STATEMENT OF THE ARDEN PETROLEUM COUNCIL ON PASSAGE OF SENATE BILL 214

For immediate release — 23 August 2025

The Council is disappointed by tonight's vote and is considering all options.

The Council said throughout the session that its members accept a fair contribution to resilience. What the Council opposed, and continues to oppose, is a charge computed on transactions completed years before the Act existed, at a figure the Legislature has never explained.

The Council also notes, as it did in testimony, that the coverage test in this bill may not operate as its sponsors intend. That is not a matter the Council can resolve; it is a matter the Legislature declined to address when it was raised.

The Council urges the Governor to return the bill for amendment. Members will comply with whatever law is finally enacted.

The Arden Petroleum Council represents sellers of refined products and natural gas in Arden.
