LEGACY MODEL - MAKE-WHOLE COMPUTATION PAGE (SCANNED)

The following reproduces one printed page of the internal legacy financial model referenced elsewhere in this diligence corpus (financial_model.pdf, Calc tab). Figures below match that workbook's own printed-page block exactly, cell for cell.

CORPORATE DEVELOPMENT - INTERNAL MODEL	PRIOR-QUARTER TEMPLATE - NOT RE-TIED TO EXECUTED DOCS
Notes principal	175,000,000.00
Notes coupon rate	7.750%
Make-whole discount rate (hard-coded, prior-quarter template)	3.914192%
Make-whole spread (bps)	50
Day-count constant (hard-coded, shared model convention)	Actual/Actual ICMA
Make-whole present value of remaining payments (this page's hard-coded discount rate)	196,192,274.90
Accrued and unpaid interest (30/360)	3,955,729.17
Make-whole present value (discounted through legal maturity)	discounted to legal maturity (2031-06-15) instead of the par call date (2030-06-15)
Make-whole amount due (accrued placement basis)	accrued interest folded inside the discounted stream instead of added after the par floor
Make-whole amount due (hard-coded prior-quarter discount rate)	200,148,004.07
Make-whole amount due (nearest-tenor Treasury fallback)	198,550,667.30
Change-of-control put price (101% of par, clean)	176,750,000.00
Accrued interest (Actual/Actual ICMA, hard-coded shared constant)	3,964,993.17
Change-of-control put amount due (hard-coded shared constant)	180,714,993.17
Working-capital collar adjustment basis	excess-over-collar only
Prepared by	Corporate Development - carried forward from the prior-quarter template.
Note	Figures on this page were rolled forward from the prior quarter's model and have not been re-tied to the executed transaction documents.

[OCR NOTE: a marginal handwritten annotation, believed to read 'roll fwd next qtr - re-tie to executed docs before use', did not survive scanning legibly and is not reproduced in this text

layer.]
[SCANNING OPERATOR NOTE: original document received via inter-office fax transmission; resolution and toner condition of the source fax were both below the scanning standard normally used for permanent-record documents. This OCR text layer is provided as a convenience only and has NOT been manually proofread against the original paper record. Where this text layer conflicts with the live, formula-driven workbook elsewhere in this corpus, the workbook's own recalculated cells control without exception.]
[END OCR TEXT LAYER - this scanned attachment is a citation-of-last-resort only; financial_model.pdf's own Calc tab controls for every figure this page depicts.]
