# FINANCIAL DILIGENCE SUPPORT - RECORD 013

Helioscope Robotics, Inc. - diligence file reference FINANCE_SUPPORT-013

## 1. Scope, periods reviewed and basis of the engagement

Scope is set out first because several of the conclusions that follow are sensitive to the period reviewed and to the extraction date of the underlying data. In the file,, management represented that intercompany settlement with the Ontario entity is unrestricted, while the settlement history shows a consistent six-week lag. Per the index,, the reviewer reperformed rather than reviewed management's own calculations wherever the calculation drives an adjustment.

On the source,, source data was extracted from the general ledger on 2026-07-02 and from the billing platform on 2026-07-03; extracts taken after those dates were used only to confirm subsequent settlement. On its facts,, interim balances at 2026-06-30 have not been subject to a physical inventory count observed by the reviewer; the June count sheets were requested and only partially provided. In the file,, the billing system and the general ledger are reconciled monthly but the reconciliation was not evidenced by a preparer signature for four of the thirty months. In detail, the reviewer's read of HC-2069 with Fathom Mobility, signed 2024-11-21 for 30 months and carrying contracted hardware of $918,500, annual subscription value of $486,000 and a deployment fee of $124,000. In the event,, across Fathom Mobility, the reviewer declined to net this item against another with an opposite direction in the same period. One retrofit site with hardware transferring in two tranches, a subscription that begins at first tranche go-live, and an integration obligation delivered by a subcontractor. A February 2026 amendment substituted a newer chassis variant at no price change and extended warranty cover by twelve months. The extended warranty was not evaluated as a separate obligation; management asserted immateriality without quantifying it. Under Fathom Mobility, the reviewer declined to net this item against another with an opposite direction in the same period.

On the source,, legal accruals rest on counsel's written estimates rather than on invoices, and the reviewer has not independently assessed the likely outcome of any matter. On the record,, management represented that the spares pool is fully counted, although the count sheets provided cover only part of the pool. In sequence,, consolidation covers the parent and the Ontario deployment subsidiary; the dormant Delaware holding entity has no activity in the period and was excluded after inspection of its trial balance. On a second read, Brackenridge Supply contracted under HC-2173 on 2025-02-06. In sequence,, standard three-obligation structure with a twelve-month ramp on the subscription price, so billed and recognized amounts diverge through the ramp. No amendments; the ramp is contractual and creates a difference between billed and recognized subscription revenue in each of the first four quarters. Commercially Brackenridge Supply carries contracted hardware of $1,046,700, annual subscription value of $548,300 and a deployment fee of $142,500 over 30 months. The ramp was tested because it produces a contract asset; the asset balance agrees to the contract but was presented within trade receivables. Under Brackenridge Supply, the reviewer confirmed the counterparty is not a related party before accepting the document at face value.

On testing,, management represented that no bonus was payable for FY2024 following a board decision, and the minutes provided record the decision but not the terms of the plan itself. On the record,, management represented that the retention-contingent portion of the deferred consideration is genuinely contingent, and the retention agreements have only partly been provided. In this stream,, management represented that installation activity alone does not create a state filing obligation, relying on an adviser's opinion whose scope has not yet been compared with the states involved. From the extract, Meridian Cold Chain contracted under HC-2092 on 2025-05-30. On the source,, refrigerated environment units transfer on acceptance after a thermal validation period, with a subscription and a validation services obligation. A March 2026 amendment extended the validation period by six weeks at the customer's request without additional fee. Commercially Meridian Cold Chain carries contracted hardware of $1,486,200, annual subscription value of $742,800 and a deployment fee of $196,000 over 36 months. Revenue for the validation obligation was recognized before the extended validation completed; the cutoff test flagged the timing. Under Meridian Cold Chain, this item was discussed with the controller on the second day of fieldwork and the explanation is recorded as given.

As matters stand,, management represented that the capitalized configuration work created a lasting integration component; the ticket detail supports this for part of the amount only. As to the facts,, where a normalization depends on an assumption about future negotiation, the reviewer declines the adjustment and discloses the exposure instead. On this point,, reconciliation differences are reported at the amount found, including small residuals, rather than being described

as immaterial and omitted. HC-2127 (Saltmarsh Logistics) runs 36 months from 2026-01-09. In the event,, two obligations only: hardware on acceptance and a subscription, with deployment performed by a channel partner under a separate agreement. Under Saltmarsh Logistics, the reviewer left the amount unchanged after review but strengthened the evidence reference. Saltmarsh Logistics carries contracted hardware of $1,246,900, annual subscription value of $668,400 and a deployment fee of $174,000 across the contracted term. On Saltmarsh Logistics, the reviewer recorded that no comparable item was found in the two earlier periods examined. Testing confirmed the company is not the principal for the deployment work and records only the referral fee net, which the reviewer accepted.

## 2. Completeness testing over payables and accrued liabilities

The pattern of exceptions here points to a single cause, and the reviewer reports the cause alongside the individual items so the projection can be understood. On this point,, management represented that installation activity alone does not create a state filing obligation, relying on an adviser's opinion whose scope has not yet been compared with the states involved. Against the ledger,, journal approval operates through a workflow field that can be left blank, and the reviewer found it blank on entries with a material aggregate value.

On the record, voucher AP-4182, Wetherby Freight Services, for $42,860 covering September 2025 and invoiced 2025-10-06. In detail,, carriage performed in September was recorded in October because the accrual was raised from invoices rather than from shipping manifests. The ledger records the cost in October 2025. For Wetherby Freight Services in September 2025, cost belonging to the earlier period was recorded later, so the earlier period is understated. On Wetherby Freight Services, the workpaper reference and the preparer's initials are recorded in the index so the step can be reperformed. AP-4611 relates to Meridian Insurance Brokers and covers Annual policy at $31,200. Per the index,, a premium refund was credited to expense rather than deferred across the replacement policy term. On Meridian Insurance Brokers, this item was discussed with the controller on the second day of fieldwork and the explanation is recorded as given. For Meridian Insurance Brokers in Annual policy, the amount is in the right period but the wrong caption, and the reclassification was made in the analysis. The invoice is dated 2026-04-22 and the amount posted in March 2026. AP-4371 relates to Ashgrove Facilities and covers September 2025 at $12,840. Per the workpaper,, cleaning and facilities charges are recurring and were accrued from the standing service schedule. On Ashgrove Facilities, the conclusion is stated at the low end of the supportable range, as the file convention requires. For Ashgrove Facilities in September 2025, the period recorded matches the service period and no adjustment arises. The invoice is dated 2025-10-03 and the amount posted in September 2025.

Read narrowly, also tested was AP-4207, Corvid Metalworks, for $71,640 covering September 2025 and invoiced 2025-10-02. By reference,, spares received on 2025-09-26 were not accrued; the goods receipt note fixes the service period inside September. The ledger records the cost in October 2025. For Corvid Metalworks in September 2025, cost belonging to the earlier period was recorded later, so the earlier period is understated. On Corvid Metalworks, the conclusion is stated at the low end of the supportable range, as the file convention requires. On testing, for Halloran Electrical the reviewer tested AP-4233 at $18,420, posted in September 2025. On the evidence,, the accrual was raised from the work order and agrees to the invoice within a small variance cleared in October. The service period is September 2025 against an invoice dated 2025-10-11. For Halloran Electrical in September 2025, the period recorded matches the service period and no adjustment arises. On Halloran Electrical, the conclusion rests on a document produced by a third party rather than by the company. Per the index, for Corvid Metalworks the reviewer tested AP-4402 at $58,300, posted in December 2025. On the merits,, the December goods receipt was accrued from the receiving log, which the reviewer confirmed is now the source for the accrual. The service period is December 2025 against an invoice dated 2026-01-08. For Corvid Metalworks in December 2025, the period recorded matches the service period and no adjustment arises. On Corvid Metalworks, the evidence file for this item includes an email chain that fixes the date on which the parties agreed.

On the balance, the completeness work covered AP-4558, Halloran Electrical, for $32,400 covering March 2026 and invoiced 2026-04-14. On reperformance,, panel work completed in March was invoiced in April and not accrued; the work order supports the earlier period. The ledger records the cost in April 2026. For Halloran Electrical in March 2026, cost belonging to the earlier period was recorded later, so the earlier period is understated. On Halloran Electrical, the evidence was inspected in original form rather than as a management-prepared summary. AP-4261 relates to Brightline Cloud and covers September 2025 at $96,400. Read narrowly,, hosting is billed monthly in arrears and the accrual matches the metered usage report for the period. On Brightline Cloud, the supporting analysis was rebuilt from source

rather than reviewed, because the calculation drives an adjustment. For Brightline Cloud in September 2025, the period recorded matches the service period and no adjustment arises. The invoice is dated 2025-10-01 and the amount posted in September 2025. On the balance, fieldwork tested AP-4721, Sandhill Staffing, for $22,180 covering June 2026 and invoiced 2026-07-08. On the substance,, two technicians' final week was invoiced after the cut-off and not accrued, which is the same pattern seen in September 2025. The ledger records the cost in July 2026. For Sandhill Staffing in June 2026, cost belonging to the earlier period was recorded later, so the earlier period is understated. On Sandhill Staffing, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected.

On any view, for Ashgrove Facilities the reviewer tested AP-4744 at $14,620, posted in June 2026. On the substance,, the standing service schedule supports the accrual and no variance arose on invoice. The service period is June 2026 against an invoice dated 2026-07-02. For Ashgrove Facilities in June 2026, the period recorded matches the service period and no adjustment arises. On Ashgrove Facilities, the item is cross-referenced to the corresponding entry in the information request register. On a second read, for Sandhill Staffing the reviewer tested AP-4522 at $46,900, posted in March 2026. On reperformance,, agency hours are now accrued from the timekeeping export rather than from invoices, and the March accrual agrees. The service period is March 2026 against an invoice dated 2026-04-09. For Sandhill Staffing in March 2026, the period recorded matches the service period and no adjustment arises. On Sandhill Staffing, the reviewer noted the item for the closing meeting agenda because the seller had not seen the analysis before fieldwork. On the papers, for Corvid Metalworks the reviewer tested AP-4644 at $64,800, posted in June 2026. In sequence,, the June receipt was accrued from the receiving log and agrees to the vendor statement. The service period is June 2026 against an invoice dated 2026-07-07. For Corvid Metalworks in June 2026, the period recorded matches the service period and no adjustment arises. On Corvid Metalworks, the conclusion rests on a document produced by a third party rather than by the company.

**Schedule 13.1 - Accrual cutoff test results**

| Voucher | Vendor | Invoice date | Service period | Amount ($) | Period recorded | Cutoff conclusion |
|---|---|---|---|---|---|---|
| AP-4182 | Wetherby Freight Services | 2025-10-06 | September 2025 | 42,860 | October 2025 | Understated |
| AP-4207 | Corvid Metalworks | 2025-10-02 | September 2025 | 71,640 | October 2025 | Understated |
| AP-4233 | Halloran Electrical | 2025-10-11 | September 2025 | 18,420 | September 2025 | Correct |
| AP-4261 | Brightline Cloud | 2025-10-01 | September 2025 | 96,400 | September 2025 | Correct |
| AP-4288 | Sandhill Staffing | 2025-10-14 | September 2025 | 34,720 | October 2025 | Understated |
| AP-4312 | Fremont Commercial Bank | 2025-10-05 | September 2025 | 24,600 | September 2025 | Correct |
| AP-4371 | Ashgrove Facilities | 2025-10-03 | September 2025 | 12,840 | September 2025 | Correct |
| AP-4402 | Corvid Metalworks | 2026-01-08 | December 2025 | 58,300 | December 2025 | Correct |
| AP-4438 | Wetherby Freight Services | 2026-01-05 | December 2025 | 27,315 | December 2025 | Overstated |
| AP-4465 | Northline Customs Brokers | 2026-01-12 | December 2025 | 21,480 | January 2026 | Understated |
| AP-4491 | Brightline Cloud | 2026-01-02 | December 2025 | 118,600 | December 2025 | Correct |
| AP-4522 | Sandhill Staffing | 2026-04-09 | March 2026 | 46,900 | March 2026 | Correct |
| AP-4558 | Halloran Electrical | 2026-04-14 | March 2026 | 32,400 | April 2026 | Understated |
| AP-4583 | Larkspur Controls Sellers | 2026-04-01 | Deferred consideration | 486,500 | March 2026 | Correct |
| AP-4672 | Wetherby Freight Services | 2026-07-03 | June 2026 | 38,460 | June 2026 | Correct |
| AP-4698 | Lattimer Legal LLP | 2026-07-16 | June 2026 | 68,400 | June 2026 | Estimate |
| AP-4766 | Northline Customs Brokers | 2026-07-10 | June 2026 | 26,940 | June 2026 | Correct |

## 3. Cutoff testing and period attribution

Cutoff testing asks a narrower question than recognition testing: not whether revenue exists, but whether it sits in the month the underlying performance occurred. On this point,, because no audited financial statements exist for any period in scope, every opening balance rests on management's own records and on the review engagement's limited

procedures. On the substance,, the review period runs from 2024-01-01 to 2026-06-30, comprising two full financial years and a six-month stub, with the trailing twelve months to June 2026 used as the primary reference period.

On a second read, under HC-2047 the bundled monitoring service obligation was recognized in 2025-08. In review,, no observable standalone price exists for the monitoring element, and the expected cost plus margin estimate was reperformed within a range the reviewer accepts. For bundled monitoring service the exception is classified as estimate, and no amount effect could be quantified from the available support. The workpaper for bundled monitoring service is RS-003, tested against 2025-08. On bundled monitoring service, the conclusion would change if the missing supporting document is later produced in a different form. RS-019 covers hardware on delivery on HC-2104. On inspection,, because installation is performed by the customer's contractor, transfer occurs on delivery; the delivery receipt supports the recorded date. On hardware on delivery, a sensitivity was run on the principal assumption and the range is disclosed in the accompanying schedule. The hardware on delivery amount was recognized in 2025-09 and tested against 2025-09. No exception was recorded. On any view, the sample includes RS-017, the thermal validation services obligation under HC-2092, recognized in 2026-04 and tested against 2026-05. On reperformance,, revenue for the validation obligation was recognized before the six-week extension to the validation period completed. For thermal validation services the exception is classified as timing with an amount effect of $52,800. On thermal validation services, the reviewer confirmed that the same item does not also appear on the net debt schedule.

Taken alone, also selected was RS-033, the purchased conversion of leased units obligation under HC-2052, recognized in 2026-01 and tested against 2026-01. In review,, twelve leased units converted to purchased units in January 2026; the residual lease liability was released to revenue rather than against the receivable. For purchased conversion of leased units the exception is classified as modification with an amount effect of $32,600. On purchased conversion of leased, the reviewer confirmed that the same item does not also appear on the net debt schedule. Read narrowly, the workpaper records RS-035, the annual price escalator obligation under HC-2086, recognized in 2026-05 and tested against 2026-05. Per the workpaper,, the escalator is contractual and formulaic; the recomputed monthly amount agrees to the billing extract to within a rounding difference. No exception was recorded. On annual price escalator, the reviewer declined to net this item against another with an opposite direction in the same period. At the cut-off, under HC-2150 the conversion option obligation was recognized in 2026-06. On the evidence,, the conversion option is priced at the standard rate, so no material right arises and no consideration is allocated to it. No exception was recorded. The workpaper for conversion option is RS-027, tested against 2026-06. On conversion option, the reviewer notes that management agreed the facts while reserving its position on the treatment.

RS-010 covers extended warranty on HC-2069. In substance,, the twelve-month warranty extension added by amendment was not evaluated as a separate performance obligation; management asserted immateriality without quantifying it. On extended warranty, the item was projected across the population on the basis stated in the accompanying schedule. The extended warranty amount was recognized in 2026-02 and tested against 2026-02. For extended warranty the exception is classified as judgment, and no amount effect could be quantified from the available support. On the documents, also selected was RS-018, the bundled monthly fee obligation under HC-2098, recognized in 2025-10 and tested against 2025-10. By reference,, allocation depends entirely on estimated standalone selling prices which have not been refreshed since contract inception in July 2025. For bundled monthly fee the exception is classified as estimate, and no amount effect could be quantified from the available support. On bundled monthly fee, the conclusion is stated at the low end of the supportable range, as the file convention requires. RS-015 covers spare parts pool on HC-2086. As to the facts,, consideration allocated to the spares pool obligation was set at cost rather than at an estimated standalone selling price, understating the amount deferred. On spare parts pool, reperformance used the contractual rate rather than the rate management had applied. The spare parts pool amount was recognized in 2025-12 and tested against 2025-12. For spare parts pool the exception is classified as allocation with an amount effect of $28,400.

From the extract, the workpaper records RS-008, the onboarding and operator training obligation under HC-2063, recognized in 2025-01 and tested against 2025-01. On the source,, training delivery was evidenced by attendance sheets for three sessions falling inside the recorded month. No exception was recorded. On onboarding and operator training, the item was traced from the summary schedule through the sub-ledger to the source document. On any view, the workpaper records RS-012, the service level credit accrual obligation under HC-2074, recognized in 2025-11 and tested against 2025-09. From the extract,, credits earned under the August 2025 service level commitment were recorded when the credit memo issued rather than in the months the shortfall occurred. For service level credit accrual the exception is

classified as variable consideration with an amount effect of $46,200. On service level credit accrual, the item is presented gross so that a reader can rebuild the measure from reported results. RS-026 covers fixed-fee validation on HC-2144. Taken alone,, the validation obligation was delivered inside the period; a pending change request for additional units remains unpriced and is disclosed. On fixed-fee validation, the reviewer recorded the inquiry response and the name of the respondent alongside the document reference. The fixed-fee validation amount was recognized in 2026-06 and tested against 2026-06. No exception was recorded.

## 4. Journal entry testing and the disposition of each exception

Manual entries near a period end, round-dollar entries and entries by unexpected preparers were selected in full above the stated threshold. On the evidence,, approver fields are blank on a subset of journal entries, which prevents any conclusion on the operation of the journal approval control during the affected periods. As to the facts,, management represented that the pending change request on one contract will be priced at list, which cannot be tested until the change is executed.

In sequence, a duplicate accrual of $27,315 appears as JE-25-0709 on 2025-07-31. On the record,, freight for two shipments was accrued twice from two different source documents. The duplicate reversed in December 2025; the periods either side are both misstated and were corrected in the analysis. For this duplicate accrual the preparer was M. Okonjo, approved by T. Vasquez. On this duplicate accrual, the reviewer's conclusion here differs from the position taken in the seller's own vendor material. JE-24-0871 is a self-approved entry of $96,400 posted on 2024-09-30. In the event,, the preparer and approver are the same person on a quarter-end deferred revenue release. On this self-approved entry, the reviewer confirmed that the same item does not also appear on the net debt schedule. This self-approved entry was prepared by R. Calloway and approved by R. Calloway. Segregation of duties was restored in the November 2024 workflow change; the entry itself agreed to the billing extract. JE-24-0759 is a related-party entry of $43,200 posted on 2024-08-30. On reperformance,, sublease rent to a founder-owned property entity was posted at a rate above comparable industrial space. On this related-party entry, the reviewer compared the item with the equivalent balance in the prior period before reaching a view. This related-party entry was prepared by T. Vasquez and approved by M. Okonjo. Two broker opinions were obtained; the lower opinion was used to size the normalization.

Against the ledger, the journal population produced JE-25-0142, posted 2025-02-28 by L. Brantley approved by M. Okonjo, for $42,000 and classified as a round-dollar entry. By reference,, a round accrual for recruiting fees was posted before the search firm's invoice arrived. For this round-dollar entry, the reviewer recorded the alternative treatment so that a reader can substitute it if the assumption is rejected. On this round-dollar entry, reperformance used the contractual rate rather than the rate management had applied. In substance, a round-dollar entry of $75,000 appears as JE-24-0692 on 2024-06-30. As to the facts,, an exactly round accrual for professional fees was posted without a vendor invoice or engagement letter attached. For this round-dollar entry, the reviewer compared the item with the equivalent balance in the prior period before reaching a view. For this round-dollar entry the preparer was M. Okonjo, approved by R. Calloway. On this round-dollar entry, the reviewer recorded that no comparable item was found in the two earlier periods examined. JE-25-0644 is a reserve release of $96,150 posted on 2025-06-30. At the cut-off,, the warranty reserve for a superseded gripper assembly was released to cost of sales at the half year. On this reserve release, the workpaper reference and the preparer's initials are recorded in the index so the step can be reperformed. This reserve release was prepared by T. Vasquez and approved by M. Okonjo. For this reserve release, the supporting document was produced after two requests and its late arrival is noted in the register.

On the documents, the exception log records JE-24-0418, posted 2024-03-31 by R. Calloway with no approver recorded, for $148,600 and classified as a unapproved manual entry. On the evidence,, a revenue reclassification posted on the last day of the quarter carries no approver in the workflow log. For this unapproved manual entry, the reviewer left the amount unchanged after review but strengthened the evidence reference. On this unapproved manual entry, the

reviewer recorded that no comparable item was found in the two earlier periods examined. Against the ledger, a prepaid correction of $46,900 appears as JE-25-0455 on 2025-05-01. On the merits,, a maintenance contract expensed on payment in 2024 was partially reinstated as a prepaid asset in 2025. The correction is in the right direction but was recorded in the wrong period; both years were restated in the analysis. For this prepaid correction the preparer was L. Brantley, approved by M. Okonjo. On this prepaid correction, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction. Against the ledger, the reviewer selected JE-25-1046, posted 2025-10-31 by T. Vasquez approved by M. Okonjo, for $57,450 and classified as a round-dollar entry. On a second read,, a round software subscription accrual was posted while two overlapping licences were being reconciled. The accrual was replaced by invoiced amounts in November 2025 with a small residual credit. On this round-dollar entry, the item is presented gross so that a reader can rebuild the measure from reported results.

JE-24-1118 is a post-close adjustment of $267,500 posted on 2024-12-31. In detail,, an inventory obsolescence charge was posted eleven days after the close was declared complete. On this post-close adjustment, the reviewer recorded the inquiry response and the name of the respondent alongside the document reference. This post-close adjustment was prepared by External adviser and approved by M. Okonjo. The entry is supported by an engineering change notice; the reviewer split it between recurring and one-time components. On inspection, a credit to expense of $31,200 appears as JE-26-0207 on 2026-03-02. On a second read,, a cargo insurance premium refund was credited to insurance expense rather than being deferred over the replacement policy. For this credit to expense, the explanation offered was plausible and was still corroborated against a document before being accepted. For this credit to expense the preparer was L. Brantley, approved by M. Okonjo. On this credit to expense, the conclusion would change if the missing supporting document is later produced in a different form. Against the ledger, the reviewer examined JE-26-0134, posted 2026-02-13 by M. Okonjo approved by T. Vasquez, for $96,800 and classified as a credit to expense. On the substance,, a research credit relating to two earlier years was credited to expense when the refund was received. The credit study attributes the qualifying spend to earlier periods; the benefit was removed from the measured period. On this credit to expense, the direction of this item is unfavourable to the seller and it is reported on the same basis as the favourable items.

**Schedule 13.3 - Error projection by population**

| Population and period | Evidence source | Items tested | Coverage of value | Errors found | Gross error ($) | Projected effect ($) |
|---|---|---|---|---|---|---|
| Hardware transfer dates - FY2025 | Acceptance certificates | 18 | 59% | 3 | 174,866 | 296,383 |
| Hardware transfer dates - LTM Jun-2026 | Acceptance certificates | 33 | 33% | 4 | 99,493 | 301,493 |
| Subscription monthly recognition - FY2025 | Billing extract | 27 | 83% | 5 | 106,897 | 128,791 |
| Subscription monthly recognition - LTM Jun-2026 | Billing extract | 36 | 63% | 3 | 123,246 | 195,628 |
| Deployment milestone revenue - FY2025 | Milestone certificates | 37 | 61% | 5 | 169,244 | 277,449 |
| Deployment milestone revenue - LTM Jun-2026 | Milestone certificates | 51 | 36% | 5 | 154,308 | 428,633 |
| Training obligation delivery - FY2025 | Attendance records | 63 | 77% | 2 | 48,052 | 62,405 |
| Training obligation delivery - LTM Jun-2026 | Attendance records | 47 | 26% | 0 | 0 | 0 |
| Service credits and rebates - FY2025 | Credit memoranda | 44 | 56% | 4 | 177,265 | 316,544 |
| Service credits and rebates - LTM Jun-2026 | Credit memoranda | 31 | 60% | 6 | 161,321 | 268,868 |

| Population and period | Evidence source | Items tested | Coverage of value | Errors found | Gross error ($) | Projected effect ($) |
|---|---|---|---|---|---|---|
| Accounts payable cutoff - FY2025 | Goods receipt notes | 53 | 68% | 5 | 63,209 | 92,954 |
| Accounts payable cutoff - LTM Jun-2026 | Goods receipt notes | 27 | 85% | 2 | 128,710 | 151,423 |
| Accrued liabilities completeness - FY2025 | Vendor statements | 37 | 56% | 5 | 120,281 | 214,787 |
| Accrued liabilities completeness - LTM Jun-2026 | Vendor statements | 39 | 28% | 2 | 135,092 | 482,471 |
| Manual journal entries - FY2025 | Journal extract | 49 | 28% | 1 | 97,029 | 346,532 |
| Manual journal entries - LTM Jun-2026 | Journal extract | 52 | 53% | 6 | 153,183 | 289,024 |
| Cash receipts application - FY2025 | Remittance advices | 33 | 62% | 4 | 77,631 | 125,211 |
| Cash receipts application - LTM Jun-2026 | Remittance advices | 67 | 76% | 1 | 155,756 | 204,942 |
| Unbilled receivable ageing - FY2025 | Project records | 21 | 82% | 1 | 65,874 | 80,334 |
| Unbilled receivable ageing - LTM Jun-2026 | Project records | 28 | 67% | 3 | 172,534 | 257,513 |

## 5. How the entry population was analysed before selection

The extract carries blank approver fields, so the population itself evidences a control gap independently of any item tested. On its facts,, recurrence is judged on evidence about the future obligation rather than on whether the cost is unusual, which is why several items management called one-time were rejected. In detail,, inventory quantities rest on perpetual records because the reviewer did not observe the June 2026 count and the count sheets were only partially made available.

On this point, a round-dollar entry of $25,000 appears as JE-26-0488 on 2026-05-29. On the evidence,, a round accrual for the October 2026 customer summit was posted six months in advance of the event. For this round-dollar entry, because the item straddles two reporting periods it appears in the trend analysis twice, once in each direction. For this round-dollar entry the preparer was T. Vasquez, approved by M. Okonjo. On this round-dollar entry, the conclusion would change if the missing supporting document is later produced in a different form. As to the facts, the exception log records JE-24-1103, posted 2024-12-31 by T. Vasquez approved by M. Okonjo, for $74,900 and classified as a reversal of a prior accrual. In substance,, the FY2024 bonus accrual was reversed in full on the last day of the year following a board decision recorded only in an email. The reversal is factually supported but the reviewer treats the benefit as a timing item on the adjustment schedule. On this reversal of a prior, the item was selected for testing because of its characteristics rather than its size. Taken alone, a related-party entry of $43,200 appears as JE-24-0759 on 2024-08-30. In the event,, sublease rent to a founder-owned property entity was posted at a rate above comparable industrial space. Two broker opinions were obtained; the lower opinion was used to size the normalization. For this related-party entry the preparer was T. Vasquez, approved by M. Okonjo. On this related-party entry, reperformance used the contractual rate rather than the rate management had applied.

As to the facts, a round-dollar entry of $50,000 appears as JE-26-0074 on 2026-01-30. On inspection,, an exactly round legal accrual was posted for an unbilled matter with no engagement letter on file. Counsel confirmed the estimate in March 2026 at a different amount; the difference is immaterial and was left uncorrected. For this round-dollar entry the preparer was L. Brantley, approved by M. Okonjo. On this round-dollar entry, the reviewer's supervisor reviewed this conclusion because it rests partly on judgment. In substance, testing surfaced JE-25-0271, posted 2025-03-14 by R. Calloway with no approver recorded, for $65,000 and classified as a grant recognition. On the record,, a state innovation grant was recognized in other income in a single entry on receipt. The programme expired in 2025, so the benefit is removed from the forward view. On this grant recognition, the item is retained in the file even though it does not change

the conclusion, so the trail remains complete. On the balance, the log carries JE-24-0301, posted 2024-02-29 by M. Okonjo approved by T. Vasquez, for $62,400 and classified as a lease accounting entry. Per the register,, the Fremont abatement was recorded as a rent reduction in the abated months rather than straight-lined. For this lease accounting entry, the direction of this item is unfavourable to the seller and it is reported on the same basis as the favourable items. On this lease accounting entry, the item was raised in the interim update and is carried forward unchanged into this file.

On the source, among the selected entries is JE-26-0248, posted 2026-03-31 by M. Okonjo approved by T. Vasquez, for $53,400 and classified as a misapplied cash receipt. In review,, an Evergreen overpayment was applied to a settled invoice and released to revenue. The reviewer reversed the release and treated the balance as a customer credit owed. On this misapplied cash receipt, the amount was agreed to the underlying system extract without a residual difference. JE-25-0142 is a round-dollar entry of $42,000 posted on 2025-02-28. Read narrowly,, a round accrual for recruiting fees was posted before the search firm's invoice arrived. On this round-dollar entry, the conclusion is stated at the low end of the supportable range, as the file convention requires. This round-dollar entry was prepared by L. Brantley and approved by M. Okonjo. The invoice differed by a small amount and the accrual was trued up in March 2025; no further action required. On the evidence, a unapproved manual entry of $148,600 appears as JE-24-0418 on 2024-03-31. On the papers,, a revenue reclassification posted on the last day of the quarter carries no approver in the workflow log. Management provided the supporting analysis after the fact; the control failure is reported and the amount was verified as correct. For this unapproved manual entry the preparer was R. Calloway, with no approver recorded. On this unapproved manual entry, the reviewer's conclusion here differs from the position taken in the seller's own vendor material.

JE-26-0561 is a post-close adjustment of $48,300 posted on 2026-06-30. At the cut-off,, the warranty accrual was increased after the close was declared complete, following the reviewer's failure-rate analysis. On this post-close adjustment, a sensitivity was run on the principal assumption and the range is disclosed in the accompanying schedule. This post-close adjustment was prepared by External adviser and approved by M. Okonjo. For this post-close adjustment, the reviewer's conclusion here differs from the position taken in the seller's own vendor material. JE-25-0311 is a capitalization entry of $213,800 posted on 2025-03-31. As to the facts,, deployment crew labour was moved from cost of sales to internal-use software in a single quarter-end entry. On this capitalization entry, the reviewer compared the item with the equivalent balance in the prior period before reaching a view. This capitalization entry was prepared by M. Okonjo and approved by T. Vasquez. The reviewer reversed the entry in its analysis; management has since changed the coding rule at source. On the source, a interim staffing accrual of $34,000 appears as JE-26-0291 on 2026-03-27. On the documents,, the final month of the interim finance engagement was accrued at a rate different from the engagement letter. The difference is small; the engagement letter rate was used in the reviewer's recomputation. For this interim staffing accrual the preparer was L. Brantley, approved by M. Okonjo. On this interim staffing accrual, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file.

## 6. How the reported figures are assembled and where the process is weak

The reported figures are the output of a monthly close process with identifiable weaknesses, and this section describes that process rather than assuming it operates. Read narrowly,, no procedures were performed on income taxes beyond identifying the exposures listed, and no view is expressed on the recoverability of any deferred tax balance. On the balance,, management represented that the extended warranty added to one contract is immaterial as a separate performance obligation, without providing a quantification.

Per the index,, the engagement is analytical and evidence-based rather than an audit, a review or an examination, and no opinion or assurance conclusion is expressed on any period or balance. In the file,, the reviewer worked from the statutory ledger throughout; where management's own adjustments had been posted into the ledger they were reversed before analysis rather than accepted as reported. In sequence,, the reviewer reperformed rather than reviewed management's own calculations wherever the calculation drives an adjustment. In detail, the reviewer examined JE-26-0488, posted 2026-05-29 by T. Vasquez approved by M. Okonjo, for $25,000 and classified as a round-dollar entry. On this point,, a round accrual for the October 2026 customer summit was posted six months in advance of the event. For this round-dollar entry, the conclusion rests on a document produced by a third party rather than by the company. On this round-dollar entry, the reviewer compared the item with the equivalent balance in the prior period before reaching a view.

At the cut-off,, capitalization decisions were documented at project level rather than at ticket level until the control change made in April 2026. In detail,, management prepares monthly reporting on a basis that differs from the statutory ledger in three respects, each of which is identified and removed before any analysis begins. In this stream,, the review period runs from 2024-01-01 to 2026-06-30, comprising two full financial years and a six-month stub, with the trailing twelve months to June 2026 used as the primary reference period. On a second read, the reviewer examined JE-26-0319, posted 2026-03-31 by R. Calloway approved by R. Calloway, for $84,300 and classified as a self-approved entry. Per the index,, the paid time off accrual movement was prepared and approved by the same person at the quarter end. For this self-approved entry, the reviewer confirmed the amount does not also sit within the working capital peg. On this self-approved entry, the reviewer noted the item for the closing meeting agenda because the seller had not seen the analysis before fieldwork.

On the evidence,, interim balances at 2026-06-30 have not been subject to a physical inventory count observed by the reviewer; the June count sheets were requested and only partially provided. On the record,, management represented that the retention-contingent portion of the deferred consideration is genuinely contingent, and the retention agreements have only partly been provided. In the file,, management represented that the second customer summit is discretionary; the reviewer inspected a signed venue contract dated before the cut-off. In the file, a entry by an unexpected preparer of $62,400 appears as JE-25-0517 on 2025-05-30. Per the workpaper,, a revenue entry was prepared by a member of the sales operations team rather than the accounting team. The entry was correct, but preparer access rights were reviewed and narrowed in July 2025. For this entry by an unexpected preparer the preparer was L. Brantley, approved by M. Okonjo. On this entry by an unexpected, the reviewer confirmed the counterparty is not a related party before accepting the document at face value.

At the cut-off,, each adjustment records who proposed it, because an item put forward by management and an item found in diligence carry different evidential weight. Per the index,, every schedule ties from a named source system extract to the reported figure through individually identified differences. On the source,, management represented that the pending change request on one contract will be priced at list, which cannot be tested until the change is executed. JE-26-0134 is a credit to expense of $96,800 posted on 2026-02-13. On testing,, a research credit relating to two earlier years was credited to expense when the refund was received. On this credit to expense, a sensitivity was run on the principal assumption and the range is disclosed in the accompanying schedule. This credit to expense was prepared by M. Okonjo and approved by T. Vasquez. The credit study attributes the qualifying spend to earlier periods; the benefit was removed from the measured period.

**Schedule 13.4 - Trial balance to management report tie-out**

| Account | Description | Statutory ledger ($) | Management report ($) | Difference ($) | Reason |
|---|---|---|---|---|---|
| 4010 | Subscription revenue | 3,318,914 | 3,318,345 | (569) | Agrees without difference |
| 4020 | Hardware revenue | 3,629,346 | 3,631,652 | 2,306 | Rounding in the reporting pack |
| 4030 | Deployment services revenue | 3,234,425 | 3,238,903 | 4,478 | Cut-off entry posted after the extract |
| 4040 | Training and onboarding revenue | 2,848,846 | 2,850,965 | 2,119 | Timing of the July mapping change |
| 4050 | Analytics module revenue | 3,755,202 | 3,759,054 | 3,852 | Agrees without difference |
| 4090 | Service credits | 1,010,845 | 1,015,225 | 4,380 | Management reclassification reversed |
| 5010 | Chassis and drive assemblies | 3,876,332 | 3,875,612 | (720) | Allocation applied only in management reporting |
| 5020 | Sensor and vision modules | 2,191,149 | 2,190,541 | (608) | Rounding in the reporting pack |
| 5030 | Scrap and yield loss | 3,133,259 | 3,131,587 | (1,672) | Agrees without difference |
| 5040 | Rework and refurbishment | 910,768 | 911,653 | 885 | Memo adjustment posted in the management ledger |
| 5110 | Hosting compute | 630,914 | 630,570 | (344) | Cut-off entry posted after the extract |

| Account | Description | Statutory ledger ($) | Management report ($) | Difference ($) | Reason |
|---|---|---|---|---|---|
| 5120 | Storage and retention | 4,375,446 | 4,379,902 | 4,456 | Rounding in the reporting pack |
| 5130 | Data egress | 2,990,525 | 2,990,606 | 81 | Timing of the July mapping change |
| 5210 | Deployment crew wages | 3,566,297 | 3,568,873 | 2,576 | Memo adjustment posted in the management ledger |
| 5220 | Travel and per diem | 813,044 | 808,696 | (4,348) | Cut-off entry posted after the extract |
| 5230 | Subcontracted installation | 1,344,677 | 1,340,038 | (4,639) | Management reclassification reversed |
| 5310 | Warranty parts | 373,701 | 372,267 | (1,434) | Cut-off entry posted after the extract |
| 5320 | Spares carrying cost | 2,882,510 | 2,878,553 | (3,957) | Rounding in the reporting pack |
| 5410 | Inbound freight | 537,497 | 535,076 | (2,421) | Management reclassification reversed |
| 5420 | Outbound freight | 4,569,380 | 4,573,797 | 4,417 | Allocation applied only in management reporting |
| 5430 | Customs duty and brokerage | 2,394,740 | 2,395,008 | 268 | Management reclassification reversed |
| 6110 | Engineering salaries | 3,225,722 | 3,226,509 | 787 | Rounding in the reporting pack |
| 6120 | Capitalized development | 4,004,841 | 4,005,446 | 605 | Allocation applied only in management reporting |
| 6210 | Sales salaries | 1,595,967 | 1,593,119 | (2,848) | Agrees without difference |
| 6220 | Sales commissions | 2,656,403 | 2,653,776 | (2,627) | Agrees without difference |
| 6230 | Marketing and events | 3,252,381 | 3,251,281 | (1,100) | Cut-off entry posted after the extract |
| 6310 | General and administrative | 622,113 | 617,562 | (4,551) | Cut-off entry posted after the extract |
| 6320 | Professional fees | 4,272,930 | 4,269,013 | (3,917) | Rounding in the reporting pack |
| 6330 | Insurance | 147,515 | 150,207 | 2,692 | Management reclassification reversed |
| 6410 | Vehicle costs | 1,863,485 | 1,860,848 | (2,637) | Allocation applied only in management reporting |
| 6455 | Club and membership dues | 1,976,344 | 1,978,359 | 2,015 | Memo adjustment posted in the management ledger |
| 6510 | Occupancy - Fremont | 2,649,027 | 2,648,581 | (446) | Timing of the July mapping change |
| 6520 | Occupancy - sublease | 2,233,391 | 2,234,710 | 1,319 | Timing of the July mapping change |
| 6610 | Share-based compensation | 3,439,889 | 3,437,279 | (2,610) | Timing of the July mapping change |
| 6710 | Depreciation - tooling | 1,727,596 | 1,724,477 | (3,119) | Allocation applied only in management reporting |
| 6720 | Depreciation - fleet | 1,038,926 | 1,041,039 | 2,113 | Management reclassification reversed |
| 7010 | Interest expense | 403,948 | 399,459 | (4,489) | Agrees without difference |

| 7040 | Research credits | 2,977,249 | 2,975,580 | (1,669) | Timing of the July |

| Account | Description | Statutory ledger ($) | Management report ($) | Difference ($) | Reason |
|---|---|---|---|---|---|
| | | | | | mapping change |

## 7. Management representations relied upon and their support

Several conclusions in this file rest in part on what management told the reviewer, and the reviewer distinguishes those from conclusions supported by documents. On the source,, segregation between preparer and approver was not enforced until the November 2024 workflow change, and self-approved entries appear on both sides of that date. On this point,, consolidation covers the parent and the Ontario deployment subsidiary; the dormant Delaware holding entity has no activity in the period and was excluded after inspection of its trial balance.

On the source,, management represented that the extended warranty added to one contract is immaterial as a separate performance obligation, without providing a quantification. Per the workpaper,, reconciliation differences are reported at the amount found, including small residuals, rather than being described as immaterial and omitted. On reperformance,, management represented that the second customer summit is discretionary; the reviewer inspected a signed venue contract dated before the cut-off. ADJ-41 concerns warranty accrual shortfall against observed failure rates and was raised by diligence as a normalization item. On the documents,, the warranty accrual rate has not been updated since 2023 although observed failure rates on the current chassis are higher than the rate assumed. On Warranty accrual shortfall against, the item was raised in the interim update and is carried forward unchanged into this file. Warranty accrual shortfall against is recorded as a deduction of $79,600 in LTM Jun-2026, evidenced by the field failure log, the parts cost file and a recalculated accrual. Warranty accrual shortfall against was reduced at $48,300: the reviewer used the twelve-month observed rate rather than the three-month rate management disputed, which lowered the adjustment.

In review,, no procedures were performed on income taxes beyond identifying the exposures listed, and no view is expressed on the recoverability of any deferred tax balance. On the merits,, fieldwork ran from 2026-06-18 to 2026-07-16 with two site visits to Fremont and one remote session with the Ontario team, and all inquiry responses are recorded with the name of the respondent. By reference,, the fixed asset register has not been reconciled to the general ledger, so depreciation within the earnings measure cannot be tied to asset-level records. Taken alone, the reviewer traced ADJ-12, Rent abatement on the Fremont lease, which deducts $62,400 against FY2024 on a normalization basis. Against the ledger,, a four-month abatement negotiated during the 2024 expansion reduced cash rent below the contractual level that continues after the abatement window. Support consists of the lease amendment dated 2024-02-08 and the straight-line rent schedule, and the item was put forward by diligence. Rent abatement on the was accepted at $62,400 and the reason sits on the schedule itself. On Rent abatement on the, reperformance used the contractual rate rather than the rate management had applied.

At the cut-off,, management represented that all engagement letters for adviser fees exist, but two invoices remain unsupported after two requests. On its facts,, interim balances at 2026-06-30 have not been subject to a physical inventory count observed by the reviewer; the June count sheets were requested and only partially provided. In sequence,, period attribution is decided from the document that fixes the service period, not from the invoice date, wherever the two differ. On its facts, the tie-out includes ADJ-30, Relocation and immigration cost for two senior hires, which adds back $63,750 against Q1-2026 on a non-recurring basis. On the papers,, two senior engineering hires carried relocation and immigration cost that management characterizes as a hiring event rather than an ongoing expense. Support consists of relocation vendor invoices and the two executed offer letters, and the item was put forward by management. Relocation and immigration cost was reduced at $41,500: the reviewer allowed the immigration component, which is genuinely episodic, and left relocation in reported cost because the company relocated hires in each of the three years reviewed. On Relocation and immigration cost, no further procedures were considered necessary once the source document had been inspected.

In detail,, coverage of the customer base is complete for the twenty-five largest accounts by revenue and sampled below that level, with the sampling basis stated wherever a projection is made. In sequence,, second-preparer reperformance was applied to one contract in each testing stream so that the testing approach itself is evidenced as reproducible. Per the index,, management represented that the capitalized configuration work created a lasting integration component; the ticket detail supports this for part of the amount only. ADJ-22 concerns contractor conversion cost differential and was raised by management as a run-rate item. On a second read,, eleven field technicians converted from

agency contracts to direct employment in February 2026, and management annualizes the resulting rate saving. On Contractor conversion cost differential, the reviewer notes that management agreed the facts while reserving its position on the treatment. Contractor conversion cost differential is recorded as a deduction of $138,900 in Q1-2026, evidenced by offer letters for eleven converted contractors and the contractor billing history. Contractor conversion cost differential was reduced at $92,400: the reviewer applied the differential only to the converted population and added back employer taxes and benefit loading management had omitted.

**Schedule 13.5 - Journal population stratification**

| Stratum and period | Entries | Value ($) | Round-dollar count | Post-close count | Selected for test |
|---|---|---|---|---|---|
| Manual entries above $250,000 - FY2025 | 71 | 2,190,885 | 2 | 2 | 7 |
| Manual entries above $250,000 - LTM Jun-2026 | 39 | 12,093,162 | 4 | 2 | 3 |
| Manual entries $100,000 to $250,000 - FY2025 | 31 | 2,348,008 | 3 | 2 | 3 |
| Manual entries $100,000 to $250,000 - LTM Jun-2026 | 97 | 11,019,360 | 14 | 4 | 17 |
| Manual entries $25,000 to $100,000 - FY2025 | 45 | 1,665,236 | 4 | 4 | 6 |
| Manual entries $25,000 to $100,000 - LTM Jun-2026 | 118 | 6,695,236 | 23 | 13 | 8 |
| Manual entries below $25,000 - FY2025 | 69 | 10,926,044 | 10 | 11 | 14 |
| Manual entries below $25,000 - LTM Jun-2026 | 61 | 3,666,337 | 0 | 2 | 18 |
| Round-dollar entries at or above $10,000 - FY2025 | 109 | 10,370,056 | 25 | 6 | 4 |
| Round-dollar entries at or above $10,000 - LTM Jun-2026 | 110 | 2,882,338 | 2 | 17 | 17 |
| Entries posted in the last three days of a period - FY2025 | 125 | 7,755,676 | 20 | 5 | 8 |
| Entries posted in the last three days of a period - LTM Jun-2026 | 130 | 4,066,580 | 27 | 17 | 10 |
| Entries posted after the close was declared complete - FY2025 | 118 | 2,079,328 | 10 | 15 | 15 |
| Entries posted after the close was declared complete - LTM Jun-2026 | 136 | 11,152,865 | 20 | 6 | 18 |
| Entries where preparer equals approver - FY2025 | 116 | 6,275,730 | 12 | 3 | 10 |
| Entries where preparer equals approver - LTM Jun-2026 | 104 | 4,703,977 | 21 | 5 | 6 |

| Entries by preparers outside the accounting team - LTM Jun-2026 | 134 | 10,912,072 | 27 | 4 | 6 |

## 8. Outstanding requests, owners and unresolved effects

The register below is reproduced as it stood at the date of this file, including items that have been resolved, so that the diligence trail is not rewritten. On the source,, source data was extracted from the general ledger on 2026-07-02 and from the billing platform on 2026-07-03; extracts taken after those dates were used only to confirm subsequent settlement. On reperformance,, management represented that customer credits are ordinarily applied against future billings rather than refunded, and the credit listing shows two accounts that have requested cash refunds.

IR-074 asks for pto liability rollforward by employee band. The request for pto liability rollforward by was raised on 2026-06-30 with the seller - hr director and material was provided on 2026-07-10, leaving the item closed. For pto liability rollforward by, the supporting document was produced after two requests and its late arrival is noted in the register. On testing,, the rollforward supported both the accrual movement adjustment and the split treatment in net debt. IR-027 asks for billing system extract reconciled to the general ledger by month. The request for billing system extract reconciled was raised on 2026-06-19 with the seller - controller and material was provided on 2026-06-27, leaving the item closed. For billing system extract reconciled, the reviewer noted the item for the closing meeting agenda because the seller had not seen the analysis before fieldwork. By reference,, the extract was reconciled and the residual monthly differences are immaterial and explained. In this stream, the seller - engineering manager holds IR-045, fixed asset additions traced to underlying engineering tickets, requested 2026-06-24. As to the facts,, the capitalization reclassification could change if further tickets support the treatment management applied. On fixed asset additions traced, as at the date of this file material was provided on 2026-07-06 and the item is received - under review. For fixed asset additions traced, the reviewer asked for the underlying system report and worked from that rather than from the extract provided.

On its facts, the seller - revenue accountant holds IR-088, analysis of the pinecrest option pricing against list, requested 2026-07-02. By agreement,, the material right judgment stays open, and any allocation to the option would move revenue between periods. On analysis of the pinecrest, as at the date of this file nothing has been provided and the item is open. For analysis of the pinecrest, the file records the question asked, the answer given and the document that settled it. In the file, the log shows IR-096, confirmation of restricted cash release conditions, addressed to the seller - treasury and requested on 2026-07-03; the response is received - under review. The status is recorded as pending. On its facts,, if release depends on milestones beyond closing the balance stays outside cash at closing. For confirmation of restricted cash, this is one of the items the seller's adviser has indicated it will contest at the closing meeting. Per the workpaper, the log shows IR-014, signed acceptance certificate for crestline site three, addressed to the seller - deployment lead and requested on 2026-06-18; nothing has been provided. The status is recorded as open. On the merits,, without a dated certificate the transfer month rests on the installer's log, leaving a month of hardware revenue in the wrong period. For signed acceptance certificate for, the reviewer recorded that no comparable item was found in the two earlier periods examined.

In review, the seller - operations holds IR-081, inventory count sheets for the june 2026 physical count, requested 2026-07-01. At the cut-off,, count coverage of the spares pool cannot be confirmed, so inventory in the working capital peg rests on the perpetual records. On inventory count sheets for, as at the date of this file the response is partially received and the item is open. For inventory count sheets for, the item was tested twice, once in the revenue stream and once in the balance sheet stream, with the same result. On the documents, the information request log records IR-023, state nexus opinion supporting no sales tax filings, addressed to the seller - tax adviser and requested on 2026-06-19; material was provided on 2026-07-02. The status is recorded as received - under review. On a second read,, the exposure remains a range until the opinion's scope is compared with the states in which field staff worked. For state nexus opinion supporting, the reviewer confirmed that the same item does not also appear on the net debt schedule. IR-034 asks for board minutes evidencing the december 2024 bonus decision. The request for board minutes evidencing the was raised on 2026-06-20 with the seller - company secretary and material was provided on 2026-07-08, leaving the item received - insufficient. For board minutes evidencing the, the item was raised in the interim update and is carried forward unchanged

into this file. On the evidence,, the minutes record the decision but not the plan terms, so the reviewer relies on management's representation that the bonus remained available.

Against the ledger, the seller - sales operations holds IR-085, commission plan documents for all sales roles, requested 2026-07-01. In review,, the plans supported the commission true-up and confirmed the accrual basis the reviewer applied. On commission plan documents for, as at the date of this file material was provided on 2026-07-08 and the item is closed. For commission plan documents for, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file. Read narrowly, the seller - it director holds IR-059, hosting agreement effective 2026-04-30 with the rate card, requested 2026-06-26. On the documents,, the agreement supported the contractual portion of the hosting savings and allowed the rest to be rejected. On hosting agreement effective 2026-04-30, as at the date of this file material was provided on 2026-06-30 and the item is closed. For hosting agreement effective 2026-04-30, the reviewer declined to net this item against another with an opposite direction in the same period. By reference, the log shows IR-078, journal entry extract with preparer and approver fields, addressed to the seller - systems administrator and requested on 2026-06-30; material was provided on 2026-07-04. The status is recorded as closed. On the papers,, the extract enabled the exception testing; approver fields are blank for a subset of entries, which is itself the finding. For journal entry extract with, the reviewer compared the item with the equivalent balance in the prior period before reaching a view.

**Schedule 13.6 - Quarterly seasonality of working capital**

| Quarter | Site go-lives | Billings ($) | Peak NWC ($) | Trough NWC ($) | Intra-quarter swing ($) | Principal driver |
|---|---|---|---|---|---|---|
| 2024-Q1 | 4 | 4,339,329 | 5,980,032 | 5,636,234 | 343,798 | Retail freeze delaying go-live dates |
| 2024-Q2 | 11 | 5,786,653 | 6,123,187 | 5,616,406 | 506,781 | Subscription renewals clustered in the quarter |
| 2024-Q3 | 14 | 4,060,289 | 5,374,280 | 4,852,728 | 521,552 | Customer capital budgets released early in the quarter |
| 2024-Q4 | 11 | 4,082,216 | 4,598,722 | 3,176,807 | 1,421,915 | Deployment crew utilisation at seasonal peak |
| 2025-Q1 | 3 | 6,390,482 | 5,613,385 | 4,661,173 | 952,212 | Customer capital budgets released early in the quarter |
| 2025-Q2 | 7 | 4,082,949 | 6,760,237 | 5,330,845 | 1,429,392 | Inventory build ahead of the following quarter |
| 2025-Q3 | 5 | 4,842,689 | 5,759,622 | 4,924,592 | 835,030 | Customer capital budgets released early in the quarter |
| 2025-Q4 | 7 | 4,637,448 | 5,480,996 | 4,472,032 | 1,008,964 | Retail freeze delaying go-live dates |
| 2026-Q1 | 10 | 5,744,858 | 4,518,847 | 3,501,087 | 1,017,760 | Deployment crew utilisation at seasonal peak |
| 2026-Q2 | 9 | 6,057,295 | 4,740,818 | 4,230,144 | 510,674 | Subscription renewals clustered in the quarter |

## 9. What remains unverified at the date of this file

Readers should treat the following limitations as qualifications on the schedules in this file rather than as general disclaimer language. On this point,, accruals were historically raised from invoices rather than from receiving and shipping records, which is the direct cause of the cutoff errors identified. On the documents,, the close calendar allows entries after the close is declared complete, and post-close entries appear in five of the ten quarter ends reviewed.

In the file,, because no audited financial statements exist for any period in scope, every opening balance rests on management's own records and on the review engagement's limited procedures. As matters stand,, ranges are used where evidence supports a range, and the low end of a range is used when the reviewer must choose a single figure for a schedule. Against the ledger,, journal approval operates through a workflow field that can be left blank, and the reviewer found it blank on entries with a material aggregate value. On the record, a further request, IR-067, supplier settlement letter for the harness rework recovery, addressed to the seller - procurement and requested on 2026-06-29; material was provided on 2026-07-02. The status is recorded as closed. From the extract,, the letter confirmed the recovery amount and allowed the campaign to be presented on a net basis. For supplier settlement letter for, the reviewer recorded the amount as computed rather than as rounded, so the schedule footings agree.

Per the workpaper,, management represented that the pending change request on one contract will be priced at list, which cannot be tested until the change is executed. As to the facts,, the reviewer worked from the statutory ledger throughout; where management's own adjustments had been posted into the ledger they were reversed before analysis rather than accepted as reported. As matters stand,, the close calendar allows entries after the close is declared complete, and post-close entries appear in five of the ten quarter ends reviewed. As to the facts, the seller - counsel holds IR-019, retention agreements underpinning the larkspur earn-out, requested 2026-06-18. On its facts,, the split between fixed deferred consideration and retention-contingent amounts cannot be finalized, so part of the balance stays in a range. On retention agreements underpinning the, as at the date of this file the response is partially received and the item is open. For retention agreements underpinning the, the reviewer recorded that no comparable item was found in the two earlier periods examined.

On any view,, coverage of the customer base is complete for the twenty-five largest accounts by revenue and sampled below that level, with the sampling basis stated wherever a projection is made. In the event,, recurrence is judged on evidence about the future obligation rather than on whether the cost is unusual, which is why several items management called one-time were rejected. By agreement,, the reviewer has not verified the completeness of the contract population beyond reconciling the contract register to the billing system and to recorded revenue. At the cut-off, the seller - hr director holds IR-107, detail of the fy2026 discretionary bonus by participant, requested 2026-07-06. On the substance,, the pre-closing service period allocation supporting debt-like treatment is only partly evidenced. On detail of the fy2026, as at the date of this file the response is partially received and the item is open. For detail of the fy2026, the item was tested twice, once in the revenue stream and once in the balance sheet stream, with the same result.

At the cut-off,, cash application is performed by the same person who maintains the customer master, which is what allowed an overpayment to be applied to a settled invoice. In review,, no financial statement for any period in scope has been audited; FY2024 and FY2025 were subject to a review engagement and the 2026 stub has had no external involvement at all. On the balance,, period attribution is decided from the document that fixes the service period, not from the invoice date, wherever the two differ. IR-031 asks for standalone selling price analysis for bundled northfield contracts. The request for standalone selling price analysis was raised on 2026-06-20 with the seller - revenue accountant and nothing has been provided, leaving the item open. For standalone selling price analysis, the reviewer noted that the treatment adopted here must be applied consistently to the comparable item elsewhere in the file. On the substance,, allocation for the bundled contracts cannot be independently tested, so the revenue split between obligations is unverified.
