ARDEN ENVIRONMENTAL QUALITY BOARD — FLOOD RISK AREA MAPS

Index sheet and schedule of designations (map plates omitted from this extract)

This extract contains the index sheet and the schedule of designations. The map plates are held by the Board and by each county recorder. Designations govern; the plates illustrate.

Plate	County	Areas designated high risk	Parcels within designation	Last revision
1-4	Ardenport	tidal reach of the Arden River; harbour district	14,424	last biennium
5-7	Tarnmouth	barrier beach and back bay	7,165	last biennium
8-9	Shalcombe	harbour and marsh margin	6,535	prior biennium
10-12	Eastcliff	cliff base and creek mouths	4,045	last biennium
13	Grayhaven	tidal creek	2,589	prior biennium
14	Fenwick Isle	whole island (islands are designated in their entirety)	2,247	last biennium
15-19	Millvale	river flood plain, Areas 1 and 2	10,072	last biennium
20-21	Coldbrook	river flood plain, Area 2	4,811	last biennium
22	Nethermill	confluence	4,102	prior biennium
23	Kestervale	reservoir margin	859	not revised

Parcel counts are all parcels within the designation and are not confined to parcels assessed above the value threshold in the Act. The count of parcels meeting the Act's definition is held by the Property Assessment Division.

Areas are designated Flood Risk Area 1 to 4. Areas 1 and 2 are high risk for the purposes of the definition in the Act; Areas 3 and 4 are not.

Revision history: the Board revised designations in each of the last three biennia. Revision may bring a parcel within or outside a designation.
