Category 16 ("Default, Event of Acceleration, Termination Event or Modification of Terms of a Financial Obligation Reflecting Financial Difficulties"), Rule 15c2-12(b)(5)(i)(C), Securities Exchange Act of 1934.

Date of this notice: 2025-02-25.

This notice is filed within ten business days of the occurrence of the event described herein (2025-02-13) - the date the guarantor delivered its compliance certificate reporting the default described below, which is the occurrence date for purposes of this notice; this notice is filed on 2025-02-25, 7 business day(s) after that occurrence, as the Continuing Disclosure Undertaking requires.

Introduction and Notice of an Event Under a Financial Obligation

This notice is submitted pursuant to the Continuing Disclosure Undertaking described in the Official Statement for the Authority's industrial revenue bonds, and it reports an event under a financial obligation reflecting financial difficulties of the Obligor. The event is reported under Rule 15c2-12's category for that event, as stated by number elsewhere in this notice. This filing is made on EMMA in accordance with the terms of the Undertaking.

This event category is distinct from the incurrence-of-a-financial-obligation category under Rule 15c2-12. The distinction is that the event reported here reflects financial difficulties of the Obligor, whereas an ordinary incurrence of a financial obligation in the ordinary course of business does not. The present notice is therefore required because the financial difficulty itself is the material fact to be disclosed.

The Obligor's most recently filed notice reporting the incurrence of the same underlying financial obligation is hereby cross-referenced. That earlier notice is identified by its filing date and descriptive title in the event information set forth elsewhere in this notice. This notice should be read together with that earlier filing for a complete understanding of the obligation and the current event.

The specific event giving rise to this notice, including the nature of the financial difficulty and the date or dates on which the event occurred and became known to the Obligor, are stated elsewhere in this notice. Those details are incorporated into this filing by reference. No further description of the event is necessary in this introduction.

Description of the Event and the Financial Difficulties it Reflects

At the fiscal quarter-end test date of 2024-12-31, under the SAME secured revolving credit facility described in this Obligor's most recently filed Category 15 notice - a financial obligation distinct from the Bonds' own Loan Agreement with the Authority - the corporate guarantor's total net leverage ratio exceeded the maximum ratio permitted under that facility, constituting an event of default. The guarantor's compliance certificate reporting this event was delivered on 2025-02-13, which is the occurrence date for purposes of this notice. The lenders under that facility granted a waiver curing the default on 2025-02-20; there was no acceleration, and no payment on the Bonds was missed or delayed. This event reflects the same softened operating conditions the Obligor's fiscal year 2024 continuing disclosure Annual Report already reports for the Bonds' own, separate Loan Agreement debt service coverage covenant, which that Annual Report states was satisfied throughout that fiscal year.

The event being reported is an exceedance of the maximum permitted total net leverage level under the Company's secured credit facility at a fiscal quarter-end test date. The total net leverage covenant under that facility tests the ratio of the Company's total net indebtedness, generally measured as total debt reduced by cash and cash equivalents, to a trailing earnings measure defined in the credit agreement. At each test date, the covenant requires that this ratio remain at or below the maximum permitted level. Softened operating conditions at the test date can compress the trailing earnings measure while operating needs consume cash, causing the ratio to exceed that maximum.

This financial obligation is distinct from the Bonds' own Loan Agreement with the Authority. The Loan Agreement contains its own debt service coverage covenant, and that covenant is reported separately in the Obligor's continuing disclosure Annual Reports. The secured credit facility event described here therefore does not alter or supersede the Loan Agreement's coverage covenant.

Upon identifying the exceedance, the guarantor engaged promptly with the lenders under the secured credit facility. The engagement included discussions concerning the causes of the ratio exceedance and the steps being considered to address the facility's covenant requirements. The guarantor's prompt engagement reflects its ongoing oversight of the Company's financial condition and its efforts to maintain an open dialogue with the facility lenders.

This event does not itself describe a default on the Bonds themselves. The Bonds remain governed by the Loan Agreement and the related trust documents, and any actual event of default on the Bonds would be the subject of a separate material event notice if required. This notice is being filed because the covenant exceedance under the separate credit facility reflects financial difficulties of the obligated person, not because a default on the Bonds has occurred.

Cure of the Default; No Acceleration; Distinction from Category 15

The lenders' waiver, which is dated elsewhere in this notice, cured the default in full with respect to the facility, and no ongoing breach remains in effect. The terms of the facility, including its pricing and covenant levels, have not been changed beyond the waiver itself. Consequently, the Company is not in default under the facility as of the date of this filing, and the Authority has no current obligation to take any remedial action.

There was no acceleration of the facility at any point, and the debt service on the Bonds was at no time affected, missed, or delayed. All payments due on the Bonds have continued to be made in accordance with their original schedule, and the waiver does not alter the timing or amount of any such payment. Neither the Authority nor the Company has received any notice of acceleration, and none is contemplated.

This reported event qualifies as a Category 16 event reflecting financial difficulties because it arises from softened operating conditions that impaired the Company's ability to maintain compliance with the facility's covenants. The default itself, while cured, indicates a measure of financial strain that distinguishes it from an ordinary amendment entered into in the ordinary course of business without any such difficulty. By contrast, the Obligor's previously-filed notice concerning the same facility described an amendment that was prospective and administrative in nature, not a response to financial stress, and therefore that notice was properly categorized as a Category 15 event. The distinction turns on the presence or absence of financial difficulty, not on the mere fact that a covenant was waived or modified.

The Obligor will report any further material developments concerning this facility in future Annual Reports or notices of material events as required under the continuing disclosure undertaking. This includes any recurrence of a default that is not cured, any change to the facility's payment structure, or any other event that could affect the Bondholders. The Obligor remains committed to full transparency with respect to the facility and the financial condition of the Company.

Miscellaneous

This notice does not modify, amend, or supplement the Bonds, the Indenture, or the Loan Agreement in any respect. The terms and conditions of those documents remain in full force and effect as originally executed and delivered. Nothing in this notice shall be construed to alter the rights, duties, or obligations of the Authority, the Company, or the guarantor under the operative documents.

Statements of opinion contained in this notice are not representations of fact and speak only as of their respective

dates. Such statements reflect the judgment of the Obligor as of the date of this notice and may be based on assumptions and information available at that time. Subsequent events or changes in circumstances may cause these opinions to be revised or no longer accurate.

The Obligor has authorized the filing of this notice in accordance with the requirements of the continuing disclosure undertaking relating to the Bonds. The Authority has been informed of this filing. This notice is being submitted by the Obligor in compliance with its obligations under the Municipal Securities Rulemaking Board’s rules.

Further information may be obtained by referring to the Official Statement and the Obligor’s other filings on the Municipal Securities Rulemaking Board’s Electronic Municipal Market Access system. Interested parties should review those documents for a more complete description of the Bonds, the Indenture, the Loan Agreement, and the financial obligations of the Obligor. The information contained in this notice is provided without prejudice to any rights or remedies of any party under applicable law or the operative documents.
