FINANCIAL DILIGENCE SUPPORT - RECORD 009

Helioscope Robotics, Inc. - diligence file reference FINANCE_SUPPORT-009

1. Engagement scope and the periods brought into review

Scope is set out first because several of the conclusions that follow are sensitive to the period reviewed and to the extraction date of the underlying data. In this stream,, management represented that the capitalized configuration work created a lasting integration component; the ticket detail supports this for part of the amount only. On the source,, no financial statement for any period in scope has been audited; FY2024 and FY2025 were subject to a review engagement and the 2026 stub has had no external involvement at all.

On the documents,, management prepares monthly reporting on a basis that differs from the statutory ledger in three respects, each of which is identified and removed before any analysis begins. On the record,, contract amendments are stored in a shared drive without a register, so the reviewer built the amendment population from the contract files themselves. On inspection,, capitalization decisions were documented at project level rather than at ticket level until the control change made in April 2026. By reference, Asterion Logistics contracted under HC-2041 on 2024-02-14. In sequence,, twenty-eight mobile units transfer on site acceptance, the fleet orchestration subscription runs monthly over the term, and a non-refundable commissioning fee covers eleven weeks of on-site work. A March 2025 amendment added six units at the original unit price and extended the term by nine months without repricing the subscription. Commercially Asterion Logistics carries contracted hardware of $1,842,600, annual subscription value of $964,800 and a deployment fee of $214,000 over 36 months. Testing found the commissioning fee recognized on invoice rather than across the commissioning window, moving cost and revenue into different quarters. Under Asterion Logistics, this item is one of the few in the file where the seller's and the reviewer's figures agree exactly.

As to the facts,, the close calendar allows entries after the close is declared complete, and post-close entries appear in five of the ten quarter ends reviewed. Per the workpaper,, fieldwork ran from 2026-06-18 to 2026-07-16 with two site visits to Fremont and one remote session with the Ontario team, and all inquiry responses are recorded with the name of the respondent. At the cut-off,, management represented that the spares pool is fully counted, although the count sheets provided cover only part of the pool. In this stream, Fathom Mobility contracted under HC-2069 on 2024-11-21. On inspection,, across Fathom Mobility, the conclusion would change if the missing supporting document is later produced in a different form. One retrofit site with hardware transferring in two tranches, a subscription that begins at first tranche go-live, and an integration obligation delivered by a subcontractor. A February 2026 amendment substituted a newer chassis variant at no price change and extended warranty cover by twelve months. Commercially Fathom Mobility carries contracted hardware of $918,500, annual subscription value of $486,000 and a deployment fee of $124,000 over 30 months. For Fathom Mobility, the item was raised in the interim update and is carried forward unchanged into this file. Under Fathom Mobility, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected.

On any view,, journal approval operates through a workflow field that can be left blank, and the reviewer found it blank on entries with a material aggregate value. By reference,, the billing system and the general ledger are reconciled monthly but the reconciliation was not evidenced by a preparer signature for four of the thirty months. On the evidence,, revenue recognition decisions are made contract by contract without a standing checklist, so treatment depends on who prepared the memorandum. HC-2121 (Redbank Distribution) runs 48 months from 2025-11-14. On the papers,, hardware in two tranches, a subscription with a committed minimum, and a deployment obligation with liquidated damages for late go-live. Under Redbank Distribution, this item was discussed with the controller on the second day of fieldwork and the explanation is recorded as given. Redbank Distribution carries contracted hardware of $2,398,400, annual subscription value of $1,186,500 and a deployment fee of $342,500 across the contracted term. A April 2026 amendment reset the go-live date and waived accrued liquidated damages in exchange for a term extension. The waived damages were not recorded as variable consideration in the periods to which they related; the amendment accounting is an open item.

2. The seller's adjustment schedule and its evidence

Management's schedule is reproduced item by item with its own evidence reference, so that the reviewer's disposition can be read against what was actually proposed. On the merits,, the fixed asset register has not been reconciled

to the general ledger, so depreciation within the earnings measure cannot be tied to asset-level records. On the substance,, source data was extracted from the general ledger on 2026-07-02 and from the billing platform on 2026-07-03; extracts taken after those dates were used only to confirm subsequent settlement.

In review, management proposed ADJ-22 at $138,900 for Q1-2026, described as contractor conversion cost differential. On any view,, eleven field technicians converted from agency contracts to direct employment in February 2026, and management annualizes the resulting rate saving. Contractor conversion cost differential was reduced at $92,400: the reviewer applied the differential only to the converted population and added back employer taxes and benefit loading management had omitted. Contractor conversion cost differential carries a recurrence judgment of run-rate, and the supporting file is offer letters for eleven converted contractors and the contractor billing history. On Contractor conversion cost differential, the item was raised in the interim update and is carried forward unchanged into this file. On any view, the schedule carries ADJ-28, Supplier recovery on the harness defect, which deducts $88,500 against FY2025 on a non-recurring basis. In the file,, the supplier settled part of the rework campaign cost, and the recovery was credited to cost of sales in the same year the scrap arose. Support consists of the supplier settlement letter and the credit applied against open payables, and the item was put forward by diligence. Supplier recovery on the was accepted at $88,500: the reviewer paired the recovery with the scrap add-back so the campaign is presented on a net basis rather than only in the direction that helps. On Supplier recovery on the, the reviewer recorded the amount as computed rather than as rounded, so the schedule footings agree. ADJ-40 concerns government innovation grant recognized in other income and was raised by diligence as a normalization item. In detail,, a state innovation grant was recognized in a single tranche on receipt and is not available in the periods a buyer would own. On Government innovation grant recognized, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction. Government innovation grant recognized is recorded as a deduction of $65,000 in FY2024, evidenced by the grant agreement, the milestone certification and the receipt advice. Government innovation grant recognized was accepted at $65,000: the grant agreement is a fixed-term programme that expired in 2025, so its removal is supported by the instrument itself.

ADJ-10 concerns deployment labour capitalized in error and was raised by diligence as a reclassification item. Read narrowly,, field crew hours spent commissioning customer sites were added to internal-use software rather than expensed, understating cost of deployment services in the year the work was performed. On Deployment labour capitalized in, no projection was made from this item because it arises from a single identifiable event. Deployment labour capitalized in is recorded as a deduction of $213,800 in FY2025, evidenced by the fixed asset addition schedule traced to timesheets for four deployment crews. Deployment labour capitalized in was accepted at $213,800: the timesheets identify customer sites rather than internal projects, so the cost belongs in operating results. In the file, the tie-out includes ADJ-18, Inventory obsolescence charge on the first-generation chassis, which adds back $267,500 against FY2024 on a non-recurring basis. In detail,, an engineering change notice retired the first-generation chassis and management wrote down the remaining stock in a single charge. Support consists of the obsolescence provision workpaper and the engineering change notice, and the item was put forward by management. Inventory obsolescence charge on was reduced at $168,000: the reviewer treated the portion attributable to routine slow-moving stock as recurring and added back only the step change caused by the design retirement. On Inventory obsolescence charge on, the direction of this item is unfavourable to the seller and it is reported on the same basis as the favourable items. On the merits, management proposed ADJ-02 at $318,455 for LTM Jun-2026, described as financing and diligence legal fees. On the balance,, the fees relate to financing preparation and diligence response rather than to running the business, and the engagement letters scope the work accordingly. Financing and diligence legal was reduced at $291,200: one invoice bundles routine commercial contract review with transaction work, and the reviewer left the commercial portion in reported results. Financing and diligence legal carries a recurrence judgment of non-recurring, and the supporting file is three law-firm invoices coded to outside professional fees, with engagement letters. On Financing and diligence legal, the reviewer recorded the inquiry response and the name of the respondent alongside the document reference.

At the cut-off, management proposed ADJ-23 at $57,450 for FY2025, described as duplicate software subscriptions during the tooling consolidation. On inspection,, two observability platforms ran in parallel for five months while the engineering team consolidated tooling, and the superseded contract was cancelled in October 2025. Duplicate software subscriptions during was accepted at $57,450: the cancellation confirmations establish that the duplicated cost has ended and the overlap window is documented. Duplicate software subscriptions during carries a recurrence judgment of non-recurring, and the supporting file is vendor invoices for two overlapping licence terms and the cancellation confirmations.

On Duplicate software subscriptions during, no projection was made from this item because it arises from a single identifiable event. On the papers, next in sequence is ADJ-26, Board and advisory fees settled in cash, which adds back $78,000 against FY2025 on a normalization basis. In this stream,, management proposes to remove non-executive board cost on the basis that the buyer will appoint its own directors without fees. Support consists of board minutes, the advisory agreements and the payment register, and the item was put forward by management. Board and advisory fees was rejected outright: the reviewer treats independent director cost as an ordinary cost of a company of this size; the buyer's own governance arrangement is a post-closing choice, not a normalization. On Board and advisory fees, the reviewer confirmed the amount does not also sit within the working capital peg. At the cut-off, diligence proposed ADJ-03 at $27,315 for FY2025, described as reversal of a duplicated freight accrual. In the file,, freight for two November shipments was accrued twice, once from the shipping manifest and once from the carrier invoice, so reported cost was understated when the accrual reversed in December. Reversal of a duplicated was accepted at $27,315: the duplication is arithmetically demonstrable from the two source documents and management did not contest it. Reversal of a duplicated carries a recurrence judgment of normalization, and the supporting file is the November 2025 accrual workpaper compared against the carrier statement. On Reversal of a duplicated, the document inspected is dated before the cut-off, which is what makes the period attribution defensible.

Schedule 9.1 - Adjustment schedule with reviewer disposition

Ref	Adjustment	Amount ($)	Direction	Period	Recurrence class	Proposed by	Evidence	Reviewer disposition	Accepted ($)

3. Why particular adjustments were reduced or refused

Reductions in this section are not negotiating positions; each is the amount the underlying document supports once the unsupported portion is stripped out. Per the workpaper,, fieldwork ran from 2026-06-18 to 2026-07-16 with two site visits to Fremont and one remote session with the Ontario team, and all inquiry responses are recorded with the name of the respondent. In this stream,, where an exception is identified, the reviewer states the population, the value tested, the coverage achieved and the projected effect before proposing any adjustment.

Read narrowly, diligence proposed ADJ-34 at $97,200 for FY2025, described as capitalized cloud configuration cost. Per the index,, configuration work on a hosted platform was capitalized although the tickets describe implementation and data migration activity rather than the development of a new asset. Capitalized cloud configuration cost was reduced at $61,400 and the reason sits on the schedule itself. Capitalized cloud configuration cost carries a recurrence judgment of

reclassification, and the supporting file is the internal-use software addition schedule and the underlying engineering tickets. On Capitalized cloud configuration cost, the reviewer left the amount unchanged after review but strengthened the evidence reference. In substance, the reviewer traced ADJ-27, Scrap on the wrist-joint harness rework campaign, which adds back $142,650 against FY2025 on a non-recurring basis. On reperformance,, a supplier harness defect required rework across ninety-four units, and the scrap generated during the campaign was charged to cost of sales in the third quarter of 2025. Support consists of the rework work orders, the scrap ticket file and the supplier corrective action report, and the item was put forward by management. Scrap on the wrist-joint was reduced at $96,300 and the reason sits on the schedule itself. On Scrap on the wrist-joint, the workpaper reference and the preparer's initials are recorded in the index so the step can be reperformed. ADJ-37 concerns annualization of the enterprise support team build and was raised by diligence as a run-rate item. From the extract,, six support engineers hired between March and June 2026 are present in the cost base for only part of the measured period, so trailing cost understates the committed run-rate. On Annualization of the enterprise, the conclusion would change if the missing supporting document is later produced in a different form. Annualization of the enterprise is recorded as a deduction of $168,000 in Q2-2026, evidenced by the approved headcount plan, six signed offer letters and the payroll register. Annualization of the enterprise was accepted at $168,000 and the reason sits on the schedule itself.

ADJ-30 concerns relocation and immigration cost for two senior hires and was raised by management as a non-recurring item. By reference,, two senior engineering hires carried relocation and immigration cost that management characterizes as a hiring event rather than an ongoing expense. On Relocation and immigration cost, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected. Relocation and immigration cost is recorded as a add-back of $63,750 in Q1-2026, evidenced by relocation vendor invoices and the two executed offer letters. Relocation and immigration cost was reduced at $41,500 and the reason sits on the schedule itself. On the record, management proposed ADJ-06 at $74,600 for FY2025, described as recruiting fees for the replacement operations leader. On the papers,, management treats executive search cost as an event cost tied to the departure rather than an ongoing expense. Recruiting fees for the was rejected outright: the company filled six senior roles through retained search across the review period, so search fees are a recurring feature of this cost base. Recruiting fees for the carries a recurrence judgment of normalization, and the supporting file is the search-firm invoice and the executed offer letter. On Recruiting fees for the, the reviewer compared the item with the equivalent balance in the prior period before reaching a view. ADJ-39 concerns legal settlement with a former contractor and was raised by management as a non-recurring item. At the cut-off,, a wage classification claim brought by a former field contractor settled in November 2025 for a single payment with no continuing obligation. On Legal settlement with a, the direction of this item is unfavourable to the seller and it is reported on the same basis as the favourable items. Legal settlement with a is recorded as a add-back of $112,500 in H2-2025, evidenced by the settlement agreement, counsel's closing memorandum and the payment advice. Legal settlement with a was accepted at $112,500: the settlement agreement releases all claims and counsel confirmed no related matters remain, so no recurring cost follows.

ADJ-21 concerns research credit recognized on a single receipt basis and was raised by diligence as a normalization item. Taken alone,, a research credit relating to two prior years was recorded as a reduction of expense when the refund was received rather than allocated to the periods that generated it. On Research credit recognized on, the explanation offered was plausible and was still corroborated against a document before being accepted. Research credit recognized on is recorded as a deduction of $96,800 in FY2025, evidenced by the credit study, the amended return and the cash receipt advice. Research credit recognized on was accepted at $96,800 and the reason sits on the schedule itself. ADJ-01 concerns dependent enrollment overpayment on the medical plan and was raised by management as a non-recurring item. From the extract,, the charge arose from a dependent-enrollment error the carrier corrected in April 2024, and no comparable charge appears in the twenty-six months since. On Dependent enrollment overpayment on, the reviewer checked whether the same condition arises in the other periods reviewed and reported the result. Dependent enrollment overpayment on is recorded as a add-back of $41,860 in FY2024, evidenced by carrier invoices for February through April 2024 and the corrected enrollment file. Dependent enrollment overpayment on was accepted at $41,860: the carrier credit memo agrees to the ledger and the condition that produced the cost has been removed at the source. ADJ-26 concerns board and advisory fees settled in cash and was raised by management as a normalization item. On its facts,, management proposes to remove non-executive board cost on the basis that the buyer will appoint its own directors without fees. On Board and advisory fees, the explanation offered was plausible and was still corroborated against a

document before being accepted. Board and advisory fees is recorded as a add-back of $78,000 in FY2025, evidenced by board minutes, the advisory agreements and the payment register. Board and advisory fees was rejected outright and the reason sits on the schedule itself.

4. Gross margin normalization

Costs are grouped by the activity that drives them rather than by the account they were posted to, since the account mapping changed during the period. On the evidence,, inventory quantities rest on perpetual records because the reviewer did not observe the June 2026 count and the count sheets were only partially made available. On the balance,, revenue recognition decisions are made contract by contract without a standing checklist, so treatment depends on who prepared the memorandum.

On the documents, the trend for operator training delivery within the launch and onboarding bucket at $96,200 in FY2024, $168,800 in FY2025 and $214,600 for the trailing twelve months to June 2026. In the file,, training hours per site are stable; the increase follows site count. The run-rate view is run-rate. For Operator training delivery, a sensitivity was run on the principal assumption and the range is disclosed in the accompanying schedule. On Operator training delivery, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected. Fleet telemetry compute sits in hosting and moved from $684,300 to $1,142,800 and then to $1,386,400. In this stream,, compute cost scales with active units and with telemetry retention, both of which rose through the period. On Fleet telemetry compute, the reviewer left the amount unchanged after review but strengthened the evidence reference. The reviewer treats the whole line as run-rate other than the migration overlap already isolated on the adjustment schedule. The line is carried forward as run-rate. On the record, the margin analysis carries depreciation on production tooling within the allocated overhead bucket at $96,400 in FY2024, $142,600 in FY2025 and $168,800 for the trailing twelve months to June 2026. On the source,, tooling additions for the second-generation chassis began depreciating in the fourth quarter of 2025. The run-rate view is run-rate. For Depreciation on production tooling, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction. On Depreciation on production tooling, the direction of this item is unfavourable to the seller and it is reported on the same basis as the favourable items.

On a second read, on the same schedule, quality and test engineering within the allocated overhead bucket at $186,400 in FY2024, $248,600 in FY2025 and $284,900 for the trailing twelve months to June 2026. On the record,, test engineering supports both production and field diagnosis and is allocated on unit throughput. The run-rate view is run-rate. For Quality and test engineering, the reviewer compared the item with the equivalent balance in the prior period before reaching a view. On Quality and test engineering, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction. By agreement, the cost build shows customer-specific integration build within the launch and onboarding bucket at $214,600 in FY2024, $342,800 in FY2025 and $286,400 for the trailing twelve months to June 2026. On a second read,, integration work with customer warehouse management systems is required at almost every site. The run-rate view is run-rate. For Customer-specific integration build, the item was projected across the population on the basis stated in the accompanying schedule. On Customer-specific integration build, reperformance used the contractual rate rather than the rate management had applied. Remote operations coverage sits in field support and moved from $168,200 to $296,400 and then to $384,600. In review,, overnight remote operations cover was introduced in 2025 for customers on the higher service tier. On Remote operations coverage, the workpaper reference and the preparer's initials are recorded in the index so the step can be reperformed. The cost follows the service commitment, so it is treated as a permanent feature of the tier. The line is carried forward as run-rate.

On inspection, the cost build shows warranty parts consumption within the spares and warranty bucket at $246,800 in FY2024, $418,600 in FY2025 and $462,400 for the trailing twelve months to June 2026. Taken alone,, consumption tracks installed base and the failure rate of the current chassis rather than any single event. The run-rate view is run-rate. For Warranty parts consumption, the reviewer noted that the treatment adopted here must be applied consistently to the

comparable item elsewhere in the file. On Warranty parts consumption, a small residual difference remains and is reported rather than described as immaterial and omitted. In the event, freight and duty includes customs duty and brokerage, classified run-rate. On its facts,, duty on imported drive assemblies increased when the supplier moved production between plants in 2025. For customs duty and brokerage the measured amounts are $142,600 in FY2024, $218,400 in FY2025 and $246,900 for the trailing twelve months to June 2026. The higher duty rate applies to the current supply arrangement and is therefore run-rate. On Customs duty and brokerage, the reviewer's conclusion here differs from the position taken in the seller's own vendor material. On reperformance, a further line, spares pool carrying cost within the spares and warranty bucket at $84,600 in FY2024, $128,400 in FY2025 and $146,800 for the trailing twelve months to June 2026. From the extract,, the spares pool was enlarged when the Kadence contract introduced a contractual parts availability commitment. The run-rate view is run-rate. The larger pool is contractual and its carrying cost does not reverse. On Spares pool carrying cost, the conclusion is stated at the low end of the supportable range, as the file convention requires.

Schedule 9.3 - Information request register

Request	Description	Owner	Requested	Received	Status	Effect if unresolved
IR-014	Signed acceptance certificate for Crestline site three	Seller - deployment lead	2026-06-18	Not received	Open	Without a dated certificate the transfer month rests on the installer's
IR-023	State nexus opinion supporting no sales tax filings	Seller - tax adviser	2026-06-19	2026-07-02	Received - under review	The exposure remains a range until the opinion's scope is compared with
IR-027	Billing system extract reconciled to the general ledger	Seller - controller	2026-06-19	2026-06-27	Closed	The extract was reconciled and the residual monthly differences are imma
IR-041	Engagement letters for all adviser fees in the period	Seller - finance director	2026-06-23	Partially received	Open	Two invoices remain unsupported, so the split between transaction and or
IR-045	Fixed asset additions traced to underlying engineering t	Seller - engineering manager	2026-06-24	2026-07-06	Received - under review	The capitalization reclassification could change if further tickets supp
IR-052	Bank statements for the Ontario subsidiary for the full	Seller - controller	2026-06-25	Partially received	Open	Two months are missing, so cash proof coverage for the subsidiary is bel
IR-056	Payroll register reconciled to the general ledger by mon	Seller - payroll manager	2026-06-25	2026-07-09	Closed	The reconciliation supported the compensation analysis and the annualiza
IR-059	Hosting agreement effective 2026-04-30 with the rate car	Seller - IT director	2026-06-26	2026-06-30	Closed	The agreement supported the contractual portion of the hosting savings a
IR-067	Supplier settlement letter for the harness rework recove	Seller - procurement	2026-06-29	2026-07-02	Closed	The letter confirmed the recovery amount and allowed the campaign to be
IR-071	Aged unbilled receivable detail with billing triggers	Seller - project accountant	2026-06-29	Not received	Open	Without billing triggers the reviewer cannot distinguish unbilled amount
IR-074	PTO liability	Seller - HR	2026-06-30	2026-07-10	Closed	The rollforward

Request	Description	Owner	Requested	Received	Status	Effect if unresolved
	rollforward by employee band	director				supported both the accrual movement adjustment and the s
IR-081	Inventory count sheets for the June 2026 physical count	Seller - operations	2026-07-01	Partially received	Open	Count coverage of the spares pool cannot be confirmed, so inventory in t
IR-085	Commission plan documents for all sales roles	Seller - sales operations	2026-07-01	2026-07-08	Closed	The plans supported the commission true-up and confirmed the accrual bas
IR-088	Analysis of the Pinecrest option pricing against list	Seller - revenue accountant	2026-07-02	Not received	Open	The material right judgment stays open, and any allocation to the option
IR-092	Lease agreements and amendments for all leased premises	Seller - counsel	2026-07-02	2026-07-09	Closed	The Fremont amendment supported the abatement normalization and the stra
IR-099	Reconciliation of the fixed asset register to the ledger	Seller - controller	2026-07-03	Not received	Open	Depreciation in the earnings measure cannot be tied to the register, whi
IR-103	Change request pricing for the Vantage additional units	Seller - commercial	2026-07-06	Not received	Open	Variable consideration arising after the cut-off cannot be estimated, so
IR-107	Detail of the FY2026 discretionary bonus by participant	Seller - HR director	2026-07-06	Partially received	Open	The pre-closing service period allocation supporting debt-like treatment
IR-111	Support for the liquidated damages waiver on Redbank	Seller - commercial	2026-07-07	2026-07-13	Received - under review	The amendment accounting remains open, and both the accrual and the waiv
IR-115	Vendor statements for the ten largest suppliers	Seller - accounts payable	2026-07-07	Partially received	Open	Accrual completeness testing coverage falls below the planned level for

5. Operating expense normalization and run-rate

The reviewer annualized only where a document fixes the amount and the start date, and treated everything else as a forecast rather than a normalization. On testing,, reconciliation differences are reported at the amount found, including small residuals, rather than being described as immaterial and omitted. Taken alone,, management represented that installation activity alone does not create a state filing obligation, relying on an adviser's opinion whose scope has not yet been compared with the states involved.

Per the workpaper, among the larger items is ADJ-28, Supplier recovery on the harness defect, which deducts $88,500 against FY2025 on a non-recurring basis. By agreement,, the supplier settled part of the rework campaign cost, and the recovery was credited to cost of sales in the same year the scrap arose. Support consists of the supplier settlement letter and the credit applied against open payables, and the item was put forward by diligence. Supplier recovery on the was accepted at $88,500: the reviewer paired the recovery with the scrap add-back so the campaign is presented on a net basis rather than only in the direction that helps. On Supplier recovery on the, the conclusion rests on a document

produced by a third party rather than by the company. In sequence, the schedule carries ADJ-16, Pro forma savings from the renegotiated hosting contract, which adds back $204,000 against Q2-2026 on a pro forma basis. On the record,, a renegotiated committed-use agreement lowers unit hosting rates from May 2026, and management annualizes the saving against trailing volumes. Support consists of the executed hosting agreement dated 2026-04-30 and a management savings model, and the item was put forward by management. Pro forma savings from was reduced at $121,000 and the reason sits on the schedule itself. On Pro forma savings from, the supporting document was produced after two requests and its late arrival is noted in the register. By reference, diligence proposed ADJ-21 at $96,800 for FY2025, described as research credit recognized on a single receipt basis. Per the index,, a research credit relating to two prior years was recorded as a reduction of expense when the refund was received rather than allocated to the periods that generated it. Research credit recognized on was accepted at $96,800: the credit study attributes the qualifying spend to 2022 and 2023, so the benefit does not belong in the measured period. Research credit recognized on carries a recurrence judgment of normalization, and the supporting file is the credit study, the amended return and the cash receipt advice. On Research credit recognized on, the conclusion would change if the missing supporting document is later produced in a different form.

By reference, diligence proposed ADJ-34 at $97,200 for FY2025, described as capitalized cloud configuration cost. By agreement,, configuration work on a hosted platform was capitalized although the tickets describe implementation and data migration activity rather than the development of a new asset. Capitalized cloud configuration cost was reduced at $61,400: the reviewer accepted that a portion of the work created a genuine integration component and reclassified the balance to operating expense. Capitalized cloud configuration cost carries a recurrence judgment of reclassification, and the supporting file is the internal-use software addition schedule and the underlying engineering tickets. On Capitalized cloud configuration cost, the reviewer recorded the inquiry response and the name of the respondent alongside the document reference. On the evidence, management proposed ADJ-19 at $118,700 for FY2025, described as customer credit issued for the asterion availability shortfall. Per the index,, management presents the credit as a one-off concession to preserve a strategic account. Customer credit issued for was rejected outright: service credits were issued in seven of the twenty-four months reviewed, so the reviewer treats them as a recurring cost of the service commitment rather than an isolated event. Customer credit issued for carries a recurrence judgment of normalization, and the supporting file is the credit memorandum, the service level report and the settlement email chain. On Customer credit issued for, the reviewer confirmed that the same item does not also appear on the net debt schedule. Against the ledger, the reviewer separately examined ADJ-40, Government innovation grant recognized in other income, which deducts $65,000 against FY2024 on a normalization basis. By agreement,, a state innovation grant was recognized in a single tranche on receipt and is not available in the periods a buyer would own. Support consists of the grant agreement, the milestone certification and the receipt advice, and the item was put forward by diligence. Government innovation grant recognized was accepted at $65,000 and the reason sits on the schedule itself. On Government innovation grant recognized, the item was projected across the population on the basis stated in the accompanying schedule.

In the file, management proposed ADJ-39 at $112,500 for H2-2025, described as legal settlement with a former contractor. In detail,, a wage classification claim brought by a former field contractor settled in November 2025 for a single payment with no continuing obligation. Legal settlement with a was accepted at $112,500 and the reason sits on the schedule itself. Legal settlement with a carries a recurrence judgment of non-recurring, and the supporting file is the settlement agreement, counsel's closing memorandum and the payment advice. On Legal settlement with a, the supporting analysis was rebuilt from source rather than reviewed, because the calculation drives an adjustment. ADJ-26 concerns board and advisory fees settled in cash and was raised by management as a normalization item. On any view,, management proposes to remove non-executive board cost on the basis that the buyer will appoint its own directors without fees. On Board and advisory fees, the supporting analysis was rebuilt from source rather than reviewed, because the calculation drives an adjustment. Board and advisory fees is recorded as a add-back of $78,000 in FY2025, evidenced by board minutes, the advisory agreements and the payment register. Board and advisory fees was rejected outright: the reviewer treats independent director cost as an ordinary cost of a company of this size; the buyer's own governance arrangement is a post-closing choice, not a normalization. On the source, the reviewer traced ADJ-42, Interim chief financial officer engagement, which adds back $96,000 against H2-2025 on a non-recurring basis. On the balance,, an interim finance leader covered a five-month vacancy and management removes the full engagement cost as a transition item. Support consists of the interim engagement letter, monthly invoices and the permanent hire's offer letter, and the

item was put forward by management. Interim chief financial officer was reduced at $34,000 and the reason sits on the schedule itself. On Interim chief financial officer, the conclusion is stated at the low end of the supportable range, as the file convention requires.

6. General ledger exception testing

The journal population was stratified before selection, and the strata were chosen for the characteristics that correlate with error rather than for value alone. On any view,, segregation between preparer and approver was not enforced until the November 2024 workflow change, and self-approved entries appear on both sides of that date. In the event,, source data was extracted from the general ledger on 2026-07-02 and from the billing platform on 2026-07-03; extracts taken after those dates were used only to confirm subsequent settlement.

Taken alone, the exception log records JE-26-0163, posted 2026-02-27 by T. Vasquez approved by M. Okonjo, for $92,400 and classified as a pro forma entry in the ledger. On the substance,, a contractor conversion saving was posted into the management ledger rather than being kept as a memo adjustment. The entry was reversed for statutory reporting; the reviewer works from the statutory ledger throughout. On this pro forma entry in, the item was selected for testing because of its characteristics rather than its size. Per the register, the reviewer selected JE-24-1118, posted 2024-12-31 by External adviser approved by M. Okonjo, for $267,500 and classified as a post-close adjustment. On the evidence,, an inventory obsolescence charge was posted eleven days after the close was declared complete. The entry is supported by an engineering change notice; the reviewer split it between recurring and one-time components. On this post-close adjustment, the reviewer recorded the amount as computed rather than as rounded, so the schedule footings agree. In substance, a reserve release of $96,150 appears as JE-25-0644 on 2025-06-30. In this stream,, the warranty reserve for a superseded gripper assembly was released to cost of sales at the half year. Release is supportable but the reviewer treats the margin benefit as a normalization item rather than as run-rate. For this reserve release the preparer was T. Vasquez, approved by M. Okonjo. On this reserve release, the supporting analysis was rebuilt from source rather than reviewed, because the calculation drives an adjustment.

On a second read, a unapproved manual entry of $18,460 appears as JE-25-0388 on 2025-04-04. In this stream,, penalty interest on the equipment facility was reclassified from interest expense to other expense without approval. For this unapproved manual entry, the conclusion is stated at the low end of the supportable range, as the file convention requires. For this unapproved manual entry the preparer was R. Calloway, with no approver recorded. On this unapproved manual entry, the item was traced from the summary schedule through the sub-ledger to the source document. JE-25-1291 is a unapproved manual entry of $109,400 posted on 2025-12-31. In substance,, a commission accrual true-up was posted at year end without an approver and without the bookings register attached. On this unapproved manual entry, the conclusion would change if the missing supporting document is later produced in a different form. This unapproved manual entry was prepared by R. Calloway and with no approver recorded. The register was later provided and supports a larger accrual than the entry recorded. In detail, a round-dollar entry of $57,450 appears as JE-25-1046 on 2025-10-31. On the source,, a round software subscription accrual was posted while two overlapping licences were being reconciled. The accrual was replaced by invoiced amounts in November 2025 with a small residual credit. For this round-dollar entry the preparer was T. Vasquez, approved by M. Okonjo. On this round-dollar entry, the reviewer left the amount unchanged after review but strengthened the evidence reference.

JE-26-0248 is a misapplied cash receipt of $53,400 posted on 2026-03-31. As to the facts,, an Evergreen overpayment was applied to a settled invoice and released to revenue. On this misapplied cash receipt, the explanation offered was plausible and was still corroborated against a document before being accepted. This misapplied cash receipt was prepared by M. Okonjo and approved by T. Vasquez. The reviewer reversed the release and treated the balance as a customer credit owed. On the evidence, a unapproved manual entry of $148,600 appears as JE-24-0418 on 2024-03-31. Read narrowly,, a revenue reclassification posted on the last day of the quarter carries no approver in the workflow log. For this unapproved manual entry, the supporting document was produced after two requests and its late arrival is noted in the register. For this unapproved manual entry the preparer was R. Calloway, with no approver recorded. On this unapproved manual entry, the item was tested twice, once in the revenue stream and once in the balance sheet stream, with the same result. At the cut-off, the exception log records JE-26-0291, posted 2026-03-27 by L. Brantley approved by M. Okonjo, for $34,000 and classified as a interim staffing accrual. In substance,, the final month of the interim finance engagement was accrued at a rate different from the engagement letter. For this interim staffing accrual, the evidence file

for this item includes an email chain that fixes the date on which the parties agreed. On this interim staffing accrual, a small residual difference remains and is reported rather than described as immaterial and omitted.

Schedule 9.4 - Cost of delivery by line across three periods

Bucket	Cost line	FY2024 ($)	FY2025 ($)	LTM Jun-2026 ($)	Run-rate view	Driver
Hosting	Fleet telemetry compute	684,300	1,142,800	1,386,400	Run-rate	Compute cost scales with active units and with telemetry reten
Hosting	Object storage and retention	148,600	236,400	312,800	Run-rate	Retention was extended from ninety days to one year in mid-202
Hosting	Data egress and interconnect	62,400	118,900	96,700	Run-rate	Egress fell after the 2026 hosting renegotiation moved traffic
Field support	Deployment crew wages	1,284,600	1,846,200	2,142,900	Run-rate	Crew headcount grew from eleven to nineteen as site volume inc
Field support	Travel and per diem	386,400	512,800	468,300	Run-rate	Travel cost per site fell as regional crews replaced fly-in te
Field support	Subcontracted installation	214,800	468,900	386,200	Mixed	Subcontractors absorb peak installation demand and the mix bet
Field support	Remote operations coverage	168,200	296,400	384,600	Run-rate	Overnight remote operations cover was introduced in 2025 for c
Spares and warranty	Warranty parts consumption	246,800	418,600	462,400	Run-rate	Consumption tracks installed base and the failure rate of the
Spares and warranty	Rework campaign labour	0	142,650	0	One-time	The wrist-joint harness campaign in the third quarter of 2025
Spares and warranty	Spares pool carrying cost	84,600	128,400	146,800	Run-rate	The spares pool was enlarged when the Kadence contract introdu
Freight and duty	Inbound freight on components	318,400	462,800	428,600	Run-rate	Inbound freight rates fell in 2026 after two ocean lanes were
Freight and duty	Outbound freight to sites	268,900	386,400	411,860	Run-rate	Outbound cost follows unit volume and the geographic spread of
Freight and duty	Customs duty and brokerage	142,600	218,400	246,900	Run-rate	Duty on imported drive assemblies increased when the supplier
Hardware cost	Chassis and drive assemblies	2,468,900	3,842,600	4,186,400	Run-rate	Unit cost fell about four per cent as volumes crossed the seco
Hardware cost	Sensor and vision modules	846,200	1,268,400	1,396,800	Run-rate	A supplier change in early 2026 lowered module cost but introd
Hardware cost	Scrap and yield loss	118,400	264,800	186,200	Mixed	Scrap rose during the harness campaign and

Bucket	Cost line	FY2024 ($)	FY2025 ($)	LTM Jun-2026 ($)	Run-rate view	Driver
						during the first pr
Hardware cost	Rework and refurbishment	96,800	218,400	142,600	Mixed	Refurbishment of returned pilot units is a recurring activity,
Launch and onboarding	Layout simulation and design	168,400	286,900	342,800	Run-rate	Simulation work is now performed for every new site and is bil
Launch and onboarding	Operator training delivery	96,200	168,800	214,600	Run-rate	Training hours per site are stable; the increase follows site
Launch and onboarding	First-site engineering support	142,800	96,400	118,600	Mixed	Engineering time spent stabilizing a customer's first site dec
Launch and onboarding	Customer-specific integration build	214,600	342,800	286,400	Run-rate	Integration work with customer warehouse management systems is

Allocated overhead	Facilities charged to production	142,800	168,400	186,200	Run-rate	The production floor share of the Fremont facility is allocate
Allocated overhead	Depreciation on production tooling	96,400	142,600	168,800	Run-rate	Tooling additions for the second-generation chassis began depr

7. Representations obtained and the evidence behind each one

Several conclusions in this file rest in part on what management told the reviewer, and the reviewer distinguishes those from conclusions supported by documents. At the cut-off,, management represented that installation activity alone does not create a state filing obligation, relying on an adviser's opinion whose scope has not yet been compared with the states involved. In the event,, the engagement is analytical and evidence-based rather than an audit, a review or an examination, and no opinion or assurance conclusion is expressed on any period or balance.

On testing,, where a projection of error is made, it rests on the sample basis stated in the relevant schedule and is presented as a range rather than as a single figure. On the record,, approver fields are blank on a subset of journal entries, which prevents any conclusion on the operation of the journal approval control during the affected periods. As to the facts,, revenue recognition decisions are made contract by contract without a standing checklist, so treatment depends on who prepared the memorandum. Read narrowly, diligence proposed ADJ-29 at $109,400 for FY2025, described as sales commission true-up on multi-year bookings. In this stream,, commissions on multi-year subscription bookings were expensed when the cash was paid in the following quarter, leaving the period charge short of the bookings it relates to. Sales commission true-up on was accepted at $109,400 and the reason sits on the schedule itself. Sales commission true-up on carries a recurrence judgment of normalization, and the supporting file is the commission plan, the bookings register and the commission accrual workpaper. On Sales commission true-up on, the reviewer's supervisor reviewed this conclusion because it rests partly on judgment.

On the papers,, management represented that no undisclosed related-party arrangements exist beyond the sublease and the management fee identified in the ledger. In detail,, certain amounts described here as agreed were agreed with management during fieldwork and have not been re-presented in a revised set of financial statements. In substance,, reconciliation differences are reported at the amount found, including small residuals, rather than being described as immaterial and omitted. On the papers, the schedule carries ADJ-30, Relocation and immigration cost for two senior hires, which adds back $63,750 against Q1-2026 on a non-recurring basis. In review,, two senior engineering hires carried relocation and immigration cost that management characterizes as a hiring event rather than an ongoing expense. Support

consists of relocation vendor invoices and the two executed offer letters, and the item was put forward by management. Relocation and immigration cost was reduced at $41,500: the reviewer allowed the immigration component, which is genuinely episodic, and left relocation in reported cost because the company relocated hires in each of the three years reviewed. On Relocation and immigration cost, the reviewer recorded that no comparable item was found in the two earlier periods examined.

On the balance,, the engagement is analytical and evidence-based rather than an audit, a review or an examination, and no opinion or assurance conclusion is expressed on any period or balance. In substance,, management represented that the second customer summit is discretionary; the reviewer inspected a signed venue contract dated before the cut-off. On the papers,, coverage of the customer base is complete for the twenty-five largest accounts by revenue and sampled below that level, with the sampling basis stated wherever a projection is made. ADJ-03 concerns reversal of a duplicated freight accrual and was raised by diligence as a normalization item. As matters stand,, freight for two November shipments was accrued twice, once from the shipping manifest and once from the carrier invoice, so reported cost was understated when the accrual reversed in December. On Reversal of a duplicated, the reviewer left the amount unchanged after review but strengthened the evidence reference. Reversal of a duplicated is recorded as a deduction of $27,315 in FY2025, evidenced by the November 2025 accrual workpaper compared against the carrier statement. Reversal of a duplicated was accepted at $27,315: the duplication is arithmetically demonstrable from the two source documents and management did not contest it.

Schedule 9.5 - Headcount and committed cost by function

Function	Filled	Open	Annualized cost ($)	Vacancy effect ($)	Contractual commitment	Run-rate view
Engineering - platform	18	0	3,570,166	0	No commitments beyond current staff	Annualize excluding vacancies
Engineering - motion	3	1	2,692,227	224,352	One retained search in progress	Annualize current staff
Engineering - safety	12	0	3,298,314	0	Contractor cover in place pending a hire	Annualize including signed offers
Engineering - test	6	0	1,956,953	0	No commitments beyond current staff	Hold at current cost
Field deployment crews	22	2	2,144,787	59,577	One retained search in progress	Hold at current cost
Field service	19	4	3,071,637	178,065	No commitments beyond current staff	Hold at current cost
Remote operations	14	5	3,407,949	298,942	No commitments beyond current staff	Annualize excluding vacancies
Supply chain	6	0	1,434,707	0	Two signed offers with start dates in the next quarter	Hold at current cost
Manufacturing	28	2	1,267,197	28,159	Two signed offers with start dates in the next quarter	Annualize excluding vacancies
Quality	26	1	3,312,521	40,895	One retained search in progress	Annualize current staff

8. Outstanding requests, owners and unresolved effects

The register below is reproduced as it stood at the date of this file, including items that have been resolved, so that the diligence trail is not rewritten. From the extract,, cash application is performed by the same person who maintains the customer master, which is what allowed an overpayment to be applied to a settled invoice. On the source,, management represented that intercompany settlement with the Ontario entity is unrestricted, while the settlement history shows a consistent six-week lag.

By agreement, the seller - service manager holds IR-038, warranty claim detail by chassis generation, requested 2026-06-23. In substance,, the detail supported the recalculated accrual rate and the adjustment was agreed at the lower of the two estimates. On warranty claim detail by, as at the date of this file material was provided on 2026-07-01 and the item is closed. For warranty claim detail by, the reviewer left the amount unchanged after review but strengthened the evidence reference. IR-045 asks for fixed asset additions traced to underlying engineering tickets. The request for fixed asset additions traced was raised on 2026-06-24 with the seller - engineering manager and material was provided on 2026-07-06, leaving the item received - under review. For fixed asset additions traced, a small residual difference remains and is reported rather than described as immaterial and omitted. On the source,, the capitalization reclassification could change if further tickets support the treatment management applied. IR-034 asks for board minutes evidencing the december 2024 bonus decision. The request for board minutes evidencing the was raised on 2026-06-20 with the seller - company secretary and material was provided on 2026-07-08, leaving the item received - insufficient. For board minutes evidencing the, the item was projected across the population on the basis stated in the accompanying schedule. In sequence,, the minutes record the decision but not the plan terms, so the reviewer relies on management's representation that the bonus remained available.

On the documents, the reviewer requested IR-099, reconciliation of the fixed asset register to the ledger, addressed to the seller - controller and requested on 2026-07-03; nothing has been provided. The status is recorded as open. Per the index,, depreciation in the earnings measure cannot be tied to the register, which limits the capital expenditure commentary. For reconciliation of the fixed, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected. In this stream, the seller - hr director holds IR-074, pto liability rollforward by employee band, requested 2026-06-30. Per the register,, the rollforward supported both the accrual movement adjustment and the split treatment in net debt. On pto liability rollforward by, as at the date of this file material was provided on 2026-07-10 and the item is closed. For pto liability rollforward by, the evidence file for this item includes an email chain that fixes the date on which the parties agreed. On the evidence, the seller - accounts payable holds IR-115, vendor statements for the ten largest suppliers, requested 2026-07-07. In sequence,, accrual completeness testing coverage falls below the planned level for three suppliers. On vendor statements for the, as at the date of this file the response is partially received and the item is open. For vendor statements for the, reperformance used the contractual rate rather than the rate management had applied.

From the extract, the seller - it director holds IR-059, hosting agreement effective 2026-04-30 with the rate card, requested 2026-06-26. Read narrowly,, the agreement supported the contractual portion of the hosting savings and allowed the rest to be rejected. On hosting agreement effective 2026-04-30, as at the date of this file material was provided on 2026-06-30 and the item is closed. For hosting agreement effective 2026-04-30, the explanation offered was plausible and was still corroborated against a document before being accepted. IR-111 asks for support for the liquidated damages waiver on redbank. The request for support for the liquidated was raised on 2026-07-07 with the seller -

commercial and material was provided on 2026-07-13, leaving the item received - under review. For support for the liquidated, the evidence was inspected in original form rather than as a management-prepared summary. Per the index,, the amendment accounting remains open, and both the accrual and the waiver may move between periods. IR-067 asks for supplier settlement letter for the harness rework recovery. The request for supplier settlement letter for was raised on 2026-06-29 with the seller - procurement and material was provided on 2026-07-02, leaving the item closed. For supplier settlement letter for, the item is retained in the file even though it does not change the conclusion, so the trail remains complete. On inspection,, the letter confirmed the recovery amount and allowed the campaign to be presented on a net basis.

Schedule 9.6 - Reported to adjusted revenue by stream

Stream and period	Reported ($)	Timing adjustments ($)	Allocation adjustments ($)	Adjusted ($)	Evidence basis
Subscription - FY2024	13,233,928	49,995	(39,618)	13,244,305	Acceptance certificate dates
Subscription - FY2025	14,754,441	(125,494)	(65,526)	14,563,421	Acceptance certificate dates
Subscription - LTM Jun-2026	2,142,851	(94,151)	(17,808)	2,030,892	Acceptance certificate dates
Subscription - Q2-2026	4,219,104	(57,121)	(79,871)	4,082,112	Acceptance certificate dates
Hardware - FY2024	5,174,981	(81,333)	(18,067)	5,075,581	Attendance records
Hardware - FY2025	8,380,228	120,511	(40,549)	8,460,190	Credit memoranda
Hardware - LTM Jun-2026	10,678,547	44,162	(37,321)	10,685,388	Acceptance certificate dates
Hardware - Q2-2026	2,070,744	(23,700)	6,202	2,053,246	Milestone certificates
Deployment services - FY2024	1,522,693	(120,914)	55,534	1,457,313	Attendance records
Deployment services - FY2025	10,778,210	(35,268)	(42,288)	10,700,654	Allocation workpaper
Deployment services - LTM Jun-2026	8,403,110	(88,673)	(34,594)	8,279,843	Credit memoranda
Deployment services - Q2-2026	9,635,411	(111,769)	(29,188)	9,494,454	Acceptance certificate dates

Training and onboarding - FY2025	10,303,952	(128,550)	(19,963)	10,155,439	Acceptance certificate dates
Training and onboarding - LTM Jun-2026	8,394,391	116,608	21,416	8,532,415	Billing extract reconciled to the ledger
Training and onboarding - Q2-2026	5,474,092	(71,222)	8,886	5,411,756	Milestone certificates
Analytics module - FY2024	3,335,489	(92,340)	(48,704)	3,194,445	Credit memoranda
Analytics module - FY2025	416,907	(73,397)	(21,607)	321,903	Billing extract reconciled to the ledger
Analytics module - LTM Jun-2026	10,534,319	53,807	(71,030)	10,517,096	Credit memoranda
Analytics module - Q2-2026	1,439,693	(50,841)	45,387	1,434,239	Allocation workpaper
Service credits - FY2024	6,758,188	45,646	(10,445)	6,793,389	Billing extract reconciled to the ledger
Service credits - FY2025	5,115,899	38,222	(79,531)	5,074,590	Allocation workpaper
Service credits - LTM Jun-2026	12,298,280	28,215	(49,497)	12,276,998	Attendance records
Service credits - Q2-2026	12,406,707	120,888	2,235	12,529,830	Allocation workpaper

9. Limitations, unresolved matters and what a reader must not infer

The limitations below are stated in the file rather than in a covering letter, because each one attaches to a specific conclusion elsewhere in this document. On the merits,, consolidation covers the parent and the Ontario deployment subsidiary; the dormant Delaware holding entity has no activity in the period and was excluded after inspection of its trial

balance. In this stream,, two months of Ontario subsidiary bank statements were not provided, so cash proof coverage for that entity is materially lower than for the parent and no projection was attempted across the gap.

On the record,, revenue recognition decisions are made contract by contract without a standing checklist, so treatment depends on who prepared the memorandum. On its facts,, because no audited financial statements exist for any period in scope, every opening balance rests on management's own records and on the review engagement's limited procedures. Per the workpaper,, management represented that all engagement letters for adviser fees exist, but two invoices remain unsupported after two requests. By reference, the reviewer chased IR-049, customer credit and unapplied cash listing at 2026-06-30, addressed to the seller - credit control and requested on 2026-06-24; material was provided on 2026-07-03. The status is recorded as closed. Taken alone,, the listing supported the customer credit balance treated as debt-like and reconciled to the aged receivable report. For customer credit and unapplied, the reviewer recorded the amount as computed rather than as rounded, so the schedule footings agree.

On the balance,, post-cut-off trading was reviewed only to July 2026 and only for evidence bearing on balances at the cut-off; it is not a basis for any forward projection. On this point,, management prepares monthly reporting on a basis that differs from the statutory ledger in three respects, each of which is identified and removed before any analysis begins. On the substance,, recurrence is judged on evidence about the future obligation rather than on whether the cost is unusual, which is why several items management called one-time were rejected. IR-107 asks for detail of the fy2026 discretionary bonus by participant. The request for detail of the fy2026 was raised on 2026-07-06 with the seller - hr director and the response is partially received, leaving the item open. For detail of the fy2026, the reviewer left the amount unchanged after review but strengthened the evidence reference. In review,, the pre-closing service period allocation supporting debt-like treatment is only partly evidenced.

Taken alone,, capitalization decisions were documented at project level rather than at ticket level until the control change made in April 2026. As matters stand,, management represented that the spares pool is fully counted, although the count sheets provided cover only part of the pool. By agreement,, where an exception is identified, the reviewer states the population, the value tested, the coverage achieved and the projected effect before proposing any adjustment. Per the index, still unresolved is IR-081, inventory count sheets for the june 2026 physical count, addressed to the seller - operations and requested on 2026-07-01; the response is partially received. The status is recorded as open. Per the workpaper,, count coverage of the spares pool cannot be confirmed, so inventory in the working capital peg rests on the perpetual records. For inventory count sheets for, the conclusion would change if the missing supporting document is later produced in a different form.
