INVESTMENT POLICY - ARCHIVED EDITION - RECORD 012

Helioscope Robotics, Inc. - diligence file reference POLICY_HISTORY-012

1. Authority and scope

Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3 was drafted on 2020-05-26 and took effect on 2020-07-01 on the authority of the Investment Committee. It governs post-close monitoring obligations, the model review standard and the committee escalation ladder. The custodian of record is the Portfolio Operations, and the schedules to this edition form part of it.

As the Investment Committee minuted at adoption, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. The committee minuted the point: the position is added to the watch list and reported at each subsequent meeting until closed. As to ownership, signature page inventory with counterpart status retains the duty throughout Edition 1.3, evidenced General Counsel. As a matter of coverage, because this edition governs post-close monitoring obligations, the model review standard and the committee escalation ladder, the requirement reaches positions carried at a mark older than two quarters and no wider.

Under PCME version 1.3, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. On failure, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. As to ownership, model cover tab and the reviewer's checklist bears it in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, with a Analytics Standards Group verification. Read narrowly, the Portfolio Operations reads this against post-close monitoring obligations, the model review standard and the committee escalation ladder, taking matters where two source records disagreed as the tested set.

As a mandatory standard of PCME version 1.3, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. On failure, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For testing purposes, model cover tab and the reviewer's checklist is assigned the control by Edition 1.3, which sets the cycle at Analytics Standards Group. Confined to its own field, because this edition governs post-close monitoring obligations, the model review standard and the committee escalation ladder, the requirement reaches matters where two source records disagreed and no wider.

As applied by the PCME monitoring calendar, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. As to consequence, a failure here is a reportable control breach and is minuted as such. Operationally, signature page inventory with counterpart status is assigned the control by Edition 1.3, which sets the cycle at General Counsel. As a matter of coverage, the Portfolio Operations reads this against post-close monitoring obligations, the model review standard and the committee escalation ladder, taking positions carried at a mark older than two quarters as the tested set.

As the PCME control register records, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The edition is explicit here: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. Operationally, room index extract showing lodging dates is accountable, under the control of Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3 tested General Counsel. In application, the Portfolio Operations reads this against post-close monitoring obligations, the model review standard and the committee escalation ladder, taking commitments made under an unexpired exception as the tested set.

As the PCME control register records, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. Practically, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. In control terms, reconciliation note signed by the controller performs the test Valuation Committee and reports under Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3. By way of illustration, for post-close monitoring obligations, the model review standard and the committee escalation ladder the operative population is matters approved between committee meetings, and a test reported without it is void.

Schedule 12.V - version history of Post-Close Monitoring, Model Governance and Escalation Standard to Edition 1.3

Edition (PCME version 1.3)	Adopted	Effective from	Effective to	Sections changed	Nature of change	Approving body
Edition 1.0	2019-07-08	2019-08-01	2020-06-30	All	First adoption; reporting obligations listed and an owner named for each	the Investment Committee
Edition 1.3	2020-05-26	2020-07-01	2023-09-30	2, 4, 5	Monitoring calendar introduced; model review and escalation grades added	the Investment Committee
Edition 2.0	2023-06-21	2023-10-01		3, 5, 6	Model governance separated into its own standard with an inventory	the Investment Committee

2. Defined terms

For the avoidance of doubt under PCME version 1.3, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. The edition is explicit here: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. For the avoidance of gaps, ageing report with the flagged lines initialled takes the requirement under Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, verified Fund Controller. On the population that matters, scoped to post-close monitoring obligations, the model review standard and the committee escalation ladder, the control bites on commitments made under an unexpired exception and is reported on that basis.

As the Investment Committee minuted at adoption, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. Enforcement follows automatically: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. By assignment, rate extract with the source and retrieval date bears it in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, with a Fund Controller verification. For the tested set, scoped to post-close monitoring obligations, the model review standard and the committee escalation ladder, the control bites on all new platform commitments in the period and is reported on that basis.

Notwithstanding the practice before PCME version 1.3, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. The remedy is procedural: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. On the second reading, room index extract showing lodging dates owns the point in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, and the test runs General Counsel. Where it bites, the Investment Committee applies this to post-close monitoring obligations, the model review standard and the committee escalation ladder by examining positions carried at a mark older than two quarters at each measurement point.

As the Investment Committee minuted at adoption, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. As to consequence, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. As the schedules allocate it, room index extract showing lodging dates is named as owner of record in Edition 1.3 and tests General Counsel. Where it bites, the reference population for post-close monitoring obligations, the model review standard and the committee escalation ladder under this edition is co-invest allocations to the parallel vehicle.

Notwithstanding the practice before PCME version 1.3, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. The register treats this strictly: the position is added to the watch list and reported at each subsequent meeting until closed. On the second reading, waiver register with expiry column populated answers for it under Edition 1.3, on a Legal and Compliance Committee test cycle. Where it bites, the Investment Committee applies this to post-close monitoring obligations, the model review standard and the committee escalation ladder by examining positions with an unclosed monitoring finding at each measurement point.

Having regard to the effective date of PCME version 1.3, the population a test is measured over is stated with the test, and a test reported without its population is treated as not performed. As recorded at adoption, a failure here is a reportable control breach and is minuted as such. On the second reading, room index extract showing lodging dates performs the test General Counsel and reports under Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3. Read narrowly, the Investment Committee applies this to post-close monitoring obligations, the model review standard and the committee escalation ladder by examining positions with an unclosed monitoring finding at each measurement point.

Schedule 12.T - control testing log kept under Edition 1.3

Test ref (PCME version 1.3)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
PCME-T0001	Each capital structure supplied to the committee identifies which view it presents	2019-07	Portfolio Operations	positions carried at a mark older than two quarters	16	passed after remediation	closed

PCME-T0049	Where two sources disagree, both are preserved and the conflict is logged	2020-03	Office of the General Counsel	positions with an unclosed monitoring finding	26	failed, no evidence on file	open
PCME-T0050	Currency translation uses one named rate source for the whole submission	2020-12	Internal Control Review	co-invest allocations to the parallel vehicle	11	not tested, population empty	n/a

2. Defined terms - part 3 of 3

The 2. Defined terms begun above continues from this point, and its row references run consecutively across the parts rather than restarting. Nothing is restated from the earlier part.

Because the basis of the 2. Defined terms is unchanged, figures in this part may be compared directly with those already given. Nothing is restated from the earlier part.

Schedule 12.T - control testing log kept under Edition 1.3 (continued, part 3 of 3)

Test ref (PCME version 1.3)	Control tested	Period	Tester	Population	Items examined	Outcome	Finding status
PCME-T0051	Unsigned counterparts are identified as unsigned wherever the instrument is cited	2022-12	External compliance reviewer	positions with an unclosed monitoring finding	29	failed, evidence produced late	open
PCME-T0052	Where two sources disagree, both are preserved and the conflict is logged	2023-02	Deal Team self-certification	matters where two source records disagreed	18	failed, evidence produced late	open
PCME-T0053	Allocation between the funds and any co-invest vehicle follows the written basis	2022-02	Portfolio Operations	transactions where a delegate signed	36	passed, evidence complete	closed
PCME-T0054	A mark carried for more than two quarters without new evidence is flagged as stale	2025-09	Valuation Committee secretariat	matters where two source records disagreed	31	passed with an observation recorded	closed

PCME-T0072	Allocation between the funds and any co-invest vehicle follows the written basis	2023-12	Fund Controller	matters where two source records disagreed	8	partially tested, sample incomplete	n/a
PCME-T0073	Unsigned counterparts are identified as unsigned wherever the instrument is cited	2023-12	External compliance reviewer	all new platform commitments in the period	27	not tested, population empty	n/a
PCME-T0074	Post-close reporting obligations are entered in the monitoring calendar at closing	2019-10	Fund Controller	follow-on commitments above the delegated band	8	failed, approver was also preparer	open

3. Mandatory standards

As the PCME control register records, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. In such a case, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. For accountability, signed clearance form with the date of search holds it for the duration of Edition 1.3, with testing Compliance Officer. On the operative population, because this edition governs post-close monitoring obligations, the model review standard and the committee escalation ladder, the requirement reaches matters where two source records disagreed and no wider.

Once a position is held under PCME version 1.3, an instrument obtained after a decision is filed against the decision, and where it contradicts the basis of the decision the matter returns to the committee. Should that occur, failure is reported to the Investment Committee in the period it is found, not in the period it occurred. On the assignment of duties, calendar extract for the quarter of closing holds it for the duration of Edition 1.3, with testing Chief Operating Officer. In application, because this edition governs post-close monitoring obligations, the model review standard and the committee escalation ladder, the requirement reaches co-invest allocations to the parallel vehicle and no wider.

Against the PCME version history, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. The stated effect is that the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. By assignment, model cover tab and the reviewer's checklist is accountable, under the control of Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3 tested Analytics Standards Group. On its own subject matter, in the context of post-close monitoring obligations, the model review standard and the committee escalation ladder this bears on commitments made under an unexpired exception, which is why the test names its population.

PCME version 1.3 makes the standard testable, so the audit trail for a mark is retained for the life of the position and afterwards, whether or not the position is realised. Failing that, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the second reading, waiver register with expiry column populated performs the test Legal and Compliance Committee and reports under Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3. By way of illustration, scoped to post-close monitoring obligations, the model review standard and the committee escalation ladder, the control bites on all new platform commitments in the period and is reported on that basis.

the Investment Committee requires, before a matter may be tabled, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. Failing that, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. As to ownership, calendar extract for the quarter of closing answers for it under Edition 1.3, on a Chief Operating Officer test cycle. Where it bites, applied to post-close monitoring obligations, the model review standard and the committee escalation ladder, the standard is tested over positions with an unclosed monitoring finding and the result is minuted.

Save where the Investment Committee grants an exception, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. Should that occur, the position is added to the watch list and reported at each subsequent meeting until closed. Operationally, room index extract showing lodging dates owns the point in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, and the test runs General Counsel. On the facts this edition addresses, for post-close monitoring obligations, the model review standard and the committee escalation ladder the operative population is matters approved between committee meetings, and a test reported without it is void.

Schedule 12.D - decisions taken under Edition 1.3

Decision ref (PCME version 1.3)	Decision type	Date	Approver of record	Authority relied on	Disposition	Evidence at decision
PCME-D0001	co-invest allocation	2025-12-25	Investment Committee, simple majority	New platform commitment	within band	complete
PCME-D0002	exception grant	2025-11-24	Two Investment Committee members	Bridge or interim instrument	within band	incomplete at decision
PCME-D0003	exception grant	2025-06-09	Investment Committee, simple majority	Secondary purchase of an existing position	ratified after the fact	incomplete at decision
PCME-D0004	follow-on within reserve	2023-10-03	Allocation Officer	Co-invest allocation to a vehicle	escalated one level	complete
PCME-D0005	watch-list escalation	2021-11-14	Two Investment Committee members	Bridge or interim instrument	within band	complete
PCME-D0006	follow-on within reserve	2021-10-26	Investment Committee, simple majority	New platform commitment	within band	complete

Decision ref (PCME version 1.3)	Decision type	Date	Approver of record	Authority relied on	Disposition	Evidence at decision
PCME-D0007	watch-list escalation	2019-05-27	Deal partner and General Counsel	Amendment of a governing document post-close	within band	complete
PCME-D0008	exception grant	2024-09-09	Investment Committee, simple majority	Secondary purchase of an existing position	referred to counsel	complete

4. Evidence and owners

On a proper reading of the PCME schedules, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. Where it is not met, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. On the second reading, reconciliation note signed by the controller holds it for the duration of Edition 1.3, with testing Valuation Committee. For the tested set, the reference population for post-close monitoring obligations, the model review standard and the committee escalation ladder under this edition is co-invest allocations to the parallel vehicle.

In the PCME drafting convention, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. The remedy is procedural: failure is reported to the Investment Committee in the period it is found, not in the period it occurred. By assignment, waiver register with expiry column populated takes the requirement under Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, verified Legal and Compliance Committee. As the instrument is scoped, in the context of post-close monitoring obligations, the model review standard and the committee escalation ladder this bears on positions carried at a mark older than two quarters, which is why the test names its population.

the Investment Committee requires, before a matter may be tabled, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. The sanction is plain: a failure here is a reportable control breach and is minuted as such. On the control map, seat schedule with instrument references owns the point in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, and the test runs General Counsel. As a matter of coverage, scoped to post-close monitoring obligations, the model review standard and the committee escalation ladder, the control bites on positions with an unclosed monitoring finding and is reported on that basis.

Under PCME version 1.3, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. In such a case, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. For accountability, rate extract with the source and retrieval date retains the duty throughout Edition 1.3, evidenced Fund Controller. For the tested set, because this edition governs post-close monitoring obligations, the model review standard and the committee escalation ladder, the requirement reaches follow-on commitments above the delegated band and no wider.

PCME version 1.3 provides, within the scope stated above, that escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. On the plain words, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. For accountability, labelled schedule with the instrument list attached is assigned the control by Edition 1.3, which sets the cycle at Investment Committee chair. As a matter of coverage, the reference population for post-close monitoring obligations, the model review standard and the committee escalation ladder under this edition is positions whose model was rebuilt in the period.

Read with the PCME schedules, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. The drafting leaves no room: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. Operationally, allocation worksheet and eligibility list owns the point in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, and the test runs Compliance Officer. Given what this edition governs, the reference population for post-close monitoring obligations, the model review standard and the committee escalation ladder under this edition is follow-on commitments above the delegated band.

PCME-A022	section 3.6	consequential	2025-05	counsel direction	superseded without replacement

5. Approval and escalation

Notwithstanding the practice before PCME version 1.3, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. On the plain words, an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the second reading, exception form with both fields completed carries the control in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, tested Compliance Officer. Confined to its own field, the reference population for post-close monitoring obligations, the model review standard and the committee escalation ladder under this edition is transactions where a delegate signed.

For the avoidance of doubt under PCME version 1.3, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. The sanction is plain: failure is reported to the Investment Committee in the period it is found, not in the period it occurred. For accountability, convergence tab showing iterations and residual is the accountable function here, testing Analytics Standards Group under Edition 1.3. Given what this edition governs, the reference population for post-close monitoring obligations, the model review standard and the committee escalation ladder under this edition is positions with an unclosed monitoring finding.

As between the deal team and the Investment Committee, the model owner of record is the person accountable for a figure reaching a recommendation, and that accountability does not pass with the spreadsheet. There is no discretion here: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. Turning to who answers for it, room index extract showing lodging dates is assigned the control by Edition 1.3, which sets the cycle at General Counsel. As the instrument is scoped, applied to post-close monitoring obligations, the model

review standard and the committee escalation ladder, the standard is tested over all new platform commitments in the period and the result is minuted.

Save where the Investment Committee grants an exception, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. The sanction is plain: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. On the second reading, arbitration log entry naming both sources carries the control in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, tested Deal Operations manager. As a matter of coverage, for post-close monitoring obligations, the model review standard and the committee escalation ladder the operative population is co-invest allocations to the parallel vehicle, and a test reported without it is void.

PCME version 1.3 provides, within the scope stated above, that the audit trail for a mark is retained for the life of the position and afterwards, whether or not the position is realised. The instrument provides that where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. As to ownership, arbitration log entry naming both sources takes the requirement under Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, verified Deal Operations manager. Read narrowly, scoped to post-close monitoring obligations, the model review standard and the committee escalation ladder, the control bites on positions whose model was rebuilt in the period and is reported on that basis.

Where the evidence before the Investment Committee is incomplete, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. As recorded at adoption, a failure here is a reportable control breach and is minuted as such. On the control map, labelled schedule with the instrument list attached retains the duty throughout Edition 1.3, evidenced Investment Committee chair. As the instrument is scoped, scoped to post-close monitoring obligations, the model review standard and the committee escalation ladder, the control bites on co-invest allocations to the parallel vehicle and is reported on that basis.

Schedule 12.C - control register as Edition 1.3 drew it

Control ref (PCME version 1.3)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
PCME-C18	Escalations reach the named recipient within the stated notification window	Compliance samples three escalations and checks the timestamps	Notification record with send and receipt times	Escalating owner	Chief Operating Officer	Quarterly	The owner's escalation authority is suspended pending retraining
PCME-C01	Every opportunity presented for approval carries a completed conflict clearance	Compliance confirms the clearance predates the tabling date	Signed clearance form with the date of search	Deal partner	Compliance Officer	Per opportunity	The matter may not be tabled and is struck from the agenda
PCME-C02	Reserve set at initial investment is recorded before the funding instruction issues	Portfolio Finance ties the reserve line to the approval minute	Reserve worksheet countersigned by the deal partner	Portfolio Finance analyst	Fund Controller	Per investment	Funding instruction is withheld until the reserve line exists
PCME-C03	Each capital structure supplied to the committee identifies which view it presents	Reviewer checks the view label against the underlying instruments	Labelled schedule with the instrument list attached	Modeling lead	Investment Committee chair	Per submission	The submission is returned unread and the meeting slot is lost
PCME-C04	Executed instruments are lodged in the	Deal Operations reconciles the	Room index extract showing	Deal Operations manager	General Counsel	Weekly	The deal partner loses signature

Control ref (PCME version 1.3)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
	data room within five business days of signing	signing log to the room index	lodging dates				authority on new documents
PCME-C05	Where two sources disagree, both are preserved and the conflict is logged	Reviewer searches the arbitration log for the affected figure	Arbitration log entry naming both sources	Reviewing analyst	Deal Operations manager	Per discrepancy	Any conclusion drawn from the figure is void and must be redone
PCME-C06	A mark carried for more than two quarters without new evidence is flagged as stale	Fund Controller runs the ageing report against the mark register	Ageing report with the flagged lines initialled	Valuation analyst	Fund Controller	Quarterly	The position is written to the lower of cost and last evidenced value
PCME-C07	Every model released to the committee has a named preparer and a named reviewer	Analytics confirms both names appear on the cover tab	Model cover tab and the reviewer's checklist	Preparer	Analytics Standards Group	Per release	The model is not circulated and the decision is deferred
PCME-C08	Exception requests state a compensating control and an expiry date	Compliance rejects any request with either field blank	Exception form with both fields completed	Requesting partner	Compliance Officer	Per request	The request is refused without prejudice to a complete resubmission
PCME-C09	Board and observer seats are confirmed against the executed voting arrangements	Legal ties each seat to the instrument that creates it	Seat schedule with instrument references	Portfolio Operations	General Counsel	Semi-annually	The seat is treated as unheld until the confirmation is produced
PCME-C10	Currency translation uses one named rate source for the whole submission	Reviewer checks that a single source is cited on every schedule	Rate extract with the source and retrieval date	Modeling lead	Fund Controller	Per submission	The submission is rejected and the analyst redoes the translation
PCME-C11	Circular calculations are iterated to a stated tolerance and the residual is disclosed	Reviewer inspects the convergence tab for the residual	Convergence tab showing iterations and residual	Preparer	Analytics Standards Group	Per model	The output may not be quoted in any approval document
PCME-C12	Post-close reporting obligations are entered in the monitoring calendar at closing	Portfolio Operations reconciles closed deals to calendar entries	Calendar extract for the quarter of closing	Portfolio Operations	Chief Operating Officer	Monthly	The closing is not marked complete and the file stays open
PCME-C13	Allocation between the funds and any co-invest vehicle follows the written basis	Compliance recomputes the allocation from the eligibility list	Allocation worksheet and eligibility list	Allocation Officer	Compliance Officer	Per allocation	The allocation is unwound and re-run under supervision
PCME-C14	Third-party valuation reports are read against the preparer's own conclusion	Fund Controller documents agreement or divergence in writing	Reconciliation note signed by the controller	Valuation analyst	Valuation Committee	Per report	The report may not be relied on and the mark is held at prior basis
PCME-C15	Rounding and	Reviewer	Recomputation	Reviewing	Analytics	Per submission	Derived figures

Control ref (PCME version 1.3)	Requirement	Test	Evidence	Owner	Approver	Frequency	Consequence of failure
	precision follow the stated convention on every derived figure	recomputes two sampled figures at full precision	sheet with both samples	analyst	Standards Group		are struck and the schedule is reissued
PCME-C16	Unsigned counterparts are identified as unsigned wherever the instrument is cited	Legal checks the citation against the signature page inventory	Signature page inventory with counterpart status	Deal Operations manager	General Counsel	Per citation	The instrument is treated as a draft for every purpose in the file
PCME-C17	A waiver granted once is recorded as expiring rather than as standing	Compliance confirms each register line carries an expiry	Waiver register with expiry column populated	Compliance analyst	Legal and Compliance Committee	Quarterly	The waiver lapses immediately and the underlying rule applies

6. Exceptions

For so long as PCME version 1.3 is in force, the effective date of an instrument governs its application, and a later drafting date does not displace an earlier effective date. The committee minuted the point: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. In control terms, notification record with send and receipt times bears it in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, with a Chief Operating Officer verification. As the instrument is scoped, applied to post-close monitoring obligations, the model review standard and the committee escalation ladder, the standard is tested over co-invest allocations to the parallel vehicle and the result is minuted.

At each measurement point PCME version 1.3 fixes, an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. The register treats this strictly: the position is added to the watch list and reported at each subsequent meeting until closed. For testing purposes, recomputation sheet with both samples takes the requirement under Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, verified Analytics Standards Group. On the facts this edition addresses, the Portfolio Operations reads this against post-close monitoring obligations, the model review standard and the committee escalation ladder, taking co-invest allocations to the parallel vehicle as the tested set.

Notwithstanding the practice before PCME version 1.3, the evidence named against a control must be on file before the decision is taken, and a decision recorded without it is reopened at the next committee meeting. On the plain words, non-compliance suspends the delegate's authority for the matter in question until the Investment Committee restores it. Operationally, calendar extract for the quarter of closing retains the duty throughout Edition 1.3, evidenced Chief Operating Officer. Confined to its own field, in the context of post-close monitoring obligations, the model review standard and the committee escalation ladder this bears on positions carried at a mark older than two quarters, which is why the test names its population.

Having regard to the effective date of PCME version 1.3, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. There is no discretion here: an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the second reading, model cover tab and the reviewer's checklist owns the point in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, and the test runs Analytics Standards Group. In application, for post-close monitoring obligations, the model review standard and the committee escalation ladder the operative population is positions carried at a mark older than two quarters, and a test reported without it is void.

Save where the Investment Committee grants an exception, a monitoring obligation not performed within its window is reported as a failure even where it is performed late, and the late performance does not close the finding. The stated effect is that an approval given in breach of this standard is recorded as invalid and the matter is re-tabled. On the second reading, allocation worksheet and eligibility list performs the test Compliance Officer and reports under Post-

Close Monitoring, Model Governance and Escalation Standard, Edition 1.3. In practice under this edition, the Investment Committee applies this to post-close monitoring obligations, the model review standard and the committee escalation ladder by examining co-invest allocations to the parallel vehicle at each measurement point.

Subject to the escalation ladder PCME version 1.3 sets, the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. There is no discretion here: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. In the accountability chain, rate extract with the source and retrieval date holds it for the duration of Edition 1.3, with testing Fund Controller. As the instrument is scoped, applied to post-close monitoring obligations, the model review standard and the committee escalation ladder, the standard is tested over positions with an unclosed monitoring finding and the result is minuted.

Schedule 12.E - exceptions granted under Edition 1.3

Ref (PCME version 1.3)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
PCME-EX-053	5.7 Convergence residual disclosed	Legacy model lacked a convergence tab when inherited	Residual computed by hand and attached to the cover	Analytics Standards Group	2023-11-14	2024-01-31	Model rebuilt with a convergence tab	Closed, rebuild released
PCME-EX-057	7.6 Unsigned counterpart labelling	Summary schedule cited an instrument before counterparts were complete	Schedule relabelled and recirculated the same day	General Counsel	2024-02-27	2024-03-29	Relabelled schedule confirmed in the room	Closed, label corrected
PCME-EX-061	8.5 Third-party report reconciliation	Report arrived two days before the reporting deadline	Controller documented divergence in a short note	Valuation Committee	2024-05-14	2024-06-28	Note reviewed at the following committee	Closed, note accepted
PCME-EX-064	3.8 Rounding convention on derived figures	Inherited schedule carried a different precision convention	Two figures recomputed at full precision and compared	Analytics Standards Group	2024-08-06	2024-09-30	Recomputation sheet retained with the file	Closed, convention applied
PCME-EX-014	4.2 Conflict clearance timing	Clearance search returned after the agenda closed on a competitive process	Partner recused from the vote and clearance filed within two days	Compliance Officer	2021-03-08	2021-04-30	Compliance confirmed the late filing at month end	Closed, monitoring complete
PCME-EX-019	6.1 Reserve recorded before funding	Wire released on a Friday ahead of the reserve worksheet countersignature	Fund Controller held the position off the forecast until signed	Fund Controller	2021-06-24	2021-07-15	Worksheet countersigned and forecast reissued	Closed, no recurrence
PCME-EX-023	3.4 Single rate source per submission	Two rate sources appeared in a submission inherited from a co-lead	Translation redone on one source before the committee read it	Analytics Standards Group	2021-09-02	2021-10-01	Reviewer re-checked the reissued schedules	Closed, control retested
PCME-EX-027	5.3 Model reviewer named on release	Reviewer on leave during a two-day exclusivity window	Second preparer performed an independent rebuild instead	Analytics Standards Group	2022-01-19	2022-02-28	Rebuild retained and compared line by line	Closed, evidence retained
PCME-	7.2 Executed	Counterparty	Signing log	General	2022-04-11	2022-05-31	Counterpart	Closed,

Ref (PCME version 1.3)	Policy section	Rationale	Compensating control	Approver	Granted	Expiry	Monitoring	Status
EX-031	instruments lodged in five days	withheld the executed counterpart pending a side letter	annotated and weekly chase recorded	Counsel			lodged and index reconciled	obligation satisfied
PCME-EX-034	8.1 Stale mark flagged at two quarters	Third-party report expected within weeks of the ageing run	Position disclosed as awaiting evidence in the pack	Valuation Committee	2022-07-28	2022-09-30	Report received and mark supported	Closed, evidence obtained
PCME-EX-038	4.6 Co-invest allocation basis	Eligibility list incomplete for a newly admitted vehicle	Allocation deferred and re-run once the list was final	Compliance Officer	2022-11-03	2022-12-15	Re-run allocation reviewed by Compliance	Closed, allocation reissued
PCME-EX-042	9.4 Escalation notification window	Escalation raised over a public holiday weekend	Written notice sent to two alternates the same day	Chief Operating Officer	2023-02-16	2023-03-31	Timestamps sampled in the quarterly review	Closed, window met on retest
PCME-EX-045	6.5 Breach request evidence	Re-forecast unavailable while an audit adjustment was open	Approval conditioned on the re-forecast within ten days	Investment Committee	2023-05-09	2023-06-30	Re-forecast filed and condition discharged	Closed, condition met
PCME-EX-049	2.3 Two-signature requirement	Second signatory unreachable during a same-day closing	Managing Partner countersigned within twenty-four hours	Managing Partners acting jointly	2023-08-22	2023-09-29	Signature page inventory updated and checked	Closed, inventory reconciled

7. Monitoring and reporting

Where a delegate of the Investment Committee acts, a delegate exceeding a band ratifies nothing by acting, and the action stands or falls on the ratification the committee subsequently gives it. The stated effect is that failure is reported to the Investment Committee in the period it is found, not in the period it occurred. On the assignment of duties, model cover tab and the reviewer's checklist is accountable, under the control of Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3 tested Analytics Standards Group. As the instrument is scoped, scoped to post-close monitoring obligations, the model review standard and the committee escalation ladder, the control bites on commitments made under an unexpired exception and is reported on that basis.

Notwithstanding the practice before PCME version 1.3, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. The drafting leaves no room: the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. For accountability, reconciliation note signed by the controller takes the requirement under Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, verified Valuation Committee. In application, because this edition governs post-close monitoring obligations, the model review standard and the committee escalation ladder, the requirement reaches positions whose model was rebuilt in the period and no wider.

PCME version 1.3 makes the standard testable, so the reviewer who clears an issue records the basis of clearance, and a cleared issue reopens automatically if the basis is later shown to be wrong. As to consequence, where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. For testing purposes, room index extract showing lodging dates bears it in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, with a General Counsel verification. For the tested set, in the context of post-close monitoring obligations, the model review standard and the committee escalation ladder this bears on matters where two source records disagreed, which is why the test names its population.

Save where the Investment Committee grants an exception, a matter within a reserved category may not be approved by a delegate, and an approval given without the reserved-matter check is void rather than merely irregular. The register treats this strictly: where the standard is not met the opportunity is withdrawn from the agenda rather than approved subject to conditions. For accountability, signature page inventory with counterpart status is the accountable function here, testing General Counsel under Edition 1.3. As the instrument is scoped, for post-close monitoring obligations, the model review standard and the committee escalation ladder the operative population is positions with an unclosed monitoring finding, and a test reported without it is void.

On a proper reading of the PCME schedules, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. Should that occur, the position is added to the watch list and reported at each subsequent meeting until closed. As the schedules allocate it, exception form with both fields completed takes the requirement under Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, verified Compliance Officer. As a matter of coverage, the reference population for post-close monitoring obligations, the model review standard and the committee escalation ladder under this edition is positions whose model was rebuilt in the period.

the Investment Committee expects, under PCME version 1.3, that an exception carries a stated expiry, and on expiry the underlying requirement revives without further notice to the holder of the exception. In such a case, the position is added to the watch list and reported at each subsequent meeting until closed. For accountability, room index extract showing lodging dates is assigned the control by Edition 1.3, which sets the cycle at General Counsel. On the facts this edition addresses, applied to post-close monitoring obligations, the model review standard and the committee escalation ladder, the standard is tested over co-invest allocations to the parallel vehicle and the result is minuted.

Schedule 12.I - review issues reserved to the Investment Committee by Edition 1.3

Issue (PCME version 1.3)	Who may clear it	Standard applied	Escalation where the standard is not met
Pro rata and participation rights	Deal partner with Portfolio Finance	The right must be exercisable from the recorded reserve	Fund Controller where the reserve is insufficient
Information and inspection rights	Deal partner	Must support the post-close monitoring obligations	Portfolio Operations lead
Founder vesting and acceleration	General Counsel with the deal partner	Acceleration on a change of control needs express approval	Investment Committee
Registration and transfer restrictions	General Counsel only	Restrictions must fit the exemption being relied on	Legal and Compliance Committee
Redemption or put mechanics	General Counsel only	Any redemption right is a reserved issue in every case	Managing Partners acting jointly
Expense and fee reimbursement	Chief Financial Officer	Reimbursement must be capped and the cap must be stated	General Counsel where no cap is offered
Exclusivity and no-shop covenants	Deal partner	The term may not exceed the period the approval contemplated	General Counsel before signature
Conditions to closing	General Counsel with the deal partner	Each condition must be capable of objective testing	Legal and Compliance Committee
Liquidation preference structure	General Counsel with the deal partner	Must match the structure recorded in the approval minute	Investment Committee chair before signature
Anti-dilution mechanic	General Counsel only	Any mechanic outside the approved form is a reserved issue	Legal and Compliance Committee
Board composition and observer rights	Deal partner	Seats must be creatable by the instruments proposed	General Counsel where an instrument must change
Protective provisions and consent list	General Counsel only	The consent list may not exceed the approved list	Legal and Compliance Committee

8. Version administration

Custody of the treatment of post-close monitoring obligations, the model review standard and the committee escalation ladder left this instrument on 2023-09-30. A reader establishing which edition governed a transaction compares its date against the effective and superseded dates in the header above.

Save where the Investment Committee grants an exception, a discrepancy between two records is preserved in the file and reported, and it is not resolved by adopting whichever figure the model already used. The sanction is plain: the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. For accountability, arbitration log entry naming both sources owns the point in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, and the test runs Deal Operations manager. In application, the reference population

for post-close monitoring obligations, the model review standard and the committee escalation ladder under this edition is positions with an unclosed monitoring finding.

For so long as PCME version 1.3 is in force, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. On the plain words, the consequence of failure is that the matter may not proceed to a commitment until the gap is closed. On the second reading, seat schedule with instrument references bears it in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, with a General Counsel verification. As the scope note records, the reference population for post-close monitoring obligations, the model review standard and the committee escalation ladder under this edition is matters where two source records disagreed.

By the terms of the PCME standard, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. Should that occur, a failure here is a reportable control breach and is minuted as such. On the control map, arbitration log entry naming both sources retains the duty throughout Edition 1.3, evidenced Deal Operations manager. On the facts this edition addresses, the reference population for post-close monitoring obligations, the model review standard and the committee escalation ladder under this edition is matters approved between committee meetings.

As PCME version 1.3 was adopted, escalation is by severity rather than by seniority of the person raising it, and a severity assessment is itself reviewable. The remedy is procedural: failure is reported to the Investment Committee in the period it is found, not in the period it occurred. In the accountability chain, calendar extract for the quarter of closing is named as owner of record in Edition 1.3 and tests Chief Operating Officer. Confined to its own field, in the context of post-close monitoring obligations, the model review standard and the committee escalation ladder this bears on co-invest allocations to the parallel vehicle, which is why the test names its population.

By the terms of the PCME standard, the approver of a matter may not also be its preparer, and where the two coincide the matter is escalated one level rather than approved. The instrument provides that the finding stays open on the register until the evidence is produced, whatever the outcome of the transaction. For the avoidance of gaps, allocation worksheet and eligibility list performs the test Compliance Officer and reports under Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3. Confined to its own field, scoped to post-close monitoring obligations, the model review standard and the committee escalation ladder, the control bites on matters where two source records disagreed and is reported on that basis.

As PCME version 1.3 was adopted, a compensating control substitutes for a requirement only where the substitution is approved in advance and recorded against the exception. The committee minuted the point: the position is added to the watch list and reported at each subsequent meeting until closed. On the assignment of duties, waiver register with expiry column populated carries the control in Post-Close Monitoring, Model Governance and Escalation Standard, Edition 1.3, tested Legal and Compliance Committee. In practice under this edition, applied to post-close monitoring obligations, the model review standard and the committee escalation ladder, the standard is tested over matters where two source records disagreed and the result is minuted.

Schedule 12.A - delegated authority bands under Edition 1.3

Decision type (PCME version 1.3)	Threshold band	Primary approver	Secondary approver	Documentation required	Reporting
Guarantee, indemnity or side letter	any amount	General Counsel	Chief Financial Officer	Executed instrument and exposure note	Reported to the advisory board annually
Engagement of a third-party valuation firm	up to USD 200,000 per engagement	Fund Controller	Valuation Committee chair	Scope letter and independence confirmation	Listed in the valuation service register
Expense charged to a portfolio company	any amount	Chief Financial Officer	General Counsel where a conflict exists	Invoice, allocation basis and consent	Disclosed in the annual expense schedule
Extension of an outstanding exception	any amount	Original approver plus one	Compliance confirms monitoring is current	Extension request and monitoring evidence	Reflected in the exception log
New platform commitment	up to USD 750,000	Sector Partner	one Managing Partner	Screening memorandum and reference log	Reported at the next committee meeting
New platform commitment	USD 750,001 to USD 4,000,000	Investment Committee, simple majority	General Counsel sign-off on documents	Full diligence file and draft term sheet	Minuted with dissent recorded

Decision type (PCME version 1.3)	Threshold band	Primary approver	Secondary approver	Documentation required	Reporting
New platform commitment	above USD 4,000,000	Investment Committee, unanimous	Managing Partners acting jointly	Full diligence file, model, legal opinion	Reported to the advisory board quarterly
Follow-on within an approved reserve	up to the reserved amount	Deal partner and Portfolio Finance	Fund Controller confirms reserve balance	Reserve worksheet and updated forecast	Listed in the monthly reserve report
Follow-on exceeding an approved reserve	any amount	Investment Committee, two-thirds	Chief Investment Officer	Breach request with re-forecast and rationale	Minuted and reported to the advisory board
Bridge or interim instrument	up to USD 1,250,000	Two Investment Committee members	General Counsel	Bridge memorandum and repayment analysis	Reported at the next committee meeting
Pro rata waiver or pass on a right	any amount	Investment Committee, simple majority	Managing Partner not on the board seat	Waiver rationale and portfolio impact note	Recorded in the waiver register
Co-invest allocation to a vehicle	any amount	Allocation Officer	Compliance review before allocation	Allocation worksheet and eligibility list	Reported to affected limited partners
Secondary purchase of an existing position	up to USD 2,000,000	Investment Committee, simple majority	Fund Controller on pricing basis	Independent pricing evidence and seller file	Minuted with the pricing basis stated
Disposition or write-off of a position	any amount	Investment Committee, simple majority	Valuation Committee on the carrying basis	Disposition memorandum and final mark	Reported in the quarterly valuation pack
Amendment of a governing document post-close	any amount	Deal partner and General Counsel	Investment Committee if economics change	Redline, impact note and consent record	Logged in the post-close amendment register
