INVESTMENT POLICY - ARCHIVED EDITION - RECORD 011

Helioscope Robotics, Inc. - diligence file reference POLICY_HISTORY-011

1. Authority and scope

Exception and Waiver Procedure, Edition 2.2 was drafted on 2021-07-14 and took effect on 2021-09-01 on the authority of the Legal and Compliance Committee. It governs the rationale, compensating control, approver, expiry and monitoring that an exception must carry. The custodian of record is the Compliance, and the schedules to this edition form part of it.

In the EWP drafting convention, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. In such a case, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. Operationally, allocation worksheet and eligibility list is the accountable function here, testing Compliance Officer under Edition 2.2. Confined to its own field, because this edition governs the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the requirement reaches co-invest allocations to the parallel vehicle and no wider.

As EWP version 2.2 was adopted, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. Enforcement follows automatically: non-compliance suspends the delegate's authority for the matter in question until the Legal and Compliance Committee restores it. Operationally, signed clearance form with the date of search is named as owner of record in Edition 2.2 and tests Compliance Officer. As a matter of coverage, scoped to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the control bites on all new platform commitments in the period and is reported on that basis.

By the terms of the EWP standard, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. Practically, the position is added to the watch list and reported at each subsequent meeting until closed. In the accountability chain, signature page inventory with counterpart status bears it in Exception and Waiver Procedure, Edition 2.2, with a General Counsel verification. As the scope note records, because this edition governs the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the requirement reaches all new platform commitments in the period and no wider.

Where two records before the Legal and Compliance Committee disagree, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The stated effect is that the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. In the accountability chain, labelled schedule with the instrument list attached is named as owner of record in Edition 2.2 and tests Investment Committee chair. In application, for the rationale, compensating control, approver, expiry and monitoring that an exception must carry the operative population is positions carried at a mark older than two quarters, and a test reported without it is void.

Save where the Legal and Compliance Committee grants an exception, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. On failure, failure is reported to the Legal and Compliance Committee in the period it is found, not in the period it occurred. For the avoidance of gaps, exception form with both fields completed performs the test Compliance Officer and reports under Exception and Waiver Procedure, Edition 2.2. As the scope note records, for the rationale, compensating control, approver, expiry and monitoring that an exception must carry the operative population is positions with an unclosed monitoring finding, and a test reported without it is void.

On the face of EWP version 2.2, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. As recorded at adoption, a failure here is a reportable control breach and is minuted as such. In control terms, exception form with both fields completed is accountable, under the control of Exception and Waiver Procedure, Edition 2.2 tested Compliance Officer. Confined to its own field, applied to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the standard is tested over matters where two source records disagreed and the result is minuted.

Schedule 11.V - version history of Exception and Waiver Procedure to Edition 2.2

Edition (EWP version 2.2)	Adopted	Effective from	Effective to	Sections changed	Nature of change	Approving body
Edition 1.0	2019-09-30	2019-11-01	2021-02-28	All	First adoption; written rationale and a named approver required	the Legal and Compliance Committee
Edition 2.0	2020-12-14	2021-02-01	2021-08-31	2, 3	Compensating control made mandatory; oral approvals abolished	the Legal and Compliance Committee
Edition 2.2	2021-07-14	2021-09-01	2024-12-31	4, 5, 6	Expiry dates and monitoring made mandatory; no-standing-waiver rule stated expressly	the Legal and Compliance Committee
Edition 3.0	2024-09-18	2025-01-01		3, 7	Extension procedure separated from the original grant	the Legal and Compliance Committee

2. Defined terms

EWP version 2.2 makes the standard testable, so the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. Practically, non-compliance suspends the delegate's authority for the matter in question until the Legal and Compliance Committee restores it. In control terms, exception form with both fields completed is assigned the control by Edition 2.2, which sets the cycle at Compliance Officer. On the facts this edition addresses, scoped to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the control bites on co-invest allocations to the parallel vehicle and is reported on that basis.

Notwithstanding the practice before EWP version 2.2, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. Practically, the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. For accountability, seat schedule with instrument references is the accountable function here, testing General Counsel under Edition 2.2. On the population that matters, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking follow-on commitments above the delegated band as the tested set.

As applied by the EWP monitoring calendar, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. Should that occur, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. As to ownership, signature page inventory with counterpart status is named as owner of record in Edition 2.2 and tests General Counsel. As the instrument is scoped, because this edition governs the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the requirement reaches positions whose model was rebuilt in the period and no wider.

By the terms of the EWP standard, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. The remedy is procedural: non-compliance suspends the delegate's authority for the matter in question until the Legal and Compliance Committee restores it. As to ownership, rate extract with the source and retrieval date retains the duty throughout Edition 2.2, evidenced Fund Controller. On the population that matters, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking positions with an unclosed monitoring finding as the tested set.

By the terms of the EWP standard, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. The sanction is plain: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. By assignment, allocation worksheet and eligibility list retains the duty throughout Edition 2.2, evidenced Compliance Officer. On its own subject matter, for the rationale, compensating control, approver, expiry and monitoring that an exception must carry the operative population is positions whose model was rebuilt in the period, and a test reported without it is void.

Against the EWP version history, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The register treats this strictly: the position is added to the watch list and reported at each subsequent meeting until closed. Operationally, model cover tab and the reviewer's checklist is assigned the control by Edition 2.2, which sets the cycle at Analytics Standards Group. On its own subject matter, in the context of the rationale, compensating control, approver, expiry and monitoring that an exception must carry this bears on positions carried at a mark older than two quarters, which is why the test names its population.

Schedule 11.T - control testing log kept under Edition 2.2

Test ref (EWP version 2.2)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
EWP-T0001	Escalations reach the named recipient within the stated notification window	2024-12	Fund Controller	transactions where a delegate signed	20	passed after remediation	closed
EWP-T0002	Unsigned counterparts are identified as unsigned wherever the instrument is cited	2020-08	Internal Control Review	co-invest allocations to the parallel vehicle	26	failed, no evidence on file	open
EWP-T0003	Allocation between the funds and any co-invest vehicle follows the written basis	2023-06	External compliance reviewer	commitments made under an unexpired exception	14	passed with an observation recorded	closed
EWP-T0004	Post-close reporting obligations are entered in the monitoring calendar at closing	2025-12	Internal Control Review	transactions where a delegate signed	33	not tested, population empty	n/a
EWP-T0005	Every opportunity presented for approval carries a completed conflict clearance	2025-03	Internal Control Review	transactions where a delegate signed	5	failed, no evidence on file	open
EWP-T0006	Where two sources disagree, both are preserved and the conflict is logged	2023-01	Office of the General Counsel	co-invest allocations to the parallel vehicle	35	failed, no evidence on file	open
EWP-T0007	Currency translation uses one named rate source for the whole submission	2022-06	Deal Team self-certification	positions with an unclosed monitoring finding	50	failed, evidence produced late	open
EWP-T0008	Exception requests state a compensating control and an expiry date	2025-06	External compliance reviewer	matters where two source records disagreed	12	partially tested, sample incomplete	n/a
EWP-T0009	Post-close reporting obligations are entered in the monitoring	2022-07	Portfolio Operations	matters where two source records disagreed	4	failed, no evidence on file	open

Test ref (EWP version 2.2)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
EWP-T0049	Board and observer seats are confirmed against the executed voting arrangements	2020-10	Office of the General Counsel	transactions where a delegate signed	38	failed, approver was also preparer	open
EWP-T0050	Rounding and precision follow the stated convention on every derived figure	2024-12	Portfolio Operations	matters where two source records disagreed	40	passed with an observation recorded	closed

2. Defined terms - part 3 of 3

For length, the 2. Defined terms is presented in 3 parts; this is the next of them, and the rows continue the same sequence. Pagination alone determines where it falls.

Treat the conventions declared for the 2. Defined terms as governing here too; this part introduces none of its own. Nothing is restated from the earlier part.

Schedule 11.T - control testing log kept under Edition 2.2 (continued, part 3 of 3)

Test ref (EWP version 2.2)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
EWP-T0051	Exception requests state a compensating control and an expiry date	2021-09	Deal Team self-certification	all new platform commitments in the period	34	not tested, population empty	n/a
EWP-T0052	Third-party valuation reports are read against the preparer's own conclusion	2025-01	External compliance reviewer	transactions where a delegate signed	10	failed, no evidence on file	open
EWP-T0053	A waiver granted once is recorded as expiring rather than as standing	2023-11	Fund Controller	matters where two source records disagreed	36	passed with an observation recorded	closed
EWP-T0054	Third-party valuation reports are read against the preparer's own conclusion	2025-04	Office of the General Counsel	positions carried at a mark older than two quarters	10	passed, evidence complete	closed
EWP-T0055	Executed instruments are lodged in the data room within five business days of signing	2020-05	Fund Controller	positions whose model was rebuilt in the period	4	passed with an observation recorded	closed
EWP-T0056	Third-party valuation reports are read against the preparer's own conclusion	2023-04	Valuation Committee secretariat	positions whose model was rebuilt in the period	41	passed after remediation	closed

EWP-T0072	Unsigned counterparts are identified as unsigned wherever the instrument is cited	2019-08	External compliance reviewer	commitments made under an unexpired exception	41	failed, evidence produced late	open
EWP-T0073	Circular calculations are iterated to a stated tolerance and the residual is disclosed	2019-01	External compliance reviewer	co-invest allocations to the parallel vehicle	38	passed with an observation recorded	closed
EWP-T0074	Currency translation uses one named rate source for the whole submission	2020-08	External compliance reviewer	all new platform commitments in the period	25	passed with an observation recorded	closed

3. Mandatory standards

Once a position is held under EWP version 2.2, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. The remedy is procedural: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. By assignment, exception form with both fields completed performs the test Compliance Officer and reports under Exception and Waiver Procedure, Edition 2.2. As the instrument is scoped, for the rationale, compensating control, approver, expiry and monitoring that an exception must carry the operative population is matters where two source records disagreed, and a test reported without it is void.

As between the deal team and the Legal and Compliance Committee, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. The drafting leaves no room: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. Within the register, calendar extract for the quarter of closing holds it for the duration of Edition 2.2, with testing Chief Operating Officer. Given what this edition governs, the Legal and Compliance Committee applies this to the rationale, compensating control, approver, expiry and monitoring that an exception must carry by examining positions whose model was rebuilt in the period at each measurement point.

Where the evidence before the Legal and Compliance Committee is incomplete, the audit trail for a mark is retained for the life of the position and afterwards, whether or not the position is realised. The instrument provides that a failure here is a reportable control breach and is minuted as such. As the schedules allocate it, ageing report with the

flagged lines initialled performs the test Fund Controller and reports under Exception and Waiver Procedure, Edition 2.2. As the instrument is scoped, for the rationale, compensating control, approver, expiry and monitoring that an exception must carry the operative population is follow-on commitments above the delegated band, and a test reported without it is void.

On a proper reading of the EWP schedules, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. In such a case, a failure here is a reportable control breach and is minuted as such. On the control map, rate extract with the source and retrieval date performs the test Fund Controller and reports under Exception and Waiver Procedure, Edition 2.2. In application, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking positions carried at a mark older than two quarters as the tested set.

For so long as EWP version 2.2 is in force, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. The drafting leaves no room: a failure here is a reportable control breach and is minuted as such. On the assignment of duties, arbitration log entry naming both sources performs the test Deal Operations manager and reports under Exception and Waiver Procedure, Edition 2.2. Scoped to this edition, for the rationale, compensating control, approver, expiry and monitoring that an exception must carry the operative population is positions carried at a mark older than two quarters, and a test reported without it is void.

EWP version 2.2 provides, within the scope stated above, that an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. On the plain words, failure is reported to the Legal and Compliance Committee in the period it is found, not in the period it occurred. By assignment, exception form with both fields completed is accountable, under the control of Exception and Waiver Procedure, Edition 2.2 tested Compliance Officer. As a matter of coverage, because this edition governs the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the requirement reaches matters where two source records disagreed and no wider.

Schedule 11.D - decisions taken under Edition 2.2

Decision ref (EWP version 2.2)	Decision type	Date	Approver of record	Authority relied on	Disposition	Evidence at decision
EWP-D0001	watch-list escalation	2020-05-28	Deal partner and Portfolio Finance	Follow-on within an approved reserve	referred to counsel	produced late
EWP-D0002	exception grant	2019-06-04	General Counsel	Guarantee, indemnity or side letter	escalated one level	produced late
EWP-D0003	new platform commitment	2024-03-16	Sector Partner	New platform commitment	escalated one level	incomplete at decision
EWP-D0004	follow-on breaching reserve	2019-07-15	Allocation Officer	Co-invest allocation to a vehicle	ratified after the fact	complete
EWP-D0005	transfer consent	2025-04-10	Investment Committee, simple majority	New platform commitment	within band	complete
EWP-D0006	new platform commitment	2024-02-13	Investment Committee, two-thirds	Follow-on exceeding an approved reserve	within band	complete
EWP-D0007	exception renewal	2021-12-01	Investment Committee, simple majority	Disposition or write-off of a position	escalated one level	complete

4. Evidence and owners

Read with the EWP schedules, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The drafting leaves no room: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. For accountability, reserve worksheet countersigned by the deal partner answers for it under Edition 2.2, on a Fund Controller test cycle. On the facts this edition addresses, applied to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the standard is tested over positions with an unclosed monitoring finding and the result is minuted.

EWP version 2.2 provides, within the scope stated above, that the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. The edition is explicit here: non-compliance suspends the delegate's authority for the matter in question until the Legal and Compliance Committee restores it. In the

accountability chain, room index extract showing lodging dates bears it in Exception and Waiver Procedure, Edition 2.2, with a General Counsel verification. As a matter of coverage, the reference population for the rationale, compensating control, approver, expiry and monitoring that an exception must carry under this edition is matters approved between committee meetings.

On a proper reading of the EWP schedules, a discrepancy between two records is preserved in the file and reported, and it is not resolved by adopting whichever figure the model already used. The stated effect is that a failure here is a reportable control breach and is minuted as such. Within the register, calendar extract for the quarter of closing owns the point in Exception and Waiver Procedure, Edition 2.2, and the test runs Chief Operating Officer. Read narrowly, in the context of the rationale, compensating control, approver, expiry and monitoring that an exception must carry this bears on co-invest allocations to the parallel vehicle, which is why the test names its population.

As EWP version 2.2 was adopted, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. The edition is explicit here: the position is added to the watch list and reported at each subsequent meeting until closed. On the assignment of duties, reconciliation note signed by the controller is named as owner of record in Edition 2.2 and tests Valuation Committee. Confined to its own field, scoped to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the control bites on follow-on commitments above the delegated band and is reported on that basis.

As the Legal and Compliance Committee minuted at adoption, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. Practically, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. As to ownership, labelled schedule with the instrument list attached is the accountable function here, testing Investment Committee chair under Edition 2.2. In application, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking all new platform commitments in the period as the tested set.

Subject to the escalation ladder EWP version 2.2 sets, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. The stated effect is that the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. Turning to who answers for it, ageing report with the flagged lines initialled is named as owner of record in Edition 2.2 and tests Fund Controller. On the operative population, for the rationale, compensating control, approver, expiry and monitoring that an exception must carry the operative population is commitments made under an unexpired exception, and a test reported without it is void.

5. Approval and escalation

EWP version 2.2 provides, within the scope stated above, that an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. Where it is not met, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. For the avoidance of gaps, reserve worksheet countersigned by the deal partner carries the control in Exception and Waiver Procedure, Edition 2.2, tested Fund Controller. Given what this edition governs, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking co-invest allocations to the parallel vehicle as the tested set.

EWP version 2.2 provides, within the scope stated above, that a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. On failure, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the control map, recomputation sheet with both samples is accountable, under the control of Exception and Waiver Procedure, Edition 2.2 tested Analytics Standards Group. Given what this edition governs, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking all new platform commitments in the period as the tested set.

Subject to the escalation ladder EWP version 2.2 sets, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. Practically, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For testing purposes, notification record with send and receipt times is the accountable function here, testing Chief Operating Officer under Edition 2.2. In practice under this edition, because this edition governs the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the requirement reaches co-invest allocations to the parallel vehicle and no wider.

Having regard to the effective date of EWP version 2.2, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. Where it is not met, a failure here is a reportable control breach and is minuted as such. On the second reading, allocation worksheet and eligibility list is accountable, under the control of Exception and Waiver Procedure, Edition 2.2 tested Compliance Officer. As the scope note records, the reference population for the rationale, compensating control, approver, expiry and monitoring that an exception must carry under this edition is co-invest allocations to the parallel vehicle.

Having regard to the effective date of EWP version 2.2, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. In such a case, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. As the schedules allocate it, rate extract with the source and retrieval date is named as owner of record in Edition 2.2 and tests Fund Controller. In application, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking matters approved between committee meetings as the tested set.

On the authority of the Legal and Compliance Committee, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. The instrument provides that the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For

accountability, notification record with send and receipt times bears it in Exception and Waiver Procedure, Edition 2.2, with a Chief Operating Officer verification. On the operative population, scoped to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the control bites on positions whose model was rebuilt in the period and is reported on that basis.

Schedule 11.C - control register as Edition 2.2 drew it

Control ref (EWP version 2.2)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
EWP-C09	Board and observer seats are confirmed against the executed voting arrangements	Legal ties each seat to the instrument that creates it	Seat schedule with instrument references	Portfolio Operations	General Counsel	Semi-annually	The seat is treated as unheld until the confirmation is produced
EWP-C10	Currency translation uses one named rate source for the whole submission	Reviewer checks that a single source is cited on every schedule	Rate extract with the source and retrieval date	Modeling lead	Fund Controller	Per submission	The submission is rejected and the analyst redoes the translation
EWP-C11	Circular calculations are iterated to a stated tolerance and the residual is disclosed	Reviewer inspects the convergence tab for the residual	Convergence tab showing iterations and residual	Preparer	Analytics Standards Group	Per model	The output may not be quoted in any approval document
EWP-C12	Post-close reporting obligations are entered in the monitoring calendar at closing	Portfolio Operations reconciles closed deals to calendar entries	Calendar extract for the quarter of closing	Portfolio Operations	Chief Operating Officer	Monthly	The closing is not marked complete and the file stays open
EWP-C13	Allocation between the funds and any co-invest vehicle follows the written basis	Compliance recomputes the allocation from the eligibility list	Allocation worksheet and eligibility list	Allocation Officer	Compliance Officer	Per allocation	The allocation is unwound and re-run under supervision
EWP-C14	Third-party valuation reports are read against the preparer's own conclusion	Fund Controller documents agreement or divergence in writing	Reconciliation note signed by the controller	Valuation analyst	Valuation Committee	Per report	The report may not be relied on and the mark is held at prior basis
EWP-C15	Rounding and precision follow the stated convention on every derived figure	Reviewer recomputes two sampled figures at full precision	Recomputation sheet with both samples	Reviewing analyst	Analytics Standards Group	Per submission	Derived figures are struck and the schedule is reissued
EWP-C16	Unsigned counterparts are identified as unsigned wherever the instrument is cited	Legal checks the citation against the signature page inventory	Signature page inventory with counterpart status	Deal Operations manager	General Counsel	Per citation	The instrument is treated as a draft for every purpose in the file
EWP-C17	A waiver granted once is recorded as expiring rather than as standing	Compliance confirms each register line carries an expiry	Waiver register with expiry column populated	Compliance analyst	Legal and Compliance Committee	Quarterly	The waiver lapses immediately and the underlying rule applies
EWP-C18	Escalations	Compliance	Notification	Escalating	Chief	Quarterly	The owner's

Control ref (EWP version 2.2)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
	reach the named recipient within the stated notification window	samples three escalations and checks the timestamps	record with send and receipt times	owner	Operating Officer		escalation authority is suspended pending retraining
EWP-C01	Every opportunity presented for approval carries a completed conflict clearance	Compliance confirms the clearance predates the tabling date	Signed clearance form with the date of search	Deal partner	Compliance Officer	Per opportunity	The matter may not be tabled and is struck from the agenda
EWP-C02	Reserve set at initial investment is recorded before the funding instruction issues	Portfolio Finance ties the reserve line to the approval minute	Reserve worksheet countersigned by the deal partner	Portfolio Finance analyst	Fund Controller	Per investment	Funding instruction is withheld until the reserve line exists
EWP-C03	Each capital structure supplied to the committee identifies which view it presents	Reviewer checks the view label against the underlying instruments	Labelled schedule with the instrument list attached	Modeling lead	Investment Committee chair	Per submission	The submission is returned unread and the meeting slot is lost
EWP-C04	Executed instruments are lodged in the data room within five business days of signing	Deal Operations reconciles the signing log to the room index	Room index extract showing lodging dates	Deal Operations manager	General Counsel	Weekly	The deal partner loses signature authority on new documents
EWP-C05	Where two sources disagree, both are preserved and the conflict is logged	Reviewer searches the arbitration log for the affected figure	Arbitration log entry naming both sources	Reviewing analyst	Deal Operations manager	Per discrepancy	Any conclusion drawn from the figure is void and must be redone
EWP-C06	A mark carried for more than two quarters without new evidence is flagged as stale	Fund Controller runs the ageing report against the mark register	Ageing report with the flagged lines initialled	Valuation analyst	Fund Controller	Quarterly	The position is written to the lower of cost and last evidenced value
EWP-C07	Every model released to the committee has a named preparer and a named reviewer	Analytics confirms both names appear on the cover tab	Model cover tab and the reviewer's checklist	Preparer	Analytics Standards Group	Per release	The model is not circulated and the decision is deferred
EWP-C08	Exception requests state a compensating control and an expiry date	Compliance rejects any request with either field blank	Exception form with both fields completed	Requesting partner	Compliance Officer	Per request	The request is refused without prejudice to a complete resubmission

6. Exceptions

As applied by the EWP monitoring calendar, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. Should that occur, a failure here is a reportable control breach and is minuted as such. On the control map, labelled schedule with the instrument list attached owns the point in Exception and Waiver Procedure, Edition 2.2, and the test runs Investment Committee chair. By way of

illustration, applied to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the standard is tested over positions with an unclosed monitoring finding and the result is minuted.

On a proper reading of the EWP schedules, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. The register treats this strictly: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. Operationally, notification record with send and receipt times is named as owner of record in Edition 2.2 and tests Chief Operating Officer. In application, the reference population for the rationale, compensating control, approver, expiry and monitoring that an exception must carry under this edition is commitments made under an unexpired exception.

Notwithstanding the practice before EWP version 2.2, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. As recorded at adoption, non-compliance suspends the delegate's authority for the matter in question until the Legal and Compliance Committee restores it. For the avoidance of gaps, room index extract showing lodging dates carries the control in Exception and Waiver Procedure, Edition 2.2, tested General Counsel. Given what this edition governs, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking co-invest allocations to the parallel vehicle as the tested set.

For so long as EWP version 2.2 is in force, a discrepancy between two records is preserved in the file and reported, and it is not resolved by adopting whichever figure the model already used. By way of enforcement, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the control map, reserve worksheet countersigned by the deal partner carries the control in Exception and Waiver Procedure, Edition 2.2, tested Fund Controller. Given what this edition governs, applied to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the standard is tested over follow-on commitments above the delegated band and the result is minuted.

Subject to the escalation ladder EWP version 2.2 sets, a discrepancy between two records is preserved in the file and reported, and it is not resolved by adopting whichever figure the model already used. As recorded at adoption, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. By assignment, convergence tab showing iterations and residual is named as owner of record in Edition 2.2 and tests Analytics Standards Group. On the population that matters, scoped to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the control bites on follow-on commitments above the delegated band and is reported on that basis.

At each measurement point EWP version 2.2 fixes, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. Where it is not met, failure is reported to the Legal and Compliance Committee in the period it is found, not in the period it occurred. Within the register, allocation worksheet and eligibility list is named as owner of record in Edition 2.2 and tests Compliance Officer. As the scope note records, because this edition governs the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the requirement reaches matters where two source records disagreed and no wider.

Schedule 11.E - exceptions granted under Edition 2.2

Ref (EWP version 2.2)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
EWP-EX-057	7.6 Unsigned counterpart labelling	Summary schedule cited an instrument before counterparts were complete	Schedule relabelled and recirculated the same day	General Counsel	2024-02-27	2024-03-29	Relabelled schedule confirmed in the room	Closed, label corrected
EWP-EX-061	8.5 Third-party report reconciliation	Report arrived two days before the reporting deadline	Controller documented divergence in a short note	Valuation Committee	2024-05-14	2024-06-28	Note reviewed at the following committee	Closed, note accepted
EWP-EX-064	3.8 Rounding convention on derived	Inherited schedule carried a	Two figures recomputed at full	Analytics Standards Group	2024-08-06	2024-09-30	Recomputation sheet retained with	Closed, convention applied

7. Monitoring and reporting

On the face of EWP version 2.2, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. There is no discretion here: failure is reported to the Legal and Compliance Committee in the period it is found, not in the period it occurred. For testing purposes, labelled schedule with the instrument list attached is the accountable function here, testing Investment Committee chair under Edition 2.2. As the scope note records, because this edition governs the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the requirement reaches matters approved between committee meetings and no wider.

In the EWP drafting convention, a discrepancy between two records is preserved in the file and reported, and it is not resolved by adopting whichever figure the model already used. The stated effect is that an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. As to ownership, ageing report with the flagged lines initialled takes the requirement under Exception and Waiver Procedure, Edition 2.2, verified Fund Controller. Read narrowly, the reference population for the rationale, compensating control, approver, expiry and monitoring that an exception must carry under this edition is positions whose model was rebuilt in the period.

On a proper reading of the EWP schedules, a prior exception creates no standing waiver, and a request that relies on a prior exception is treated as a fresh request on its own facts. Practically, non-compliance suspends the delegate's authority for the matter in question until the Legal and Compliance Committee restores it. As the schedules allocate it, signature page inventory with counterpart status owns the point in Exception and Waiver Procedure, Edition 2.2, and the test runs General Counsel. In practice under this edition, in the context of the rationale, compensating control, approver, expiry and monitoring that an exception must carry this bears on commitments made under an unexpired exception, which is why the test names its population.

EWP version 2.2 provides, within the scope stated above, that a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. The edition is explicit here: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. Turning to who answers for it, labelled schedule with the instrument list attached carries the control in Exception and Waiver Procedure, Edition 2.2, tested Investment Committee chair. On the operative population, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking positions whose model was rebuilt in the period as the tested set.

Save where the Legal and Compliance Committee grants an exception, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. Should that occur, the position is added to the watch list and reported at each subsequent meeting until closed. In control terms, allocation worksheet and eligibility list takes the requirement under Exception and Waiver Procedure, Edition 2.2, verified Compliance Officer. Where it bites, in the context of the rationale, compensating control, approver, expiry and monitoring that an exception must carry this bears on transactions where a delegate signed, which is why the test names its population.

For so long as EWP version 2.2 is in force, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. The drafting leaves no room: non-compliance suspends the delegate's authority for the matter in question until the Legal and Compliance Committee restores it. For the avoidance of gaps, reserve worksheet countersigned by the deal partner performs the test Fund Controller and reports under Exception and Waiver Procedure, Edition 2.2. As a matter of coverage, because this edition governs the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the requirement reaches positions with an unclosed monitoring finding and no wider.

Schedule 11.N - measurement conventions under Edition 2.2

Convention (EWP version 2.2)	Value under this edition	Reason	Test applied on review	Treatment of a departure
Tie-break where two conventions both apply	The more conservative of the two, with the choice stated	A silent tie-break is unreviewable	Reviewer confirms the stated choice on the tab	Unstated tie-breaks are treated as errors

Convention (EWP version 2.2)	Value under this edition	Reason	Test applied on review	Treatment of a departure
Treatment of a figure sourced from a summary	Marked unverified and excluded from any derived total	A summary is the weakest admissible source	Trace each marked figure back to its source	Derived totals containing it are struck
Version control for a released model	Sequential release number with a dated change note	Two models sharing one name cannot be reconciled	Compare the cover release number to the log	Unversioned releases are not accepted for review
Documentation accompanying a release	Purpose, inputs, conventions applied, and known limitations	A model without stated limitations invites misuse	Reviewer checks all four headings are present	Release is blocked until the note is complete
Day-count for interest on a convertible instrument	Actual over a three hundred and sixty-five day year	Matches the instruments the fund had then signed	Recompute one accrual period by hand	Departure recorded on the model cover tab
Rounding of derived per-unit figures	Carry full precision internally, present to four decimal places	Presentation rounding must not enter a later calculation	Recompute two sampled figures at full precision	Departure requires an Analytics sign-off
Rounding of aggregate currency amounts	Present to the whole unit, never to thousands	Aggregating rounded parts drifts against the true total	Foot the schedule and compare to the unrounded total	Difference disclosed as a footing note
Currency translation basis	One named published source for a whole submission	Mixed sources make two schedules irreconcilable	Check the source citation on every schedule	Submission returned for a single-source rebuild
Measurement date for a balance figure	The last day of the reporting period, stated on the tab	An implied date cannot be audited afterwards	Confirm the stated date against the source extract	Undated tabs are withheld from circulation
Iteration for a circular calculation	Iterate until the residual falls below one unit of the smallest presented figure	An unconverged circularity moves with recalculation order	Inspect the convergence tab for the residual	Output may not be quoted until it converges

8. Version administration

After 2024-12-31 the Compliance retained this edition as an archive copy only. Its provisions on the rationale, compensating control, approver, expiry and monitoring that an exception must carry are reproduced in the successor instrument except where the version history marks a substantive change.

On the authority of the Legal and Compliance Committee, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. The committee minuted the point: failure is reported to the Legal and Compliance Committee in the period it is found, not in the period it occurred. In control terms, signed clearance form with the date of search bears it in Exception and Waiver Procedure, Edition 2.2, with a Compliance Officer verification. In application, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking follow-on commitments above the delegated band as the tested set.

Read with the EWP schedules, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. The committee minuted the point: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. On the assignment of duties, signature page inventory with counterpart status retains the duty throughout Edition 2.2, evidenced General Counsel. For the tested set, the Compliance reads this against the rationale, compensating control, approver, expiry and monitoring that an exception must carry, taking co-invest allocations to the parallel vehicle as the tested set.

On a proper reading of the EWP schedules, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. Practically, the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. On the control map, ageing report with the flagged lines initialled takes the requirement under Exception and Waiver Procedure, Edition 2.2, verified Fund Controller. For the tested set, the reference population for the rationale, compensating control, approver, expiry and monitoring that an exception must carry under this edition is matters approved between committee meetings.

On the authority of the Legal and Compliance Committee, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. The remedy is procedural: non-compliance suspends the delegate's authority for the matter in question until the Legal and Compliance Committee restores it. Within the register, seat schedule with instrument references is the accountable function here, testing General Counsel under Edition 2.2. Where it bites, for the rationale, compensating control, approver, expiry and monitoring that

an exception must carry the operative population is follow-on commitments above the delegated band, and a test reported without it is void.

Where two records before the Legal and Compliance Committee disagree, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. As to consequence, the position is added to the watch list and reported at each subsequent meeting until closed. On the second reading, exception form with both fields completed is named as owner of record in Edition 2.2 and tests Compliance Officer. On the population that matters, scoped to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the control bites on positions carried at a mark older than two quarters and is reported on that basis.

As a mandatory standard of EWP version 2.2, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. Practically, non-compliance suspends the delegate's authority for the matter in question until the Legal and Compliance Committee restores it. On the second reading, ageing report with the flagged lines initialled is named as owner of record in Edition 2.2 and tests Fund Controller. By way of illustration, applied to the rationale, compensating control, approver, expiry and monitoring that an exception must carry, the standard is tested over matters approved between committee meetings and the result is minuted.

Schedule 11.R - reserve lifecycle events under Edition 2.2

Position reference (EWP version 2.2)	View forecast under	Trigger event	Action taken on the reserve	Effective quarter	Recorded by
Position C-21	Fully-funded view	Co-invest vehicle took part of the allocation	Reserve split between fund and vehicle on the written basis	2023-09-30	Allocation Officer
Position F-01	First-close view	Outstanding instrument converted at a priced round	Reserve re-forecast on the fully-funded view for the first time	2023-12-31	Portfolio Finance
Position D-13	Fully-funded view	Governance change removed the participation right	Reserve released and the release minuted with its reason	2024-03-31	Investment Committee
Position A-19	First-close view	Milestone met ahead of plan	Reserve reduced and the balance returned to the sector band	2021-03-31	Portfolio Finance
Position B-04	Fully-funded view	Round size increased after the term sheet	Reserve increased on a committee approval	2021-09-30	Investment Committee
Position C-11	First-close view	Bridge extended pending a priced round	Reserve held and the forecast date moved one quarter	2022-03-31	Portfolio Finance
Position A-07	Fully-funded view	Down round carrying a pay-to-play mechanic	Reserve released in part and the participation reduced	2022-06-30	Investment Committee
Position D-02	First-close view	Position written down below cost	Reserve released in full and reallocated	2022-12-31	Investment Committee
Position B-16	Fully-funded view	Follow-on exceeded the reserved amount	Breach approved on a re-forecast with a named alternative use	2023-03-31	Investment Committee
Position E-05	First-close view	Exit signed and the position moved to proceeds	Reserve released and the uncommitted balance restored	2023-06-30	Fund Controller
