REPORT OF THE SENATE COMMITTEE ON ENERGY AND ENVIRONMENT

On amendments adopted to the Climate Resilience Funding Act, 3 May 2025

The Committee reports the bill with the following amendments.

1. Section 7-019(k)(ii)

The Committee struck the requirement that the revenue threshold be met in each of the five calendar years preceding the assessment and substituted the word 'annually'. The change is stylistic and is not intended to alter the class of entities covered.

2. Section 7-019(k)(iii)

The Committee struck the fixed figure of $10,000,000 and substituted a requirement that at least 1% of the entity's total gross revenue from sales of Fossil Fuel Products occur in the State. The Committee was advised that a fixed dollar figure would become stale as prices and volumes change, and that a proportionate test would remain current without further amendment.

3. Section 7-020(1)(c)

The Committee raised the target fund from $12,000,000,000 to $20,000,000,000. Testimony before the Committee indicated that the lower figure would not meet documented repair needs together with the adaptation programme contemplated by section 7-022.

4. No further amendments

The Committee adopted no further amendments. Sections not listed above are reported without change.

Filed with the Secretary of the Senate. The Committee did not request a revised fiscal note in respect of the amendment to section 7-020(1)(c).
