Standards Group	Whether the output may be quoted or must be withheld	Convergence tab and the reviewer's rejection note
