FINANCIAL DILIGENCE SUPPORT - RECORD 002

Helioscope Robotics, Inc. - diligence file reference FINANCE_SUPPORT-002

1. What was reviewed, from which systems, and on what basis

The reviewer records the boundaries of the work at the front of the file so that the reader can see what has not been done as clearly as what has. On the evidence,, management represented that installation activity alone does not create a state filing obligation, relying on an adviser's opinion whose scope has not yet been compared with the states involved. On this point,, segregation between preparer and approver was not enforced until the November 2024 workflow change, and self-approved entries appear on both sides of that date.

In review,, pro forma items are separated from normalizations so that a reader can adopt one class without accepting the other. On the papers,, no procedures were performed on income taxes beyond identifying the exposures listed, and no view is expressed on the recoverability of any deferred tax balance. On the merits,, approver fields are blank on a subset of journal entries, which prevents any conclusion on the operation of the journal approval control during the affected periods. HC-2162 (Zephyr Retail Logistics) runs 42 months from 2025-06-12. On the balance,, four obligations including a hosted analytics module sold as an add-on with its own renewal cycle. Under Zephyr Retail Logistics, the direction of this item is unfavourable to the seller and it is reported on the same basis as the favourable items. Zephyr Retail Logistics carries contracted hardware of $2,064,800, annual subscription value of $998,400 and a deployment fee of $286,000 across the contracted term. On Zephyr Retail Logistics, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file. The amendment was accounted for prospectively; the reviewer tested whether the remaining goods and services were distinct and concluded prospective treatment is supportable.

On testing,, where an exception is identified, the reviewer states the population, the value tested, the coverage achieved and the projected effect before proposing any adjustment. By reference,, no financial statement for any period in scope has been audited; FY2024 and FY2025 were subject to a review engagement and the 2026 stub has had no external involvement at all. Taken alone,, interim balances at 2026-06-30 have not been subject to a physical inventory count observed by the reviewer; the June count sheets were requested and only partially provided. Per the index, Umberland Freight contracted under HC-2139 on 2026-03-13. On the balance,, a retrofit contract where existing customer equipment is integrated, so the hardware element is smaller and the services element larger than the population average. No amendments; the contract includes a customer-favourable acceptance test that delayed transfer by five weeks. Commercially Umberland Freight carries contracted hardware of $618,200, annual subscription value of $342,700 and a deployment fee of $92,000 over 24 months. For Umberland Freight, the reviewer left the amount unchanged after review but strengthened the evidence reference. Under Umberland Freight, the reviewer confirmed that the same item does not also appear on the net debt schedule.

In the event,, management prepares monthly reporting on a basis that differs from the statutory ledger in three respects, each of which is identified and removed before any analysis begins. On the papers,, management represented that no undisclosed related-party arrangements exist beyond the sublease and the management fee identified in the ledger. On reperformance,, management represented that all engagement letters for adviser fees exist, but two invoices remain unsupported after two requests. On the balance, Harborline Systems contracted under HC-2081 on 2025-03-08. Per the register,, a proof-of-concept converted to a production contract, with the original pilot fee credited against the first production invoice. On Harborline Systems, the item was traced from the summary schedule through the sub-ledger to the source document. Commercially Harborline Systems carries contracted hardware of $486,900, annual subscription value of $264,000 and a deployment fee of $74,500 over 18 months. For Harborline Systems, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected. Under Harborline Systems, the reviewer compared the item with the equivalent balance in the prior period before reaching a view.

2. Identifying obligations in the subscription, hardware and services model

Under FASB ASC Topic 606 the hardware, subscription and deployment elements can be separate obligations, and the reviewer tested that conclusion contract by contract. On a second read,, because no audited financial statements exist for any period in scope, every opening balance rests on management's own records and on the review engagement's

limited procedures. Taken alone,, approver fields are blank on a subset of journal entries, which prevents any conclusion on the operation of the journal approval control during the affected periods.

Per the index, the file for HC-2156 with Yarrow Distribution Partners, signed 2026-06-04 for 36 months and carrying contracted hardware of $1,582,300, annual subscription value of $786,200 and a deployment fee of $214,500. On the record,, signed within the final month of the review period, with no revenue recognized by the cut-off and a deployment fee invoiced in advance. No amendments; the advance invoice creates a deferred revenue balance that was traced into the closing rollforward. Because no performance had occurred, the entire invoice should sit in deferred revenue; testing confirmed it does. Under Yarrow Distribution Partners, the workpaper reference and the preparer's initials are recorded in the index so the step can be reperformed. HC-2139 (Umberland Freight) runs 24 months from 2026-03-13. On the evidence,, across Umberland Freight, the reviewer compared the item with the equivalent balance in the prior period before reaching a view. A retrofit contract where existing customer equipment is integrated, so the hardware element is smaller and the services element larger than the population average. Under Umberland Freight, the evidence was inspected in original form rather than as a management-prepared summary. Umberland Freight carries contracted hardware of $618,200, annual subscription value of $342,700 and a deployment fee of $92,000 across the contracted term. On Umberland Freight, the amount was agreed to the underlying system extract without a residual difference. The delayed acceptance was correctly reflected, and the contract was retained in the sample as evidence that the acceptance control operates. As to the facts, sample coverage extends to HC-2092 with Meridian Cold Chain, signed 2025-05-30 for 36 months and carrying contracted hardware of $1,486,200, annual subscription value of $742,800 and a deployment fee of $196,000. In sequence,, refrigerated environment units transfer on acceptance after a thermal validation period, with a subscription and a validation services obligation. On Meridian Cold Chain, the reviewer recorded that no comparable item was found in the two earlier periods examined. Revenue for the validation obligation was recognized before the extended validation completed; the cutoff test flagged the timing. Under Meridian Cold Chain, the conclusion rests on a document produced by a third party rather than by the company.

On testing, Thornbury Wholesale contracted under HC-2133 on 2026-02-20. As to the facts,, hardware, subscription and a training obligation delivered in three sessions across the first quarter of service. On Thornbury Wholesale, the item is presented gross so that a reader can rebuild the measure from reported results. Commercially Thornbury Wholesale carries contracted hardware of $886,400, annual subscription value of $458,900 and a deployment fee of $118,500 over 30 months. One training session had not been delivered at the cut-off but the full fee was recognized; the exception was quantified and posted. Under Thornbury Wholesale, the conclusion is stated at the low end of the supportable range, as the file convention requires. HC-2047 (Blue Mesa Components) runs 24 months from 2024-04-02. On the merits,, a single line replenishment cell transfers on delivery, and the subscription and remote monitoring service are billed together but delivered continuously. Under Blue Mesa Components, the conclusion would change if the missing supporting document is later produced in a different form. Blue Mesa Components carries contracted hardware of $612,400, annual subscription value of $348,000 and a deployment fee of $86,500 across the contracted term. No modifications; the customer exercised a renewal option in April 2026 on identical terms. For Blue Mesa Components, the item is retained in the file even though it does not change the conclusion, so the trail remains complete. On the source, also within scope is HC-2074 with Granite Peak Distribution, signed 2025-01-16 for 36 months and carrying contracted hardware of $2,746,100, annual subscription value of $1,312,700 and a deployment fee of $386,000. Per the register,, three phases of hardware with separate acceptance, a subscription priced per active unit, and a deployment obligation including layout simulation delivered before installation. An August 2025 amendment added a service level commitment with credits, and a May 2026 amendment accelerated phase three. The layout simulation was delivered and billed in advance of installation; testing confirmed it is capable of being distinct and was recognized on delivery. Under Granite Peak Distribution, the reviewer's conclusion here differs from the position taken in the seller's own vendor material.

In the event, Vantage Cold Storage contracted under HC-2144 on 2026-04-07. In review,, hardware, subscription and a validation obligation similar in structure to the Meridian contract but with a fixed-fee validation. On Vantage Cold Storage, the item was projected across the population on the basis stated in the accompanying schedule. Commercially Vantage Cold Storage carries contracted hardware of $1,368,700, annual subscription value of $704,500 and a deployment fee of $186,500 over 36 months. The pending change request is disclosed as an open item because it may create variable consideration in the period after the cut-off. Under Vantage Cold Storage, this is one of the items the seller's adviser has indicated it will contest at the closing meeting. HC-2058 (Dunbar Industrial) runs 12 months from

2024-07-19. In review,, a short-term pilot with hardware supplied on a loan basis and a monthly platform fee; no deployment fee was charged. Under Dunbar Industrial, the reviewer confirmed the amount does not also sit within the working capital peg. Dunbar Industrial carries contracted hardware of $284,700 and annual subscription value of $132,000 with no separate deployment fee across the contracted term. The pilot lapsed in July 2025 without renewal following the customer's insolvency proceedings. Pilot revenue was recognized ratably, which the reviewer accepted; the receivable was subsequently written off. On inspection, the contract register lists HC-2173 with Brackenridge Supply, signed 2025-02-06 for 30 months and carrying contracted hardware of $1,046,700, annual subscription value of $548,300 and a deployment fee of $142,500. From the extract,, across Brackenridge Supply, the reviewer recorded that no comparable item was found in the two earlier periods examined. Standard three-obligation structure with a twelve-month ramp on the subscription price, so billed and recognized amounts diverge through the ramp. On Brackenridge Supply, the explanation offered was plausible and was still corroborated against a document before being accepted. The ramp was tested because it produces a contract asset; the asset balance agrees to the contract but was presented within trade receivables. Under Brackenridge Supply, the reviewer notes that management agreed the facts while reserving its position on the treatment.

Schedule 2.1 - Contract register with commercial terms

Contract	Customer	Signed	Term (months)	Hardware ($)	Subscription ARR ($)	Deployment fee ($)
HC-2041	Asterion Logistics	2024-02-14	36	1,842,600	964,800	214,000
HC-2047	Blue Mesa Components	2024-04-02	24	612,400	348,000	86,500
HC-2052	Crestline Fulfillment	2024-06-27	48	3,268,900	1,486,200	428,000
HC-2058	Dunbar Industrial	2024-07-19	12	284,700	132,000	0
HC-2074	Granite Peak Distribution	2025-01-16	36	2,746,100	1,312,700	386,000
HC-2081	Harborline Systems	2025-03-08	18	486,900	264,000	74,500
HC-2086	Kadence Industrial Holdings	2025-04-24	60	4,128,700	2,046,500	612,000
HC-2092	Meridian Cold Chain	2025-05-30	36	1,486,200	742,800	196,000
HC-2098	Northfield Grocers	2025-07-11	24	764,300	412,600	108,000
HC-2104	Oakhurst Parts Group	2025-08-29	30	1,142,800	596,400	158,500
HC-2115	Quarrybrook Fulfilment	2025-10-02	24	542,600	296,800	68,000
HC-2121	Redbank Distribution	2025-11-14	48	2,398,400	1,186,500	342,500
HC-2127	Saltmarsh Logistics	2026-01-09	36	1,246,900	668,400	174,000
HC-2133	Thornbury Wholesale	2026-02-20	30	886,400	458,900	118,500
HC-2144	Vantage Cold Storage	2026-04-07	36	1,368,700	704,500	186,500
HC-2150	Westbourne Grocery	2026-05-19	18	384,500	212,400	54,000
HC-2162	Zephyr Retail Logistics	2025-06-12	42	2,064,800	998,400	286,000
HC-2168	Ashcombe Beverage Distribution	2024-10-30	36	1,324,600	682,900	178,000

3. Contract modifications and variable consideration

Variable consideration in this population arises from volume tiers, service credits, liquidated damages and discounted options, each of which is dealt with separately below. On testing,, inventory quantities rest on perpetual records because the reviewer did not observe the June 2026 count and the count sheets were only partially made available. In detail,, the engineering ticket population supporting capitalization decisions was provided in extract form and the reviewer could not confirm that the extract is complete.

HC-2156 (Yarrow Distribution Partners) runs 36 months from 2026-06-04. On the documents,, across Yarrow Distribution Partners, the item was raised in the interim update and is carried forward unchanged into this file. Signed within the final month of the review period, with no revenue recognized by the cut-off and a deployment fee invoiced in advance. Under Yarrow Distribution Partners, the item was projected across the population on the basis stated in the accompanying schedule. Yarrow Distribution Partners carries contracted hardware of $1,582,300, annual subscription value of $786,200 and a deployment fee of $214,500 across the contracted term. No amendments; the advance invoice creates a deferred revenue balance that was traced into the closing rollforward. Because no performance had occurred, the entire invoice should sit in deferred revenue; testing confirmed it does. Taken alone, the reviewer read HC-2104 with Oakhurst Parts Group, signed 2025-08-29 for 30 months and carrying contracted hardware of $1,142,800, annual subscription value of $596,400 and a deployment fee of $158,500. From the extract,, hardware transfers on delivery with installation by the customer's own contractor, so the deployment obligation is limited to remote commissioning support. On Oakhurst Parts Group, the conclusion would change if the missing supporting document is later produced in a different form. Because installation is performed by the customer, hardware transfer is earlier than in comparable contracts; the earlier transfer date was verified to the delivery receipt. Under Oakhurst Parts Group, the direction of this item is unfavourable to the seller and it is reported on the same basis as the favourable items. On reperformance, testing reached HC-2063 with Evergreen Warehousing, signed 2024-09-05 for 36 months and carrying contracted hardware of $2,104,300, annual subscription value of $1,128,400 and a deployment fee of $268,500. On reperformance,, two distribution centres take hardware on acceptance, share a single subscription measured by active units, and buy an onboarding package that includes operator training. A July 2025 amendment reduced the unit count by four following a layout change and issued a partial credit against the deployment fee. An overpayment received in March 2026 was applied to revenue rather than held as a customer credit, which testing identified as an unrecorded liability. Under Evergreen Warehousing, the conclusion would change if the missing supporting document is later produced in a different form.

HC-2115 (Quarrybrook Fulfilment) runs 24 months from 2025-10-02. On the merits,, a single site with hardware, subscription and a light onboarding obligation delivered over four weeks. Under Quarrybrook Fulfilment, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file. Quarrybrook Fulfilment carries contracted hardware of $542,600, annual subscription value of $296,800 and a deployment fee of $68,000 across the contracted term. No amendments; the contract is the cleanest in the population and was used as the control item in sample testing. For Quarrybrook Fulfilment, the reviewer's conclusion here differs from the position taken in the seller's own vendor material. On the evidence, the file for HC-2133 with Thornbury Wholesale, signed 2026-02-20 for 30 months and carrying contracted hardware of $886,400, annual subscription value of $458,900 and a deployment fee of $118,500. On the balance,, across Thornbury Wholesale, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction. Hardware, subscription and a training obligation delivered in three sessions across the first quarter of service. On Thornbury Wholesale, the item was raised in the interim update and is carried forward unchanged into this file. One training session had not been delivered at the cut-off but the full fee was recognized; the exception was quantified and posted. Under Thornbury Wholesale, the reviewer confirmed that the same item does not also appear on the net debt schedule. HC-2058 (Dunbar Industrial) runs 12 months from 2024-07-19. On reperformance,, across Dunbar Industrial, this item is one of the few in the file where the seller's and the reviewer's figures agree exactly. A short-term pilot with hardware supplied on a loan basis and a monthly platform fee; no deployment fee was charged. Under Dunbar Industrial, no projection was made from this item because it arises from a single identifiable event. Dunbar Industrial carries contracted hardware of $284,700 and annual subscription value of $132,000 with no separate deployment fee across the contracted term. The pilot lapsed in July 2025 without renewal following the customer's insolvency proceedings. Pilot revenue was recognized ratably, which the reviewer accepted; the receivable was subsequently written off.

On any view, Saltmarsh Logistics contracted under HC-2127 on 2026-01-09. On the merits,, two obligations only: hardware on acceptance and a subscription, with deployment performed by a channel partner under a separate agreement. On Saltmarsh Logistics, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected. Commercially Saltmarsh Logistics carries contracted hardware of $1,246,900, annual subscription value of $668,400 and a deployment fee of $174,000 over 36 months. For Saltmarsh Logistics, the supporting analysis was rebuilt from source rather than reviewed, because the calculation drives an adjustment. Under Saltmarsh Logistics, the direction

of this item is unfavourable to the seller and it is reported on the same basis as the favourable items. On testing, sample coverage extends to HC-2121 with Redbank Distribution, signed 2025-11-14 for 48 months and carrying contracted hardware of $2,398,400, annual subscription value of $1,186,500 and a deployment fee of $342,500. In detail,, hardware in two tranches, a subscription with a committed minimum, and a deployment obligation with liquidated damages for late go-live. A April 2026 amendment reset the go-live date and waived accrued liquidated damages in exchange for a term extension. The waived damages were not recorded as variable consideration in the periods to which they related; the amendment accounting is an open item. Under Redbank Distribution, a second preparer reperformed the arithmetic and reached the same figure to the dollar. As to the facts, Westbourne Grocery contracted under HC-2150 on 2026-05-19. On this point,, across Westbourne Grocery, the reviewer confirmed the counterparty is not a related party before accepting the document at face value. A short-term contract taken to test a smaller-format cell, with hardware, subscription and a minimal onboarding element. No amendments; the customer has an option to convert to a thirty-six month term at a stated price. Commercially Westbourne Grocery carries contracted hardware of $384,500, annual subscription value of $212,400 and a deployment fee of $54,000 over 18 months. For Westbourne Grocery, this item was discussed with the controller on the second day of fieldwork and the explanation is recorded as given. Under Westbourne Grocery, the item was projected across the population on the basis stated in the accompanying schedule.

On its facts, the reviewer's read of HC-2081 with Harborline Systems, signed 2025-03-08 for 18 months and carrying contracted hardware of $486,900, annual subscription value of $264,000 and a deployment fee of $74,500. Per the index,, a proof-of-concept converted to a production contract, with the original pilot fee credited against the first production invoice. The conversion in November 2025 was documented as a new contract rather than a modification, which changes how the credited pilot fee is treated. Pilot fees were recognized on invoice eleven weeks before the service window began, which the reviewer adjusted. Under Harborline Systems, the amount was agreed to the underlying system extract without a residual difference. Against the ledger, Brackenridge Supply contracted under HC-2173 on 2025-02-06. On the evidence,, standard three-obligation structure with a twelve-month ramp on the subscription price, so billed and recognized amounts diverge through the ramp. No amendments; the ramp is contractual and creates a difference between billed and recognized subscription revenue in each of the first four quarters. Commercially Brackenridge Supply carries contracted hardware of $1,046,700, annual subscription value of $548,300 and a deployment fee of $142,500 over 30 months. For Brackenridge Supply, the item was traced from the summary schedule through the sub-ledger to the source document. Under Brackenridge Supply, the reviewer compared the item with the equivalent balance in the prior period before reaching a view. On the substance, Fathom Mobility contracted under HC-2069 on 2024-11-21. As matters stand,, one retrofit site with hardware transferring in two tranches, a subscription that begins at first tranche go-live, and an integration obligation delivered by a subcontractor. A February 2026 amendment substituted a newer chassis variant at no price change and extended warranty cover by twelve months. Commercially Fathom Mobility carries contracted hardware of $918,500, annual subscription value of $486,000 and a deployment fee of $124,000 over 30 months. The extended warranty was not evaluated as a separate obligation; management asserted immateriality without quantifying it. Under Fathom Mobility, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction.

Schedule 2.2 - Revenue recognition sample results

Sample	Contract	Invoice	Performance obligation	Recognized period	Tested period	Exception	Amount effect ($)
RS-002	HC-2041	INV-8636	Hardware - six added units	2025-04	2025-04	None	0

RS-036	HC-2063	INV-8705	Customer overpayment applied to revenu	2026-03	None	Completeness	53,400

4. Sample selection, coverage and exceptions found

The sample was drawn from the full recorded revenue population for the period rather than from a management-prepared listing, and the selection basis is stated so it can be criticised. Per the workpaper,, management represented that the capitalized configuration work created a lasting integration component; the ticket detail supports this for part of the amount only. Against the ledger,, contract amendments are stored in a shared drive without a register, so the reviewer built the amendment population from the contract files themselves.

In detail, under HC-2086 the volume tier subscription obligation was recognized in 2026-03. On the merits,, the tier assumed in the estimate was achieved on actual unit counts, so no constraint adjustment arises for the quarter tested. For volume tier subscription the exception is classified as estimate, and no amount effect could be quantified from the available support. The workpaper for volume tier subscription is RS-014, tested against 2026-03. On volume tier subscription, the conclusion rests on a document produced by a third party rather than by the company. At the cut-off, sample coverage extends to RS-005, the hardware - site three obligation under HC-2052, recognized in 2026-01 and tested against 2025-12. Per the register,, the acceptance certificate is undated and the installer's log shows completion in the final week of December, one month before revenue was recorded. For hardware - site three the exception is classified as timing with an amount effect of $142,600. On hardware site three, the reviewer compared the item with the equivalent balance in the prior period before reaching a view. RS-006 covers deployment milestone three on HC-2052. Against the ledger,, the milestone definition, the customer sign-off and the invoice all agree, and the amount allocated matches the

contract schedule. On deployment milestone three, the reviewer's supervisor reviewed this conclusion because it rests partly on judgment. The deployment milestone three amount was recognized in 2026-02 and tested against 2026-02. No exception was recorded.

RS-027 covers conversion option on HC-2150. On reperformance,, the conversion option is priced at the standard rate, so no material right arises and no consideration is allocated to it. On conversion option, the reviewer recorded that no comparable item was found in the two earlier periods examined. The conversion option amount was recognized in 2026-06 and tested against 2026-06. No exception was recorded. Per the register, the reviewer traced RS-022, the liquidated damages waiver obligation under HC-2121, recognized in 2026-04 and tested against 2025-12. On testing,, damages accrued for late go-live were waived by amendment in exchange for a term extension, and neither the accrual nor the waiver was reflected in the periods concerned. For liquidated damages waiver the exception is classified as variable consideration with an amount effect of $78,500. On liquidated damages waiver, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction. RS-015 covers spare parts pool on HC-2086. On inspection,, consideration allocated to the spares pool obligation was set at cost rather than at an estimated standalone selling price, understating the amount deferred. On spare parts pool, the reviewer confirmed the amount does not also sit within the working capital peg. The spare parts pool amount was recognized in 2025-12 and tested against 2025-12. For spare parts pool the exception is classified as allocation with an amount effect of $28,400.

RS-009 covers subscription - unit count reduction on HC-2063. Taken alone,, the July 2025 amendment reduced the active unit count from the start of July, but the billing system continued to invoice the original count for one further cycle. On subscription unit count, the item was tested twice, once in the revenue stream and once in the balance sheet stream, with the same result. The subscription - unit count reduction amount was recognized in 2025-08 and tested against 2025-07. For subscription - unit count reduction the exception is classified as timing with an amount effect of $34,800. On reperformance, under HC-2109 the discounted unit option obligation was recognized in 2026-04. On a second read,, the option was assessed as a material right and management allocated no consideration to it; the reviewer left the judgment open pending a pricing analysis. For discounted unit option the exception is classified as judgment, and no amount effect could be quantified from the available support. The workpaper for discounted unit option is RS-020, tested against 2026-04. On discounted unit option, a second preparer reperformed the arithmetic and reached the same figure to the dollar. In detail, the population yielded RS-033, the purchased conversion of leased units obligation under HC-2052, recognized in 2026-01 and tested against 2026-01. On a second read,, twelve leased units converted to purchased units in January 2026; the residual lease liability was released to revenue rather than against the receivable. For purchased conversion of leased units the exception is classified as modification with an amount effect of $32,600. On purchased conversion of leased, the reviewer noted the item for the closing meeting agenda because the seller had not seen the analysis before fieldwork.

By reference, also selected was RS-002, the hardware - six added units obligation under HC-2041, recognized in 2025-04 and tested against 2025-04. In substance,, the March 2025 amendment priced the additional units at the original rate; transfer on acceptance was verified to the site acceptance certificate. No exception was recorded. On hardware six added, the reviewer left the amount unchanged after review but strengthened the evidence reference. In substance, under HC-2144 the fixed-fee validation obligation was recognized in 2026-06. On a second read,, the validation obligation was delivered inside the period; a pending change request for additional units remains unpriced and is disclosed. No exception was recorded. The workpaper for fixed-fee validation is RS-026, tested against 2026-06. On fixed-fee validation, the item was projected across the population on the basis stated in the accompanying schedule. On its facts, under HC-2074 the service level credit accrual obligation was recognized in 2025-11. On the substance,, credits earned under the August 2025 service level commitment were recorded when the credit memo issued rather than in the months the shortfall occurred. For service level credit accrual the exception is classified as variable consideration with an amount effect of $46,200. The workpaper for service level credit accrual is RS-012, tested against 2025-09. On service level credit accrual, no further procedures were considered necessary once the source document had been inspected.

Schedule 2.3 - Deferred revenue rollforward

Month	Opening ($)	Billings ($)	Recognized ($)	Modifications ($)	Refunds ($)	Closing ($)	GL tie difference ($)
2024-06	6,033,873	1,669,587	1,269,317	(143,946)	(49,537)	6,240,660	296
2024-07	6,240,660	1,888,595	1,746,980	14,620	(54,594)	6,342,301	(1,844)

Month	Opening ($)	Billings ($)	Recognized ($)	Modifications ($)	Refunds ($)	Closing ($)	GL tie difference ($)
2024-08	6,342,301	1,545,237	1,307,529	23,092	(65,487)	6,537,614	(1,180)
2024-09	6,537,614	1,771,696	1,936,859	60,120	(19,957)	6,412,614	3,278
2024-10	6,412,614	1,350,322	2,199,370	(119,072)	(39,108)	5,405,386	3,318
2024-11	5,405,386	1,225,966	1,815,684	(124,865)	(58,926)	4,631,877	685
2024-12	4,631,877	1,805,787	1,210,620	(121,769)	(13,683)	5,091,592	(793)
2025-01	5,091,592	1,877,735	1,819,520	(52,102)	(4,996)	5,092,709	(552)
2025-02	5,092,709	1,492,994	2,228,680	(17,341)	(72,666)	4,267,016	1,632
2025-03	4,267,016	1,327,157	1,294,054	(68,401)	(60,022)	4,171,696	3,365
2025-04	4,171,696	2,457,974	2,040,075	(64,117)	(844)	4,524,634	(2,213)
2025-05	4,524,634	2,329,646	1,597,653	(85,153)	(50,419)	5,121,055	(2,459)
2025-06	5,121,055	1,732,018	1,636,535	33,998	(36,618)	5,213,918	2,891
2025-07	5,213,918	1,929,085	2,063,330	(41,390)	(55,949)	4,982,334	(1,959)
2025-08	4,982,334	1,843,950	1,703,812	(20,090)	(43,985)	5,058,397	1,485
2025-09	5,058,397	1,828,620	1,281,890	(27,738)	(65,016)	5,512,373	1,774
2025-10	5,512,373	2,386,491	1,373,890	(79,470)	(5,599)	6,439,905	2,065
2025-11	6,439,905	1,533,563	1,199,684	53,066	(2,047)	6,824,803	(120)
2025-12	6,824,803	2,234,338	1,944,998	62,047	(60,305)	7,115,885	902
2026-01	7,115,885	1,882,071	1,249,104	(30,429)	(18,917)	7,699,506	803
2026-02	7,699,506	2,459,582	2,123,500	(74,611)	(44,294)	7,916,683	1,841
2026-03	7,916,683	2,206,537	1,849,095	(127,325)	(34,880)	8,111,920	(2,333)
2026-04	8,111,920	2,270,091	2,121,926	19,943	(5,239)	8,274,789	2,301
2026-05	8,274,789	2,452,946	1,903,304	79,739	(64,235)	8,839,935	(1,953)

5. Reconciling billings, recognition and the closing contract liability

The reviewer rebuilt the rollforward from the billing extract rather than accepting the company's schedule, then compared the two and reported the differences. On the merits,, the reviewer reperformed rather than reviewed management's own calculations wherever the calculation drives an adjustment. On the record,, pro forma items are separated from normalizations so that a reader can adopt one class without accepting the other.

RS-013 covers pilot fee credited on conversion on HC-2081. In the file,, the pilot fee was recognized on invoice eleven weeks before the service window opened, and the conversion was documented as a new contract rather than a modification. On pilot fee credited on, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file. The pilot fee credited on conversion amount was recognized in 2025-09 and tested against 2025-11. For pilot fee credited on conversion the exception is classified as timing with an amount effect of $62,900. RS-027 covers conversion option on HC-2150. In review,, the conversion option is priced at the standard rate, so no material right arises and no consideration is allocated to it. On conversion option, no further procedures were considered necessary once the source document had been inspected. The conversion option amount was recognized in 2026-06 and tested against 2026-06. No exception was recorded. RS-015 covers spare parts pool on HC-2086. Against the ledger,, consideration allocated to the spares pool obligation was set at cost rather than at an estimated standalone selling price, understating the amount deferred. On spare parts pool, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected. The spare parts pool amount was recognized in 2025-12 and tested against 2025-12. For spare parts pool the exception is classified as allocation with an amount effect of $28,400.

As to the facts, under HC-2052 the deployment milestone three obligation was recognized in 2026-02. As to the facts,, the milestone definition, the customer sign-off and the invoice all agree, and the amount allocated matches the contract schedule. No exception was recorded. The workpaper for deployment milestone three is RS-006, tested against 2026-02. On deployment milestone three, the item was projected across the population on the basis stated in the accompanying schedule. On the papers, testing covered RS-002, the hardware - six added units obligation under HC-2041, recognized in 2025-04 and tested against 2025-04. From the extract,, the March 2025 amendment priced the additional units at the original rate; transfer on acceptance was verified to the site acceptance certificate. No exception was recorded. On hardware six added, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected. On this point, under HC-2133 the training session four obligation was recognized in 2026-06. From the extract,, the fourth training session added by the May 2026 amendment had not been delivered at the cut-off although the full fee had been recognized. For training session four the exception is classified as completeness with an amount effect of $18,600. The workpaper for training session four is RS-024, tested against an obligation still undelivered

at the cut-off. On training session four, the supporting analysis was rebuilt from source rather than reviewed, because the calculation drives an adjustment.

From the extract, under HC-2074 the phase three acceleration obligation was recognized in 2026-06. On the documents,, the May 2026 amendment accelerated phase three and the revised acceptance date was verified to the customer's written confirmation. No exception was recorded. The workpaper for phase three acceleration is RS-034, tested against 2026-06. On phase three acceleration, the reviewer left the amount unchanged after review but strengthened the evidence reference. RS-033 covers purchased conversion of leased units on HC-2052. Per the index,, twelve leased units converted to purchased units in January 2026; the residual lease liability was released to revenue rather than against the receivable. On purchased conversion of leased, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected. The purchased conversion of leased units amount was recognized in 2026-01 and tested against 2026-01. For purchased conversion of leased units the exception is classified as modification with an amount effect of $32,600. RS-029 covers hosted analytics module on HC-2162. Taken alone,, the December 2025 amendment was accounted for prospectively; the remaining goods and services are distinct, so prospective treatment is supportable. On hosted analytics module, the conclusion is stated at the low end of the supportable range, as the file convention requires. The hosted analytics module amount was recognized in 2026-01 and tested against 2026-01. For hosted analytics module the exception is classified as modification, and no amount effect could be quantified from the available support.

RS-035 covers annual price escalator on HC-2086. On its facts,, the escalator is contractual and formulaic; the recomputed monthly amount agrees to the billing extract to within a rounding difference. On annual price escalator, the explanation offered was plausible and was still corroborated against a document before being accepted. The annual price escalator amount was recognized in 2026-05 and tested against 2026-05. No exception was recorded. On the merits, under HC-2173 the subscription ramp - contract asset obligation was recognized in 2025-06. In the file,, the contract asset created by the twelve-month price ramp agrees to the contract but is presented within trade receivables rather than separately. For subscription ramp - contract asset the exception is classified as presentation, and no amount effect could be quantified from the available support. The workpaper for subscription ramp - contract asset is RS-031, tested against 2025-06. On subscription ramp contract, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction. In the event, under HC-2063 the subscription - unit count reduction obligation was recognized in 2025-08. On this point,, the July 2025 amendment reduced the active unit count from the start of July, but the billing system continued to invoice the original count for one further cycle. For subscription - unit count reduction the exception is classified as timing with an amount effect of $34,800. The workpaper for subscription - unit count reduction is RS-009, tested against 2025-07. On subscription unit count, the evidence file for this item includes an email chain that fixes the date on which the parties agreed.

6. Normalizing the cost of delivery across the review period

Margin normalization is the part of this work most easily overstated, so the reviewer required evidence that a cost has stopped before removing it from the cost base. Taken alone,, the reviewer worked from the statutory ledger throughout; where management's own adjustments had been posted into the ledger they were reversed before analysis rather than accepted as reported. Per the index,, management represented that the retention-contingent portion of the deferred consideration is genuinely contingent, and the retention agreements have only partly been provided.

On its facts, the margin analysis carries deployment crew wages within the field support bucket at $1,284,600 in FY2024, $1,846,200 in FY2025 and $2,142,900 for the trailing twelve months to June 2026. On the balance,, crew headcount grew from eleven to nineteen as site volume increased, with two crews added in the final quarter. The run-rate view is run-rate. For Deployment crew wages, the file records the question asked, the answer given and the document that settled it. On Deployment crew wages, no further procedures were considered necessary once the source document had been inspected. At the cut-off, the trend for customer-specific integration build within the launch and onboarding bucket at $214,600 in FY2024, $342,800 in FY2025 and $286,400 for the trailing twelve months to June 2026. By reference,, integration work with customer warehouse management systems is required at almost every site. The run-rate view is run-rate. The reviewer confirmed no part of this line was capitalized after the FY2025 reclassification. On Customer-specific integration build, the reviewer declined to net this item against another with an opposite direction in the same period. Per the register, hardware cost includes scrap and yield loss, classified mixed. In the event,, scrap rose during the harness

campaign and during the first production run of the second-generation chassis. For scrap and yield loss the measured amounts are $118,400 in FY2024, $264,800 in FY2025 and $186,200 for the trailing twelve months to June 2026. Baseline scrap is run-rate; the reviewer isolated only the campaign excess and left the new-product learning curve in cost. On Scrap and yield loss, a small residual difference remains and is reported rather than described as immaterial and omitted.

Rework campaign labour sits in spares and warranty and moved from $0 to $142,650 and then to $0. On the substance,, the wrist-joint harness campaign in the third quarter of 2025 consumed crew hours outside normal service work. On Rework campaign labour, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file. The campaign is genuinely isolated; the supplier recovery is presented alongside it rather than separately. The line is carried forward as one-time. In the file, the cost build shows warranty parts consumption within the spares and warranty bucket at $246,800 in FY2024, $418,600 in FY2025 and $462,400 for the trailing twelve months to June 2026. On the documents,, consumption tracks installed base and the failure rate of the current chassis rather than any single event. The run-rate view is run-rate. For Warranty parts consumption, the amount was agreed to the underlying system extract without a residual difference. On Warranty parts consumption, the item is presented gross so that a reader can rebuild the measure from reported results. In this stream, hardware cost includes rework and refurbishment, classified mixed. In detail,, refurbishment of returned pilot units is a recurring activity, while the harness rework was campaign-driven. For rework and refurbishment the measured amounts are $96,800 in FY2024, $218,400 in FY2025 and $142,600 for the trailing twelve months to June 2026. The two components were separated using work order types before any adjustment was proposed. On Rework and refurbishment, a small residual difference remains and is reported rather than described as immaterial and omitted.

Outbound freight to sites sits in freight and duty and moved from $268,900 to $386,400 and then to $411,860. By agreement,, outbound cost follows unit volume and the geographic spread of new sites. On Outbound freight to sites, the supporting analysis was rebuilt from source rather than reviewed, because the calculation drives an adjustment. No adjustment is proposed; the duplicated November 2025 accrual is dealt with separately. The line is carried forward as run-rate. On the papers, allocated overhead includes quality and test engineering, classified run-rate. Read narrowly,, test engineering supports both production and field diagnosis and is allocated on unit throughput. For quality and test engineering the measured amounts are $186,400 in FY2024, $248,600 in FY2025 and $284,900 for the trailing twelve months to June 2026. The allocation basis was consistent across the three periods, which the reviewer verified before using the trend. On Quality and test engineering, the workpaper reference and the preparer's initials are recorded in the index so the step can be reperformed. By reference, hosting includes data egress and interconnect, classified run-rate. On the substance,, egress fell after the 2026 hosting renegotiation moved traffic onto a committed private interconnect. For data egress and interconnect the measured amounts are $62,400 in FY2024, $118,900 in FY2025 and $96,700 for the trailing twelve months to June 2026. For Data egress and interconnect, the reviewer's conclusion here differs from the position taken in the seller's own vendor material. On Data egress and interconnect, the reviewer recorded the amount as computed rather than as rounded, so the schedule footings agree.

Inbound freight on components sits in freight and duty and moved from $318,400 to $462,800 and then to $428,600. On its facts,, inbound freight rates fell in 2026 after two ocean lanes were consolidated with a single forwarder. On Inbound freight on components, the evidence was inspected in original form rather than as a management-prepared summary. For Inbound freight on components, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file. The line is carried forward as run-rate. Per the index, hosting includes fleet telemetry compute, classified run-rate. In substance,, compute cost scales with active units and with telemetry retention, both of which rose through the period. For fleet telemetry compute the measured amounts are $684,300 in FY2024, $1,142,800 in FY2025 and $1,386,400 for the trailing twelve months to June 2026. The reviewer treats the whole line as run-rate other than the migration overlap already isolated on the adjustment schedule. On Fleet telemetry compute, the item is retained in the file even though it does not change the conclusion, so the trail remains complete. At the cut-off, field support includes subcontracted installation, classified mixed. As to the facts,, subcontractors absorb peak installation demand and the mix between own crew and subcontract varies quarter to quarter. For subcontracted installation the measured amounts are $214,800 in FY2024, $468,900 in FY2025 and $386,200 for the trailing twelve months to June 2026. No normalization is proposed because the mix is a capacity choice rather than a one-

time event. On Subcontracted installation, the reviewer's conclusion here differs from the position taken in the seller's own vendor material.

Schedule 2.4 - Error projection by population

Population and period	Evidence source	Items tested	Coverage of value	Errors found	Gross error ($)	Projected effect ($)
Hardware transfer dates - FY2025	Acceptance certificates	65	73%	1	159,946	219,104
Hardware transfer dates - LTM Jun-2026	Acceptance certificates	19	69%	3	164,656	238,631
Subscription monthly recognition - FY2025	Billing extract	70	57%	4	98,853	173,426
Subscription monthly recognition - LTM Jun-2026	Billing extract	69	38%	0	0	0
Deployment milestone revenue - FY2025	Milestone certificates	33	40%	1	50,841	127,102
Deployment milestone revenue - LTM Jun-2026	Milestone certificates	47	82%	6	150,100	183,048
Training obligation delivery - FY2025	Attendance records	57	39%	4	144,948	371,661
Training obligation delivery - LTM Jun-2026	Attendance records	31	26%	2	115,705	445,019
Service credits and rebates - FY2025	Credit memoranda	25	57%	1	107,945	189,377
Service credits and rebates - LTM Jun-2026	Credit memoranda	44	43%	6	144,547	336,155
Accounts payable cutoff - FY2025	Goods receipt notes	44	48%	1	48,253	100,527
Accounts payable cutoff - LTM Jun-2026	Goods receipt notes	28	40%	6	142,467	356,167
Accrued liabilities completeness - FY2025	Vendor statements	66	70%	2	79,518	113,597
Accrued liabilities completeness - LTM Jun-2026	Vendor statements	36	70%	1	111,399	159,141
Manual journal entries - FY2025	Journal extract	57	53%	5	100,314	189,271
Manual journal entries - LTM Jun-2026	Journal extract	53	55%	3	178,816	325,120
Cash receipts application - FY2025	Remittance advices	20	63%	2	157,726	250,358
Cash receipts application - LTM Jun-2026	Remittance advices	32	84%	0	0	0
Unbilled receivable ageing - FY2025	Project records	22	27%	1	130,400	482,962
Unbilled receivable ageing - LTM Jun-2026	Project records	60	39%	0	0	0

7. Where the record rests on representation rather than evidence

Where management asserted a position and the supporting document was not produced, the assertion is recorded as an assertion and nothing more. In review,, where a normalization depends on an assumption about future negotiation, the reviewer declines the adjustment and discloses the exposure instead. On the papers,, management represented that the capitalized configuration work created a lasting integration component; the ticket detail supports this for part of the amount only.

Against the ledger,, where an exception is identified, the reviewer states the population, the value tested, the coverage achieved and the projected effect before proposing any adjustment. On the substance,, where a normalization depends on an assumption about future negotiation, the reviewer declines the adjustment and discloses the exposure instead. On any view,, reconciliation differences are reported at the amount found, including small residuals, rather than being described as immaterial and omitted. ADJ-09 concerns stock compensation expense and was raised by management as a normalization item. From the extract,, non-cash share-based compensation measured under FASB ASC Topic 718 is removed to reach a cash earnings measure, consistent with how the lenders in the process model the business. On Stock compensation expense, the item was raised in the interim update and is carried forward unchanged into this file. Stock compensation expense is recorded as a add-back of $1,247,300 in LTM Jun-2026, evidenced by the equity administrator's expense report reconciled to the payroll and equity ledgers. Stock compensation expense was accepted at $1,247,300: the expense agrees between the equity administrator's report and the general ledger, and no portion was settled in cash during the period.

On the balance,, interim balances at 2026-06-30 have not been subject to a physical inventory count observed by the reviewer; the June count sheets were requested and only partially provided. From the extract,, capitalization decisions were documented at project level rather than at ticket level until the control change made in April 2026. On the balance,, management represented that no bonus was payable for FY2024 following a board decision, and the minutes provided record the decision but not the terms of the plan itself. Taken alone, testing covered ADJ-40, Government innovation grant recognized in other income, which deducts $65,000 against FY2024 on a normalization basis. By reference,, a state innovation grant was recognized in a single tranche on receipt and is not available in the periods a buyer would own. Support consists of the grant agreement, the milestone certification and the receipt advice, and the item was put forward by diligence. Government innovation grant recognized was accepted at $65,000 and the reason sits on the schedule itself. On Government innovation grant recognized, the conclusion would change if the missing supporting document is later produced in a different form.

In review,, no financial statement for any period in scope has been audited; FY2024 and FY2025 were subject to a review engagement and the 2026 stub has had no external involvement at all. In detail,, accruals were historically raised from invoices rather than from receiving and shipping records, which is the direct cause of the cutoff errors identified. As to the facts,, contract amendments are stored in a shared drive without a register, so the reviewer built the amendment population from the contract files themselves. On inspection, management proposed ADJ-04 at $34,720 for FY2025, described as owner's vehicle and club dues. In sequence,, personal expenses run through the company are removed to present the cost structure a buyer would inherit. Owner's vehicle and club was reduced at $22,180 and the reason sits on the schedule itself. Owner's vehicle and club carries a recurrence judgment of normalization, and the supporting file is general ledger detail for accounts 6410 and 6455 with supporting statements. On Owner's vehicle and club, the supporting document was produced after two requests and its late arrival is noted in the register.

On a second read,, recurrence is judged on evidence about the future obligation rather than on whether the cost is unusual, which is why several items management called one-time were rejected. In detail,, approver fields are blank on a subset of journal entries, which prevents any conclusion on the operation of the journal approval control during the affected periods. On the substance,, management represented that the spares pool is fully counted, although the count sheets provided cover only part of the pool. ADJ-08 concerns warranty reserve release and was raised by diligence as a normalization item. At the cut-off,, a reserve established in 2023 for a superseded gripper assembly was released to cost of sales in June 2025, flattering reported margin in a period with no offsetting claim experience. On Warranty reserve release, no projection was made from this item because it arises from a single identifiable event. Warranty reserve release is recorded as a deduction of $96,150 in FY2025, evidenced by the warranty reserve rollforward and the field failure log.

Warranty reserve release was accepted at $96,150: the release is visible as a single credit journal and the failure log shows no corresponding decline in claim volume.

Schedule 2.5 - Working capital peg sensitivity

Definition variant	Included	Excluded	Computed level ($)	Difference vs reference ($)	Comment
Trailing twelve-month average	All trade and other working capital	Cash, debt, deferred consideration	4,349,577	(227,816)	Consistent with the draft agreement
Trailing six-month average	All trade and other working capital	Cash, debt, deferred consideration	4,947,819	370,426	Preferred by the seller
Quarter-end average of four quarters	Trade balances only	Prepaid transaction costs	4,382,357	(195,036)	Rejected as too sensitive to a single month
Month-end average excluding December	All trade and other working capital	Seasonal December inventory build	4,656,766	79,373	Not supportable without the missing count sheets
Trailing twelve months excluding deferred revenue	Trade balances and inventory	Deferred revenue, customer deposits	4,462,888	(114,505)	Rejected as too sensitive to a single month
Trailing twelve months excluding unbilled	Trade balances and inventory	Unbilled receivables	4,248,047	(329,346)	Not supportable without the missing count sheets
Median of trailing twelve month-ends	All trade and other working capital	Cash, debt, tax balances	4,029,139	(548,254)	Consistent with the draft agreement
Latest three months average	All trade and other working capital	Cash, debt, tax balances	4,528,887	(48,506)	Presented for sensitivity only
Trailing twelve months, revolver excluded	All trade and other working capital	Revolver borrowings	4,747,460	170,067	Consistent with the draft agreement
Trailing twelve months, PTO excluded	All trade and other working capital	Unfunded paid time off	4,347,403	(229,990)	Not supportable without the missing count sheets
Trailing twelve months, credits excluded	All trade and other working capital	Customer credits owed	4,050,086	(527,307)	Preferred by the seller
Trailing twelve months, bonus excluded	All trade and other working capital	Accrued discretionary bonus	4,267,715	(309,678)	Consistent with the draft agreement
Trailing twelve months, gross basis	All balances including intercompany	None	4,523,430	(53,963)	Not supportable without the missing count sheets
Trailing twelve months, Ontario excluded	Parent company balances only	Ontario subsidiary balances	4,059,418	(517,975)	Rejected as too sensitive to a single month
Seasonally adjusted twelve-month average	All trade and other working capital	Cash, debt, seasonal peak	5,270,385	692,992	Presented for sensitivity only
Contractual definition as drafted	As listed in the draft definition	As listed in the draft definition	4,832,932	255,539	Adopted as the reference definition

8. Information request register at the date of this file

Open items are the most negotiated part of a diligence record, so each carries the effect if unresolved rather than only its status. On the papers,, legal accruals rest on counsel's written estimates rather than on invoices, and the reviewer has not independently assessed the likely outcome of any matter. On inspection,, access to post revenue journals extended beyond the accounting team until access rights were narrowed in July 2025.

IR-088 asks for analysis of the pinecrest option pricing against list. The request for analysis of the pinecrest was raised on 2026-07-02 with the seller - revenue accountant and nothing has been provided, leaving the item open. For analysis of the pinecrest, a small residual difference remains and is reported rather than described as immaterial and omitted. In the event,, the material right judgment stays open, and any allocation to the option would move revenue between periods. IR-063 asks for contractor conversion offer letters and prior agency rates. The request for contractor conversion offer letters was raised on 2026-06-26 with the seller - hr director and material was provided on 2026-07-07, leaving the item received - under review. For contractor conversion offer letters, the explanation offered was plausible and was still corroborated against a document before being accepted. Per the workpaper,, employer tax and benefit loading on the converted population is still being confirmed, which affects the size of the run-rate deduction. In review,

the register carries IR-052, bank statements for the ontario subsidiary for the full period, addressed to the seller - controller and requested on 2026-06-25; the response is partially received. The status is recorded as open. In sequence,, two months are missing, so cash proof coverage for the subsidiary is below the level applied to the parent. For bank statements for the, the reviewer recorded that no comparable item was found in the two earlier periods examined.

IR-056 asks for payroll register reconciled to the general ledger by month. The request for payroll register reconciled to was raised on 2026-06-25 with the seller - payroll manager and material was provided on 2026-07-09, leaving the item closed. For payroll register reconciled to, the reviewer confirmed the counterparty is not a related party before accepting the document at face value. On the papers,, the reconciliation supported the compensation analysis and the annualization of the support team build. IR-096 asks for confirmation of restricted cash release conditions. The request for confirmation of restricted cash was raised on 2026-07-03 with the seller - treasury and the response is received - under review, leaving the item pending. For confirmation of restricted cash, the reviewer confirmed that the same item does not also appear on the net debt schedule. On the source,, if release depends on milestones beyond closing the balance stays outside cash at closing. IR-023 asks for state nexus opinion supporting no sales tax filings. The request for state nexus opinion supporting was raised on 2026-06-19 with the seller - tax adviser and material was provided on 2026-07-02, leaving the item received - under review. For state nexus opinion supporting, the item was raised in the interim update and is carried forward unchanged into this file. On the merits,, the exposure remains a range until the opinion's scope is compared with the states in which field staff worked.

IR-019 asks for retention agreements underpinning the larkspur earn-out. The request for retention agreements underpinning the was raised on 2026-06-18 with the seller - counsel and the response is partially received, leaving the item open. For retention agreements underpinning the, the file records the question asked, the answer given and the document that settled it. In the event,, the split between fixed deferred consideration and retention-contingent amounts cannot be finalized, so part of the balance stays in a range. On testing, the reviewer chased IR-074, pto liability rollforward by employee band, addressed to the seller - hr director and requested on 2026-06-30; material was provided on 2026-07-10. The status is recorded as closed. Per the index,, the rollforward supported both the accrual movement adjustment and the split treatment in net debt. For pto liability rollforward by, the item is retained in the file even though it does not change the conclusion, so the trail remains complete. On the substance, the information request log records IR-014, signed acceptance certificate for crestline site three, addressed to the seller - deployment lead and requested on 2026-06-18; nothing has been provided. The status is recorded as open. On the papers,, without a dated certificate the transfer month rests on the installer's log, leaving a month of hardware revenue in the wrong period. For signed acceptance certificate for, the item is presented gross so that a reader can rebuild the measure from reported results.

On testing, the seller - operations holds IR-081, inventory count sheets for the june 2026 physical count, requested 2026-07-01. In this stream,, count coverage of the spares pool cannot be confirmed, so inventory in the working capital peg rests on the perpetual records. On inventory count sheets for, as at the date of this file the response is partially received and the item is open. For inventory count sheets for, this item is one of the few in the file where the seller's and the reviewer's figures agree exactly. IR-034 asks for board minutes evidencing the december 2024 bonus decision. The request for board minutes evidencing the was raised on 2026-06-20 with the seller - company secretary and material was provided on 2026-07-08, leaving the item received - insufficient. For board minutes evidencing the, the reviewer confirmed the counterparty is not a related party before accepting the document at face value. At the cut-off,, the minutes record the decision but not the plan terms, so the reviewer relies on management's representation that the bonus remained available. Taken alone, the seller - credit control holds IR-049, customer credit and unapplied cash listing at 2026-06-30, requested 2026-06-24. On the balance,, the listing supported the customer credit balance treated as debt-like and reconciled to the aged receivable report. On customer credit and unapplied, as at the date of this file material was provided on 2026-07-03 and the item is closed. For customer credit and unapplied, the reviewer recorded the inquiry response and the name of the respondent alongside the document reference.

Schedule 2.6 - Receivable, payable and inventory days by month

Month	Receivables ($)	Unbilled ($)	DSO (days)	DPO (days)	DIO (days)	Cash cycle (days)	Comment
2024-01	4,252,122	1,616,144	66	39	56	83	Improved after the credit control change
2024-02	4,312,108	1,677,985	45	59	77	63	Inventory build

Month	Receivables ($)	Unbilled ($)	DSO (days)	DPO (days)	DIO (days)	Cash cycle (days)	Comment
							ahead of a phase release
2024-03	5,525,080	2,368,792	45	40	58	63	Payables stretched at the period end
2024-04	6,369,718	1,446,709	59	60	71	70	Inventory build ahead of a phase release
2024-05	4,559,707	1,055,700	68	49	95	114	Inventory build ahead of a phase release
2024-06	3,184,525	1,408,149	44	58	77	63	Inventory build ahead of a phase release
2024-07	3,834,863	1,225,220	38	44	118	112	Improved after the credit control change
2024-08	6,385,699	1,221,920	39	59	61	41	Distorted by a single milestone invoice
2024-09	6,025,865	2,250,670	73	46	101	128	Elevated by two late enterprise settlements
2024-10	6,785,867	1,961,400	73	60	80	93	Elevated by two late enterprise settlements
2024-11	5,452,913	643,703	41	57	85	69	Inventory build ahead of a phase release
2024-12	4,814,557	2,252,146	61	43	80	98	Within the trailing average
2025-01	3,520,689	1,130,254	69	53	57	73	Improved after the credit control change
2025-02	5,292,903	1,664,558	71	47	73	97	Inventory build ahead of a phase release
2025-03	6,327,407	2,027,345	70	35	100	135	Distorted by a single milestone invoice
2025-04	3,592,502	1,344,381	44	47	80	77	Within the trailing average
2025-05	4,066,127	2,206,013	67	54	90	103	Elevated by two late enterprise settlements
2025-06	5,363,186	749,626	50	37	69	82	Distorted by a single milestone invoice
2025-07	3,335,411	2,376,535	60	55	83	88	Inventory build ahead of a phase release
2025-08	3,384,486	1,683,622	41	59	54	36	Inventory build ahead of a phase release
2025-09	4,732,810	1,589,051	73	32	67	108	Distorted by a single milestone invoice
2025-10	4,145,578	733,377	57	30	104	131	Payables stretched at the period end
2025-11	4,053,890	1,817,513	70	57	112	125	Improved after the credit control change

Month	Receivables ($)	Unbilled ($)	DSO (days)	DPO (days)	DIO (days)	Cash cycle (days)	Comment
2025-12	6,692,218	2,011,324	41	45	86	82	Within the trailing average
2026-01	6,486,599	2,176,102	64	57	82	89	Improved after the credit control change
2026-02	3,358,029	1,205,830	56	33	90	113	Distorted by a single milestone invoice
2026-03	3,372,028	750,988	72	56	115	131	Improved after the credit control change
2026-04	3,249,610	905,391	74	36	106	144	Distorted by a single milestone invoice
2026-05	5,515,003	1,259,064	61	38	106	129	Elevated by two late enterprise settlements
2026-06	6,077,715	639,767	64	61	47	50	Improved after the credit control change

9. Limitations, unresolved matters and what a reader must not infer

The limitations below are stated in the file rather than in a covering letter, because each one attaches to a specific conclusion elsewhere in this document. On this point,, legal accruals rest on counsel's written estimates rather than on invoices, and the reviewer has not independently assessed the likely outcome of any matter. In the event,, management represented that no undisclosed related-party arrangements exist beyond the sublease and the management fee identified in the ledger.

Per the workpaper,, the chart of accounts was re-mapped in July 2025, and every trend presented here uses the later mapping applied retrospectively so that period comparisons are on a consistent basis. On the papers,, no financial statement for any period in scope has been audited; FY2024 and FY2025 were subject to a review engagement and the 2026 stub has had no external involvement at all. On the papers,, pro forma items are separated from normalizations so that a reader can adopt one class without accepting the other. In the file, still unresolved is IR-092, lease agreements and amendments for all leased premises, addressed to the seller - counsel and requested on 2026-07-02; material was provided on 2026-07-09. The status is recorded as closed. By reference,, the Fremont amendment supported the abatement normalization and the straight-line recomputation. For lease agreements and amendments, the reviewer recorded the inquiry response and the name of the respondent alongside the document reference.

On the balance,, management represented that the spares pool is fully counted, although the count sheets provided cover only part of the pool. On the balance,, capitalization decisions were documented at project level rather than at ticket level until the control change made in April 2026. Per the workpaper,, management represented that the pending change request on one contract will be priced at list, which cannot be tested until the change is executed. On any view, a further request, IR-111, support for the liquidated damages waiver on redbank, addressed to the seller - commercial and requested on 2026-07-07; material was provided on 2026-07-13. The status is recorded as received - under review. On this point,, the amendment accounting remains open, and both the accrual and the waiver may move between periods. For support for the liquidated, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file.

In detail,, inventory quantities rest on perpetual records because the reviewer did not observe the June 2026 count and the count sheets were only partially made available. On the merits,, no procedures were performed on income taxes beyond identifying the exposures listed, and no view is expressed on the recoverability of any deferred tax balance. On the evidence,, amounts are stated in United States dollars, with Canadian dollar balances of the Ontario deployment subsidiary translated at month-end rates taken from the company's own revaluation report. In substance, the seller - service manager holds IR-038, warranty claim detail by chassis generation, requested 2026-06-23. On the merits,, the detail supported the recalculated accrual rate and the adjustment was agreed at the lower of the two estimates. On

warranty claim detail by, as at the date of this file material was provided on 2026-07-01 and the item is closed. For warranty claim detail by, the item is presented gross so that a reader can rebuild the measure from reported results.

At the cut-off,, where a projection of error is made, it rests on the sample basis stated in the relevant schedule and is presented as a range rather than as a single figure. On any view,, related-party balances were identified from the ledger and from management inquiry; no independent search for undisclosed related parties was performed. On a second read,, fieldwork ran from 2026-06-18 to 2026-07-16 with two site visits to Fremont and one remote session with the Ontario team, and all inquiry responses are recorded with the name of the respondent. On the papers, the seller - operations holds IR-081, inventory count sheets for the june 2026 physical count, requested 2026-07-01. On the evidence,, count coverage of the spares pool cannot be confirmed, so inventory in the working capital peg rests on the perpetual records. On inventory count sheets for, as at the date of this file the response is partially received and the item is open. For inventory count sheets for, the item is retained in the file even though it does not change the conclusion, so the trail remains complete.
