FINANCIAL DILIGENCE SUPPORT - RECORD 004

Helioscope Robotics, Inc. - diligence file reference FINANCE_SUPPORT-004

1. Preparation basis, source systems and control observations

The reported figures are the output of a monthly close process with identifiable weaknesses, and this section describes that process rather than assuming it operates. In review,, because no audited financial statements exist for any period in scope, every opening balance rests on management's own records and on the review engagement's limited procedures. In the event,, no procedures were performed on income taxes beyond identifying the exposures listed, and no view is expressed on the recoverability of any deferred tax balance.

On its facts,, cash application is performed by the same person who maintains the customer master, which is what allowed an overpayment to be applied to a settled invoice. On a second read,, capitalization decisions were documented at project level rather than at ticket level until the control change made in April 2026. Per the index,, related-party balances were identified from the ledger and from management inquiry; no independent search for undisclosed related parties was performed. JE-26-0556 is a unapproved manual entry of $168,000 posted on 2026-06-30. On the papers,, a headcount annualization entry was posted at the period end with no approver and no supporting offer letters attached. On this unapproved manual entry, the amount was agreed to the underlying system extract without a residual difference. This unapproved manual entry was prepared by M. Okonjo and with no approver recorded. For this unapproved manual entry, the supporting document was produced after two requests and its late arrival is noted in the register.

In the file,, journal approval operates through a workflow field that can be left blank, and the reviewer found it blank on entries with a material aggregate value. Against the ledger,, accruals were historically raised from invoices rather than from receiving and shipping records, which is the direct cause of the cutoff errors identified. On reperformance,, management represented that all engagement letters for adviser fees exist, but two invoices remain unsupported after two requests. As to the facts, a round-dollar entry of $42,000 appears as JE-25-0142 on 2025-02-28. Against the ledger,, a round accrual for recruiting fees was posted before the search firm's invoice arrived. The invoice differed by a small amount and the accrual was trued up in March 2025; no further action required. For this round-dollar entry the preparer was L. Brantley, approved by M. Okonjo. On this round-dollar entry, the evidence was inspected in original form rather than as a management-prepared summary.

On the evidence,, subsequent events to 2026-07-16 were reviewed only for their bearing on balances and periods within scope. In substance,, consolidation covers the parent and the Ontario deployment subsidiary; the dormant Delaware holding entity has no activity in the period and was excluded after inspection of its trial balance. On its facts,, contract amendments are stored in a shared drive without a register, so the reviewer built the amendment population from the contract files themselves. JE-24-1118 is a post-close adjustment of $267,500 posted on 2024-12-31. On the source,, an inventory obsolescence charge was posted eleven days after the close was declared complete. On this post-close adjustment, the item was tested twice, once in the revenue stream and once in the balance sheet stream, with the same result. This post-close adjustment was prepared by External adviser and approved by M. Okonjo. For this post-close adjustment, the item was projected across the population on the basis stated in the accompanying schedule.

2. Deferred revenue rollforward and the billing system tie-out

The disclosure requirement for opening and closing contract balances at FASB ASC 606-10-50-17 is what a buyer will expect this rollforward to support, so it is presented on that basis rather than as an internal reconciliation. In this stream,, source data was extracted from the general ledger on 2026-07-02 and from the billing platform on 2026-07-03; extracts taken after those dates were used only to confirm subsequent settlement. On reperformance,, interim balances at 2026-06-30 have not been subject to a physical inventory count observed by the reviewer; the June count sheets were requested and only partially provided.

Per the workpaper, the reviewer reperformed RS-035, the annual price escalator obligation under HC-2086, recognized in 2026-05 and tested against 2026-05. In the event,, the escalator is contractual and formulaic; the recomputed monthly amount agrees to the billing extract to within a rounding difference. No exception was recorded. On annual price escalator, the conclusion is stated at the low end of the supportable range, as the file convention requires. In the event, testing covered RS-017, the thermal validation services obligation under HC-2092, recognized in 2026-04 and

tested against 2026-05. In this stream,, revenue for the validation obligation was recognized before the six-week extension to the validation period completed. For thermal validation services the exception is classified as timing with an amount effect of $52,800. On thermal validation services, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file. Per the workpaper, under HC-2052 the hardware - site two obligation was recognized in 2025-02. On the source,, transfer was verified to an acceptance certificate signed by the customer's engineering manager on the recorded date. No exception was recorded. The workpaper for hardware - site two is RS-004, tested against 2025-02. On hardware site two, this is one of the items the seller's adviser has indicated it will contest at the closing meeting.

RS-036 covers customer overpayment applied to revenue on HC-2063. On the evidence,, an overpayment received in March 2026 was applied against an invoice already settled and released to revenue rather than held as a customer credit. On customer overpayment applied to, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction. The customer overpayment applied to revenue amount was recognized in 2026-03 and tested against None. For customer overpayment applied to revenue the exception is classified as completeness with an amount effect of $53,400. At the cut-off, under HC-2144 the fixed-fee validation obligation was recognized in 2026-06. In this stream,, the validation obligation was delivered inside the period; a pending change request for additional units remains unpriced and is disclosed. No exception was recorded. The workpaper for fixed-fee validation is RS-026, tested against 2026-06. On fixed-fee validation, the reviewer's supervisor reviewed this conclusion because it rests partly on judgment. On testing, under HC-2041 the hardware - six added units obligation was recognized in 2025-04. On the documents,, the March 2025 amendment priced the additional units at the original rate; transfer on acceptance was verified to the site acceptance certificate. No exception was recorded. The workpaper for hardware - six added units is RS-002, tested against 2025-04. On hardware six added, the reviewer recorded the inquiry response and the name of the respondent alongside the document reference.

RS-014 covers volume tier subscription on HC-2086. In the file,, the tier assumed in the estimate was achieved on actual unit counts, so no constraint adjustment arises for the quarter tested. On volume tier subscription, the document inspected is dated before the cut-off, which is what makes the period attribution defensible. The volume tier subscription amount was recognized in 2026-03 and tested against 2026-03. For volume tier subscription the exception is classified as estimate, and no amount effect could be quantified from the available support. In the event, the reviewer reperformed RS-031, the subscription ramp - contract asset obligation under HC-2173, recognized in 2025-06 and tested against 2025-06. As to the facts,, the contract asset created by the twelve-month price ramp agrees to the contract but is presented within trade receivables rather than separately. For subscription ramp - contract asset the exception is classified as presentation, and no amount effect could be quantified from the available support. On subscription ramp contract, the item was projected across the population on the basis stated in the accompanying schedule. In detail, the sample includes RS-023, the channel partner referral fee obligation under HC-2127, recognized in 2026-03 and tested against 2026-03. On the merits,, the company is not the principal for the partner-delivered deployment work, and only the referral fee is recorded. No exception was recorded. On channel partner referral fee, the document inspected is dated before the cut-off, which is what makes the period attribution defensible.

Schedule 4.1 - Deferred revenue rollforward

Month	Opening ($)	Billings ($)	Recognized ($)	Modifications ($)	Refunds ($)	Closing ($)	GL tie difference ($)
2024-01	4,182,415	2,441,720	1,624,115	(16,126)	(47,535)	4,936,359	(2,002)
2024-02	4,936,359	1,309,909	2,089,955	(6,960)	(10,263)	4,139,090	2,506
2024-03	4,139,090	1,903,060	1,106,299	69,457	(62,939)	4,942,369	3,009
2024-04	4,942,369	1,842,618	1,568,547	(41,045)	(73,248)	5,102,147	(62)
2024-05	5,102,147	2,441,028	1,407,841	(43,363)	(58,098)	6,033,873	(1,042)
2024-06	6,033,873	1,669,587	1,269,317	(143,946)	(49,537)	6,240,660	296
2024-07	6,240,660	1,888,595	1,746,980	14,620	(54,594)	6,342,301	(1,844)
2024-08	6,342,301	1,545,237	1,307,529	23,092	(65,487)	6,537,614	(1,180)
2024-09	6,537,614	1,771,696	1,936,859	60,120	(19,957)	6,412,614	3,278
2024-10	6,412,614	1,350,322	2,199,370	(119,072)	(39,108)	5,405,386	3,318
2024-11	5,405,386	1,225,966	1,815,684	(124,865)	(58,926)	4,631,877	685
2024-12	4,631,877	1,805,787	1,210,620	(121,769)	(13,683)	5,091,592	(793)
2025-01	5,091,592	1,877,735	1,819,520	(52,102)	(4,996)	5,092,709	(552)
2025-02	5,092,709	1,492,994	2,228,680	(17,341)	(72,666)	4,267,016	1,632
2025-03	4,267,016	1,327,157	1,294,054	(68,401)	(60,022)	4,171,696	3,365

Month	Opening ($)	Billings ($)	Recognized ($)	Modifications ($)	Refunds ($)	Closing ($)	GL tie difference ($)
2025-04	4,171,696	2,457,974	2,040,075	(64,117)	(844)	4,524,634	(2,213)
2025-05	4,524,634	2,329,646	1,597,653	(85,153)	(50,419)	5,121,055	(2,459)
2025-06	5,121,055	1,732,018	1,636,535	33,998	(36,618)	5,213,918	2,891
2025-07	5,213,918	1,929,085	2,063,330	(41,390)	(55,949)	4,982,334	(1,959)
2025-08	4,982,334	1,843,950	1,703,812	(20,090)	(43,985)	5,058,397	1,485
2025-09	5,058,397	1,828,620	1,281,890	(27,738)	(65,016)	5,512,373	1,774
2025-10	5,512,373	2,386,491	1,373,890	(79,470)	(5,599)	6,439,905	2,065
2025-11	6,439,905	1,533,563	1,199,684	53,066	(2,047)	6,824,803	(120)
2025-12	6,824,803	2,234,338	1,944,998	62,047	(60,305)	7,115,885	902

3. Identifying obligations in the subscription, hardware and services model

The three revenue streams behave differently in time, so the first question in every file is how many obligations a contract contains and what each is worth. From the extract,, warranty accrual rates had not been refreshed since 2023 because no owner was assigned to the review of the underlying assumption. In review,, management represented that the spares pool is fully counted, although the count sheets provided cover only part of the pool.

Against the ledger, the obligation analysis covers HC-2069 with Fathom Mobility, signed 2024-11-21 for 30 months and carrying contracted hardware of $918,500, annual subscription value of $486,000 and a deployment fee of $124,000. Against the ledger,, one retrofit site with hardware transferring in two tranches, a subscription that begins at first tranche go-live, and an integration obligation delivered by a subcontractor. On Fathom Mobility, the reviewer confirmed that the same item does not also appear on the net debt schedule. The extended warranty was not evaluated as a separate obligation; management asserted immateriality without quantifying it. Under Fathom Mobility, the item was selected for testing because of its characteristics rather than its size. Taken alone, Vantage Cold Storage contracted under HC-2144 on 2026-04-07. Per the index,, hardware, subscription and a validation obligation similar in structure to the Meridian contract but with a fixed-fee validation. No amendments; a change request for additional units was pending at the cut-off and had not been priced. Commercially Vantage Cold Storage carries contracted hardware of $1,368,700, annual subscription value of $704,500 and a deployment fee of $186,500 over 36 months. The pending change request is disclosed as an open item because it may create variable consideration in the period after the cut-off. Under Vantage Cold Storage, the reviewer notes that management agreed the facts while reserving its position on the treatment. HC-2127 (Saltmarsh Logistics) runs 36 months from 2026-01-09. Per the index,, two obligations only: hardware on acceptance and a subscription, with deployment performed by a channel partner under a separate agreement. Under Saltmarsh Logistics, the item was raised in the interim update and is carried forward unchanged into this file. Saltmarsh Logistics carries contracted hardware of $1,246,900, annual subscription value of $668,400 and a deployment fee of $174,000 across the contracted term. No amendments to date; the channel partner agreement was amended in March 2026 to change the referral fee. Testing confirmed the company is not the principal for the deployment work and records only the referral fee net, which the reviewer accepted.

HC-2168 (Ashcombe Beverage Distribution) runs 36 months from 2024-10-30. In substance,, across Ashcombe Beverage Distribution, this is one of the items the seller's adviser has indicated it will contest at the closing meeting. Hardware and subscription with a deployment obligation performed partly by the customer's engineering team under supervision. Under Ashcombe Beverage Distribution, the conclusion rests on a document produced by a third party rather than by the company. Ashcombe Beverage Distribution carries contracted hardware of $1,324,600, annual subscription value of $682,900 and a deployment fee of $178,000 across the contracted term. A September 2025 amendment reduced the supervision scope and refunded part of the deployment fee. The refund was recorded as a reduction of revenue in the month of payment rather than in the periods the fee had been recognized. Against the ledger, Yarrow Distribution Partners contracted under HC-2156 on 2026-06-04. On reperformance,, signed within the final month of the review period, with no revenue recognized by the cut-off and a deployment fee invoiced in advance. No amendments; the advance invoice creates a deferred revenue balance that was traced into the closing rollforward. Commercially Yarrow Distribution Partners carries contracted hardware of $1,582,300, annual subscription value of $786,200 and a deployment fee of $214,500 over 36 months. Because no performance had occurred, the entire invoice should sit in deferred revenue; testing confirmed it does. Under Yarrow Distribution Partners, the reviewer notes that management agreed the facts while reserving its position on the treatment. By agreement, Harborline Systems contracted under HC-2081 on 2025-03-08. By agreement,, a proof-of-concept converted to a production contract, with the original pilot fee credited against the first

production invoice. The conversion in November 2025 was documented as a new contract rather than a modification, which changes how the credited pilot fee is treated. Commercially Harborline Systems carries contracted hardware of $486,900, annual subscription value of $264,000 and a deployment fee of $74,500 over 18 months. Pilot fees were recognized on invoice eleven weeks before the service window began, which the reviewer adjusted. Under Harborline Systems, the reviewer checked whether the same condition arises in the other periods reviewed and reported the result.

HC-2104 (Oakhurst Parts Group) runs 30 months from 2025-08-29. On the evidence,, across Oakhurst Parts Group, the reviewer noted the item for the closing meeting agenda because the seller had not seen the analysis before fieldwork. Hardware transfers on delivery with installation by the customer's own contractor, so the deployment obligation is limited to remote commissioning support. Under Oakhurst Parts Group, the document inspected is dated before the cut-off, which is what makes the period attribution defensible. Oakhurst Parts Group carries contracted hardware of $1,142,800, annual subscription value of $596,400 and a deployment fee of $158,500 across the contracted term. A June 2026 amendment brought installation back in scope for a second site at a separately negotiated fee. For Oakhurst Parts Group, the direction of this item is unfavourable to the seller and it is reported on the same basis as the favourable items. On the documents, also within scope is HC-2098 with Northfield Grocers, signed 2025-07-11 for 24 months and carrying contracted hardware of $764,300, annual subscription value of $412,600 and a deployment fee of $108,000. On a second read,, two stores take a compact picking cell each, on a bundled monthly fee with no separate hardware invoice. The bundled structure was unchanged; a side letter in December 2025 added an early termination right after month eighteen. Because the fee is bundled, allocation depends entirely on estimated standalone selling prices; the estimate has not been refreshed since contract inception. Under Northfield Grocers, the reviewer compared the item with the equivalent balance in the prior period before reaching a view. On the substance, Kadence Industrial Holdings contracted under HC-2086 on 2025-04-24. Read narrowly,, the largest contract in the population: five facilities, staged hardware transfer, a master subscription with volume tiers, and a managed deployment obligation with a dedicated crew. Three amendments across 2025 and 2026 adjusted the facility sequence, added a spare parts pool and introduced an annual price escalator. Commercially Kadence Industrial Holdings carries contracted hardware of $4,128,700, annual subscription value of $2,046,500 and a deployment fee of $612,000 over 60 months. Volume tier pricing creates variable consideration; management estimated the tier achieved rather than constraining to the minimum, and the estimate was tested against actual unit counts. Under Kadence Industrial Holdings, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction.

Schedule 4.2 - Trial balance to management report tie-out

Account	Description	Statutory ledger ($)	Management report ($)	Difference ($)	Reason
4010	Subscription revenue	3,964,690	3,965,089	399	Memo adjustment posted in the management ledger
4020	Hardware revenue	475,515	471,009	(4,506)	Timing of the July mapping change
4030	Deployment services revenue	4,063,409	4,062,324	(1,085)	Management reclassification reversed
4040	Training and onboarding revenue	1,760,638	1,763,523	2,885	Agrees without difference
4050	Analytics module revenue	4,843,004	4,842,634	(370)	Memo adjustment posted in the management ledger
4090	Service credits	4,295,059	4,293,129	(1,930)	Cut-off entry posted after the extract
5010	Chassis and drive assemblies	1,418,802	1,422,912	4,110	Memo adjustment posted in the management ledger
5020	Sensor and vision modules	2,155,729	2,157,078	1,349	Cut-off entry posted after the extract
5030	Scrap and yield loss	1,467,607	1,466,007	(1,600)	Timing of the July mapping change
5040	Rework and refurbishment	4,509,514	4,505,141	(4,373)	Allocation applied only in management reporting
5110	Hosting compute	3,333,009	3,334,862	1,853	Timing of the July mapping change

Account	Description	Statutory ledger ($)	Management report ($)	Difference ($)	Reason
5120	Storage and retention	2,937,821	2,938,032	211	Rounding in the reporting pack
5130	Data egress	2,519,998	2,522,886	2,888	Timing of the July mapping change
5210	Deployment crew wages	2,788,479	2,786,608	(1,871)	Timing of the July mapping change
5220	Travel and per diem	2,031,486	2,029,404	(2,082)	Allocation applied only in management reporting
5230	Subcontracted installation	4,768,682	4,772,643	3,961	Memo adjustment posted in the management ledger
5310	Warranty parts	3,751,902	3,755,310	3,408	Management reclassification reversed
5320	Spares carrying cost	3,456,770	3,456,558	(212)	Rounding in the reporting pack
5410	Inbound freight	4,003,949	4,007,048	3,099	Management reclassification reversed
5420	Outbound freight	429,031	427,216	(1,815)	Cut-off entry posted after the extract
5430	Customs duty and brokerage	1,700,302	1,701,447	1,145	Agrees without difference
6110	Engineering salaries	1,306,178	1,310,550	4,372	Memo adjustment posted in the management ledger
6120	Capitalized development	3,560,901	3,563,595	2,694	Agrees without difference
6210	Sales salaries	2,335,130	2,331,872	(3,258)	Rounding in the reporting pack
6220	Sales commissions	4,409,901	4,411,508	1,607	Timing of the July mapping change
6230	Marketing and events	3,517,582	3,520,139	2,557	Cut-off entry posted after the extract
6310	General and administrative	2,595,426	2,591,264	(4,162)	Rounding in the reporting pack
6320	Professional fees	2,371,868	2,367,591	(4,277)	Agrees without difference
6330	Insurance	3,777,875	3,778,503	628	Management reclassification reversed
6410	Vehicle costs	4,602,431	4,601,337	(1,094)	Memo adjustment posted in the management ledger
6455	Club and membership dues	2,336,656	2,331,960	(4,696)	Management reclassification reversed
6510	Occupancy - Fremont	2,546,541	2,547,256	715	Rounding in the reporting pack
6520	Occupancy - sublease	700,217	698,910	(1,307)	Agrees without difference
6610	Share-based compensation	1,043,290	1,046,990	3,700	Rounding in the reporting pack
6710	Depreciation - tooling	3,158,968	3,155,062	(3,906)	Timing of the July mapping change
6720	Depreciation - fleet	3,573,247	3,568,882	(4,365)	Timing of the July mapping change
7010	Interest expense	3,235,924	3,235,863	(61)	Rounding in the reporting pack
7020	Other income - grants	3,553,778	3,552,937	(841)	Memo adjustment posted in the management ledger
7030	Foreign exchange	3,349,171	3,351,095	1,924	Timing of the July mapping change
7040	Research credits	841,263	838,565	(2,698)	Rounding in the reporting pack

4. Sample selection, coverage and exceptions found

The reviewer records the outcome of every selected item, including those with no exception, because a workpaper that lists only failures cannot support a projection. On testing,, management represented that the retention-contingent portion of the deferred consideration is genuinely contingent, and the retention agreements have only partly been provided. On any view,, the engagement is analytical and evidence-based rather than an audit, a review or an examination, and no opinion or assurance conclusion is expressed on any period or balance.

RS-004 covers hardware - site two on HC-2052. Per the workpaper,, transfer was verified to an acceptance certificate signed by the customer's engineering manager on the recorded date. On hardware site two, a sensitivity was run on the principal assumption and the range is disclosed in the accompanying schedule. The hardware - site two amount was recognized in 2025-02 and tested against 2025-02. No exception was recorded. In this stream, under HC-2144 the fixed-fee validation obligation was recognized in 2026-06. On inspection,, the validation obligation was delivered inside the period; a pending change request for additional units remains unpriced and is disclosed. No exception was recorded. The workpaper for fixed-fee validation is RS-026, tested against 2026-06. On fixed-fee validation, no projection was made from this item because it arises from a single identifiable event. On inspection, the population yielded RS-008, the onboarding and operator training obligation under HC-2063, recognized in 2025-01 and tested against 2025-01. In detail,, training delivery was evidenced by attendance sheets for three sessions falling inside the recorded month. No exception was recorded. On onboarding and operator training, the item is retained in the file even though it does not change the conclusion, so the trail remains complete.

RS-005 covers hardware - site three on HC-2052. On a second read,, the acceptance certificate is undated and the installer's log shows completion in the final week of December, one month before revenue was recorded. On hardware site three, the reviewer recorded that no comparable item was found in the two earlier periods examined. The hardware - site three amount was recognized in 2026-01 and tested against 2025-12. For hardware - site three the exception is classified as timing with an amount effect of $142,600. On inspection, under HC-2052 the purchased conversion of leased units obligation was recognized in 2026-01. On its facts,, twelve leased units converted to purchased units in January 2026; the residual lease liability was released to revenue rather than against the receivable. For purchased conversion of leased units the exception is classified as modification with an amount effect of $32,600. The workpaper for purchased conversion of leased units is RS-033, tested against 2026-01. On purchased conversion of leased, a small residual difference remains and is reported rather than described as immaterial and omitted. Against the ledger, sample coverage extends to RS-019, the hardware on delivery obligation under HC-2104, recognized in 2025-09 and tested against 2025-09. In detail,, because installation is performed by the customer's contractor, transfer occurs on delivery; the delivery receipt supports the recorded date. No exception was recorded. On hardware on delivery, the explanation offered was plausible and was still corroborated against a document before being accepted.

On any view, under HC-2162 the hosted analytics module obligation was recognized in 2026-01. On the documents,, the December 2025 amendment was accounted for prospectively; the remaining goods and services are distinct, so prospective treatment is supportable. For hosted analytics module the exception is classified as modification, and no amount effect could be quantified from the available support. The workpaper for hosted analytics module is RS-029, tested against 2026-01. On hosted analytics module, the item is presented gross so that a reader can rebuild the measure from reported results. RS-027 covers conversion option on HC-2150. Taken alone,, the conversion option is priced at the standard rate, so no material right arises and no consideration is allocated to it. On conversion option, the reviewer notes that management agreed the facts while reserving its position on the treatment. The conversion option amount was recognized in 2026-06 and tested against 2026-06. No exception was recorded. In this stream, under HC-2063 the customer overpayment applied to revenue obligation was recognized in 2026-03. As matters stand,, an overpayment received in March 2026 was applied against an invoice already settled and released to revenue rather than held as a customer credit. For customer overpayment applied to revenue the exception is classified as completeness with an amount effect of $53,400. The workpaper for customer overpayment applied to revenue is RS-036, tested against None. On customer overpayment applied to, the conclusion rests on a document produced by a third party rather than by the company.

Schedule 4.3 - Revenue recognition sample results

Sample	Contract	Invoice	Performance obligation	Recognized period	Tested period	Exception	Amount effect ($)
RS-001	HC-2041	INV-8856	Commissioning services	2025-03	2025-05	Timing	68,400
RS-002	HC-2041	INV-8636	Hardware - six added units	2025-04	2025-04	None	0
RS-004	HC-2052	INV-8703	Hardware - site two	2025-02	2025-02	None	0
RS-005	HC-2052	INV-8914	Hardware - site three	2026-01	2025-12	Timing	142,600
RS-008	HC-2063	INV-8766	Onboarding and operator training	2025-01	2025-01	None	0
RS-009	HC-2063	INV-8732	Subscription - unit count reduction	2025-08	2025-07	Timing	34,800
RS-010	HC-2069	INV-8947	Extended warranty	2026-02	2026-02	Judgment	0
RS-011	HC-2074	INV-8868	Layout simulation	2025-02	2025-02	None	0
RS-012	HC-2074	INV-8717	Service level credit accrual	2025-11	2025-09	Variable consideration	46,200
RS-014	HC-2086	INV-8783	Volume tier subscription	2026-03	2026-03	Estimate	0
RS-015	HC-2086	INV-8896	Spare parts pool	2025-12	2025-12	Allocation	28,400

RS-017	HC-2092	INV-8821	Thermal validation services	2026-04	2026-05	Timing	52,800
RS-018	HC-2098	INV-8849	Bundled monthly fee	2025-10	2025-10	Estimate	0
RS-020	HC-2109	INV-8750	Discounted unit option	2026-04	2026-04	Judgment	0
RS-021	HC-2115	INV-8780	Onboarding - four week programme	2025-11	2025-11	None	0
RS-022	HC-2121	INV-8763	Liquidated damages waiver	2026-04	2025-12	Variable consideration	78,500
RS-026	HC-2144	INV-8644	Fixed-fee validation	2026-06	2026-06	None	0
RS-027	HC-2150	INV-8931	Conversion option	2026-06	2026-06	None	0
RS-028	HC-2156	INV-8851	Deployment fee invoiced in advance	None	2026-06	None	0
RS-030	HC-2168	INV-8691	Deployment fee refund	2025-09	2024-11	Timing	41,200
RS-031	HC-2173	INV-8635	Subscription ramp - contract asset	2025-06	2025-06	Presentation	0
RS-034	HC-2074	INV-8690	Phase three acceleration	2026-06	2026-06	None	0
RS-035	HC-2086	INV-8878	Annual price escalator	2026-05	2026-05	None	0

5. Contract-level working capital and its behaviour through the period

Working capital in this business is created by the contracts rather than by trade terms, so the analysis starts from the contract population and not from the aged reports. On the merits,, approver fields are blank on a subset of journal entries, which prevents any conclusion on the operation of the journal approval control during the affected periods. Per the register,, consolidation covers the parent and the Ontario deployment subsidiary; the dormant Delaware holding entity has no activity in the period and was excluded after inspection of its trial balance.

On inspection, a further contract, HC-2104 with Oakhurst Parts Group, signed 2025-08-29 for 30 months and carrying contracted hardware of $1,142,800, annual subscription value of $596,400 and a deployment fee of $158,500. In substance,, hardware transfers on delivery with installation by the customer's own contractor, so the deployment obligation is limited to remote commissioning support. A June 2026 amendment brought installation back in scope for a second site at a separately negotiated fee. For Oakhurst Parts Group, a sensitivity was run on the principal assumption and the range is disclosed in the accompanying schedule. Under Oakhurst Parts Group, the reviewer's supervisor reviewed this conclusion because it rests partly on judgment. As matters stand, sample coverage extends to HC-2162 with Zephyr Retail Logistics, signed 2025-06-12 for 42 months and carrying contracted hardware of $2,064,800, annual subscription value of $998,400 and a deployment fee of $286,000. In this stream,, four obligations including a hosted analytics module sold as an add-on with its own renewal cycle. On Zephyr Retail Logistics, the reviewer recorded that no comparable item was found in the two earlier periods examined. For Zephyr Retail Logistics, the item was selected for testing because of its characteristics rather than its size. Under Zephyr Retail Logistics, reperformance used the contractual rate rather than the rate management had applied. Against the ledger, Ashcombe Beverage Distribution contracted under HC-2168 on 2024-10-30. In substance,, across Ashcombe Beverage Distribution, the item was projected across the population on the basis stated in the accompanying schedule. Hardware and subscription with a deployment obligation performed partly by the customer's engineering team under supervision. A September 2025 amendment reduced the supervision scope and refunded part of the deployment fee. Commercially Ashcombe Beverage Distribution carries contracted hardware of $1,324,600, annual subscription value of $682,900 and a deployment fee of $178,000 over 36 months. The refund was recorded as a reduction of revenue in the month of payment rather than in the periods the fee had been recognized. Under Ashcombe Beverage Distribution, the item was projected across the population on the basis stated in the accompanying schedule.

Per the register, the obligation analysis covers HC-2144 with Vantage Cold Storage, signed 2026-04-07 for 36 months and carrying contracted hardware of $1,368,700, annual subscription value of $704,500 and a deployment fee of $186,500. Against the ledger,, hardware, subscription and a validation obligation similar in structure to the Meridian contract but with a fixed-fee validation. No amendments; a change request for additional units was pending at the cut-off and had not been priced. The pending change request is disclosed as an open item because it may create variable consideration in the period after the cut-off. Under Vantage Cold Storage, the conclusion is stated at the low end of the supportable range, as the file convention requires. HC-2133 (Thornbury Wholesale) runs 30 months from 2026-02-20. On this point,, hardware, subscription and a training obligation delivered in three sessions across the first quarter of service. Under Thornbury Wholesale, the reviewer recorded the amount as computed rather than as rounded, so the schedule footings agree. Thornbury Wholesale carries contracted hardware of $886,400, annual subscription value of $458,900 and a deployment fee of $118,500 across the contracted term. On Thornbury Wholesale, the reviewer declined to net this item against another with an opposite direction in the same period. One training session had not been delivered at the cut-off but the full fee was recognized; the exception was quantified and posted. HC-2109 (Pinecrest Retail Services) runs 36 months from 2025-09-17. On a second read,, three obligations plus an option for additional units at a discount that testing evaluated as a potential material right. Under Pinecrest Retail Services, no further procedures were considered necessary once the source document had been inspected. Pinecrest Retail Services carries contracted hardware of $1,684,500, annual subscription value of $824,200 and a deployment fee of $232,000 across the contracted term. On Pinecrest Retail Services, the reviewer notes that management agreed the facts while reserving its position on the treatment. The discount was assessed as a material right; management allocated no consideration to it, and the reviewer left this as an open judgment.

HC-2150 (Westbourne Grocery) runs 18 months from 2026-05-19. On testing,, a short-term contract taken to test a smaller-format cell, with hardware, subscription and a minimal onboarding element. Under Westbourne Grocery, the conclusion is stated at the low end of the supportable range, as the file convention requires. Westbourne Grocery carries contracted hardware of $384,500, annual subscription value of $212,400 and a deployment fee of $54,000 across the contracted term. No amendments; the customer has an option to convert to a thirty-six month term at a stated price. For Westbourne Grocery, the supporting analysis was rebuilt from source rather than reviewed, because the calculation drives an adjustment. HC-2041 (Asterion Logistics) runs 36 months from 2024-02-14. On any view,, twenty-eight mobile units transfer on site acceptance, the fleet orchestration subscription runs monthly over the term, and a non-refundable commissioning fee covers eleven weeks of on-site work. Under Asterion Logistics, the reviewer declined to net this item

against another with an opposite direction in the same period. Asterion Logistics carries contracted hardware of $1,842,600, annual subscription value of $964,800 and a deployment fee of $214,000 across the contracted term. On Asterion Logistics, the explanation offered was plausible and was still corroborated against a document before being accepted. Testing found the commissioning fee recognized on invoice rather than across the commissioning window, moving cost and revenue into different quarters. HC-2139 (Umberland Freight) runs 24 months from 2026-03-13. In review,, across Umberland Freight, the supporting document was produced after two requests and its late arrival is noted in the register. A retrofit contract where existing customer equipment is integrated, so the hardware element is smaller and the services element larger than the population average. Under Umberland Freight, this item is one of the few in the file where the seller's and the reviewer's figures agree exactly. Umberland Freight carries contracted hardware of $618,200, annual subscription value of $342,700 and a deployment fee of $92,000 across the contracted term. No amendments; the contract includes a customer-favourable acceptance test that delayed transfer by five weeks. For Umberland Freight, the document inspected is dated before the cut-off, which is what makes the period attribution defensible.

6. Accrual completeness and cutoff testing

The pattern of exceptions here points to a single cause, and the reviewer reports the cause alongside the individual items so the projection can be understood. From the extract,, where an exception is identified, the reviewer states the population, the value tested, the coverage achieved and the projected effect before proposing any adjustment. Per the index,, the reviewer worked from the statutory ledger throughout; where management's own adjustments had been posted into the ledger they were reversed before analysis rather than accepted as reported.

On the source, also tested was AP-4744, Ashgrove Facilities, for $14,620 covering June 2026 and invoiced 2026-07-02. As to the facts,, the standing service schedule supports the accrual and no variance arose on invoice. The ledger records the cost in June 2026. For Ashgrove Facilities in June 2026, the period recorded matches the service period and no adjustment arises. On Ashgrove Facilities, the evidence was inspected in original form rather than as a management-prepared summary. As to the facts, for Corvid Metalworks the reviewer tested AP-4402 at $58,300, posted in December 2025. On the documents,, the December goods receipt was accrued from the receiving log, which the reviewer confirmed is now the source for the accrual. The service period is December 2025 against an invoice dated 2026-01-08. For Corvid Metalworks in December 2025, the period recorded matches the service period and no adjustment arises. On Corvid Metalworks, the workpaper reference and the preparer's initials are recorded in the index so the step can be reperformed. AP-4261 relates to Brightline Cloud and covers September 2025 at $96,400. By agreement,, hosting is billed monthly in arrears and the accrual matches the metered usage report for the period. On Brightline Cloud, a second preparer reperformed the arithmetic and reached the same figure to the dollar. For Brightline Cloud in September 2025, the period recorded matches the service period and no adjustment arises. The invoice is dated 2025-10-01 and the amount posted in September 2025.

AP-4438 relates to Wetherby Freight Services and covers December 2025 at $27,315. Per the index,, the duplicated November freight accrual reversed here, so December cost is understated and November overstated. On Wetherby Freight Services, the reviewer notes that management agreed the facts while reserving its position on the treatment. For Wetherby Freight Services in December 2025, the reversal of an earlier duplication lands here, so this period is overstated and the earlier one understated. The invoice is dated 2026-01-05 and the amount posted in December 2025. In detail, for Lattimer Legal LLP the reviewer tested AP-4344 at $50,000, posted in September 2025. In review,, a round accrual was raised without an invoice; counsel's later statement differed by an immaterial amount left uncorrected. The service period is August-September 2025 against an invoice dated 2025-10-20. For Lattimer Legal LLP in August-September 2025, the amount rests on an estimate rather than an invoice, and the estimate was corroborated during fieldwork. On Lattimer Legal LLP, this item was discussed with the controller on the second day of fieldwork and the explanation is recorded as given. As matters stand, testing selected AP-4371, Ashgrove Facilities, for $12,840 covering September 2025 and invoiced 2025-10-03. In detail,, cleaning and facilities charges are recurring and were accrued from the standing service schedule. The ledger records the cost in September 2025. For Ashgrove Facilities in September 2025, the period recorded matches the service period and no adjustment arises. On Ashgrove Facilities, the reviewer confirmed that the same item does not also appear on the net debt schedule.

AP-4288 relates to Sandhill Staffing and covers September 2025 at $34,720. Per the index,, agency technician hours for the final week of September were invoiced late and no accrual was raised. On Sandhill Staffing, the item is

presented gross so that a reader can rebuild the measure from reported results. For Sandhill Staffing in September 2025, cost belonging to the earlier period was recorded later, so the earlier period is understated. The invoice is dated 2025-10-14 and the amount posted in October 2025. On any view, for Sandhill Staffing the reviewer tested AP-4522 at $46,900, posted in March 2026. Per the workpaper,, agency hours are now accrued from the timekeeping export rather than from invoices, and the March accrual agrees. The service period is March 2026 against an invoice dated 2026-04-09. For Sandhill Staffing in March 2026, the period recorded matches the service period and no adjustment arises. On Sandhill Staffing, the reviewer confirmed the counterparty is not a related party before accepting the document at face value. On reperformance, fieldwork tested AP-4721, Sandhill Staffing, for $22,180 covering June 2026 and invoiced 2026-07-08. In substance,, two technicians' final week was invoiced after the cut-off and not accrued, which is the same pattern seen in September 2025. The ledger records the cost in July 2026. For Sandhill Staffing in June 2026, cost belonging to the earlier period was recorded later, so the earlier period is understated. On Sandhill Staffing, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction.

On reperformance, a further voucher, AP-4766, Northline Customs Brokers, for $26,940 covering June 2026 and invoiced 2026-07-10. On the papers,, brokerage was accrued from the June import entries after the control change made in February 2026. The ledger records the cost in June 2026. For Northline Customs Brokers in June 2026, the period recorded matches the service period and no adjustment arises. On Northline Customs Brokers, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file. On testing, the reviewer examined AP-4611, Meridian Insurance Brokers, for $31,200 covering Annual policy and invoiced 2026-04-22. As to the facts,, a premium refund was credited to expense rather than deferred across the replacement policy term. The ledger records the cost in March 2026. For Meridian Insurance Brokers in Annual policy, the amount is in the right period but the wrong caption, and the reclassification was made in the analysis. On Meridian Insurance Brokers, the supporting analysis was rebuilt from source rather than reviewed, because the calculation drives an adjustment. On the evidence, a further voucher, AP-4491, Brightline Cloud, for $118,600 covering December 2025 and invoiced 2026-01-02. By reference,, the accrual reflects the metered usage report including the migration overlap period. The ledger records the cost in December 2025. For Brightline Cloud in December 2025, the period recorded matches the service period and no adjustment arises. On Brightline Cloud, the reviewer notes that management agreed the facts while reserving its position on the treatment.

Schedule 4.4 - Unbilled receivables and deposits by milestone

Contract / customer	Milestone	Unbilled ($)	Deposit held ($)	Billing trigger	Expected billing	Risk note
HC-2173 / Brackenridge Supply	Installation complete	158,712	24,768	Customer sign-off on the milestone certificate	2026-10	Trigger depends on a customer-controlled test
HC-2074 / Granite Peak Distribut	Final handover signed	208,871	40,704	Issue of the quarterly subscription invoice	2026-10	Milestone certificate not yet countersigned
HC-2144 / Vantage Cold Storage	Layout simulation delivered	105,958	143,528	Customer sign-off on the milestone certificate	2026-07	Trigger depends on a customer-controlled test
HC-2074 / Granite Peak Distribut	Installation complete	365,609	71,759	Acceptance test certificate	Awaiting sign-off	Milestone certificate not yet countersigned
HC-2058 / Dunbar Industrial	Site survey accepted	232,450	98,835	Acceptance test certificate	Awaiting sign-off	Milestone certificate not yet countersigned
HC-2086 / Kadence Industrial Hol	Operator training delivered	258,662	49,387	Acceptance test certificate	2026-08	Deposit exceeds work performed to date
HC-2063 / Evergreen Warehousing	Operator training delivered	199,205	1,902	Completion of the stabilization window	Awaiting sign-off	No risk identified; routine timing
HC-2086 / Kadence Industrial Hol	Go-live confirmed	58,854	52,588	Acceptance test certificate	2026-08	Deposit exceeds work performed to date
HC-2144 / Vantage Cold Storage	Hardware delivered to site	194,126	23,635	Customer sign-off on the milestone certificate	2026-10	Deposit exceeds work performed to date
HC-2086 /	Final handover	145,582	84,473	Acceptance test	2026-08	Billing blocked

Contract / customer	Milestone	Unbilled ($)	Deposit held ($)	Billing trigger	Expected billing	Risk note
Kadence Industrial Hol	signed			certificate		pending an amendment
HC-2092 / Meridian Cold Chain	Layout simulation delivered	151,723	24,676	Issue of the quarterly subscription invoice	2026-07	No risk identified; routine timing
HC-2041 / Asterion Logistics	Customer acceptance test passed	294,587	39,110	Delivery receipt countersigned at site	Awaiting sign-off	Billing blocked pending an amendment
HC-2104 / Oakhurst Parts Group	Thirty-day stabilization complete	189,382	75,441	Completion of the stabilization window	2026-10	Ageing beyond ninety days without billing
HC-2115 / Quarrybrook Fulfilment	Go-live confirmed	204,136	70,623	Customer sign-off on the milestone certificate	2026-09	Billing blocked pending an amendment
HC-2150 / Westbourne Grocery	Customer acceptance test passed	306,334	120,805	Issue of the quarterly subscription invoice	2026-08	Milestone certificate not yet countersigned
HC-2127 / Saltmarsh Logistics	Customer acceptance test passed	104,992	8,496	Customer sign-off on the milestone certificate	2026-10	Trigger depends on a customer-controlled test
HC-2162 / Zephyr Retail Logistic	Hardware delivered to site	157,999	31,706	Acceptance test certificate	Awaiting sign-off	No risk identified; routine timing
HC-2041 / Asterion Logistics	Hardware delivered to site	245,044	91,262	Customer sign-off on the milestone certificate	2026-09	Ageing beyond ninety days without billing
HC-2150 / Westbourne Grocery	Final handover signed	318,322	79,753	Customer sign-off on the milestone certificate	2026-10	Billing blocked pending an amendment
HC-2144 / Vantage Cold Storage	Site survey accepted	295,595	40,729	Delivery receipt countersigned at site	Awaiting sign-off	Milestone certificate not yet countersigned
HC-2162 / Zephyr Retail Logistic	Site survey accepted	280,426	73,054	Acceptance test certificate	2026-10	Trigger depends on a customer-controlled test
HC-2144 / Vantage Cold Storage	Thirty-day stabilization complete	23,547	132,222	Delivery receipt countersigned at site	Awaiting sign-off	Billing blocked pending an amendment
HC-2069 / Fathom Mobility	Layout simulation delivered	309,584	46,228	Elapsed time from go-live	Awaiting sign-off	Trigger depends on a customer-controlled test
HC-2104 / Oakhurst Parts Group	Hardware delivered to site	189,194	20,457	Acceptance test certificate	2026-09	Milestone certificate not yet countersigned
HC-2121 / Redbank Distribution	Layout simulation delivered	148,481	62,281	Completion of the stabilization window	Awaiting sign-off	Billing blocked pending an amendment
HC-2058 / Dunbar Industrial	Layout simulation delivered	191,876	127,506	Issue of the quarterly subscription invoice	2026-09	No risk identified; routine timing

7. Manual, round-dollar and post-close entries

The journal population was stratified before selection, and the strata were chosen for the characteristics that correlate with error rather than for value alone. On a second read,, management represented that the retention-contingent portion of the deferred consideration is genuinely contingent, and the retention agreements have only partly been provided. On a second read,, related-party balances were identified from the ledger and from management inquiry; no independent search for undisclosed related parties was performed.

JE-25-0822 is a self-approved entry of $186,400 posted on 2025-08-29. On the source,, the severance accrual for the departing operations leader was prepared and approved by the same person. On this self-approved entry, a sensitivity was run on the principal assumption and the range is disclosed in the accompanying schedule. This self-approved entry was prepared by R. Calloway and approved by R. Calloway. The separation agreement supports the amount; the control

exception is reported without a monetary adjustment. In detail, the exception log records JE-26-0563, posted 2026-06-30 by R. Calloway approved by R. Calloway, for $121,000 and classified as a self-approved entry. On the balance,, the hosting savings memo adjustment was posted into the management ledger by its own preparer. Removed from the statutory view; the contractual portion of the saving is carried on the adjustment schedule instead. On this self-approved entry, a small residual difference remains and is reported rather than described as immaterial and omitted. JE-26-0207 is a credit to expense of $31,200 posted on 2026-03-02. Against the ledger,, a cargo insurance premium refund was credited to insurance expense rather than being deferred over the replacement policy. On this credit to expense, the reviewer compared the item with the equivalent balance in the prior period before reaching a view. This credit to expense was prepared by L. Brantley and approved by M. Okonjo. The credit was removed from the measured period because coverage cost did not actually fall.

As to the facts, a post-close adjustment of $142,650 appears as JE-25-1288 on 2025-12-31. On testing,, rework campaign scrap was reclassified between cost lines nine days after the close was declared final. The reclassification is supported by work order types; the reviewer used the same split in the margin analysis. For this post-close adjustment the preparer was External adviser, approved by M. Okonjo. On this post-close adjustment, the reviewer checked whether the same condition arises in the other periods reviewed and reported the result. On inspection, a credit to expense of $96,800 appears as JE-26-0134 on 2026-02-13. Per the workpaper,, a research credit relating to two earlier years was credited to expense when the refund was received. For this credit to expense, the file records the question asked, the answer given and the document that settled it. For this credit to expense the preparer was M. Okonjo, approved by T. Vasquez. On this credit to expense, the item is presented gross so that a reader can rebuild the measure from reported results. JE-25-1174 is a credit memorandum of $118,700 posted on 2025-11-28. Per the register,, a service credit to a major account was posted as a reduction of revenue rather than as a contract liability. On this credit memorandum, the reviewer asked for the underlying system report and worked from that rather than from the extract provided. This credit memorandum was prepared by M. Okonjo and approved by T. Vasquez. For this credit memorandum, the reviewer's conclusion here differs from the position taken in the seller's own vendor material.

On the merits, a unapproved manual entry of $148,600 appears as JE-24-0418 on 2024-03-31. Per the register,, a revenue reclassification posted on the last day of the quarter carries no approver in the workflow log. Management provided the supporting analysis after the fact; the control failure is reported and the amount was verified as correct. For this unapproved manual entry the preparer was R. Calloway, with no approver recorded. On this unapproved manual entry, this is one of the items the seller's adviser has indicated it will contest at the closing meeting. JE-26-0163 is a pro forma entry in the ledger of $92,400 posted on 2026-02-27. In substance,, a contractor conversion saving was posted into the management ledger rather than being kept as a memo adjustment. On this pro forma entry in, the reviewer recorded the amount as computed rather than as rounded, so the schedule footings agree. This pro forma entry in the ledger was prepared by T. Vasquez and approved by M. Okonjo. For this pro forma entry in, no projection was made from this item because it arises from a single identifiable event. By reference, the reviewer examined JE-25-0517, posted 2025-05-30 by L. Brantley approved by M. Okonjo, for $62,400 and classified as a entry by an unexpected preparer. On the documents,, a revenue entry was prepared by a member of the sales operations team rather than the accounting team. The entry was correct, but preparer access rights were reviewed and narrowed in July 2025. On this entry by an unexpected, the item is retained in the file even though it does not change the conclusion, so the trail remains complete.

At the cut-off, a misapplied cash receipt of $53,400 appears as JE-26-0248 on 2026-03-31. In this stream,, an Evergreen overpayment was applied to a settled invoice and released to revenue. The reviewer reversed the release and treated the balance as a customer credit owed. For this misapplied cash receipt the preparer was M. Okonjo, approved by T. Vasquez. On this misapplied cash receipt, this is one of the items the seller's adviser has indicated it will contest at the closing meeting. As to the facts, a reserve release of $96,150 appears as JE-25-0644 on 2025-06-30. As matters stand,, the warranty reserve for a superseded gripper assembly was released to cost of sales at the half year. Release is supportable but the reviewer treats the margin benefit as a normalization item rather than as run-rate. For this reserve release the preparer was T. Vasquez, approved by M. Okonjo. On this reserve release, the reviewer noted the item for the closing meeting agenda because the seller had not seen the analysis before fieldwork. JE-24-0871 is a self-approved entry of $96,400 posted on 2024-09-30. Per the workpaper,, the preparer and approver are the same person on a quarter-end deferred revenue release. On this self-approved entry, the reviewer recorded that no comparable item was found in the

two earlier periods examined. This self-approved entry was prepared by R. Calloway and approved by R. Calloway. For this self-approved entry, reperformance used the contractual rate rather than the rate management had applied.

Schedule 4.5 - Information request register

Request	Description	Owner	Requested	Received	Status	Effect if unresolved
IR-019	Retention agreements underpinning the Larkspur earn-out	Seller - counsel	2026-06-18	Partially received	Open	The split between fixed deferred consideration and retention-contingent
IR-027	Billing system extract reconciled to the general ledger	Seller - controller	2026-06-19	2026-06-27	Closed	The extract was reconciled and the residual monthly differences are imma
IR-034	Board minutes evidencing the December 2024 bonus decisio	Seller - company secretary	2026-06-20	2026-07-08	Received - insufficient	The minutes record the decision but not the plan terms, so the reviewer
IR-038	Warranty claim detail by chassis generation	Seller - service manager	2026-06-23	2026-07-01	Closed	The detail supported the recalculated accrual rate and the adjustment wa
IR-041	Engagement letters for all adviser fees in the period	Seller - finance director	2026-06-23	Partially received	Open	Two invoices remain unsupported, so the split between transaction and or

IR-111	Support for the liquidated damages waiver on Redbank	Seller - commercial	2026-07-07	2026-07-13	Received - under review	The amendment accounting remains open, and both the accrual and the waiv

8. Outstanding requests, owners and unresolved effects

The register below is reproduced as it stood at the date of this file, including items that have been resolved, so that the diligence trail is not rewritten. On reperformance,, cash application is performed by the same person who maintains the customer master, which is what allowed an overpayment to be applied to a settled invoice. On the papers,, adjustments are presented gross with their direction stated, rather than netted, so that a reader can rebuild the measure from reported results.

Taken alone, the seller - sales operations holds IR-085, commission plan documents for all sales roles, requested 2026-07-01. On inspection,, the plans supported the commission true-up and confirmed the accrual basis the reviewer applied. On commission plan documents for, as at the date of this file material was provided on 2026-07-08 and the item is closed. For commission plan documents for, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction. IR-052 asks for bank statements for the ontario subsidiary for the full period. The request for bank statements for the was raised on 2026-06-25 with the seller - controller and the response is partially received, leaving the item open. For bank statements for the, the conclusion would change if the missing supporting document is later produced in a different form. In the event,, two months are missing, so cash proof coverage for the subsidiary is below the level applied to the parent. On this point, the reviewer requested IR-088, analysis of the pinecrest option pricing against list, addressed to the seller - revenue accountant and requested on 2026-07-02; nothing has been provided. The status is recorded as open. On reperformance,, the material right judgment stays open, and any allocation to the option would move revenue between periods. For analysis of the pinecrest, the item is retained in the file even though it does not change the conclusion, so the trail remains complete.

At the cut-off, the seller - engineering manager holds IR-045, fixed asset additions traced to underlying engineering tickets, requested 2026-06-24. On its facts,, the capitalization reclassification could change if further tickets support the treatment management applied. On fixed asset additions traced, as at the date of this file material was provided on 2026-

07-06 and the item is received - under review. For fixed asset additions traced, the evidence was inspected in original form rather than as a management-prepared summary. On the record, the seller - credit control holds IR-049, customer credit and unapplied cash listing at 2026-06-30, requested 2026-06-24. At the cut-off,, the listing supported the customer credit balance treated as debt-like and reconciled to the aged receivable report. On customer credit and unapplied, as at the date of this file material was provided on 2026-07-03 and the item is closed. For customer credit and unapplied, a sensitivity was run on the principal assumption and the range is disclosed in the accompanying schedule. IR-067 asks for supplier settlement letter for the harness rework recovery. The request for supplier settlement letter for was raised on 2026-06-29 with the seller - procurement and material was provided on 2026-07-02, leaving the item closed. For supplier settlement letter for, the direction of this item is unfavourable to the seller and it is reported on the same basis as the favourable items. Against the ledger,, the letter confirmed the recovery amount and allowed the campaign to be presented on a net basis.

IR-071 asks for aged unbilled receivable detail with billing triggers. The request for aged unbilled receivable detail was raised on 2026-06-29 with the seller - project accountant and nothing has been provided, leaving the item open. For aged unbilled receivable detail, the amount was agreed to the underlying system extract without a residual difference. On inspection,, without billing triggers the reviewer cannot distinguish unbilled amounts awaiting a milestone from those awaiting customer sign-off. IR-059 asks for hosting agreement effective 2026-04-30 with the rate card. The request for hosting agreement effective 2026-04-30 was raised on 2026-06-26 with the seller - it director and material was provided on 2026-06-30, leaving the item closed. For hosting agreement effective 2026-04-30, the item is retained in the file even though it does not change the conclusion, so the trail remains complete. Per the index,, the agreement supported the contractual portion of the hosting savings and allowed the rest to be rejected. IR-115 asks for vendor statements for the ten largest suppliers. The request for vendor statements for the was raised on 2026-07-07 with the seller - accounts payable and the response is partially received, leaving the item open. For vendor statements for the, the reviewer asked for the underlying system report and worked from that rather than from the extract provided. From the extract,, accrual completeness testing coverage falls below the planned level for three suppliers.

On reperformance, the seller - deployment lead holds IR-014, signed acceptance certificate for crestline site three, requested 2026-06-18. On the balance,, without a dated certificate the transfer month rests on the installer's log, leaving a month of hardware revenue in the wrong period. On signed acceptance certificate for, as at the date of this file nothing has been provided and the item is open. For signed acceptance certificate for, the reviewer asked for the underlying system report and worked from that rather than from the extract provided. On its facts, the information request log records IR-031, standalone selling price analysis for bundled northfield contracts, addressed to the seller - revenue accountant and requested on 2026-06-20; nothing has been provided. The status is recorded as open. By reference,, allocation for the bundled contracts cannot be independently tested, so the revenue split between obligations is unverified. For standalone selling price analysis, the reviewer checked whether the same condition arises in the other periods reviewed and reported the result. At the cut-off, the seller - hr director holds IR-063, contractor conversion offer letters and prior agency rates, requested 2026-06-26. Against the ledger,, employer tax and benefit loading on the converted population is still being confirmed, which affects the size of the run-rate deduction. On contractor conversion offer letters, as at the date of this file material was provided on 2026-07-07 and the item is received - under review. For contractor conversion offer letters, the reviewer's conclusion here differs from the position taken in the seller's own vendor material.

Schedule 4.6 - Quarterly seasonality of working capital

Quarter	Site go-lives	Billings ($)	Peak NWC ($)	Trough NWC ($)	Intra-quarter swing ($)	Principal driver
2024-Q1	12	6,248,387	5,004,296	3,954,941	1,049,355	Inventory build ahead of the following quarter
2024-Q2	13	3,930,761	5,414,228	4,115,271	1,298,957	Retail freeze delaying go-live dates
2024-Q3	9	6,070,273	6,137,216	5,006,892	1,130,324	Hardware shipments concentrated in the final month
2024-Q4	3	4,515,023	6,321,487	5,417,986	903,501	Customer capital budgets released early in the

Quarter	Site go-lives	Billings ($)	Peak NWC ($)	Trough NWC ($)	Intra-quarter swing ($)	Principal driver
						quarter
2025-Q1	14	5,203,505	5,407,477	5,051,891	355,586	Customer capital budgets released early in the quarter
2025-Q2	6	3,632,300	4,507,165	3,467,795	1,039,370	Deployment crew utilisation at seasonal peak
2025-Q3	8	6,030,482	4,855,116	3,440,729	1,414,387	Subscription renewals clustered in the quarter

9. What remains unverified at the date of this file

Readers should treat the following limitations as qualifications on the schedules in this file rather than as general disclaimer language. On the record,, recurrence is judged on evidence about the future obligation rather than on whether the cost is unusual, which is why several items management called one-time were rejected. On any view,, two months of Ontario subsidiary bank statements were not provided, so cash proof coverage for that entity is materially lower than for the parent and no projection was attempted across the gap.

On this point,, the chart of accounts was re-mapped in July 2025, and every trend presented here uses the later mapping applied retrospectively so that period comparisons are on a consistent basis. From the extract,, management represented that the second customer summit is discretionary; the reviewer inspected a signed venue contract dated before the cut-off. As to the facts,, the close calendar allows entries after the close is declared complete, and post-close entries appear in five of the ten quarter ends reviewed. On the source, the seller - accounts payable holds IR-115, vendor statements for the ten largest suppliers, requested 2026-07-07. Per the register,, accrual completeness testing coverage falls below the planned level for three suppliers. On vendor statements for the, as at the date of this file the response is partially received and the item is open. For vendor statements for the, the item was projected across the population on the basis stated in the accompanying schedule.

Per the index,, adjustments are presented gross with their direction stated, rather than netted, so that a reader can rebuild the measure from reported results. In the file,, capitalization decisions were documented at project level rather than at ticket level until the control change made in April 2026. Per the register,, interim balances at 2026-06-30 have not been subject to a physical inventory count observed by the reviewer; the June count sheets were requested and only partially provided. On the source, the seller - systems administrator holds IR-078, journal entry extract with preparer and approver fields, requested 2026-06-30. In substance,, the extract enabled the exception testing; approver fields are blank for a subset of entries, which is itself the finding. On journal entry extract with, as at the date of this file material was provided on 2026-07-04 and the item is closed. For journal entry extract with, the item was projected across the population on the basis stated in the accompanying schedule.

At the cut-off,, because no audited financial statements exist for any period in scope, every opening balance rests on management's own records and on the review engagement's limited procedures. On the documents,, pro forma items are separated from normalizations so that a reader can adopt one class without accepting the other. At the cut-off,, where a normalization depends on an assumption about future negotiation, the reviewer declines the adjustment and discloses the exposure instead. On the substance, a further request, IR-041, engagement letters for all adviser fees in the period, addressed to the seller - finance director and requested on 2026-06-23; the response is partially received. The status is recorded as open. On the evidence,, two invoices remain unsupported, so the split between transaction and ordinary-

course professional fees is provisional. For engagement letters for all, the conclusion is stated at the low end of the supportable range, as the file convention requires.

By reference,, consolidation covers the parent and the Ontario deployment subsidiary; the dormant Delaware holding entity has no activity in the period and was excluded after inspection of its trial balance. Per the register,, management represented that intercompany settlement with the Ontario entity is unrestricted, while the settlement history shows a consistent six-week lag. As to the facts,, management represented that no bonus was payable for FY2024 following a board decision, and the minutes provided record the decision but not the terms of the plan itself. On the record, the seller - sales operations holds IR-085, commission plan documents for all sales roles, requested 2026-07-01. As to the facts,, the plans supported the commission true-up and confirmed the accrual basis the reviewer applied. On commission plan documents for, as at the date of this file material was provided on 2026-07-08 and the item is closed. For commission plan documents for, the item was raised in the interim update and is carried forward unchanged into this file.
