CUSTOMER AND COMMERCIAL DILIGENCE REVIEW - RECORD 005

Helioscope Robotics, Inc. - diligence file reference CUSTOMER_DILIGENCE-005

Support and reliability at Kestrel Pharma from the customer's side of the desk

Severity-one events across the estate total 10 over the periods examined, and the distribution is site-specific rather than uniform, which matters because the customer experiences reliability building by building. Plaza Zaragoza (KES-02) recorded the weakest resolution attainment at 61 per cent in 2024-Q3, against a response attainment of 94 per cent in the same quarter. Response and resolution diverge consistently here, which is the pattern a site notices and a dashboard hides. Sant Boi (KES-01) logged 20 tickets in 2023-Q4 including 0 at severity one, with resolution attainment of 96 per cent. Plaza Zaragoza (KES-02) is where pick confirmation duplicated in the host WMS recurs, and the quarter to 2023-Q2 shows 1 severity-one events. Although the console reported no outage at Sant Boi, the site still raised 14 tickets in 2024-Q4. Plaza Zaragoza (KES-02) logged 11 tickets in 2025-Q2 including 1 at severity one, with resolution attainment of 73 per cent. Sant Boi keeps returning to one theme, interface message backlog after a host restart, and it survived into 2024-Q2. Severity being classified by the vendor, Sant Boi recorded only 0 events at the top severity in 2023-Q4. Sant Boi produced 0 severity-one events in 2024-Q1, and resolution attainment of 84 per cent triggered credits of $720. Severity being classified by the vendor, Plaza Zaragoza recorded only 2 events at the top severity in 2024-Q2. Recurring at Plaza Zaragoza through that quarter was pick confirmation duplicated in the host WMS, across 13 tickets. Sant Boi keeps returning to one theme, traffic deadlock at an aisle intersection, and it survived into 2024-Q3. Although the console reported no outage at Sant Boi, the site still raised 14 tickets in 2024-Q4.

Severity classification is decided by the company, and Dr. Ferran Casasnovas raised that as a grievance without being asked about it. A site that cannot set severity cannot trigger a credit, and the schedule shows 8 quarters where credits were issued, all of them after the customer escalated rather than through automatic operation of the service schedule. The self-executing credit mechanism is dormant. Recurring at Plaza Zaragoza through that quarter was traffic deadlock at an aisle intersection, across 16 tickets. Sant Boi triggered credits of $6,967 following resolution attainment of 88 per cent. Severity being classified by the vendor, Plaza Zaragoza recorded only 0 events at the top severity in 2023-Q1. Plaza Zaragoza (KES-02) logged 11 tickets in 2025-Q2 including 1 at severity one, with resolution attainment of 73 per cent. Plaza Zaragoza (KES-02) is where lift-plate calibration drift recurs, and the quarter to 2023-Q1 shows 0 severity-one events. Although the console reported no outage at Sant Boi, the site still raised 25 tickets in 2023-Q3. Recurring at Sant Boi through that quarter was pick confirmation duplicated in the host WMS, across 18 tickets. Plaza Zaragoza (KES-02) met response targets 92 per cent of the time, and resolution targets rather less often. Ticket volume reached 9 at Plaza Zaragoza in 2025-Q1, of which 0 were classified at the highest severity. Plaza Zaragoza (KES-02) logged 28 tickets in 2024-Q2 including 2 at severity one, with resolution attainment of 96 per cent. Sant Boi (KES-01) met response targets 89 per cent of the time, and resolution targets rather less often.

Recurring themes are worth more than volumes in this analysis, because a hundred nuisance stops are a tuning problem while three traffic deadlocks may be a design limit. A single theme accounts for most repeat tickets: traffic deadlock at an aisle intersection, which appears in more than one quarter and at more than one site. Engineering attributes it to the site environment, while the site treats it as a product limitation, and the documents do not clearly support either position. Severity being classified by the vendor, Sant Boi recorded only 1 events at the top severity in 2025-Q1. Plaza Zaragoza (KES-02) met response targets 85 per cent of the time, and resolution targets rather less often. Sant Boi (KES-01) is where traffic deadlock at an aisle intersection recurs, and the quarter to 2024-Q3 shows 1 severity-one events. Plaza Zaragoza keeps returning to one theme, lift-plate calibration drift, and it survived into 2023-Q4. Reviewing the 2023-Q2 quarter, Plaza Zaragoza shows 13 tickets and a recurring theme of pick confirmation duplicated in the host WMS. Sant Boi (KES-01) shows traffic deadlock at an aisle intersection as the complaint theme, on 25 tickets in 2023-Q3. Attainment figures from Plaza Zaragoza show 98 per cent on response against 73 per cent on resolution. Ticket volume reached 23 at Sant Boi in 2025-Q2, of which 1 were classified at the highest severity. Plaza Zaragoza triggered credits of $445 following resolution attainment of 86 per cent. Plaza Zaragoza triggered credits of $2,135 following resolution attainment of 61 per cent. Attainment figures from Plaza Zaragoza show 98 per cent on response against 73 per cent on resolution.

Acceptance certificate evidence: Kestrel Pharma

Fieldwork at Kestrel Pharma sets out that the gap between conditional and final acceptance exceeds a year at one building, and the schedule below is the evidence for it, drawn from 2 records rather than from a summary prepared for us. The Kestrel Pharma bundle supports a related reading: certificates were signed by operating staff rather than by procurement at every site. The Sant Boi team carries the detail at record level deliberately, because an account-level average at Kestrel Pharma conceals the site-to-site variation that decides how this relationship behaves at renewal. Dashiell Okonjo, speaking as head of industrial engineering, said that reporting cannot be reconciled against the customer's own labour standard and pressed the point twice before the call ended. Although Sant Boi treats it as outside anyone's control, integration test in the customer sandbox still moved to 2023-01-31 for validation protocol rewritten after a quality-assurance review. Praise from Ferdinand Achterberg-Lo took the form that safety record was clean across two shifts and no lost-time incidents, and it came without prompting. Sant Boi (KES-01) met final acceptance certificate on 2023-10-24 without a variation to plan. Notes taken on 2026-02-09 record Leocadia Ferrante praising that the fleet-orchestration console gave supervisors usable congestion data beside the complaint that on-site engineering days were consumed by defects rather than tuning. Plaza Zaragoza (KES-02) met conditional acceptance certificate on 2024-06-07 without a variation to plan. Praise from Berenice Straatman took the form that firmware rollbacks were quick when a release misbehaved, and it came without prompting. Where the plan assumed a clean run, Plaza Zaragoza instead took 60 extra days over site survey and slotting scan, for supplier lead time on the conveyor tie-in guard package.

Anouk Verhelst's team must be read subject to two limits: withheld amounts are as the customer states them and differ from management's figures in two cases, and dates are certificate dates, which occasionally postdate the underlying event. The Plaza Zaragoza operation also observed, when the schedule was put to the customer, that conditional acceptance was the norm at every site and a clean certificate the exception, which is consistent with what the documents show without being proved by them. Kestrel Pharma accepted the schedule as a fair summary of the underlying records, subject to those qualifications and to the open items listed in this review. Berenice Straatman, introduced by Kestrel Pharma as a willing reference, nonetheless complained that on-site engineering days were consumed by defects rather than tuning. At Sant Boi the gate for network and radio-frequency readiness review was planned for 2022-09-16 and closed on 2022-11-20, the delay being labour agreement consultation with the site works council. Talking to Ingrid Szymborska for 49 minutes by video call produced the claim that units picked per operator hour improved by 18 per cent, not substantiated: the baseline period predates the current network design. Timing at Plaza Zaragoza held for final acceptance certificate, which closed on 2024-09-13 as scheduled. Berenice Straatman gave 27 minutes on 2026-05-02 and made one quantified claim, on order cycle time from release to pack-out, of 29 per cent. Punch items numbering 0 remained at Plaza Zaragoza when wms interface build and message mapping was signed on 2023-09-15. Dashiell Okonjo raised the complaint that reporting cannot be reconciled against the customer's own labour standard, and put the improvement in reduction in temporary labour headcount at peak at 25 per cent. Punch items numbering 6 remained at Plaza Zaragoza when punch-list closure review was signed on 2024-08-08.

Schedule 5.1 - Kestrel Pharma: acceptance certificates and amounts withheld

Site	Conditional acceptance date	Final acceptance date	Punch items at conditional	Punch items open	Withheld amount
Sant Boi (KES-01)	2023-06-14	2023-10-24	6	0	nil
Plaza Zaragoza (KES-02)	2024-06-07	not issued	10	3	$30,240

Metered usage against invoices at Kestrel Pharma

Metered volume at Kestrel Pharma exceeded entitlement in 7 of the 18 periods examined, and the excess is seasonal rather than structural, peaking in 2024-10 at 90,038 against an entitlement of 62,766. The invoice line follows the meter, twice excepted, both of which were traced to an entitlement figure keyed from a superseded order form. Credits were issued in several periods, 3 in total, and the reasons stated on those notes do not always match the reasons the site gave us. Reconciling August leaves Kestrel Pharma with a variance of $-154, no exception raised. Billing for October charged Kestrel Pharma $29,192 on a metered volume of 68,342, and the exception was no exception raised. Kestrel Pharma metered May at 59,156 picks against an entitlement of 62,766, and was invoiced $27,520. Billing for March charged Kestrel Pharma $27,520 on a metered volume of 48,957, and the exception was no exception raised. Consumption recorded for Kestrel Pharma in January ran to 53,798 picks, 0 of them above entitlement. Kestrel Pharma in

November shows entitlement of 62,766 against consumption of 61,642, recorded as no exception raised. Kestrel Pharma's ledger for November shows overage of 19,296 picks, credits of $0 and a variance of $74, no exception raised. Consumption recorded for Kestrel Pharma in February ran to 51,549 picks, 0 of them above entitlement. Consumption recorded for Kestrel Pharma in May ran to 71,971 picks, 9,205 of them above entitlement. Kestrel Pharma's position for March was settled as written off as a goodwill concession, on an invoice of $30,595. Console records for June at Kestrel Pharma show 69,094 picks, and the invoice followed at $29,418.

Reconciliation was performed period by period rather than on annual totals, because an annual view nets an overbilling in one month against an underbilling in another and hides both. Both over- and under-billing appear: the site was overbilled where entitlement was understated, and underbilled in a period where the console under-recorded picks during a firmware regression. The under-billing was news to both parties, which says something about the strength of the meter-to-invoice control. Kestrel Pharma's position for December was settled as resolved: meter reconciliation accepted by both parties, on an invoice of $27,520. Kestrel Pharma's ledger for November shows overage of 19,296 picks, credits of $0 and a variance of $74, no exception raised. Consumption recorded for Kestrel Pharma in March ran to 73,017 picks, 10,251 of them above entitlement. Kestrel Pharma used in February only 51,549 of an entitled 62,766, and no credit was sought in that cycle. Meter and invoice diverge in October at Kestrel Pharma by $-67, which the parties treat as no exception raised. Meter and invoice diverge in October at Kestrel Pharma by $-67, which the parties treat as no exception raised. Consumption recorded for Kestrel Pharma in November ran to 85,252 picks, 22,486 of them above entitlement. Kestrel Pharma metered June at 69,094 picks against an entitlement of 62,766, and was invoiced $29,418. Kestrel Pharma's ledger for October shows overage of 9,086 picks, credits of $0 and a variance of $-67, no exception raised. Kestrel Pharma metered October at 71,852 picks against an entitlement of 62,766, and was invoiced $30,245. Kestrel Pharma's position for February was settled as no exception raised, on an invoice of $27,520.

Anouk Verhelst treats the overage mechanic as the main commercial grievance and said plainly that the site cannot forecast a bill it cannot model. The definition of an entitled pick drives the dispute, since a re-pick after an exception counts against entitlement under the order form and does not count in the site's own operational reporting. Both readings are defensible on the drafting, which is a contract-quality observation as much as a customer-relationship one, and it has been flagged to the legal workstream with the clause reference. Kestrel Pharma in January shows entitlement of 62,766 against consumption of 53,798, recorded as no exception raised. Reconciling August leaves Kestrel Pharma with a variance of $-92, no exception raised. Consumption recorded for Kestrel Pharma in February ran to 51,549 picks, 0 of them above entitlement. Kestrel Pharma's position for April was settled as no exception raised, on an invoice of $27,520. Consumption recorded for Kestrel Pharma in August ran to 63,864 picks, 1,098 of them above entitlement. Kestrel Pharma was credited in March with $0, against an invoiced amount of $27,520. Kestrel Pharma carried overage in February of 0 picks, which the invoice reflects and the site disputes on definition rather than count. Kestrel Pharma's ledger for January shows overage of 29 picks, credits of $5,956 and a variance of $92, partially credited; the balance remains contested. Kestrel Pharma's ledger for October shows overage of 9,086 picks, credits of $0 and a variance of $-67, no exception raised. Kestrel Pharma used in September only 63,079 of an entitled 62,766, and no credit was sought in that cycle. Meter and invoice diverge in December at Kestrel Pharma by $-61, which the parties treat as no exception raised.

Outstanding requests and unresolved questions on Kestrel Pharma

Four requests remain outstanding with management on this account, and none of them is cosmetic. The supporting calculation has not arrived, the console meter definition of an entitled pick has not been confirmed in writing, the credit accrual for open disputes has not been quantified, and the amended order form referenced in correspondence has not been produced. Each has been asked for more than once. Billing for August charged Kestrel Pharma $27,770 on a metered volume of 63,602, and the exception was no exception raised. The site labour standard at Kestrel Pharma carries more weight than any summary, since it shows the baseline against which benefits are claimed. Consumption recorded for Kestrel Pharma in October ran to 90,038 picks, 27,272 of them above entitlement. Kestrel Pharma relies on the console meter extract for its own account of the position, and it shows the volume the company recorded. Kestrel Pharma in October shows entitlement of 62,766 against consumption of 68,342, recorded as no exception raised. The joint escalation minutes for Kestrel Pharma was produced on request and shows what was agreed when the relationship was under strain. Console records for April at Kestrel Pharma show 52,618 picks, and the invoice followed at $27,520. The support ticket

export at Kestrel Pharma carries more weight than any summary, since it shows how each incident was classified for severity. Overage in May at Kestrel Pharma came to 9,205 picks, entitlement having been fixed at signature. Kestrel Pharma was asked for the aged receivable listing precisely because it bears on how promptly this customer actually pays. Reconciling April leaves Kestrel Pharma with a variance of $31, no exception raised.

Greta Wallenborn raised a point that could not be tested at all within the timetable, namely whether the recurring theme at that site was disclosed to other prospects as a known limitation. Testing it would require access we do not have, and it is recorded because an investor may want it put to management directly rather than through the diligence team. We infer nothing from being unable to test it. Kestrel Pharma relies on the host interface message log for its own account of the position, and it shows how the interface behaved on receipt confirmations. Billing for October charged Kestrel Pharma $29,192 on a metered volume of 68,342, and the exception was no exception raised. The works council consultation note at Kestrel Pharma carries more weight than any summary, since it shows the labour constraints on further automation. Kestrel Pharma's position for March was settled as written off as a goodwill concession, on an invoice of $30,595. The support ticket export at Kestrel Pharma carries more weight than any summary, since it shows how each incident was classified for severity. Kestrel Pharma metered January at 62,795 picks against an entitlement of 62,766, and was invoiced $27,528. Kestrel Pharma was asked for the pilot charter precisely because it bears on what the parties agreed the pilot had to prove. Kestrel Pharma carried overage in September of 0 picks, which the invoice reflects and the site disputes on definition rather than count. The aged receivable listing sits on the Kestrel Pharma file and is the source for how promptly this customer actually pays. Kestrel Pharma in October shows entitlement of 62,766 against consumption of 71,852, recorded as no exception raised. The host interface message log in the Kestrel Pharma bundle is cited throughout this review as the evidence for how the interface behaved on receipt confirmations.

Timing is the practical risk on this file rather than any single unresolved item, because the notice date of 2026-04-01 falls before the point at which these requests would realistically be answered. A buyer should decide what it needs before that date, and on our reading only the entitlement definition and the credit accrual would change a valuation view. The remaining two are matters of comfort, and are listed so that nothing appears to have been quietly dropped. The aged receivable listing in the Kestrel Pharma bundle is cited throughout this review as the evidence for how promptly this customer actually pays. Billing for May charged Kestrel Pharma $27,520 on a metered volume of 59,156, and the exception was closed with no adjustment after evidence review. The aged receivable listing sits on the Kestrel Pharma file and is the source for how promptly this customer actually pays. Meter and invoice diverge in October at Kestrel Pharma by $-67, which the parties treat as no exception raised. The published reference case study in the Kestrel Pharma bundle is cited throughout this review as the evidence for what was claimed to the market. Reconciling January leaves Kestrel Pharma with a variance of $183, no exception raised. The site labour standard at Kestrel Pharma carries more weight than any summary, since it shows the baseline against which benefits are claimed. Kestrel Pharma in November shows entitlement of 62,766 against consumption of 82,062, recorded as no exception raised. The joint escalation minutes obtained from Kestrel Pharma was read in full rather than in extract, since it shows what was agreed when the relationship was under strain. Meter and invoice diverge in September at Kestrel Pharma by $-68, which the parties treat as no exception raised. The executed acceptance test protocol at Kestrel Pharma carries more weight than any summary, since it shows the tested criteria and the signatures on them.

Milestone and slip evidence: Kestrel Pharma

Anouk Verhelst puts on the record that the pattern of slippage is front-loaded: later gates recovered some time, and the schedule below is the evidence for it, drawn from 8 records rather than from a summary prepared for us. Dr. Ferran Casasnovas goes further: the interface build is the gate that most often absorbed the delay. Diligence on Kestrel Pharma is drawn at this grain on purpose, because an account-level average at Kestrel Pharma conceals the site-to-site variation that decides how this relationship behaves at renewal. Where the plan assumed a clean run, Plaza Zaragoza instead took 72 extra days over acceptance test protocol execution, for customer master-data cleanup for slot dimensions ran long. Timing at Sant Boi held for final acceptance certificate, which closed on 2023-10-24 as scheduled. Timing at Plaza Zaragoza held for final acceptance certificate, which closed on 2024-09-13 as scheduled. Sant Boi (KES-01) met final acceptance certificate on 2023-10-24 without a variation to plan. Nothing needed explaining at Sant Boi for pilot cell go-live, which was reached on 2023-03-01 as planned. The slip of 65 days at Sant Boi on network and radio-frequency readiness review is the one the customer raises first, and it traces to labour agreement consultation with the site works council. Although

Sant Boi treats it as outside anyone's control, punch-list closure review still moved to 2023-09-10 for host WMS upgrade re-sequenced the interface build. Plaza Zaragoza (KES-02) shows conditional acceptance certificate completed on 2024-06-07, status conditional acceptance issued, with nothing carried forward on the schedule.

The Sant Boi team is qualified in two respects: causes are as recorded contemporaneously; where records conflict the customer version is shown, and the tracker omits internal re-planning that never reached the customer. The Kestrel Pharma estate also observed, when the schedule was put to the customer, that slip causes cluster on the customer side of the boundary at most sites, which is consistent with what the documents show without being proved by them. This Kestrel Pharma review accepted the schedule as a fair summary of the underlying records, subject to those qualifications and to the open items listed in this review. The slip of 50 days at Plaza Zaragoza on punch-list closure review is the one the customer raises first, and it traces to labour agreement consultation with the site works council. Once Sant Boi had dealt with customer middleware team could not release the interface test window, the site completed acceptance test protocol execution on 2023-05-19. Plaza Zaragoza (KES-02) met conditional acceptance certificate on 2024-06-07 without a variation to plan. Plaza Zaragoza (KES-02) shows conditional acceptance certificate completed on 2024-06-07, status conditional acceptance issued, with nothing carried forward on the schedule. Where the plan assumed a clean run, Sant Boi instead took 49 extra days over acceptance test protocol execution, for customer middleware team could not release the interface test window. Plaza Zaragoza (KES-02) shows conditional acceptance certificate completed on 2024-06-07, status conditional acceptance issued, with nothing carried forward on the schedule. Plaza Zaragoza (KES-02) reached pilot cell go-live on 2024-02-11, status closed, with 0 punch items open at that gate. Plaza Zaragoza logged integration test in the customer sandbox on 2023-11-11; the customer attributes the slip to customer master-data cleanup for slot dimensions ran long.

Schedule 5.2 - Kestrel Pharma: acceptance milestone tracker with slip causes

Site	Milestone	Planned	Actual	Slip (days)	Slip cause	Acceptance status
Sant Boi (KES-01)	Site survey and slotting scan	2022-08-10	2022-08-10	0	no slip: milestone met inside the planned window	closed
Sant Boi (KES-01)	Network and radio-frequency readiness review	2022-09-16	2022-11-20	65	labour agreement consultation with the site works council	closed
Sant Boi (KES-01)	WMS interface build and message mapping	2022-12-15	2022-12-27	12	charger electrical permit issued late by the local authority	closed
Sant Boi (KES-01)	Integration test in the customer sandbox	2023-01-17	2023-01-31	14	validation protocol rewritten after a quality-assurance review	closed
Sant Boi (KES-01)	Pilot cell go-live	2023-03-01	2023-03-01	0	no slip: milestone met inside the planned window	closed
Sant Boi (KES-01)	Acceptance test protocol execution	2023-03-31	2023-05-19	49	customer middleware team could not release the interface test window	closed
Sant Boi (KES-01)	Conditional acceptance certificate	2023-06-09	2023-06-14	5	facility readiness: mezzanine steel and charger bays incomplete	conditional acceptance issued
Sant Boi (KES-01)	Punch-list closure review	2023-07-04	2023-09-10	68	host WMS upgrade re-sequenced the interface build	punch list open

Pilot scope and success criteria at Kestrel Pharma

The pilot at Sant Boi ran a single zone rather than a whole building, which is the right way to de-risk a deployment and the wrong way to prove a business case. Criteria were written into a charter document, and that charter is dated before go-live on 2023-03-01, which is better governance than several accounts in this pack can show. Not every criterion was

quantified, and predictably those are the two the parties later argued about. Attainment figures from Sant Boi show 98 per cent on response against 84 per cent on resolution. Plaza Zaragoza lost time because supplier lead time on the conveyor tie-in guard package, and site survey and slotting scan moved to 2023-02-24 from a planned 2022-12-26. Recurring at Sant Boi through that quarter was interface message backlog after a host restart, across 23 tickets. The slip of 63 days at Plaza Zaragoza on pilot cell go-live is the one the customer raises first, and it traces to customer IT change-freeze extended by two sprint cycles. Although the console reported no outage at Sant Boi, the site still raised 25 tickets in 2023-Q3. Sant Boi logged wms interface build and message mapping on 2022-12-27; the customer attributes the slip to charger electrical permit issued late by the local authority. Plaza Zaragoza keeps returning to one theme, lift-plate calibration drift, and it survived into 2023-Q1. Plaza Zaragoza (KES-02) met conditional acceptance certificate on 2024-06-07 without a variation to plan. Plaza Zaragoza (KES-02) met response targets 88 per cent of the time, and resolution targets rather less often. Sant Boi (KES-01) met site survey and slotting scan on 2022-08-10 without a variation to plan. Ticket volume reached 16 at Plaza Zaragoza in 2024-Q3, of which 0 were classified at the highest severity.

Measured outcomes against target are set out below, and the mixed result is more credible than a clean sweep would be. Availability and throughput held, while recovery time from traffic deadlock and interface message success were the criteria where the pilot did not reach the stated target. Measurement source matters as much as the number, because a figure from the fleet console and a figure from the host system are not the same evidence even when they agree. Plaza Zaragoza (KES-02) met final acceptance certificate on 2024-09-13 without a variation to plan. Plaza Zaragoza (KES-02) met response targets 84 per cent of the time, and resolution targets rather less often. Turning to Plaza Zaragoza, the tracker puts integration test in the customer sandbox at 2023-11-11 where the plan said 2023-10-24, the gap being customer master-data cleanup for slot dimensions ran long. Sant Boi triggered credits of $720 following resolution attainment of 84 per cent. Acceptance slipped 68 days at Sant Boi before punch-list closure review was recorded as punch list open. Sant Boi reached 98 per cent on response and 84 per cent on resolution, and credits of $720 followed. Although Sant Boi treats it as outside anyone's control, wms interface build and message mapping still moved to 2022-12-27 for charger electrical permit issued late by the local authority. Plaza Zaragoza (KES-02) met response targets 85 per cent of the time, and resolution targets rather less often. Plaza Zaragoza (KES-02) reached network and radio-frequency readiness review on 2023-05-30, status closed, with 0 punch items open at that gate. Recurring at Sant Boi through that quarter was pick confirmation duplicated in the host WMS, across 18 tickets. Sant Boi (KES-01) met pilot cell go-live on 2023-03-01 without a variation to plan.

Dr. Ferran Casasnovas regarded the pilot as sufficient to justify the rollout and said so without hedging, which is the commercially relevant fact whatever the criteria table shows. Commercially the pilot achieved what it needed to, and the unmet criteria became punch items rather than reasons to stop. The deferral resurfaces at renewal, visible in this account as an argument at acceptance about what had actually been promised. Sant Boi (KES-01) met site survey and slotting scan on 2022-08-10 without a variation to plan. Reviewing the 2024-Q4 quarter, Sant Boi shows 14 tickets and a recurring theme of interface message backlog after a host restart. Plaza Zaragoza logged network and radio-frequency readiness review on 2023-05-30; the customer attributes the slip to customer middleware team could not release the interface test window. Reviewing the 2023-Q1 quarter, Plaza Zaragoza shows 19 tickets and a recurring theme of lift-plate calibration drift. Plaza Zaragoza (KES-02) reached site survey and slotting scan on 2023-02-24, status closed, with 0 punch items open at that gate. Sant Boi keeps returning to one theme, fleet console latency during shift change, and it survived into 2025-Q1. Sant Boi (KES-01) reached acceptance test protocol execution on 2023-05-19, status closed, with 0 punch items open at that gate. Sant Boi (KES-01) met response targets 91 per cent of the time, and resolution targets rather less often. Where the plan assumed a clean run, Sant Boi instead took 65 extra days over network and radio-frequency readiness review, for labour agreement consultation with the site works council. Recurring at Plaza Zaragoza through that quarter was pick confirmation duplicated in the host WMS, across 13 tickets. Certificates held at Plaza Zaragoza put site survey and slotting scan on 2023-02-24 and explain the 60 days by supplier lead time on the conveyor tie-in guard package.

Kestrel Pharma - reference-call record

The Plaza Zaragoza operation shows that no interviewee refused to speak, which is unusual for a base of this size, and the schedule below is the evidence for it, drawn from 3 records rather than from a summary prepared for us. Kestrel Pharma produces one more finding: the praise offered is operational and the criticism is commercial in almost every call.

The Sant Boi team is drawn at this grain on purpose, because an account-level average at Kestrel Pharma conceals the site-to-site variation that decides how this relationship behaves at renewal. Whatever the company's materials claim, Leocadia Ferrante described the position on order cycle time from release to pack-out as partly substantiated: one of the two sites supports the claim. Nkechi Adaeze-Fowler treats the relationship as one where implementation engineers were candid about what the pilot would not prove, and the dock-to-stock hours on inbound receipts figure offered was 20 per cent. Berenice Straatman, introduced by Kestrel Pharma as a willing reference, nonetheless complained that on-site engineering days were consumed by defects rather than tuning. Praise from Nkechi Adaeze-Fowler took the form that implementation engineers were candid about what the pilot would not prove, and it came without prompting. Leocadia Ferrante treats the relationship as one where the fleet-orchestration console gave supervisors usable congestion data, and the order cycle time from release to pack-out figure offered was 27 per cent. Asked what worked, Greta Wallenborn said that throughput held up during the promotional peak without extra labour; asked what did not, the answer was that the roadmap commitments given during the sales cycle slipped a year. Notes taken on 2026-02-09 record Leocadia Ferrante praising that the fleet-orchestration console gave supervisors usable congestion data beside the complaint that on-site engineering days were consumed by defects rather than tuning. Praise from Nkechi Adaeze-Fowler took the form that implementation engineers were candid about what the pilot would not prove, and it came without prompting.

Kestrel Pharma's file should be read with two qualifications: one interviewee asked that a comment be treated as background and it is excluded, and re-buy answers were given without any price being put on the table. The Kestrel Pharma workpaper also observed, when the schedule was put to the customer, that the strongest advocates are the people who use the fleet console daily, which is consistent with what the documents show without being proved by them. Anouk Verhelst accepted the schedule as a fair summary of the underlying records, subject to those qualifications and to the open items listed in this review. Whatever the company's materials claim, Emrys Pengelly described the position on reduction in temporary labour headcount at peak as substantiated: figures tie to the customer's own weekly operations pack. Notes taken on 2026-04-10 record Dashiell Okonjo praising that implementation engineers were candid about what the pilot would not prove beside the complaint that reporting cannot be reconciled against the customer's own labour standard. Nkechi Adaeze-Fowler treats the relationship as one where implementation engineers were candid about what the pilot would not prove, and the dock-to-stock hours on inbound receipts figure offered was 20 per cent. Whatever the company's materials claim, Leocadia Ferrante described the position on order cycle time from release to pack-out as partly substantiated: one of the two sites supports the claim. Praise from Berenice Straatman took the form that firmware rollbacks were quick when a release misbehaved, and it came without prompting. Emrys Pengelly raised the complaint that traffic management degrades when aisle congestion exceeds design load, and put the improvement in reduction in temporary labour headcount at peak at 27 per cent. Ingrid Szymborska treats the relationship as one where the fleet-orchestration console gave supervisors usable congestion data, and the units picked per operator hour figure offered was 18 per cent. Talking to Ferdinand Achterberg-Lo for 55 minutes by on-site walkthrough produced the claim that cost per outbound line improved by 22 per cent, not substantiated: the interviewee described it as an impression.

Schedule 5.3 - Kestrel Pharma: reference-call log and re-buy intent

Interviewee	Role	Call date	Would re-buy	Praised	Criticised	Claim substantiated
Rustam Yesilova	IT applications manager for the host WMS	2026-03-14	yes, and has already sponsored an expansion	firmware rollbacks were quick when a release misbehaved	release notes arrive late and rarely say what changed operationally	unverifiable
Zohra Benkirane	inventory control supervisor	2026-03-08	no comment; referred the question to procurement	robots tolerated the mixed pallet and tote presentations on the floor	battery swap procedure is awkward for the night crew	partly substantiated
Ferdinand Achterberg-Lo	vice president of distribution	2026-04-04	yes, but only for high-velocity zones	safety record was clean across two shifts and no lost-time incidents	the roadmap commitments given during the sales cycle slipped a year	not substantiated

Concentration sensitivity: Kestrel Pharma

Fieldwork at Kestrel Pharma shows that no scenario in the run produces a single-customer dependency, and the schedule below is the evidence for it, drawn from 3 records rather than from a summary prepared for us. The Kestrel Pharma bundle supports a related reading: residual share moves slowly, which is the argument against a fragility narrative. Anouk Verhelst settled on this level of detail for a reason, because an account-level average at Kestrel Pharma conceals the site-to-site variation that decides how this relationship behaves at renewal. Reviewing the 2024-Q1 quarter, Sant Boi shows 7 tickets and a recurring theme of fleet console latency during shift change. Looking across at Halcyon Medical Supply, the renewal structure reads as auto-renew annually; expansion order signed in the third year. Sant Boi (KES-01) shows fleet console latency during shift change as the complaint theme, on 21 tickets in 2023-Q2. Crestmoor Office Products carries an ACV band of 0.8m to 1.0m on net thirty, and the risk trigger identified there is competitive bid issued to three automation vendors. Plaza Zaragoza triggered credits of $445 following resolution attainment of 86 per cent. Looking across at Crestmoor Office Products, the renewal structure reads as renewed once, then converted to month-to-month. Plaza Zaragoza (KES-02) is where traffic deadlock at an aisle intersection recurs, and the quarter to 2024-Q3 shows 0 severity-one events. Looking across at Crestmoor Office Products, the renewal structure reads as renewed once, then converted to month-to-month.

Anouk Verhelst's team must be read subject to two limits: shares are as at fieldwork date and move with every renewal, and support cost is assumed unchanged, which overstates the loss slightly. The Plaza Zaragoza operation also observed, when the schedule was put to the customer, that the scenarios assume no offsetting expansion, which is deliberately pessimistic, which is consistent with what the documents show without being proved by them. Kestrel Pharma accepted the schedule as a fair summary of the underlying records, subject to those qualifications and to the open items listed in this review. Lindenvale Grocery carries an ACV band of 0.8m to 1.0m on net forty-five, and the risk trigger identified there is no trigger identified; renewal treated as routine. Recurring at Sant Boi through that quarter was pick confirmation duplicated in the host WMS, across 18 tickets. Ossuary Ridge Beverage pays on net thirty, a longer cycle than most of the base and one negotiated at signature. Ticket volume reached 18 at Plaza Zaragoza in 2024-Q1, of which 1 were classified at the highest severity. Comparison with Northriding Automotive is instructive, since it prices on per-robot subscription with a bonded consignment module and pays on net forty-five. Sant Boi keeps returning to one theme, interface message backlog after a host restart, and it survived into 2024-Q2. Ossuary Ridge Beverage is described internally as churned, cited case-picking mix and slotting constraints, and the movement expected at renewal is expansion signed for a second wave of robots. Sant Boi produced 0 severity-one events in 2023-Q4, and resolution attainment of 96 per cent triggered credits of $0.

Schedule 5.4 - concentration sensitivity run for the Kestrel Pharma review

Scenario	Accounts lost	Share removed (%)	Residual top-account share (%)	Comment
loss of the top 1 account(s)	Thornquist Parcel	14.5	12.0	assumes support headcount is not reduced
loss of the top 2 account(s)	Thornquist Parcel; Arborlight Home	26.5	8.8	assumes the fleet is redeployed within nine months
loss of the top 3 account(s)	Thornquist Parcel; Arborlight Home; Northriding Automotive	35.3	8.4	assumes the notice window is used in full

Buying-centre coverage at Kestrel Pharma

The Kestrel Pharma estate shows that coverage of the buying centre is good on operations and thin on finance, and the schedule below is the evidence for it, drawn from 5 records rather than from a summary prepared for us. This Kestrel Pharma review supports a related reading: several daily users of the fleet console have more influence on renewal than their titles suggest. The Kestrel Pharma bundle settled on this level of detail for a reason, because an account-level average at Kestrel Pharma conceals the site-to-site variation that decides how this relationship behaves at renewal. Plaza Zaragoza lost time because customer master-data cleanup for slot dimensions ran long, and acceptance test protocol execution moved to 2024-05-09 from a planned 2024-02-27. Talking to Ingrid Szymborska for 49 minutes by video call produced the claim that units picked per operator hour improved by 18 per cent, not substantiated: the baseline period predates the current network design. Sant Boi closed site survey and slotting scan on 2022-08-10 and the certificate

records 0 open items. Talking to Emrys Pengelly for 65 minutes by video call with a follow-up email produced the claim that reduction in temporary labour headcount at peak improved by 27 per cent, substantiated: figures tie to the customer's own weekly operations pack. Although Sant Boi treats it as outside anyone's control, wms interface build and message mapping still moved to 2022-12-27 for charger electrical permit issued late by the local authority. Dashiell Okonjo raised the complaint that reporting cannot be reconciled against the customer's own labour standard, and put the improvement in reduction in temporary labour headcount at peak at 25 per cent. Plaza Zaragoza logged network and radio-frequency readiness review on 2023-05-30; the customer attributes the slip to customer middleware team could not release the interface test window. Ferdinand Achterberg-Lo gave 55 minutes on 2026-04-04 and made one quantified claim, on cost per outbound line, of 22 per cent.

The Plaza Zaragoza building should be read with two qualifications: roles are as the contact described them and not as the customer's directory shows, and no attempt was made to reach contacts who had left the business. Diligence on Kestrel Pharma also observed, when the schedule was put to the customer, that one contact who declined to speak owns the host release calendar, which is consistent with what the documents show without being proved by them. The Sant Boi site accepted the schedule as a fair summary of the underlying records, subject to those qualifications and to the open items listed in this review. Plaza Zaragoza (KES-02) shows conditional acceptance certificate completed on 2024-06-07, status conditional acceptance issued, with nothing carried forward on the schedule. Whatever the company's materials claim, Emrys Pengelly described the position on reduction in temporary labour headcount at peak as substantiated: figures tie to the customer's own weekly operations pack. Where the plan assumed a clean run, Sant Boi instead took 65 extra days over network and radio-frequency readiness review, for labour agreement consultation with the site works council. Rustam Yesilova gave 35 minutes on 2026-03-14 and made one quantified claim, on cost per outbound line, of 24 per cent. Although Sant Boi treats it as outside anyone's control, integration test in the customer sandbox still moved to 2023-01-31 for validation protocol rewritten after a quality-assurance review. Zohra Benkirane treats the relationship as one where robots tolerated the mixed pallet and tote presentations on the floor, and the dock-to-stock hours on inbound receipts figure offered was 31 per cent. Certificates held at Plaza Zaragoza put network and radio-frequency readiness review on 2023-05-30 and explain the 68 days by customer middleware team could not release the interface test window. Ferdinand Achterberg-Lo raised the complaint that the roadmap commitments given during the sales cycle slipped a year, and put the improvement in cost per outbound line at 22 per cent.

Schedule 5.5 - Kestrel Pharma: relationship map and coverage of contacts

Contact	Role	Function	Interviewed	Influence on renewal
Anouk Verhelst	Qualified Procurement Lead	procurement	yes	primary decision maker
Dr. Ferran Casasnovas	Director of Distribution Quality	executive sponsor	yes	chairs the steering review
Rafferty Osgood-Blaine	inventory control supervisor	engineering	yes	owns the host WMS release calendar
Noor Al-Rashidi	shift superintendent, outbound	quality	no	influences renewal informally
Zohra Benkirane	warehouse systems manager	quality	no	no material influence identified

Related-party and affiliation screening in the Kestrel Pharma review

Affiliation screening was run across the customer base rather than only on the account under review, because a single affiliated customer changes how an investor reads a reference pack. Only one account is affiliated: Solstice Renewables Field Services is an affiliate of an existing shareholder, contracted on 2022-12-05 with an ACV band of 0.3m to 0.5m. Kestrel Pharma itself showed no affiliation on the register searches performed, and its procurement contact confirmed no ownership or advisory relationship. Progress at Sant Boi shows conditional acceptance certificate signed off on 2023-06-14 against 2023-06-09 as planned. Northriding Automotive pays on net forty-five, a longer cycle than most of the base and one negotiated at signature. At Sant Boi the gate for network and radio-frequency readiness review was planned for 2022-09-16 and closed on 2022-11-20, the delay being labour agreement consultation with the site works council. Crestmoor Office Products is described internally as lukewarm, structurally declining volumes, and the movement expected at renewal is downgrade under discussion to a single-shift tier. Turning to Sant Boi, the tracker puts integration test in the customer sandbox at 2023-01-31 where the plan said 2023-01-17, the gap being validation protocol rewritten after a quality-assurance review. Thornquist Parcel carries an ACV band of 3.2m to 3.7m on net thirty, monthly

in arrears, and the risk trigger identified there is sponsor departure removed the internal champion. Sant Boi closed site survey and slotting scan on 2022-08-10 and the certificate records 0 open items. Sablecreek Apparel is described internally as contracting, returns line automation withdrawn, and the movement expected at renewal is no movement; customer wants the punch list closed first. At Plaza Zaragoza the gate for conditional acceptance certificate closed on 2024-06-07 inside the planned window, and no cause needs recording. Ironbark Building Materials carries an ACV band of 0.7m to 0.9m on net sixty, and the risk trigger identified there is site consolidation programme will close one deployment. Plaza Zaragoza (KES-02) cleared punch-list closure review on 2024-08-08 against a plan of 2024-06-19, a difference of 50 days recorded against labour agreement consultation with the site works council.

Solstice Renewables was reviewed on its own terms to see whether the affiliation shows in the commercial substance, which is the question that matters rather than the label. Its pricing is softer than comparable accounts, and the order form contains a most-favoured-rate statement that no other reviewed contract carries. The implementation record is conventional, with slippage and punch items in line with unaffiliated sites, so the relationship is not a paper arrangement. Timing at Sant Boi held for site survey and slotting scan, which closed on 2022-08-10 as scheduled. Perpetua Ojukwu sponsors the Thornquist Parcel deployment, which covers 5 sites in regional parcel sortation and last-mile injection. Nothing needed explaining at Sant Boi for site survey and slotting scan, which was reached on 2022-08-10 as planned. Pennarth Industrial renews on 2027-09-01, and Juniper Halloran-Voss owns that conversation on the company side. Turning to Plaza Zaragoza, the tracker puts integration test in the customer sandbox at 2023-11-11 where the plan said 2023-10-24, the gap being customer master-data cleanup for slot dimensions ran long. Comparison with Arborlight Home is instructive, since it prices on hybrid: base subscription plus per-pick metering above entitlement and pays on net forty-five with a two percent early-payment discount. The slip of 60 days at Plaza Zaragoza on site survey and slotting scan is the one the customer raises first, and it traces to supplier lead time on the conveyor tie-in guard package. Northriding Automotive is described internally as warm, methodical, benchmarks every renewal, and the movement expected at renewal is no movement; customer wants the punch list closed first. Sant Boi (KES-01) shows final acceptance certificate completed on 2023-10-24, status final acceptance granted, with nothing carried forward on the schedule. Caldera Cold Chain carries an ACV band of 0.9m to 1.1m on net sixty, annual in advance, and the risk trigger identified there is budget reallocated to a conveyor retrofit. On the evidence from Plaza Zaragoza, wms interface build and message mapping slipped 63 days and the status now reads closed.

Two consequences follow, and only the second is significant. Removing it moves the base marginally, so a reader who prefers to strip related-party revenue out of a growth or retention statistic can do so without the picture changing. The most-favoured wording is the live issue, since a clause negotiated with an affiliate may constrain pricing to unaffiliated customers, and that question has been passed to the legal workstream with the document reference. Kwabena Asiedu-Nkrumah sponsors the Zephyrine Beauty Brands deployment, which covers 2 sites in cosmetics direct-to-consumer fulfilment. Acceptance slipped 49 days at Sant Boi before acceptance test protocol execution was recorded as closed. Vantageport Terminals is described internally as lukewarm, integration debt with a legacy terminal system, and the movement expected at renewal is no movement; customer wants the punch list closed first. At Plaza Zaragoza the gate for conditional acceptance certificate closed on 2024-06-07 inside the planned window, and no cause needs recording. Kwabena Asiedu-Nkrumah sponsors the Zephyrine Beauty Brands deployment, which covers 2 sites in cosmetics direct-to-consumer fulfilment. Once Sant Boi had dealt with labour agreement consultation with the site works council, the site completed network and radio-frequency readiness review on 2022-11-20. Halcyon Medical Supply pays on net forty-five, a longer cycle than most of the base and one negotiated at signature. Sant Boi closed final acceptance certificate on 2023-10-24 and the certificate records 0 open items. Northriding Automotive carries an ACV band of 1.9m to 2.3m on net forty-five, and the risk trigger identified there is procurement mandate to renegotiate every automation contract. Plaza Zaragoza (KES-02) reached acceptance test protocol execution on 2024-05-09, status closed, with 0 punch items open at that gate. Annegret Holzknecht runs procurement at Grindelwald Precision, where the executive sponsor is Matthias Ehrenwerth.

Punch-list evidence supporting the Kestrel Pharma review

Diligence on Kestrel Pharma records that punch items are concentrated at the gates closest to final acceptance, and the schedule below is the evidence for it, drawn from 3 records rather than from a summary prepared for us. The Sant Boi site carries a further observation: punch counts fell sharply once an on-site engineer was assigned. The Plaza Zaragoza

operation is drawn at this grain on purpose, because an account-level average at Kestrel Pharma conceals the site-to-site variation that decides how this relationship behaves at renewal. Kestrel Pharma let us check the conditional acceptance certificate against the customer's own copy, and it shows which items were carried forward as punch. Sant Boi (KES-01) met pilot cell go-live on 2023-03-01 without a variation to plan. Kestrel Pharma was asked for the aged receivable listing precisely because it bears on how promptly this customer actually pays. Turning to Sant Boi, the tracker puts acceptance test protocol execution at 2023-05-19 where the plan said 2023-03-31, the gap being customer middleware team could not release the interface test window. Kestrel Pharma relies on the console meter extract for its own account of the position, and it shows the volume the company recorded. Timing at Plaza Zaragoza held for final acceptance certificate, which closed on 2024-09-13 as scheduled. Kestrel Pharma was asked for the site labour standard precisely because it bears on the baseline against which benefits are claimed. Sant Boi lost time because validation protocol rewritten after a quality-assurance review, and integration test in the customer sandbox moved to 2023-01-31 from a planned 2023-01-17.

Kestrel Pharma management needs two caveats stated: closure evidence was sighted for some items and asserted for others, and the schedule shows items open at fieldwork date, not items ever raised. Fieldwork at Kestrel Pharma also observed, when the schedule was put to the customer, that the closure review is the step that consistently slipped without being escalated, which is consistent with what the documents show without being proved by them. The Kestrel Pharma bundle accepted the schedule as a fair summary of the underlying records, subject to those qualifications and to the open items listed in this review. On the evidence from Plaza Zaragoza, pilot cell go-live slipped 63 days and the status now reads closed. The site labour standard held by Kestrel Pharma is the document that decides the point, relied upon for the baseline against which benefits are claimed. Turning to Sant Boi, the tracker puts punch-list closure review at 2023-09-10 where the plan said 2023-07-04, the gap being host WMS upgrade re-sequenced the interface build. Kestrel Pharma relies on the console meter extract for its own account of the position, and it shows the volume the company recorded. Certificates held at Plaza Zaragoza put network and radio-frequency readiness review on 2023-05-30 and explain the 68 days by customer middleware team could not release the interface test window. The published reference case study in the Kestrel Pharma bundle is cited throughout this review as the evidence for what was claimed to the market. Acceptance slipped 68 days at Sant Boi before punch-list closure review was recorded as punch list open. Kestrel Pharma let us check the support ticket export against the customer's own copy, and it shows how each incident was classified for severity.

Schedule 5.6 - Kestrel Pharma: punch-list position at each acceptance gate

Site	Milestone	Actual completion	Open punch items	Status	Days beyond plan
Sant Boi (KES-01)	Conditional acceptance certificate	2023-06-14	6	conditional acceptance issued	5
Sant Boi (KES-01)	Punch-list closure review	2023-09-10	6	punch list open	68
Sant Boi (KES-01)	Final acceptance certificate	2023-10-24	0	final acceptance granted	0

Disputed invoices and service-level credits at Kestrel Pharma

Billing exceptions at this account number 3 across the period examined, of which 0 were still unresolved when fieldwork closed. Against account size the amounts are small, but the pattern is the point: the same exception type recurs, which means the control that should have caught it the first time did not change. Credits under the service schedule run separately and are triggered by resolution attainment rather than by billing accuracy. The joint escalation minutes for Kestrel Pharma was produced on request and shows what was agreed when the relationship was under strain. Credits reaching Kestrel Pharma in the July cycle came to $0, and the balance remains as no exception raised. The conditional acceptance certificate sits on the Kestrel Pharma file and is the source for which items were carried forward as punch. Billing for June charged Kestrel Pharma $27,520 on a metered volume of 53,664, and the exception was resolved: meter reconciliation accepted by both parties. The credit note sequence sits on the Kestrel Pharma file and is the source for what was conceded and in which period. Kestrel Pharma used in December only 61,961 of an entitled 62,766, and no credit was sought in that cycle. The renewal correspondence file at Kestrel Pharma carries more weight than any summary, since it shows what each party put in writing about intent. Kestrel Pharma used in September only 72,494 of an entitled 62,766, and no credit was sought in that cycle. The credit note sequence obtained from Kestrel Pharma was read in full rather than in extract, since it shows what was conceded and in which period. Billing for March charged Kestrel Pharma $27,520 on a metered volume of 48,957, and the exception was no exception raised. Kestrel Pharma was asked for the site labour standard precisely because it bears on the baseline against which benefits are claimed.

Dr. Ferran Casasnovas said the site had stopped raising small billing errors because the effort of the dispute exceeded the amount recovered, and that statement is consistent with the pattern in the ledger. Error frequency is higher than the dispute log shows, so the exception count in the schedule should be read as a floor rather than as a measure. We sampled periods to test the claim and found two unraised discrepancies in the three periods examined. Kestrel Pharma metered June at 62,556 picks against an entitlement of 62,766, and was invoiced $27,520. The works council consultation note at Kestrel Pharma carries more weight than any summary, since it shows the labour constraints on further automation. Kestrel Pharma in November shows entitlement of 62,766 against consumption of 61,642, recorded as no exception raised. The joint escalation minutes obtained from Kestrel Pharma was read in full rather than in extract, since it shows what was agreed when the relationship was under strain. Console records for April at Kestrel Pharma show 52,618 picks, and the invoice followed at $27,520. Kestrel Pharma let us check the credit note sequence against the customer's own copy, and it shows what was conceded and in which period. Kestrel Pharma's position for May was settled as no exception raised, on an invoice of $30,281. The published reference case study held by Kestrel Pharma is the document that decides the point, relied upon for what was claimed to the market. Console records for June at Kestrel Pharma show 62,556 picks, and the invoice followed at $27,520. The support ticket export sits on the Kestrel Pharma file and is the source for how each incident was classified for severity. Kestrel Pharma in August shows entitlement of 62,766 against consumption of 51,311, recorded as no exception raised.

Dispute handling on the company side is not documented in a single system, and evidence had to be assembled from credit notes, support tickets and the account executive's email. Scattered evidence is itself a weakness, because a buyer cannot size an accrued credit exposure from records that live in three places and reconcile to none of them. The point was accepted by management and described a consolidation project that had not started at the date of this review. Kestrel Pharma was asked for the renewal correspondence file precisely because it bears on what each party put in writing about intent. Console records for September at Kestrel Pharma show 51,572 picks, and the invoice followed at $27,520. The host interface message log at Kestrel Pharma carries more weight than any summary, since it shows how the interface behaved on receipt confirmations. Overage in October at Kestrel Pharma came to 27,272 picks, entitlement having been fixed at signature. The renewal correspondence file for Kestrel Pharma was produced on request and shows what each party put in writing about intent. Overage in July at Kestrel Pharma came to 0 picks, entitlement having been fixed at signature. Kestrel Pharma let us check the support ticket export against the customer's own copy, and it shows how each incident was classified for severity. Consumption recorded for Kestrel Pharma in January ran to 62,795 picks, 29 of them above entitlement. The console meter extract sits on the Kestrel Pharma file and is the source for the volume the company recorded. Consumption recorded for Kestrel Pharma in January ran to 62,795 picks, 29 of them above entitlement. Reading the renewal correspondence file for Kestrel Pharma is what establishes what each party put in writing about intent.

Churn, downgrades and win-back evidence around Kestrel Pharma

Ossuary Ridge Beverage is the clearest loss in the base, having let a 24-month contract expire without extension, and the stated reason is instructive rather than embarrassing: the case-picking mix at those two sites never suited a tote-based fleet. The loss reflects qualification rather than performance, and it bears on how much weight an investor should give the company's win rate. Kestrel Pharma sits at the opposite end of that spectrum on fit, which is part of why it was selected for this file. Grindelwald Precision sits in precision tooling and metrology equipment on per-robot subscription with an on-site engineer allocation, with renewal falling on 2027-08-08 and notice due by 2027-05-10. Sant Boi produced 1 severity-one events in 2025-Q1, and resolution attainment of 77 per cent triggered credits of $2,062. Grindelwald Precision pays on net thirty, a longer cycle than most of the base and one negotiated at signature. Reviewing the 2025-Q1 quarter, Plaza Zaragoza shows 9 tickets and a recurring theme of lift-plate calibration drift. Sablecreek Apparel is described internally as contracting, returns line automation withdrawn, and the movement expected at renewal is no movement; customer wants the punch list closed first. Although the console reported no outage at Sant Boi, the site still raised 25 tickets in 2023-Q3. Ossuary Ridge Beverage is banded at nil - already lapsed on renewal, the trigger being unresolved severity-one recurrence in the freezer aisles. Plaza Zaragoza produced 2 severity-one events in 2023-Q4, and resolution attainment of 78 per cent triggered credits of $5,857. Ignatius Wrenfield sponsors the Sablecreek Apparel deployment, which covers 3 sites in apparel wholesale and returns processing. Attainment figures from Sant Boi show 86

per cent on response against 77 per cent on resolution. Among the peer accounts it is Solstice Renewables where labour agreement restricts further automation at the site.

Sablecreek Apparel shows the quieter pattern, a partial non-renewal in which the returns line was withdrawn while two sites continued, and the site now shows a zero-robot entry that the company's site count still includes. Including that site overstates the estate, and the same treatment appears in one other account, so the aggregate site figure in the company's materials needs a footnote rather than a correction. Win-back activity is thin across the lapsed accounts, amounting in two cases to a proposal issued and never followed up. Plaza Zaragoza (KES-02) is where wireless roaming loss in the cold zone recurs, and the quarter to 2024-Q1 shows 1 severity-one events. Comparison with Lindenvale Grocery is instructive, since it prices on per-robot subscription, cooperative member pricing schedule and pays on net forty-five. Attainment figures from Plaza Zaragoza show 93 per cent on response against 96 per cent on resolution. Set beside Solstice Renewables, which runs 2 sites at 40 robots, this account is the better documented of the two. Ticket volume reached 20 at Sant Boi in 2023-Q4, of which 0 were classified at the highest severity. Whatever this account decides, Brackenhill Pet Nutrition reaches its own renewal on 2027-01-18 with expansion signed for a second wave of robots. Severity being classified by the vendor, Plaza Zaragoza recorded only 1 events at the top severity in 2024-Q4. Grindelwald Precision carries an ACV band of 0.3m to 0.4m on net thirty, and the risk trigger identified there is labour agreement restricts further automation at the site. Ticket volume reached 20 at Sant Boi in 2023-Q4, of which 0 were classified at the highest severity. Nerida Fitzhardinge runs procurement at Ironbark Building Materials, where the executive sponsor is Obadiah Kirrimuir. Sant Boi (KES-01) logged 14 tickets in 2024-Q4 including 1 at severity one, with resolution attainment of 63 per cent.

Stated reasons for loss were taken from customer correspondence where it exists and from the account owner's note where it does not, and the two sources differ in tone more than in substance. Customers name fit and commercial terms, whereas the internal notes lean toward customer readiness and internal politics at the account, which is the direction one would expect from a vendor record. Displacement by a rival is absent from the record, which is a genuinely favourable feature of the loss profile and is stated as such. Brackenhill Pet Nutrition deploys 116 robots across 3 sites and is banded at 1.1m to 1.3m. Plaza Zaragoza (KES-02) met response targets 98 per cent of the time, and resolution targets rather less often. Vantageport Terminals is described internally as lukewarm, integration debt with a legacy terminal system, and the movement expected at renewal is no movement; customer wants the punch list closed first. Sant Boi reached 98 per cent on response and 84 per cent on resolution, and credits of $720 followed. Lindenvale Grocery carries an ACV band of 0.8m to 1.0m on net forty-five, and the risk trigger identified there is no trigger identified; renewal treated as routine. Severity being classified by the vendor, Sant Boi recorded only 1 events at the top severity in 2025-Q1. Lindenvale Grocery began on 2023-02-14 and its structure is described as auto-renew annually, board approval required for expansion. Recurring at Plaza Zaragoza through that quarter was wireless roaming loss in the cold zone, across 18 tickets. Whatever this account decides, Arborlight Home reaches its own renewal on 2026-11-22 with expansion signed for a second wave of robots. Sant Boi reached 86 per cent on response and 63 per cent on resolution, and credits of $7,019 followed. Thornquist Parcel carries an ACV band of 3.2m to 3.7m on net thirty, monthly in arrears, and the risk trigger identified there is sponsor departure removed the internal champion.

Said, shown and reported: how the Kestrel Pharma evidence was handled

Three categories of statement are kept apart throughout this file, and the separation is not pedantry: what a customer said, what a document shows, and what the company reported are different kinds of evidence with different reliability. We attribute each statement to its source, documents are cited by name and date, and management representations are labelled as such rather than absorbed into narrative. Where all three align we stop testing. Reading the published reference case study for Kestrel Pharma is what establishes what was claimed to the market. Dashiell Okonjo raised the complaint that reporting cannot be reconciled against the customer's own labour standard, and put the improvement in reduction in temporary labour headcount at peak at 25 per cent. The published reference case study held by Kestrel Pharma is the document that decides the point, relied upon for what was claimed to the market. Whatever the company's materials claim, Rustam Yesilova described the position on cost per outbound line as unverifiable: the customer declined to release underlying data. Kestrel Pharma let us check the joint escalation minutes against the customer's own copy, and it shows what was agreed when the relationship was under strain. Notes taken on 2026-04-10 record Dashiell Okonjo praising that implementation engineers were candid about what the pilot would not prove beside

the complaint that reporting cannot be reconciled against the customer's own labour standard. The credit note sequence held by Kestrel Pharma is the document that decides the point, relied upon for what was conceded and in which period. Greta Wallenborn was reached by telephone and gave a re-buy answer of probably, with a shorter initial term, which sits oddly beside the praise that throughput held up during the promotional peak without extra labour. The site labour standard held by Kestrel Pharma is the document that decides the point, relied upon for the baseline against which benefits are claimed. Ingrid Szymborska raised the complaint that integration change requests are quoted at professional-services rates, and put the improvement in units picked per operator hour at 18 per cent. The site labour standard held by Kestrel Pharma is the document that decides the point, relied upon for the baseline against which benefits are claimed.

Disagreement is the useful case, and it was resolved in favour of the document only where the document is contemporaneous and unambiguous. Otherwise the disagreement is preserved, because a diligence file that resolves every conflict has usually resolved them by preferring whichever source was easiest to obtain. Anouk Verhelst and the company's account owner disagree on at least two matters of fact in this account, and both versions appear in the comparison schedule with the documentary position beside them. The pilot charter at Kestrel Pharma carries more weight than any summary, since it shows what the parties agreed the pilot had to prove. Nkechi Adaeze-Fowler treats the relationship as one where implementation engineers were candid about what the pilot would not prove, and the dock-to-stock hours on inbound receipts figure offered was 20 per cent. The conditional acceptance certificate held by Kestrel Pharma is the document that decides the point, relied upon for which items were carried forward as punch. Leocadia Ferrante treats the relationship as one where the fleet-orchestration console gave supervisors usable congestion data, and the order cycle time from release to pack-out figure offered was 27 per cent. Kestrel Pharma was asked for the pilot charter precisely because it bears on what the parties agreed the pilot had to prove. Berenice Straatman treats the relationship as one where firmware rollbacks were quick when a release misbehaved, and the order cycle time from release to pack-out figure offered was 29 per cent. Kestrel Pharma relies on the console meter extract for its own account of the position, and it shows the volume the company recorded. Leocadia Ferrante raised the complaint that on-site engineering days were consumed by defects rather than tuning, and put the improvement in order cycle time from release to pack-out at 27 per cent. Kestrel Pharma was asked for the pilot charter precisely because it bears on what the parties agreed the pilot had to prove. Whatever the company's materials claim, Leocadia Ferrante described the position on order cycle time from release to pack-out as partly substantiated: one of the two sites supports the claim. The host interface message log obtained from Kestrel Pharma was read in full rather than in extract, since it shows how the interface behaved on receipt confirmations.

Reliance is stated for every source used, since an investor reading this file needs to know which conclusions would move if one document turned out to be unreliable. Two sources were not relied upon at all, in both cases because provenance could not be established: an undated extract and a summary prepared for us rather than in the ordinary course. We discount material produced specifically for us, and that is a general principle rather than a comment on anyone's good faith. Talking to Ferdinand Achterberg-Lo for 55 minutes by on-site walkthrough produced the claim that cost per outbound line improved by 22 per cent, not substantiated: the interviewee described it as an impression. Kestrel Pharma let us check the console meter extract against the customer's own copy, and it shows the volume the company recorded. Zohra Benkirane treats the relationship as one where robots tolerated the mixed pallet and tote presentations on the floor, and the dock-to-stock hours on inbound receipts figure offered was 31 per cent. The joint escalation minutes in the Kestrel Pharma bundle is cited throughout this review as the evidence for what was agreed when the relationship was under strain. Rustam Yesilova, the IT applications manager for the host WMS, spoke on 2026-03-14 and praised that firmware rollbacks were quick when a release misbehaved, answering the re-buy question with yes, and has already sponsored an expansion. The conditional acceptance certificate held by Kestrel Pharma is the document that decides the point, relied upon for which items were carried forward as punch. Rustam Yesilova gave 35 minutes on 2026-03-14 and made one quantified claim, on cost per outbound line, of 24 per cent. The support ticket export at Kestrel Pharma carries more weight than any summary, since it shows how each incident was classified for severity. Nkechi Adaeze-Fowler answered on re-buy with yes, and has already sponsored an expansion and would not be drawn further on price or on term. Kestrel Pharma was asked for the amended order form precisely because it bears on nothing, because it was never produced. Ingrid Szymborska treats the relationship as one where the fleet-orchestration console gave supervisors usable congestion data, and the units picked per operator hour figure offered was 18 per cent.
