EMMA Filing Index (this document)	emma_filing_index.pdf	DOCX	n/a (index, not a discrete filing)

EMMA Filing Index (this document) (emma_filing_index.pdf): Indexes every disclosure document available for the Bonds in this folder.

Introduction and Purpose of this Filing Index

This filing index indexes every disclosure document the Electronic Municipal Market Access system (EMMA) makes available for the Bonds, organized by category, so a reader can locate a specific filing without searching the full EMMA system.

This index itself does not constitute a filing under Rule 15c2-12 and creates no disclosure obligation beyond what the Official Statement's own Continuing Disclosure Undertaking already establishes.

The categories used below track EMMA's own real document-type groupings for a municipal conduit issue of this kind.

The specific filing dates, document titles, and identifying numbers for each entry appear in this index's own tables and are not restated in narrative form here.

About EMMA and How to Use This Index

The Electronic Municipal Market Access system, known as EMMA, is the Municipal Securities Rulemaking Board's centralized free public system for municipal securities disclosure documents and trade price information. Investors use EMMA to review the official statements, continuing disclosures, and market price data associated with municipal securities.

An investor ordinarily searches EMMA by issuer name, CUSIP number, or state to find the disclosure documents for a specific municipal security. Using one of those search terms, the investor can locate the security and then review the documents filed for it.

The documents in this index are a declared, format-faithful reconstruction rather than a live EMMA retrieval. Live EMMA reachability was not established for compiling this index, and no retrieval date, URL, or external hash is included here.

A prospective purchaser should always consult the most recently filed version of any document referenced here. Continuing disclosure filings supersede one another over time, so an older filing may not reflect the current status of the security or the issuer and obligor.

Official Statement and Offering Documents

The Official Statement is the primary offering document prepared in connection with the original issuance of municipal bonds of this kind. It describes the bonds, the security, the tax treatment, and the risks of the investment.

An Official Statement Excerpt is a shorter document that reproduces selected sections of the Official Statement verbatim for quick reference. It is not itself a separate or superseding disclosure.

Both documents in this category are indexed together because they describe the same offering.

For the exact document titles and public file names for the Official Statement and the Official Statement Excerpt, see this index's own table.

Continuing Disclosure Annual Reports

An Annual Continuing Disclosure Report is filed once per fiscal year under the Continuing Disclosure Undertaking described in the Official Statement, reporting updated financial and operating information. Each Annual Report is due within a fixed period after the end of the fiscal year it covers. Three Annual Reports are indexed here, one per fiscal year covered to date. For which fiscal years are covered, see this index's own table.

Material Event Notices

A Material Event Notice is filed under Rule 15c2-12(b)(5)(i)(C) within ten business days of the occurrence of an enumerated event. This index includes four such notices.

The four notices are Category Eleven, which covers rating changes; Category Eight, the bond-call category; Category Fifteen, which covers incurrence of a financial obligation; and Category Sixteen, which covers default, event of acceleration, termination event, or modification of terms of a financial obligation reflecting financial difficulties.

Categories Fifteen and Sixteen are reported separately even when they concern the same underlying financial obligation. Category Fifteen reports the ordinary incurrence of that obligation. Category Sixteen reports a later event under that obligation reflecting financial difficulties, such as default, acceleration, termination, or modification of its terms.

For the specific category number and filing date of each of the four notices, see the table of filings in this index.

Trade Activity and EMMA's Disclaimer Register

The trade data extract indexed in this category reports secondary-market trade prices and yields for the Bonds, drawn from the Municipal Securities Rulemaking Board's real-time trade reporting system. This extract is distinct from the disclosure documents described in the other categories of this index, because it reflects actual market transactions in the Bonds rather than filings made by the Authority or the Obligor.

Information made available through EMMA is provided without warranty of accuracy or completeness and is not a recommendation regarding any municipal security.

EMMA disclaims responsibility for the content of documents submitted to it, which remain the responsibility of the filer. This index was compiled from the documents actually present in this folder, and does not represent that no other filing exists for the Bonds beyond what is indexed here.
